Salzer's Golden Jewel Corn

**Corn is Short.
Order Early.**

SALZER'S GOLDEN JEWEL CORN

In breeding the Golden Jewel our aim was to improve on the type of the old Murdock by increasing the size of the ear both in circumference and in length. In crossing it with the Early Mastodon, a favorite variety for years, this object was accomplished. The result is a handsome yellow, compact ear, 8 to 10 inches in length with 16 to 20 rows of square shouldered deep kernels. These are somewhat rough or sharp, and crowded on a very small cob of red color. The ears are generally well filled over the tip, a feature inherited from both the Mastodon and Murdock. A large percentage of the Golden Jewel has splashes of red on the tip end of the ear. In spite of its good sized ears, Golden Jewel matures in 95 to 100 days, and is therefore most suitable for northwestern conditions, and is of stocky growth, very leafy, growing only 7 to 8 feet in height. Golden Jewel is not only the best corn for Southern Minnesota, but also for the best corn producing sections of South Dakota, Iowa, and Illinois. 4368—Minnesota Grown. Lb., 30c, postpaid. Not prepaid: peck, \$1.30; bu., (56 lbs.), \$4.50; 2½ bus., \$11.15; 5 bus., \$22.00.

SALZER'S IMPROVED MURDOCK CORN

THE PRIZE CORN OF THE NORTHERN ZONE

The ears are of beautiful golden yellow color and very uniform in type and size, 8 to 9 inches long with 16 to 20 rows and the kernels are very deep and large, slightly rough on the tips and without any tendency to flintiness, as is found on many other early sorts. The grains completely cover the cob from butt to tip and are sitting on it very compact and solid. The stalks grow strong and leafy, about 8 ft. high and make excellent fodder and silo corn. The ears set about 3½ feet from the ground.

Salzer's Improved Murdock is the most productive of the early yellow varieties. It is an enormous cropper and the yields are often more than 100 bushels per acre. Although we consider this corn especially adapted for portions of the Northwestern states, it certainly is also a splendid variety for more southern and eastern states, as a corn that produces 100 bus. to an acre under normal conditions in our state is not to be decried anywhere. Matures in about 95 days.

4389—Minnesota Grown. Lb., 30c postpaid. Not prepaid: peck, \$1.30; bu., (56 lbs.), \$4.50; 2½ bus., \$11.15; 5 bus., \$22.00.

MINNESOTA WHITE DENT CORN

The earliest pure white dent corn, maturing in 75 to 85 days, fully as early as Northwestern Dent, adapted for North Dakota, Northern South Dakota, Minnesota and Wisconsin. Is equally as early as any yellow variety, and should be planted on poor and thin soils and also on cold and wet ground where it will thrive when other corns fail. The ears are of good size, usually 8 inches long; the kernels are long and deep, growing very compactly around the cob. The stalks average about 6½ feet in height, have large and heavy foliage, making an unusually fine fodder. Under average conditions the yield of Minnesota White Dent is 75 bushels and over per acre. 4394—Minnesota Grown. Lb., 30c, postpaid. Not prepaid: peck, \$1.45; bu., (56 lbs.), \$5.00; 2½ bus., \$12.40; 5 bus., \$24.50.

RUSTLER WHITE DENT CORN

This variety originated many years ago in South Dakota and is largely grown in our Northwestern states. It matures in 90 to 95 days. Compared with Minnesota White Dent, it is about 5 days later, but the kernels and the ears are larger, and it is more productive. The average height of stalks is 7 feet. The average distance from base of ear to the ground is 3½ feet. The ears are large, 14 to 18 rowed, and are closely filled with large, deep white kernels. This corn is admirably adapted to the northwestern climate, best suited for the central part of South Dakota and Wisconsin and Southern Minnesota. Though not as productive as Silver King, it is much earlier and in our state it is a safe corn to plant at Wausau and Eau Claire and even farther north. It yields fully as big a crop as any yellow dent equally as early. 4399—Minnesota Grown. Lb., 30c, postpaid. Not prepaid: peck, \$1.30; bu., (56 lbs.), \$4.50; 2½ bus., \$11.15; 5 bus., \$22.00.

MINNESOTA WHITE DENT

JOHN A. SALZER SEED COMPANY

SEED GROWERS AND FLORISTS

LA CROSSE, WIS.

DEAR FRIEND:

Thousands of people ordered Salzer's Seeds last year. The big majority of these were old customers.

Do you want better proof of quality of Salzer Seeds?

Do you want better proof of our prompt service and fair dealing?

Do you want better proof of Salzer's great values?

Practically half a million people, living in every corner of the country were so well satisfied after planting Salzer's seeds, that they sent us their orders for the coming season and recommended us to their friends.

You also, will find that Salzer's Northern Grown Seeds give you greater values than are obtainable elsewhere, for back of every package we send out is test after test to make certain of its purity, vigor, and quality.

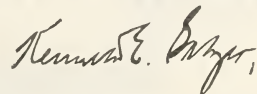

Just a few days ago, I held samples of two lots of bean seed in my hands. They looked exactly alike. Experts could not tell by looking at them, which would grow and which would not. Yet our tests proved that one would sprout and make good yields while the other was almost worthless. You must buy seeds on confidence. We use every resource to guard you against poor seeds and our hundreds of thousands of steady customers are the result.

This seed book marks the beginning of our 57th year in the Seed business. During every one of these years we have greeted and served thousands of new customers as well as renewed old friendships. Why not let it mark a new season of bigger yields and finer vegetables, flowers, and field crops for you?

I hope you will like our catalog. It shows you, as well as type and pictures can, the many wonderful vegetables, flowers and field crops we grow at Cliffwood Farms. You will find something of interest on every page, and please do not miss the novelties on page one.

Yours sincerely,

JOHN A. SALZER SEED CO.

P. S. Be sure to read our FREE Early Order offers on the back of this letter.

FREE GIFTS For Early Orders

on Flower and Vegetable Seeds, Shrubs and Plants in Catalog. Rewards cannot be given on Special Collections nor on Field Seeds, Potatoes, Implements, Sundries, Etc. Send your orders early.

We want you to order early. It may be a little more trouble for you to pick out in advance all of the vegetable and flower seeds you will want, but we have made up these free gifts in order to make the extra time worth your while. You help us to save money by getting your order in early, so we are simply passing the saving along to you in the form of beautiful flowers or plants.

FOR ORDERS SENT WITHIN 15 DAYS

It will be just as easy to plan your garden now as it will be to put it off until the last minute and look at the big gifts that await you for ordering right away. In order to receive these premiums your order must reach us within 15 days from the date you receive this catalog.

5 Gladioli Bulbs Free With Order Amounting to \$2.50 or More

Extra choice Cliffwood Gladioli, Northern grown at Cliffwood Farms. These five bulbs of different varieties of Gladioli will give you a fine start in these gorgeous blooming flowers. Mrs. Francis King, a most exquisite shade of bright scarlet, 2 bulbs; Mrs. Frank Pendleton, immense, deep rose-pink flower, with blood-red blotches in throat, 1 bulb; Willie Wigman, a fine white, fusing into pink, blotched bright scarlet, 1 bulb; Cracker Jack, a rich dark red, throat spotted yellow and maroon, 1 bulb. These five bulbs are sent you absolutely free with an order for Salzer's Seeds amounting to \$2.50 or more sent in to us within 15 days from date.

Salzer's Climbing Roses.

FREE With \$3.50 Order

The beautiful and popular climbing Dorothy Perkins Rose. It flowers profusely in large clusters, and the soft shell-pink blooms are very fragrant. It is a hardy, showy rose and always gives satisfaction. This grand rose will be sent to you absolutely free if you send us an order amounting to \$3.50, within 15 days after receiving this catalog.

FREE With \$5.00 Order

If your order amounts to \$5.00 and you send it to us within 15 days from date, we will send you free of charge one climbing Dorothy Perkins Rose and also one President Canna. The President is one of the finest Cannas ever introduced and bears immense, flaming, scarlet flowers. Easily grown.

FREE With \$7.50 Order

One Crimson Rambler Rose, one Dorothy Perkins Rose, and one Kriemhilde Dahlia. The Crimson Rambler Rose bears double, deep crimson, fragrant flowers, and like the Dorothy Perkins, is easily grown. Kriemhilde is a choice Cactus Dahlia, shell-pink, shading to white in the center. If you send us an order for \$7.50 within 15 days from date, we will send you this gift, free.

Salzer's Choice Gladioli

FREE WITH \$10.00 ORDER

The 5 choice Gladioli described above, 1 Dorothy Perkins and 1 Crimson Rambler Rose, 1 President Canna, 1 Kriemhilde Dahlia and 1 Frangrans Peony. The Frangrans Peony has dark pink, double, very fragrant flowers, and is unusually hardy. This fine collection sent with every order for \$10.00, received within 15 days from date.

PLEASE NOTE:—These offers are only sent with orders for vegetable and flower seeds, plants and shrubs. They are not sent on orders for potatoes, implements, etc., collections of seeds, nor on grasses and field seeds. These offers will be sent to you at proper time to plant, and are sent separate from seed shipments.

SALZER'S NOVELTIES FOR 1925

See Inside Front Cover For Illustrations In Color

After exhaustive development and careful tests at Cliffwood Farms, we are firmly convinced that these six varieties of seed are valuable additions, that they are here to stay, and that they undoubtedly are going to displace some varieties of their class in general popularity. Some great philosopher once said, "Be not the first, nor yet the last, to accept the new." We have been the first to experiment with these strains, we have carefully bred them for general adaptability to all soils, earliness, productiveness, uniformity, quality, etc. Now we urge our customers to give them a trial. In all cases where they have already been planted, the people have been decidedly satisfied with the results and have written us enthusiastic letters. All of the widely sown varieties now in cultivation were once novelties, and so we trust these six varieties will be given wide try-outs this year under favorable and unfavorable conditions. We are sure their merits will bring them instant recognition, and that they will rapidly come into general use.

SALZER'S EARLY WONDER BEET

An extremely early and perfectly shaped beet for bunching purposes. Its beautiful deep blood-red color, nearly globe-shaped root with almost no lighter zoning in the cross-section of the root, its small sized top and its smooth, clean, and small tap-root make it a decided asset in the Beet family. Will be grown extensively for late fall sowing because of its early maturity. Matures evenly so that the entire crop may be gathered at one time. Every gardener should try a package and note its fine growth and general characteristics.

177—Pkg., 15c; oz., 25c; ¼ lb., 60c; lb., \$1.75, postpaid.

DISEASE-RESISTANT CABBAGE

Bugner's Disease-Resistant Cabbage which we have developed and bred as near perfect as possible, is a winter variety, bred yellow resistant by means of continued and painstaking selection on cabbage sick soil. We have had good success in raising crops on soil that was very diseased, and if your own soil should be infected with "yellows" or "yellow rot" do not overlook trying out this strain. This seed has all been grown on "yellow" soil and is very resistant.

26f—Pkg., 20c; ½ oz., 80c; oz., \$1.50, postpaid.

KITCHENETTE SQUASH

A small acorn-shaped, dark-green squash, almost black, about 4 inches in diameter and 6 inches long. The fruits turn to a golden color as they mature, and can be used either green or ripe. Vines seem almost insect proof, and the ground is literally covered with the scalloped, rather roundish dark green fruits. Of superb quality, they make excellent pies and can be cooked whole when young. Is of exceptionally nice flavor, and is just the right size to cut in half and bake. It is a splendid keeper, immensely prolific and is one of the best squashes for the home garden. Will be a money maker for market gardeners.

109C—Pkg., 15c; oz., 30c; ¼ lb., 85c; lb., \$2.50, postpaid.

SALZER'S FEONIA CARROT

A cross between the two well-known varieties, Nantes and Chantenay, this introduction unites the good qualities of both. Salzer's Feonia is an admirable carrot for storing and shipping, holding to a remarkable degree its fine flavor, tenderness and crispness. The long obtuse, cylindrical roots are absolutely smooth, of a beautiful scarlet color and best of all, are practically coreless. As the carrots reach a good size, your soil should be thoroughly prepared. Our stock of this seed is limited.

304—Pkg., 25c, postpaid.

WILT-RESISTANT TOMATO

If you have been troubled with wilt, plant the Norton Wilt-Resistant Tomato. In tests on diseased soil, the Norton produced an excellent crop, almost free from wilt, while 8 other varieties were nearly destroyed. Has yielded 300 bu. to the acre on soil affected by wilt, while other varieties next to it, yielded 25 bu. The tomatoes ripen nice and solid on the vines. Has a firm, solid skin, is a wonderful shipper, fine flavor, meaty, few seeds and very tender. Is a mid-season tomato, globular, a beautiful scarlet color. The strong vines grow vigorously and luxuriantly and have rich, dark green foliage. Our seed is from tomatoes grown from seed stock supplied by the U. S. Department of Agriculture. This variety is going to prove a boon all over the country. Write us about your success with it.

1129—Pkg., 20c; oz., \$1.10; ¼ lb., \$3.75, postpaid.

KING & QUEEN WATERMELON

Perfectly round, averages about 10 pounds in weight and has small black seeds. The flesh is bright red, crisp and juicy and the outside color is white with indistinct green stripes. Originated in the Volga Valley of Russia. Can be stored until February, retaining its attractive appearance and delicious qualities in full. Think of serving fresh watermelon in winter! This watermelon is going to be as popular as any on the market, if not more so.

C57—Pkg., 15c; oz., 30c; ¼ lb., 85c; lb., \$2.50, postpaid.

A SUGGESTION

When through with this Catalog, save it carefully until canning time. The black-and-white and the colored illustrations can be used to label your jars as you put them up, especially those you intend to enter at fairs, or to give to your friends. The large type headings will also be of value for this purpose.

57 Years of Service

Our older friends and customers are familiar with the steady growth of our seed business, but we want to give our newer and more recent patrons a short resumé of our 57 years' service to the people of not only America, but of numerous foreign countries.

"Sow Salzer's Seeds" is more than a slogan. The carrying on of the seed business is a trust, a duty to give the seed buyer the best seeds possible, and only he who sells reliable and high quality seeds can hope to win the confidence of the public. The mere fact that the John A. Salzer Seed Company has been in business for 57 years, has been holding the same customers year in and year out, proclaims loudly and forcibly that we sell only the best seeds that can be produced.

Back in the covered-wagon days of 1868, John A. Salzer, grandfather of the present generation of Salzers, established this business in La Crosse, Wisconsin. His was a most humble beginning. He brought with him many special varieties of vegetables and flowers from the old country. His first customers were limited to La Crosse, but gradually they came from greater and greater distances, so that before long he issued a small number of four-page catalogs and thus gradually drew customers from the entire state of Wisconsin.

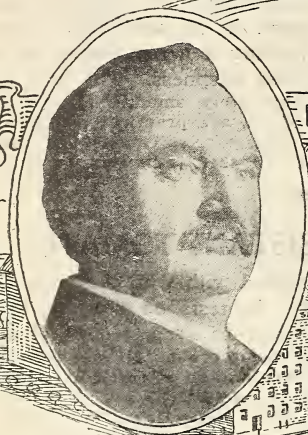

When Henry A. Salzer, his son, took charge of the business, the same policy of selling clean, first quality seeds, was followed. By this time larger quarters were necessary, larger catalogs and larger editions were needed to send to the customers from the entire central section of the country. Salzer's Seeds were "delivering the goods"; citizens were learning that they were good seeds and that they produced bountifully. Orders began to pour in from all over the country and from foreign countries.

Mr. Henry Salzer's death in 1916, placed the responsibility for the continuance of the business upon his son, Kenneth E. Salzer, and how well this trust has been, and is being, carried on, can be gathered from the fact that a million and more catalogs are distributed annually, customers run into the hundreds of thousands, a large and complete trial grounds, Cliffwood Farms, one of the biggest of its kind in the country, is used for the breeding and testing of seeds, a small army of employees is needed; the Salzer Seed Company's buildings cover more than a solid city block. We are glad indeed to gain every single new customer and we feel sure that our seeds will more than please you. We welcome the small order as well as the large, and each individual order will receive the same careful attention.

KENNETH E. SALZER

1925

Several Acres

of Gladioli

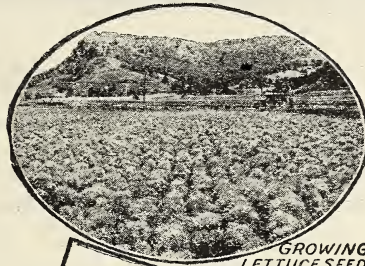

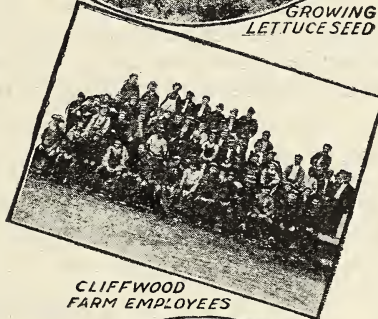

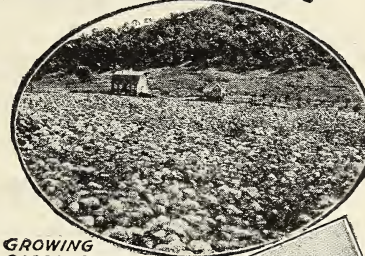

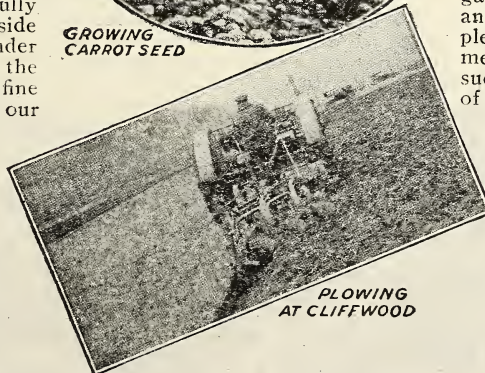

Dear Reader:

Why not jump in the car and drive out with me to our Farms and I'll "show you 'round" the place?

Just outside of the city limits of La Crosse, as we descend a small hill, we see Cliffwood Farms right before us. We'll drive more slowly now, and as we drive up the road, here at the right are trials and tests of every single kind of flowers that we list in this catalog, beginning with Ageratums and down the entire list of flowers to Zinnias—a wealth of fragrance, color and beauty. Occasionally we see two or three varieties that are not doing so well. Note the tags on them, "Seed unfavorable." This lot of seed cannot be sold. A loss to us, but a protection for you and the hundreds of thousands of other customers.

As we cross the road, we come upon row after row of Iris, and just behind them, countless Dahlias. The Iris have finished blooming, but the Dahlias are lifting their heads in all their glory to the sun. How beautiful they look, one can just imagine them being glad that they can do, not a bit, but a whole lot, to make this world more cheerful. These Iris and Dahlias are all marked and rogued before the roots are dug up, so that the best roots will be used to fill orders when it is time to ship.

Farther on we come upon several acres of Gladioli. Notice the tags here and there. Later on, when the bulbs are dug, the men carefully select the perfect ones and toss aside the imperfect sorts. Is it any wonder that people from all States in the Union write us and tell us what fine Gladioli they have grown from our bulbs? Yes, it is a tremendous expense to maintain these large farms with their corps of experts. But, it all reverts back to the same thing. We want to sell the best there is, and from the manner in which we are getting commendatory letters and new customers we feel that we are succeeding and that it is all worth the expense.

GROWING
LETTUCE SEEDCLIFFWOOD
FARM EMPLOYEESGROWING
CARROT SEEDPLOWING
AT CLIFFWOOD

Let us walk over here and examine the vegetable section. Notice the fine large Cabbage, the Beets, the Carrots, Tomatoes, Beans, etc., and all of the other good things our wives serve us at dinner. They would take first prize at any fair. And many of our customers do take numerous "firsts" at exhibits.

What do you think of this immense patch of Asparagus Roots? There are ten million roots in it, all nice, clean and sound. Turn to page 8 and notice the low price we have made. Asparagus is healthy and delicious and a small patch will be ample supply for the average family. As we drive along, note the fine Roses, Shrubs, Strawberry Plants, Perennial Plants, the Chives and Rhubarb, etc.

As we pass the house, note the beautiful garden. We have reproduced it in color on the inside rear cover. It's a jim dandy and I know the Collection will please you.

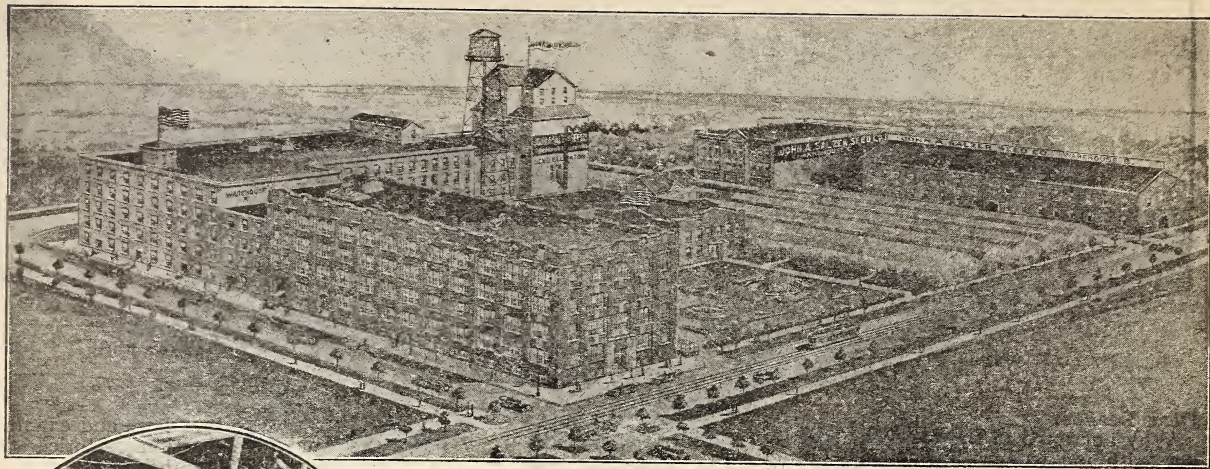

But my space is limited. There is much more to see but I will have to wait until some future time. You perhaps never realized the careful testing, developing, and breeding of seeds, that we carry on at Cliffwood Farms. This enormous outlay of money creates a heavy overhead expense for us, but we depend upon a heavy volume of business with only a slight margin of profit upon each individual order.

I sincerely trust you will have finer gardens this year than ever before and needless to say, I will be much pleased indeed, to have you write to me at any time telling me of your successes, or if I, at any time, can be of service to you.

Respectfully yours,

Kenward E. Salzer

John A. Salzer Seed Company.

HOME OF SALZER'S SEEDS

If you will compare this group of buildings, representing an immense investment, with the single shed and simple cleaning machinery when John A. Salzer first started in the seed business, you will realize how much the demand for Salzer's Seeds has grown.

We cannot submit a better or more truthful testimonial as to the quality of Salzer's Seeds or the service and fair dealing of the John A. Salzer Seed Company, than the fact that this growth demonstrates the need for these huge buildings in order to serve our customers.

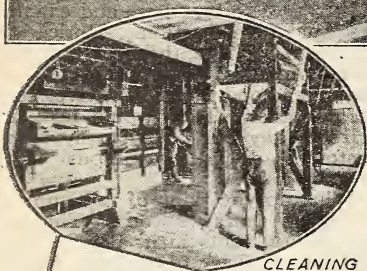

The buildings and grounds shown in the picture at the top of this page cover more than a solid, city, square block. They are part of the equipment that makes Salzer's the largest Mail Order Seed House in the world. Here are the Warehouses, Shipping Department, Cleaning Machinery, Offices and all the other numerous departments necessary to insure quality and service in every package of seed sent out.

ACRES OF GLASS

Besides the vast testing beds at Cliffwood Farms, we hold continuous tests of Salzer's seeds in our Greenhouses. Here are acres of glass, under which are rows upon rows of testing beds that will decide whether certain seed is equal to Salzer quality. Any day, winter or summer, you will find seeds being tested in these Greenhouses, in order that you and all of our customers may receive only one grade of seeds from Salzer—the very best that can be produced.

NORTHERN GROWN SEEDS

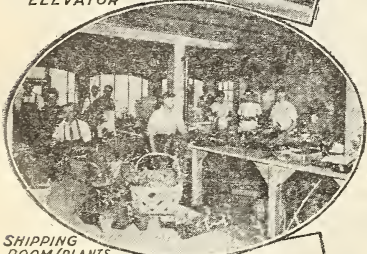

We have found that one of the most important reasons why Salzer's seeds grow so well is that they are all produced in the northern part of the country. They resist frost and are so much hardier than seed grown farther south. Hardy, northern-grown seeds sprout and grow when inferior seed would wither or freeze. Of course it costs more to produce northern-grown seeds, but this is a part of the Salzer standard—to give quality, regardless of price.

STENOGRAPHIC
ROOM

WHAT SALZER SERVICE MEANS TO YOU

"Salzer Service" is not a meaningless term. It requires trained workmen in the drying buildings, in the shipping rooms, and trained men to handle the special cleaning machinery that occupies one entire building by itself. The number of workers needed at Cliffwood Farms, in the general office, the stenographic department, and the mailing room, make a small army in themselves.

Now you ask, "What does all this special machinery and buildings mean to me?" It is well worth the while for any one who plants seeds to consider this question. As you sow, so shall you reap. The work, time and expense is the same whether you plant good seed or bad. Planting poor seed or seed not thoroughly cleaned, brings a scanty yield and many times a heavy crop of weeds. Planting quality seed, cleaned, tested and graded by the Salzer methods, produces a handsome yield of delicious vegetables, beautiful flowers or profitable grain and other field crops. Weather and other conditions have a great deal to do with success in the garden, but the very first requisite is good, high quality seed. You must have a good start.

As you look at the pictures showing the different departments of the John A. Salzer Seed Company, you realize to some extent the exceedingly great care and precautions taken to assure you not only highest quality seed, but also prompt, satisfactory service. We always try to ship every order within twenty-four hours of its receipt.

Yet a comparison will show you that Salzer Seeds cost no more, and in many varieties, are lower in price, than others. In other words, when buying Salzer Seeds you make certain of receiving the best in quality and service without it costing you an extra penny.

The reason Salzer Seeds can be sold for such low prices is that we have so many hundreds of thousands of customers and propagate and handle so many thousands of bushels of all varieties of seeds that we are able to afford machinery and other equipment that is impossible for some houses. The saving we make by quantity methods is given to our customers in low prices on high quality seeds.

These buildings also mean something more to you. Ask yourself the question, "Can a house with such a large investment in special buildings and machinery, serving so many thousands of customers, afford to do otherwise than deliver 100 cents of value in seeds for every dollar sent them?" Your question answers itself. "No." If we were to depart one iota from our rigid standards of quality and service, we could not hold our customers. You could want no better guarantee of receiving quality seeds from John A. Salzer Seed Company than these buildings and the investment they represent. Read what the Patrick Duluth Club, Duluth, Minn., writes:

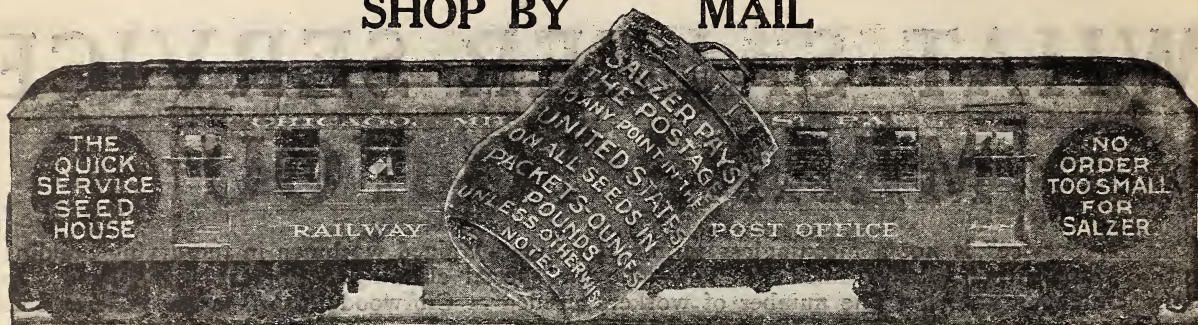

"The Patrick Duluth Club is operated by F. A. Patrick & Co., who maintain a club house for the benefit of the employees. Last year we entertained about twenty-one hundred guests. We find your seeds very productive and especially adapted for this climate. Our tea rooms, operating in connection with our Duluth Glass Block Store, greatly prize Salzer's products."

We want to thank the thousands of our steady customers whom we know will order their seeds from this catalog, old timers who have bought from the three generations of Salzers without a break—also the thousands who have bought from us for 25 years or more; in fact we want to thank all customers, whether they have bought 10 cents worth or \$10.00 worth, whether they have been with us one year or five years. At the same time, we wish to welcome many thousand new customers who will send us an order this season for the first time. We assure all of the same quality of seeds, prompt service and fair dealing that has been religiously maintained by three generations of seedsmen, that has made Salzer a household word wherever quality seeds are planted, and to which we owe our growth and prosperity.

JOHN A. SALZER SEED COMPANY,
La Crosse, Wisconsin.

SHOP BY MAIL

POSTPAID PRICES APPLY TO EVERY POINT IN THE UNITED STATES

TERMS: Cash with order. Remit in manner that suits your convenience. If seeds are to go by mail always add postage when ordering quantities not listed at postpaid prices. If your nearest Freight or Express Office is a prepaid station, enclose sufficient money to prepay charges or give name of nearest open station. All seeds are sold "sacks weighed in, unless otherwise noted."

PRICES: All prices in this catalog subject to change without notice. Prices quoted "By Express" or "By Freight" means transportation "At Purchaser's Expense."

CONDITIONS OF SALE: In common with all seedsmen we, The John A. Salzer Seed Co., do not give, and our employees are forbidden to give, any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they must at once be returned and money will be refunded.

PARCEL POST RATES

From the 4th to 8th Zone Seeds or Plants Weighing 10 Lbs. or More Usually Go About as Cheap by Express. (Poisons cannot be sent by mail.)

1st Zone: 5c for the first lb., 1c for each additional lb.
 2nd Zone: 5c for the first lb., 1c for each additional lb.
 3rd Zone: 6c for the first lb., 2c for each additional lb.
 4th Zone: 7c for the first lb., 4c for each additional lb.

Parcels of seeds, bulbs, and plants weighing 8 ounces or less are mailable at the rate of 1c for every two ounces, regardless of distance; if weight is more than 8 ounces the pound rate applies.

Parcel Post packages must not exceed 70 pounds in weight for the first three zones, and 50 pounds for the other zones.

PARCEL POST ZONE OF EACH STATE

Below we have arranged each zone according to states. This enables our customers to tell at a glance in which zone they live and how far they are from La Crosse, Wisconsin, according to zones.

| State | Zone | State | Zone | State | Zone | State | Zone | State | Zone | State | Zone | State | Zone |

A SUGGESTION

When through with this seed catalog, save it carefully until canning time. Use the black-and-white, and the colored illustrations to label your jars as you put them up, especially the ones you intend to enter at Fairs or that you want to give to your friends. The large type headings of variety names, will also be found desirable for this purpose.

SHALL WE SEND YOU OUR CATALOG NEXT YEAR?

We have spent much money trying to make this catalog a work of art as well as an authority on seeds. It is too expensive to mail out promiscuously. We will revise our mailing lists on the basis of this year's orders, and so we urge you to send us at least a small order to keep your name on the mailing list for the 1926 catalog.

We also issue a Fall Catalog (about September 1st) listing Dutch bulbs and seeds for fall planting, and house plants for winter culture. A post-card will bring it to you.

MARKET GARDENERS

We publish a Market Gardener's Catalog, which is ready for mailing at the same time as this catalog. It gives special prices to Gardeners who order in large bulk quantities. Many thousands of the largest and leading Gardeners of the country come to us for their seeds, for they know from experience that Salzer's Seeds are reliable, dependable, of stronger vitality, true to name and of unexcelled quality.

SOW SALZER'S SEEDS

Salzer Seed Company:

Your Pansies, Carnations, etc., are beautiful. Even the 6 weeks' drought did not harm them, although my garden had been neglected for 2 years. My soil is clayish and gravelly and I fertilize with lime and chicken manure. Sold over \$100.00 worth of flowers with very little effort, and have some seeds left.

I never realized the pride, satisfaction, the joy of a garden until these beauties began to appear and to greet every one with their clear, finely tinted, colored heads. Next year will put more time to flowers as many vegetables do not succeed well in this soil. Out of 100 Frost Proof Cabbage Plants, I had 52 fine, solid heads of cabbage; never even watered them.

So please send the enclosed order at once, and accept heartiest gratitude for the fine seeds in the past.

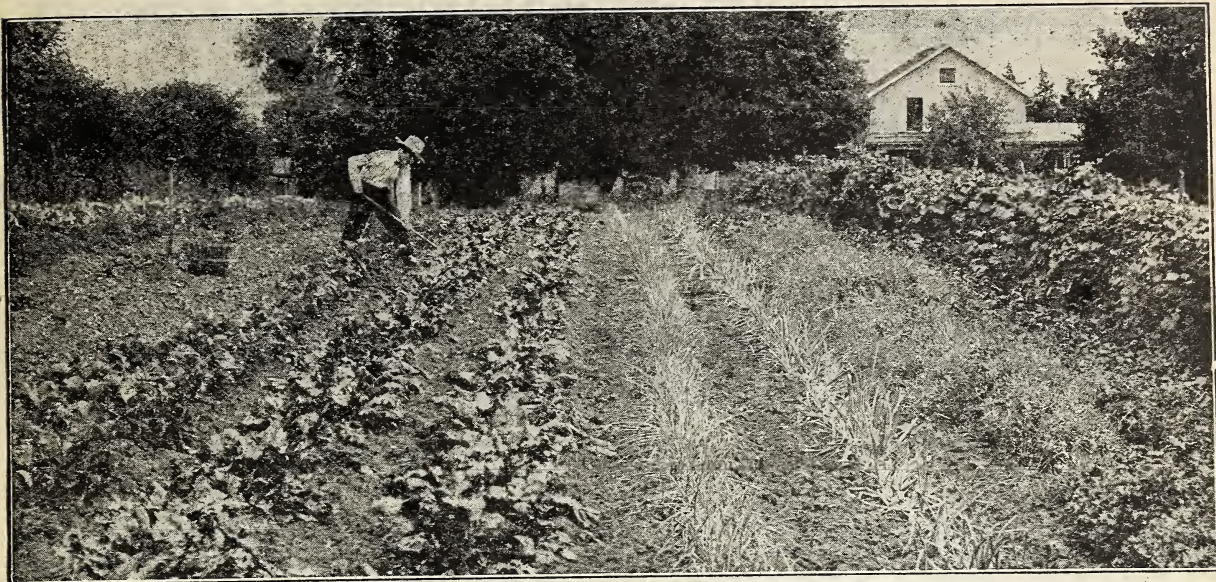

Julius M. Kissley,
 Box 101, Tannersville, N. Y.

John A. Salzer Seed Co.:

Last year for the first time, we planted Salzer's vegetable seeds and our crops were so successful that we are getting all our seeds from you this year. We planted about one-half package of your "Earliest of All Tomato" and from these seeds (which, by the way, we started in strawberry boxes on the radiators, later transferring them to the porch before we could actually transplant them) we gathered fully three bushels of most delicious tomatoes. The Wax Bean crop was very good and the Beets were gigantic. The Lettuce came along practically without attention, and the Corn, although not such a bumper crop, was sweet and luscious. We are very proud of the results from our backyard garden and expect even better results this year.

Mrs. Helen B. McManus
 14 Cochituate St., Natick, Mass.

BE SURE OF QUALITY IN THE SEEDS YOU PLANT. SOW SALZER'S.

SALZER'S DOLLAR VEGETABLE COLLECTION

25 PACKAGES, POSTPAID, \$1.00

COLLECTIONS ARE PUT UP IN ADVANCE OF THE SEASON AND CANNOT BE ALTERED

During the dull season each year, in order to give employment to our help, we fill literally millions of packages of seeds for these collections, by machinery, and can therefore sell them so cheaply. The seeds used are all of the same high Salzer quality, all are northern grown and carefully tested at our great Cliffwood Farms. Mr. Eugene G. Kientz, R. D. 2, Foley, Mo., writes, "We ordered your \$1.00 Vegetable Collection and 50c Flower Seed Collection (see Page 65), and I was surprised at the wonderful results. The Zinnias, Marigold and Mignonette were the talk of the county."

1565—25 Packages for \$1.00, postpaid.

SALZER'S CLIFFWOOD GROWN VEGETABLE ROOTS

Grown From
Pedigreed
Seed

Tender, Delicious,
Healthy

RUST-PROOF WASHINGTON ASPARAGUS ROOTS

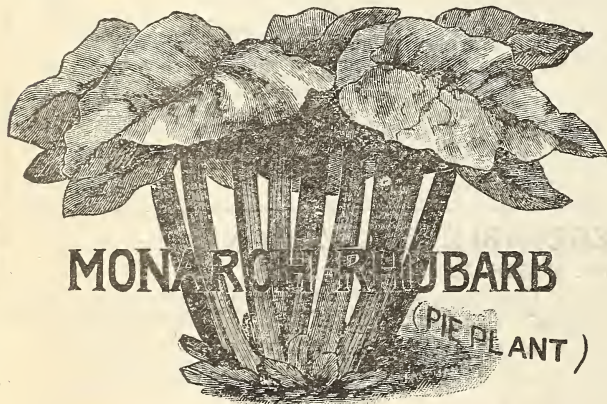

Get your asparagus roots direct from Salzer's celebrated Cliffwood Farms this year! This new variety is so rapidly replacing all other strains, that we have discontinued growing any but the Rust-Proof Washington Asparagus Roots. The Washington type has been bred to resist rust. It has thick and heavy shoots, long and straight, and closely folded tips. It is a beautiful rich dark green color, darker green at the tips, and is a very heavy yielder. You will be delighted with both the quality and appearance of this fine variety. Growing rapidly, it is the most tender of all! Plant these extra large roots and save from 1½ to 2 years' time in having your bed ready for cutting. Set roots 4 inches deep and 18 inches apart in rows about 4 feet wide, fertilizing well with stable manure or other fertilizer. The richer the soil, the better the crop. Plant 100 roots to 15 by 20 foot bed. Two-year-old roots can be cut the following year.

PRICES: One-year-old-roots: 12 for 50c; 25 for 75c; 50 for \$1.00; 100 for \$1.75, postpaid. Not prepaid, 500 for \$5.75; 1,000 for \$9.50. Two-year-old roots: 12 for 85c; 25 for \$1.10; 50 for \$1.40; 100 for \$2.25, postpaid. Not prepaid: 500 for \$8.25; 1,000 for \$14.50.

RHUBARB ROOTS

Rhubarb is about the earliest plant that you can pluck from your garden in the spring, for making pies and sauces. It is not only tasty and delicious, but it is very healthy, and every garden should have a small corner devoted to rhubarb. Our Cliffwood Grown Roots are unexcelled for tenderness, quality, appearance and flavor. Rhubarb should have a partly shaded location, to secure best result.

PRICES: One-year-old roots: 3 for 25c; 6 for 35c; 25 for \$1.35, postpaid. Two-year-old roots: 2 for 25c; 6 for 70c; 25 for \$2.25, postpaid. Extra large clumps, 50c each, postpaid.

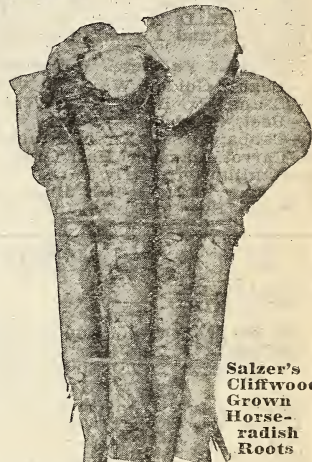

HORSE RADISH ROOTS

Instead of purchasing horseradish prepared at the store, plant a few of our Cliffwood grown roots this year, grate it yourself, and notice the wonderful difference in taste. You will only need a trifling space for enough horseradish for the whole year, but be sure to plant Salzer's Roots. Horseradish does best in a rather moist, partly shaded location.

4112—Cliffwood Roots: 6 for 25c; 12 for 40c; 25 for 75c; 50 for \$1.25; 100 for \$2.00, postpaid.

4111—Bohemian Roots: 6 for 20c; 12 for 30c; 25 for 55c; 50 for \$1.00; 100 for \$1.50, postpaid.

Salzer's
Cliffwood
Grown
Horseradish
Roots

CHIVES (Schnittlauch)

This plant should be more widely cultivated than it is. Chives are grown for the young leaf stems, which have a mild onion flavor. Makes a delicious dish, especially when prepared with cottage cheese. Also used extensively in soups, stews, etc. They are easily grown indoors in pots, for winter use. We offer only Cliffwood Grown Roots, which are noted for their fine quality and flavor.

4106—Chive Roots, in clumps: Each, 20c; 3 for 55c; 6 for \$1.00; 12 for \$1.90, postpaid. Larger clumps, each 50c, postpaid.

362—Pkg. (Seed), 10c, postpaid.

Salzer's Chives

ROOTS AND PLANTS ARE SENT SEPARATE FROM SEED ORDERS, AT PROPER TIME TO PLANT

SALZER'S NORTHERN GROWN VEGETABLE SEEDS

SALZER'S SEEDS ARE PRIZE WINNERS

Mrs. J. A. Peterson, Route 1, Box 56, Mountain View, Calif., writes, "Your seeds have certainly been very satisfactory at our Exposition. Our exhibit of the vegetables grown from your seeds, brought us many first prizes."

Mr. V. M. Maroukian, Mount Pleasant, Michigan, writes, "I am in charge of the garden and orchard of the U. S. Indian School. Last year I planted your seed and exhibited some of the garden crop at our County Fair. All of my exhibits received first premiums."

These letters are not unusual! We receive numbers of them almost every day, but we have selected these two letters because they indicate that Salzer's Seeds capture first prizes both in the East and West. The seed orders of these two customers were not filled specially, with special seeds, but were filled in the routine of business in the spring of the year, along with several thousands of other orders, from our stock bins. We only carry one grade of vegetable and flower seeds, and that one grade is the very best that can be grown. If any of our friends should be a bit skeptical as to the truth of the above letters (or any other testimonials given in the catalog) we urge them to write direct to these customers. All of our testimonials are true and are unsolicited, and are not purchased in any manner whatever.

It only pays to buy the very best in the line of seeds, and although our seeds are the very best northern grown seeds, and of the finest quality, note our low prices. For your own sake and for your pocket-book's sake, "Sow Salzer's Seeds."

SALZER'S EARLIEST ARTICHOKE

This delicious vegetable is a perennial and is cultivated for its flower-heads, which are cooked and prepared like asparagus. Seed should be sown in a bed and the seedlings either left where they are, or transplanted into boxes or pots. The plants produce a fine lot of buds or artichokes, the second year.

11—Pkg., 10c; oz., 75c, postpaid. Earliest Artichoke

ASPARAGUS

Sow the seed early in the spring in drills, afterwards thinning to three inches apart. The drills should be spaced 12 to 14 inches apart and after plants have grown two full seasons, transplant into rows about four feet apart and about 18 inches between the roots. Use the richest soil you have, fertilize well, and cultivate frequently.

RUST-PROOF WASHINGTON. 6—Pkg., 10c; oz., 35c; ¼ lb., 95c; lb., \$3.00, postpaid.

CONOVER'S COLOSSAL. Very rich flavor. Vigorous and tender. Crown does not divide like most types.

3—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.25, postpaid.

CHICORY

WITLOOF-CHICORY OR FRENCH ENDIVE

The plants make a delicious winter salad, and are as rank growers as weeds, having made large roots by fall. Grown in the cellar in darkness, these roots produce tender blanched leaves. Sow seed in May, and thin so that plants stand 4 inches apart, in rows 12 to 18 inches apart. Lift the roots in fall and store until wanted for forcing. Then plant the roots in the cellar, upright, 2 inches apart, and in about a month you may cut off the heads with a small portion of the neck and use raw for salad, or boiled.

359—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.25, postpaid.

LARGE ROOTED OR COFFEE CHICORY. A root grown like the carrot; when dried and roasted, if added to coffee, lends to it strength, richness and flavor. The young leaves make an excellent salad for early spring.

358—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.25, postpaid.

GEORGIA COLLARDS

This is a type of cabbage widely used where the soil is too poor to grow cabbages. It grows quickly and produces a large quantity of tender foliage on a tall stem. Not in its best condition until touched by frost, and is delicious either boiled like cabbage or in cold slaw. Also much used for winter greens in the South.

364—Pkg., 10c; oz., 25c, postpaid.

BRUSSELS SPROUTS

The sprouts resemble miniature cabbages growing closely on the stalk of the plant. They are more tender and delicious than any cabbage. Hard frosts do not injure sprouts, but improve them, and they are left in the garden until desired for cooking.

They are a delicacy not surpassed by the finest cauliflower.

IMPROVED HALF-DWARF

The plants are very hardy and grow from 2 to 3 feet high, bearing a mass of leaves at the top. The main stem is well covered with three or four dozen small cabbage heads, about 2 inches in diameter, which are tightly folded, solid and of exquisite quality. Sow early so as to have well-grown plants by fall. Cultivate the same as for cabbage.

207—Pkg., 10c; oz., 30c; ¼ lb., 90c; lb., \$3.00, postpaid.

CORN SALAD OR FETTICUS

Used as a substitute for lettuce in early spring and in fall. It is quite hardy and of very rapid growth, producing tender lettuce-like leaves. Does best in cool weather. Sow thinly in rows 10 to 12 inches apart.

431—Pkg., 10c; oz., 20c; ¼ lb., 55c; lb., \$1.75, postpaid.

CRESS

UPLAND CRESS—A perennial plant that shows its bright green leaves as soon as the snow begins to melt, and is ahead of all other early greens in the Spring by fully three weeks. It has a crisp, tart taste, and is relished as a salad.

435—Pkg., 10c; oz., 30c, postpaid.

Corn Salad or Feticus

Your 4th of July Sweet Corn was fine. Your Cabbage was splendid as well as the Ferris Wheel Tomato.

—George Mace, R. D. 1, Rochester, Pa.

Wax Beans

CLIFFWOOD NEW EARLY WONDER WAX

See Color Illustration on Page 33

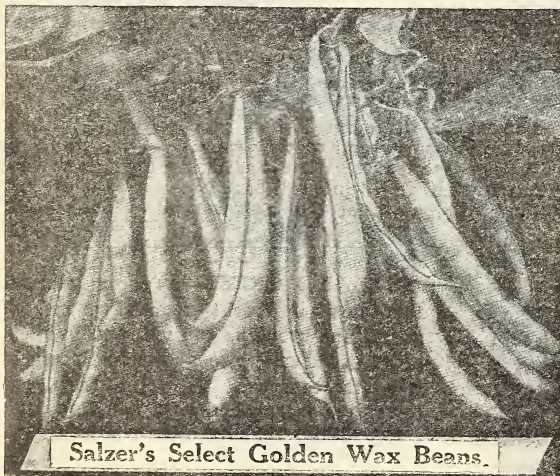

Without question this is the most wonderful wax bean introduction of recent years, and the best for the market and the home garden. Belongs to the flat podded class and grows a strong plant eighteen inches high and two feet across. Plants are heavily loaded with pods five to seven inches long, flat, plump, meaty, and of a clear, handsome, waxy yellow color. Very tender, brittle, of fine texture and quality, and is the very earliest wax-podded bean. It is a bountiful yielder, and bears for a long season; it is practically rust-proof and it thrives and yields heavily in either a rainy season or in dry, hot weather. Appears to be absolutely unaffected by bad weather. Ready to pick in 35 days. If you have not as yet tried our New Early Wonder Wax, by all means give it a trial this season. You will not be sorry.

74—Pkg., 15c; ½ lb., 30c; lb., 55c; 2 lbs., \$1.00; 5 lbs., \$2.25, postpaid. Not prepaid, 10 lbs. or more, at 36c per lb.

SELECT GOLDEN WAX

The standard flat wax-podded bean, and although it is not the earliest bush wax bean, yet it is so sure to produce heavy crops of large and attractive pods, that it is a great favorite all over with market gardeners. And if good for market gardeners, it is equally good for the home garden. Whether sown early or late, it bears heavily. The pods are of large size, thick-flat, brittle, entirely free from strings at all stages until maturity, and the quality is excellent. Color is a rich golden yellow, bushes grow about 10 inches high. It is rust-proof, and it yields well on almost all soils. Matures in 45 days. (See illustration.)

58—Pkg., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 19c per lb.

Salzer's Select Golden Wax Beans.

Wardwell's
Delicious
Wax

WARDWELL'S DELICIOUS WAX

One of the most popular wax bush beans for the market or for the home garden. It is a most vigorous grower, matures in 48 days, and produces heavy crops of long, showy pods, 5½ to 6 inches in length, and ½ inch broad, of a handsome golden yellow color. Tender, stout, straight and flat, fleshy, brittle and fine grained, fine flavor and almost stringless even when fully developed. Of strong, upright bush growth, 15 inches in height. Is a splendid shipper, and a great favorite on account of its large size, handsome appearance and fine quality. It is an exceptionally brittle bean. This variety will give you a mess of beans for your table under fair conditions, in seven weeks after seed is planted. (See illustration.)

73—Pkg., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75, postpaid. Not prepaid, 10 lbs. or more, at 22c per lb.

PROLIFIC BLACK WAX

An improved strain of the old favorite German Black Wax Bean, and is a larger and better grower, and a much heavier bearer than the original variety. Pods are 4 to 5 inches in length, quite round, very meaty, brittle, and stringless, and of a fine deep golden-yellow color. Of vigorous growth and bears splendidly for a long period. Matures in 42 days. If you liked the old German Black Wax Bean, you will certainly like this new strain even better.

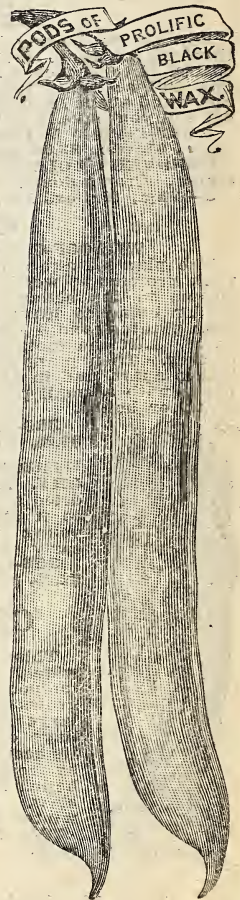

56—Pkg., 10c; ½ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.35, postpaid. Not prepaid, 10 lbs. or more, at 19c per lb.

HUMOGERM

Inoculate your beans before planting them! Humogerm Bacteria builds root nodules, fills them with nitrogen, and after the crop is harvested they rot and greatly enrich the soil, in addition to having given you greater yields. Beans weigh 60 pounds to the bushel. Prices include postage.

We sell beans and peas by weight only.

Your Cauliflower Seed produced cauliflowers weighing 6 lbs. a head.—John Honzik, Molin, Ore.

NEW STRINGLESS KIDNEY WAX

Wax Beans

SALZER'S NEW STRINGLESS KIDNEY WAX

Enormously Prolific, Stringless, Meaty, Tender and of
Delicious Flavor.

This comparatively new variety, originated a few years ago by an Eastern grower, is a most valuable acquisition to the garden. Robust in growth, with long pods, entirely stringless, fleshy, and of superb quality. Plants are of erect bush habit, about 18 to 20 inches in height, and are most prolific. They are free from all diseases; even in wet seasons the foliage seems to be proof against blight, and the pods are always free from rust. Pods are fleshy, flattened in form, from 6 to 7 inches in length, $\frac{3}{8}$ inch thick, and $\frac{1}{2}$ inch broad, and of a rich lemon-yellow color. They are remarkable for their brittleness, exceptional flavor, and their absolute freedom from strings. Matures in 45 days.

64—Pkg., 10c; $\frac{1}{2}$ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75, postpaid. Not prepaid, 10 lbs. or more, at 22c per lb.

SALZER'S GIANT STRINGLESS PENCIL POD

Its exceptional stringlessness appeals to all. Medium early and prolific. One of the best for home use and near markets. Pods are six to seven inches long. Golden yellow color, straight, brittle, tender and meaty. Fine flavor and entirely stringless. Successive plantings should be made from May to August. Matures in about 45 days.

57—Pkg., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.35, postpaid. Not prepaid, 10 lbs. or more, at 21c per lb.

ROUND PODDED KIDNEY WAX

The pods measure from five and one-half to six inches, are entirely stringless, round, of light yellow color, very brittle, very handsome, and of the finest quality. It is one of the earliest wax beans grown and very productive. Matures in about 40 days. Also known as "Brittle Wax" beans. Plants are of vigorous growth, with large foliage, and are completely loaded with the handsome pods.

68—Pkg., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.35, postpaid. Not prepaid, 10 lbs. or more, at 21c per lb.

DAVIS KIDNEY WAX

A very productive flat pod wax bean. The vine is rustless and very vigorous, bearing its pods near the center in clusters. Pods seven inches long, straight, very uniform in shape and of clear waxy white color. Extremely prolific. Matures in about 45 days.

54—Pkg., 10c; $\frac{1}{2}$ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.35, postpaid. Not prepaid, 10 lbs. or more, at 21c per lb.

Wax Beans, Pole

KENTUCKY WONDER WAX

Without exception, the best pole wax bean for Northern planting. It is similar in habit of growth to the "Kentucky Wonder Green Pod," equal in every respect to that famous variety, and matures as early. Very prolific, bearing a fine crop of long, thick, meaty, and very brittle pods of attractive light yellow color. Entirely stringless and of a delicious flavor. Pods average about 8 inches in length. A very heavy yielder. Matures in 70 days.

103—Pkg., 10c; $\frac{1}{2}$ lb., 30c; lb., 50c; 2 lbs., 85c; 5 lbs., \$1.90, postpaid. Not prepaid, 10 lbs. or more, at 24c per lb.

GOLDEN CLUSTER WAX

One of the most popular yellow-podded pole beans in cultivation. Hardy, vigorous, climbs well, and enormously productive. The pods are produced in clusters, and are of excellent flavor, very straight, flat, fine grained a light waxy yellow color, very brittle, and they remain in edible condition a long time. We have grown pods from this variety, 10 inches long. Also desirable for dry shelled beans for winter. White seeded. Matures in 72 days.

101—Pkg., 10c; $\frac{1}{2}$ lb., 25c; lb., 45c; 2 lbs., 85c; 5 lbs., \$1.85, postpaid. Not prepaid, 10 pounds or more, at 20c per lb.

Am going back to Salzer's Seeds. They are the only satisfactory seeds.—Otto Brink, 135 Allen Place, Hartford, Conn.

SALZER'S BOUNTIFUL STRINGLESS

The earliest and one of the very largest green podded bush varieties grown. On account of its great earliness, its handsome, large, straight pods and its exceptionally fine quality it is one of the best to grow for the market and also an excellent sort for the home garden.

The plant is of thrifty growth, very hardy, and practically proof against rust or mildew. Pods are stringless, tender, and flat, they are produced very early in the season and the bushes continue to bear for a long time. It is the first to give pods fit to pick in the spring and the last to yield edible pods in the fall. Of a handsome, rich green color, they are of large size, thick, broad, flat, extra-long, very uniform in shape, solid, meaty, brittle, and of finest quality. Melting, tender, and having a delicious flavor exclusively their own, the pods are absolutely stringless in all stages of growth. In addition they are most excellent shelled for winter use. Matures in 42 days. Don't fail to plant some beans this year. They may be planted late, taking the place of some early crop like peas. Grow your own beans and can them for winter use.

18—Pkg., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75, postpaid. Not prepaid, 10 lbs. or more, at 20c per lb.

SALZER'S EXTRA EARLY TENDER VALENTINE

One of the most largely planted varieties of the green-podded bush beans. A splendid early and very prolific variety for market or home use. Salzer's Valentine is the true, round-podded stock, very early, and a very heavy bearer of round, fleshy, saddle-backed pods, finely flavored, with only slight strings. The plants are dwarf and compact in growth, 15 to 18 inches high, vigorous and hardy. Pods are about 4½ inches long, tender and very brittle, even when fully grown. It is very uniform in ripening and is extensively grown by market gardeners. A favorite variety for canning. Matures in 40 days.

Mr. G. Tillman, Route 2, Box 36, Springdale, Ark., writes, "The Extra Early Valentine Beans which I ordered from you, were the finest I ever saw." You will likewise find them to be a splendid variety.

21—Pkg., 10c; ½ lb., 20c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.35, postpaid. Not prepaid, 10 lbs. or more, at 16c per lb.

BURPEE'S STRINGLESS GREEN-POD

Plants are medium large, of somewhat spreading growth, dark green foliage, and of strictly bush form. Pods are medium in length, rich green, slightly curved and extremely thick. Hardy, very early, and enormously productive. Pods are tender, brittle, of fine texture and delicate flavor, and even when fully grown, they are absolutely stringless. Splendid for canning and when cooked, retain their rich color. Matures in 45 days. Recommended for both the market gardener and the home garden.

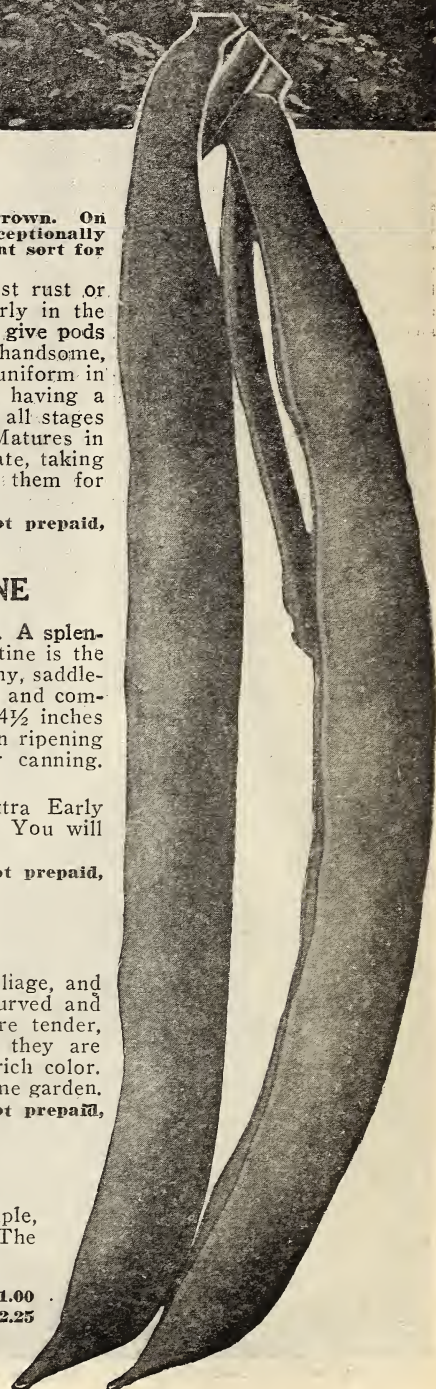

19—Pkg., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 18c per lb.

HUMOGERM

We strongly recommend the inoculation of beans. Inoculation is simple, it is inexpensive, it increases the yield, and it restores fertility to the soil. The following prices include postage. Full cultural directions on each package.

| | | | |
|----------------------------|--------|-----------------------|------|
| 6000—Garden size only..... | \$0.25 | 6011—1 bu. size..... | 1.00 |
| 6009—¼ bu. size..... | .35 | 6012—2½ bu. size..... | 2.25 |
| 6010—½ bu. size..... | .60 | | |

For best results, inoculate beans and peas.

SALZER'S COLOSSAL STRINGLESS

An absolutely stringless, green, round-podded bush bean, one of the best for the market or home garden. It is entirely stringless in all stages of growth, from the time the first pods form until fully grown and ready to dry up. The plants are of strong growth, very productive, and they make a beautiful appearance with their long, smooth, round, stout, light green pods about 5 inches or more in length. Very meaty, tender, slightly curved, saddle-backed, and a very heavy cropper. It is early, maturing in about 45 days, and continues to produce long after other bush varieties have gone. It is one of the very best quality green podded bush beans grown. Splendid for canning on account of its fine flavor and brittleness.

20—Pkg., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 19c per lb.

Pole Beans *Green Podded*

KENTUCKY WONDER

The most popular, most dependable, and finest quality green podded pole bean grown. Equally well-known as OLD HOMESTEAD, and TEXAS PROLIFIC. This superb pole snap bean is a profitable variety to plant. Bears in sixty to seventy days from planting, and if closely picked will continue to bear until frost. Pods are from 9 to 10 inches long, nearly round, much curved, rich green color, meaty, tender, brittle, and entirely stringless. It is enormously productive, a peck

having been often picked from a single vine. Pods hang in great clusters from top to bottom of the pole. A great favorite pole snap bean, which will certainly please you. Cooks tender and melting and has always given great satisfaction.

141—Pkg., 10c; ½ lb., 25c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.75, postpaid. Not prepaid, 10 lbs. or more, at 24c per lb.

LAZY WIFE

Of superior quality as "snaps" and excellent for either the home or market. The pods are produced in great abundance and measure from 5 to 6 inches in length. The plants continue to bear large crops all summer. Pods are light green, flat, brittle, of smooth surface, entirely stringless and of mild, sweet flavor. The dried seed is pure white. Valuable for dried shell beans for winter use. A splendid pole bean.

142—Pkg., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 19c per lb.

CORN HILL

Red Speckled Cut Short or Corn Hill beans are widely planted in cornfields and are good in the "snap" stage and good as a dry shell bean for winter use. A heavy cropper of finely flavored, meaty, green pods about 4 inches long. Bears for a long season. The vines, being lighter than other varieties, will even grow without support. It is an old standby that always delivers a crop. Matures in about 70 days.

133—Pkg., 10c; ½ lb., 25c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 19c per lb.

Field Beans

SALZER'S WHITE WONDER

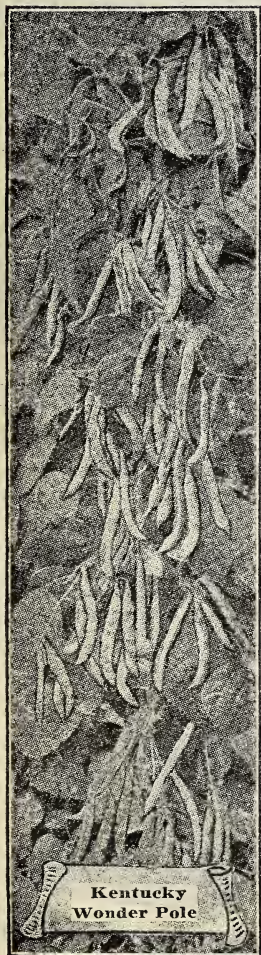

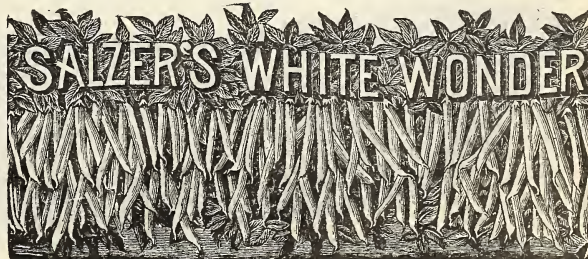

Grown exclusively to use as dried beans during winter. The grandest bean for a farm crop that we have ever seen; side by side with any bean known to us it out-yields it by fully one-third to one-half, placing it as a marvelous cropper. The pods are large and filled full of medium-sized, pure white beans which excel in baking and cooking qualities. It is very early, maturing dry beans in 75 days from planting, enabling you to sell when beans are scarce and high. We consider it the finest, largest yielding, best tasting, and best selling field bean known. It is an upright, bushy grower, holding the pods in thick clusters, well up from the ground. If you don't grow for market, plant a pound of these beans for your own use during the winter. Handsome, plump, and best quality.

117—Pkg., 10c; lb., 35c; 2 lbs., 60c; 5 lbs., \$1.25, postpaid. Not prepaid, 10 lbs. or more, at 16c per lb.

WHITE NAVY

There's no reason at all why you should buy navy beans at the store in winter. Plant a pound of seed in your garden this year and you will have an ample supply for your own table use. Splendid quality and excellent for baking.

120—Pkg., 5c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.00, postpaid. Not prepaid, 10 lbs. or more, at 12c per lb.

Your Kentucky Wonder Beans are sure fine. The best ever, to my notion.—John Knapp, Pedro, Ohio.

Lima Beans *(Butter Beans)*

SALZER'S GIANT BUSH

Enormously productive and bears pods of immense size. Plants are of vigorous growth, with heavy foliage, and of true bush form, the full grown bushes measuring 30 inches in height and 24 inches across the top. Pods are frequently borne in "clusters" of from 5 to 8, are 5 to 6 inches long by $1\frac{1}{4}$ inches wide, and each one is well filled with large, thick, tender, full-size beans of melting and luscious flavor. It is very early, maturing in about 85 days. A universal favorite, because of its earliness, productiveness, size and fine flavor. Lima Beans should not be planted before the soil has warmed up and the weather is quite settled.

115—Pkg., 10c; $\frac{1}{2}$ lb., 25c; 1b., 45c; 2 lbs., 85c; 5 lbs., \$2.00, postpaid. Not prepaid, 10 lbs. or more, at 30c per lb.

SMALL BUSH OR SIEVA

Extensively grown in the South, where they are called Butter Beans. Is the smallest but most prolific of all the white seeded varieties, and as they are hardy and very early, are worth growing in the North. Matures in 70 to 78 days. Of true bush growth, the plants bear a tremendous lot of pods which are 3 inches long and filled with 3 or 4 light green, small, flat beans, of a sweet and delicious flavor. When mature, beans are white and keep well for winter shell beans.

116—Pkg., 10c; $\frac{1}{2}$ lb., 25c; 1b., 45c; 2 lbs., 85c; 5 lbs., \$2.00, postpaid. Not prepaid, 10 lbs. or more, at 30c per lb.

FORDHOOK BUSH

The only stiffly erect bush form of the popular "Potato" Lima. Plants are 25 to 30 inches high, 24 inches across the top and are so strong and erect as to withstand whipping rains and high winds. Pods measure $5\frac{1}{2}$ inches long, $1\frac{1}{4}$ inches wide, and $\frac{3}{4}$ of an inch thick, and contain 4 or 5 large, magnificent beans, tender, melting, sweet, of buttery and delicious flavor. Is very early and an excellent cropper. A favorite with truckers and we recommend it for the home garden. Bears for a long time.

113—Pkg., 10c; $\frac{1}{2}$ lb., 30c; 1b., 55c; 2 lbs., \$1.00; 5 lbs., \$2.25, postpaid. Not prepaid, 10 lbs. or more, at 37c per lb.

SALZER'S IDEAL GIANT POLE

The best main crop pole lima grown. The pods are enormously large, borne in great clusters, and it is extremely productive. Produces bountifully right up to frost. Pods are broad, from 6 to 7 inches in length, packed full of exceptionally large beans, tender, finely-flavored, green-whitish, and of excellent quality. Medium late, an exceptional yielder.

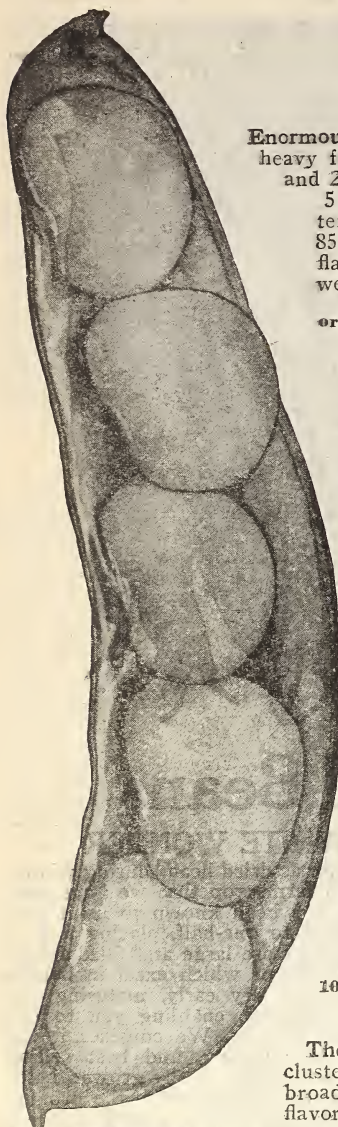

129—Pkg., 10c; $\frac{1}{2}$ lb., 25c; 1b., 40c; 2 lbs., 75c; 5 lbs., \$1.65, postpaid. Not prepaid, 10 lbs. or more, at 22c per lb.

EARLY LEVIATHAN POLE

An extremely early, hardy, and prolific bean—the earliest pole lima bean in cultivation. The plants are of strong and vigorous growth, clinging well to the poles, and as it is fully a week earlier than other pole sorts, it can be grown successfully where other pole varieties would be harmed by the early frosts of autumn. It is a prodigious

cropper, producing its pods in large clusters from base to top of pole, frequently from 5 to 10 together. Pods are packed with large, thick beans of excellent quality, delicate pale green color, and of a delicious, melting, buttery flavor. Produces not only a large early crop, but bears abundantly throughout the entire season.

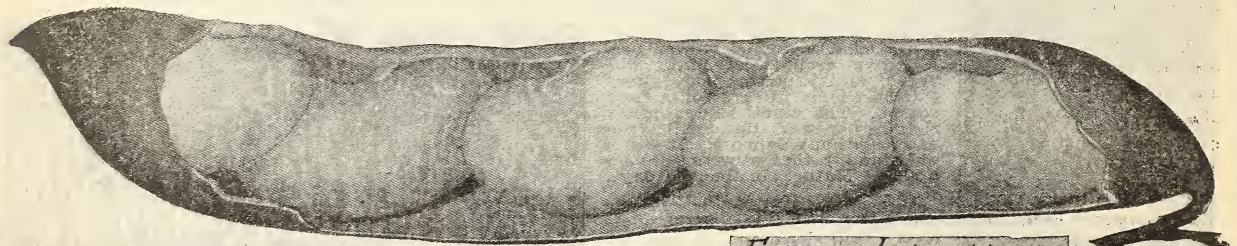

125—Pkg., 10c; $\frac{1}{2}$ lb., 25c; 1b., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 23c per lb.

SALZER'S RED BEAUTY

The Earliest—the Richest
and Darkest Red of
Any Beet.

Beets

DETROIT DARK RED

The Unrivalled Main Crop
Beet. Large Beets,
Small Tap Root.

Salzer's Detroit
Dark Red Beets

SALZER'S RED BEAUTY

See Color Illustration on Page 33

Very early, uniform in size, perfect turnip shape, fine grained, tender, the richest and darkest red of any beet. Salzer's Red Beauty is a mighty good beet to plant and those who have once planted it, see to it that they have some of this fine strain in their garden every year. Its uniformity and its rich, attractive, dark red color sell the beets on sight at market, and for the home garden it not only produces tender, delicious, extremely early beets for table use, but the color is retained when cooked, making them most attractive for both canning and pickling.

Red Beauty is remarkable for its uniform, perfect shape; the roots are always smooth, with but a small tap-root, are of medium size, flesh is finely grained, very sweet, always free from woody fibres, and the skin and flesh are of a beautiful, dark red color, the darkest red of any beet. The leaves are dark green and shaded with red, are very small and of upright growth, allowing close planting. A heavy cropper, maturing in about 40 days.

166—Pkg., 15c; oz., 20c; ¼ lb., 60c; lb., \$1.75, postpaid.

DETROIT DARK RED

Re-Selected Seed

Cannot be surpassed for main crop purposes. One of the largest beets grown and a heavy cropper, producing large, globe shaped roots, delicious, tender, and fine grained, small tap-root, and free from any trace of woodiness or stringy tendency. Succeeds equally well at all seasons and is one of the best to sow in spring to succeed the extra early and medium crop sorts.

The skin is an attractive blood-red and the flesh is dark red, slightly zoned with a lighter shade. It is a popular variety for canning, retaining its fine color exceptionally well. Leaves are dark green, shaded with red, tops are small and grow upright. The flesh is solid, always tender, and of a decidedly sweet flavor. Matures in about 50 days. Most valuable for succession sowings. A great favorite, not only with market gardeners who grow for profit, but likewise with the home gardener who wants large, good beets for his own table use. A splendid beet to store for winter.

159—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.50, postpaid.

Without exception your Garden Seeds are the best I ever planted.—Mrs. C. O. T. Scheetz, Burr Oak, Mich.

Beets

SALZER'S EARLY WONDER BEET

See inside front cover for illustration, and Page 1 for description of this superb beet which we are introducing this year.

177—Pkg., 15c; oz., 25c; ¼ lb., 60c; lb., \$1.75, postpaid.

SALZER'S FIREBALL

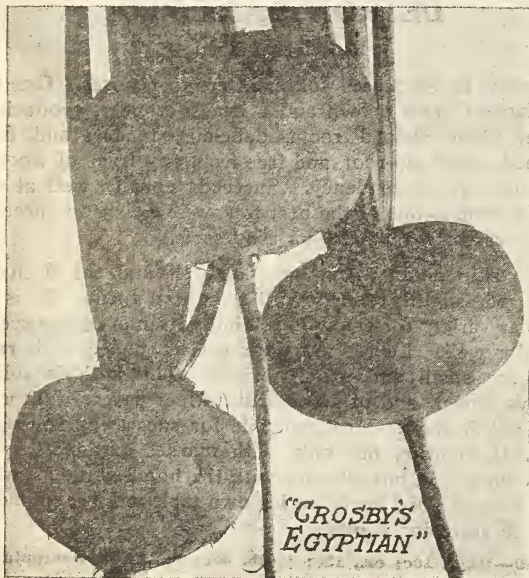

A handsome, globe-shaped beet with smooth skin and of an attractive deep blood-red color, which we introduced in 1914. It is fully as early as the old flat Egyptian beets, but is of perfect globe form and much superior in quality, having very fine grained, rich and exceedingly tender flesh of excellent quality. The leaves are small, upright, of rich purple color. The roots are uniform, medium sized, of perfect globe shape, remarkably smooth surface, very small tap-root, and the color of the skin and flesh is a brilliant, fiery red. This intensity of color is retained when cooked, making Fireball highly desirable for canning or pickling. Although very early, (quickly reaching a diameter of 2 inches), if left growing, the larger roots retain their fine flavor, tenderness, and deep coloring. An ideal beet for either the home garden or the market gardener.

167—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.45, postpaid.

SALZER'S CRIMSON GLOBE

Remarkably popular among gardeners in all sections of the country. It is of medium size, generally about 3 inches in diameter, globe shaped, a trifle deeper than round, with a smooth even surface. Leaves are rich crimson in color, borne on slender stems, which grow compactly, and are thus easily removed. Flesh is deep crimson, ringed and zoned, exquisitely tender and of fine flavor. Not only desirable for bunching for early use, but it is a grand second early and main crop variety.

157—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 85c, postpaid.

EDMANDS' EARLY

A good variety to follow the extra early sorts and one of the best for winter use. Beets are turnip shaped, very smooth, and of good marketable size. Skin and flesh are both dark red, extremely tender, and it is a good keeper. Ready for use in 50 to 55 days.

164—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

LONG SMOOTH BLOOD RED

An exceptionally fine winter keeper. Roots are 10 to 12 inches long by 1½ to 2 inches in diameter, skin is smooth, flesh is sweet, tender, and of a dark, blackish red color. Requires deep, well-dug, and well manured soil. May be sown with advantage in July or August, as a second crop. Matures in about 65 days. It will not be injured by the October frosts and will produce in great abundance. Very popular for fall and winter use.

171—Pkg., 10c; oz., 15c; ¼ lb., 20c; lb., 60c, postpaid.

CROSBY'S EGYPTIAN

One of the most extensively grown of any variety of beets, by market gardeners, for whom it has been a great extra early money maker! Is noted for its handsome form, small tops, very small tap-root, fine quality, and quick, rapid growth. Roots run uniform in size and shape, are rather flattened, turnip shaped, reach a good size, are tender and crisp. Flesh is an attractive dark red color with slightly lighter red zonings. Especially desirable for bunching for the early market. Takes on its turnip shape very early, a decided advantage for forcing for real early market. Highly recommended for the home garden for early table use. Matures in 45 days.

153—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

SALZER'S EARLY BLOOD TURNIP

One of the best early varieties and exceedingly popular. Of uniform globular shape, flesh bright, glossy-red, fine-grained, unusually tender and sweet. Beets are smooth, with very small tap-root. It is especially in demand as a family beet, and for greens. Matures in 45 days and less. An extra fine beet.

162—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

Swiss Chard or Spinach Beet

Also known as Sea Kale. Is grown for its stalks and leaves, as it does not make a bulbous, edible root like the other varieties of beets. The leaves grow large and upright and as the outer leaves are cut, more come from the center. Yields a constant crop from July until winter, and can be used all summer when spinach is not available. The mid-rib or center stem of each leaf is large, broad, and white, and after trimming can be cooked and served like asparagus, or made into very good pickles. The leaf part, far superior to ordinary beet tops, is cooked like spinach, or when young the entire leaf can be boiled and served as "greens." Has a delicious and delicate flavor. Gardeners make good money using Swiss Chard as a catch-crop. It gives quick results. Fine for poultry as green feed or pasture.

LUCULLUS. Stalks very large, broad and thick. Leaves tender, heavily crumpled and of fine flavor. Most popular variety.

172—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25, postpaid.

LARGE RIBBED WHITE. Very broad, thick mid-ribs, but the leaves are plain and for this reason preferred by many. Tender and of excellent quality.

169—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

LUCULLUS
Swiss Chard

SOW SALZER'S SEEDS

The seeds I planted last year were far better than you claimed them to be.

C. B. Frank,
509 W. Del Norte. Colorado Springs, Colo.

Mangels and Sugar Beets

SALZER'S EIFFEL TOWER MANGEL

Both Mangels and Sugar Beets require deep, well enriched soil. Sow in May or June in rows 1½ to 2 feet apart and 8 inches apart in the row. Sugar Beets and Mangels improve the health and condition of animals, increase the flow and quality of milk, cut down your fodder bills, and give your stock a varied diet. If you keep only one cow, you should grow a small patch for winter feed. They make excellent and rich feed for poultry. Sow 5 pounds per acre in drills, 15 to 20 pounds per acre broadcast. For winter, store in cellar or pits.

Salzer's Eiffel Tower Mangel yields enormously. It is the heaviest cropping and largest of all mangels. The roots grow uniformly from ½ to ¾ above the surface and are often 2 feet and more in length, and 6 inches in diameter. The skin is bright red and the flesh is white tinged with rose. Of fine quality and exceptionally high feeding value. A wonderful yield, and we recommend it strongly. Your stock will thrive on this splendid and most popular variety.

1489—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00; 5 lbs., \$4.25, postpaid.

MAMMOTH LONG RED MANGEL

A very prolific strain and an abundant yielder. Frequently reach a length of about two feet, grow about one-half above the surface, and the tonnage per acre on rich or well-fertilized ground is something immense. We recommend this strain next to Eiffel Tower, for size, quality and yield. Skin is deep red and flesh is veined with rose-pink. Ranks very high in nutritive value and is greatly relished by stock.

1496—Oz., 10c; ¼ lb., 20c; lb., 70c; 5 lbs., \$2.80, postpaid.

GOLDEN TANKARD MANGEL

A smooth, yellow-fleshed Mangel, high in saccharine content and in milk producing qualities. Yields immense crops on rich or well-fertilized soils and is easily harvested. Roots are heavy and solid, of a thick and typical tankard shape, tapering quickly at the bottom which is quite broad, with only a small tap-root. The flesh is firm, rich deep yellow color, and it is an excellent keeper. Cattle never tire of it.

1495—Oz., 10c; ¼ lb., 20c; lb., 70c; 5 lbs., \$2.80, postpaid.

COLOSSAL SUGAR BEET OR HALF SUGAR MANGEL

Highly nutritious and easily stored for winter. Containing a large amount of sugar, it is superior to Mangels for stock-feeding purposes. Twice as productive as Sugar Beets. Roots are of oval shape, green above and white below the ground, flesh white and sweet. Extensively used in the western states for stock feeding. It is a heavy cropper. Mr. Herman K. Schulze, R. D. 24, Ransomville, N. Y., writes: "I raised from your seed a Colossal Sugar Beet weighing 21½ pounds of which I am enclosing a picture. The beet was 23 inches long."

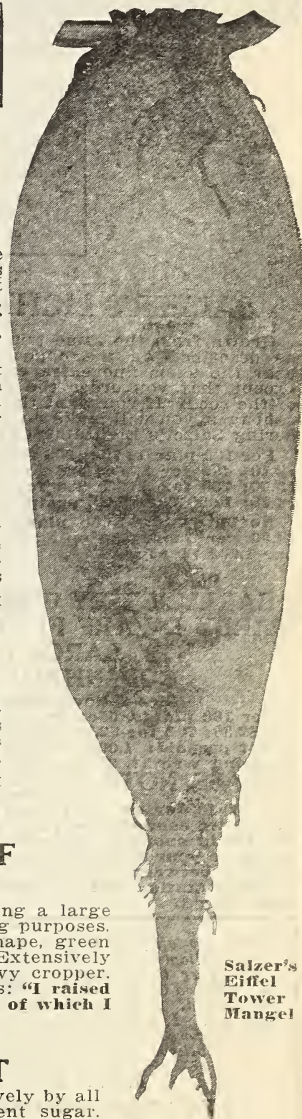

1481—Oz., 10c; ¼ lb., 20c; lb., 60c; 5 lbs., \$2.50, postpaid.

KLEIN WANZLEBEN SUGAR BEET

More extensively grown than any other variety for making sugar; used almost exclusively by all sugar factories. The average yield is from 15 to 20 tons per acre with about 18 per cent sugar. Our seed is pedigreed stock, producing roots testing highest in sugar content.

1482—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., 85c; 5 lbs., \$3.50, postpaid.

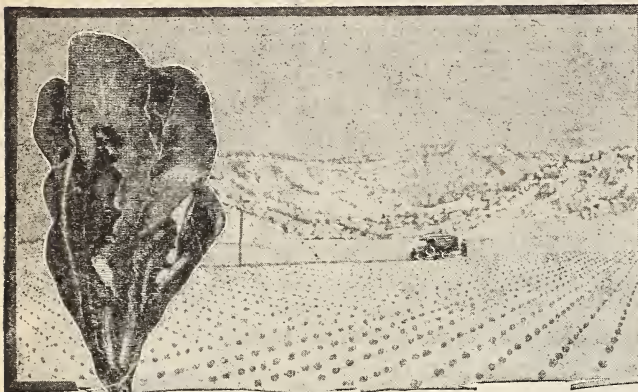

We have always had the best of success with your Seeds.—J. W. Mourheidt, R. D. 3, Wheeler, Ill.

Frost Proof Cabbage Plants

WITHSTAND
FROSTS AND
LIGHT FREEZES

Cabbage Plants in Two Inches of Snow.

If plants cannot be set out the same day received, uncrate immediately, dip roots in water and heel out into the ground, spreading bunches a little. Never leave in crate or package.

SALZER'S LIGHTNING

Grown from the same true to type seed as described on the opposite page, and bear the same fine extra early cabbages, except that you order the plants instead of the seed. If you want the very earliest cabbages, you will make no mistake in ordering Salzer's Lightning Cabbage Plants.

Per 100 plants, 75c; 200 for \$1.45; 300 for \$2.10; 400 for \$2.60; 500 for \$3.00; 600 for \$3.50; 700 for \$3.95; 800 for \$4.35; 900 for \$4.70; 1,000 for \$5.00, postpaid.

Not prepaid: 1,000 plants or more, at \$4.00 per 1,000. Shipping weight, 25 lbs. per 1,000 plants.

EARLY JERSEY WAKEFIELD EARLY DWARF FLAT DUTCH LARGE CHARLESTON WAKEFIELD COPENHAGEN MARKET SUCCESSION

(See following pages for description of these varieties.)
Per 100 plants, 55c; 200 for \$1.10; 300 for \$1.65; 400 for \$1.85; 500 for \$2.00; 600 for \$2.30; 700 for \$2.70; 800 for \$3.10; 900 for \$3.30; 1,000 for \$3.50, postpaid.

Not prepaid: 1,000 to 4,000 at \$2.75 per 1,000; 5,000 or more at \$2.25 per 1,000. Shipping weight, 25 lbs. per 1,000 plants.

PLEASE NOTE. No other varieties supplied except as listed. We cannot sell any one variety of frost proof cabbage plants in less than lots of 100 or except in multiples of 100 no matter how large the order. This means we cannot accept any order for 25 or 50 of one variety and the balance of the 100 in another. Shipment is made when we consider planting conditions best suited to your district or at any time you may specify on your order. Plants are shipped between December 1st and May 1st. They are shipped direct from our growing station and are therefore not sent with seed orders. No orders accepted after May 1.

SOW SALZER'S SEEDS

The day after I planted my Frost Proof Cabbage Plants it snowed 11 inches and drifted 3 feet over the cabbage. I didn't see them for over two weeks and then little green leaves had started. I never saw anything grow like they did. I hauled cabbage to market four weeks before the other farmers did. They couldn't believe that I had raised it.

H. M. Grover,
R. D. 3, Box 8, Caro, Mich.

Your Frost Proof Cabbage Plants stood the weather when the ground froze two inches.

Mrs. A. R. Palmer, Oakdale, N. D.

Just brought in a four-pound head of Frost Proof Cabbage from the plants I bought of you last spring. Never in my 17 years of gardening have I had finer cabbage. When the 1925 plants are ready, save 500 for me.

Mrs. Nic. M. Ruppert,
R. D. 2, Box 28, Currie, Minn.

Planted my Frost Proof Cabbage Plants on the 15th of March, and had the finest cabbage that I or my neighbors had ever seen.

Chas. A. Smith,
R. D. 2, Box 244, West Frankfort, Ills.

Set Salzer's hardy cabbage plants out in the open just as soon as you can get them into the ground! No matter if you do expect heavy frosts or some light freezes, if you have planted Salzer's Frost Proof Plants you may rest secure as to the outcome. If the temperature does not go below 20 degrees above zero, we guarantee these plants to live and if any are frozen out we will replace them free of charge or refund your money. Frequently the plants live when the temperature drops nearly to zero.

The market gardener who grows cabbages for shipment or the market, must have extra early maturing crops if he wishes to obtain the highest prices. The home gardener who desires extra earliness and who wants to avoid the trouble of sowing cabbage seed and the necessary protection of early sown seed and plants, will find our frost proof plants to be a great convenience.

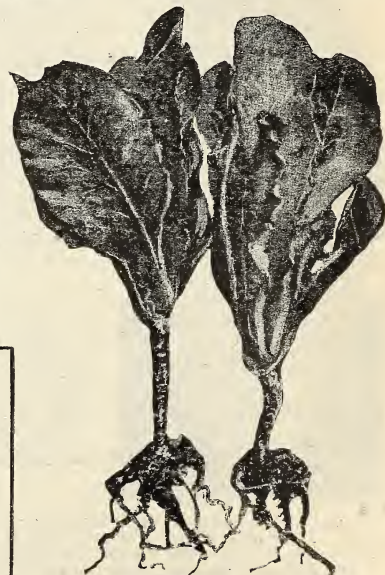

Salzer's Frost Proof Cabbage Plants will enable you to have fully matured cabbages three or four weeks earlier than from hot-bed plants. Our growing stations on the Atlantic Coast do not experience the severe weather that prevails in other sections of the country, and here the cabbage seed is sown in the fall and makes a slow, vigorous, hardy growth all winter long in the open ground.

These plants can then be set out anywhere, and although the top of the plant does not grow until Spring weather, the roots take hold immediately and develop even though they should be covered with snow. Later when the weather becomes favorable, they make an astonishing growth, due to their early start. You know what the difference in profits will be, if your crop is harvested three or four weeks earlier than from home grown plants.

The severe late blizzards of the Spring of 1924 destroyed many of our cabbage fields just prior to shipping time, but our customers made generous allowance for the heavy difficulties with which we had to contend last year. However, we do not look for such severe blizzards this year again, and as we have made much larger plantings, we will have at least 40,000,000 plants for shipment—enough for all.

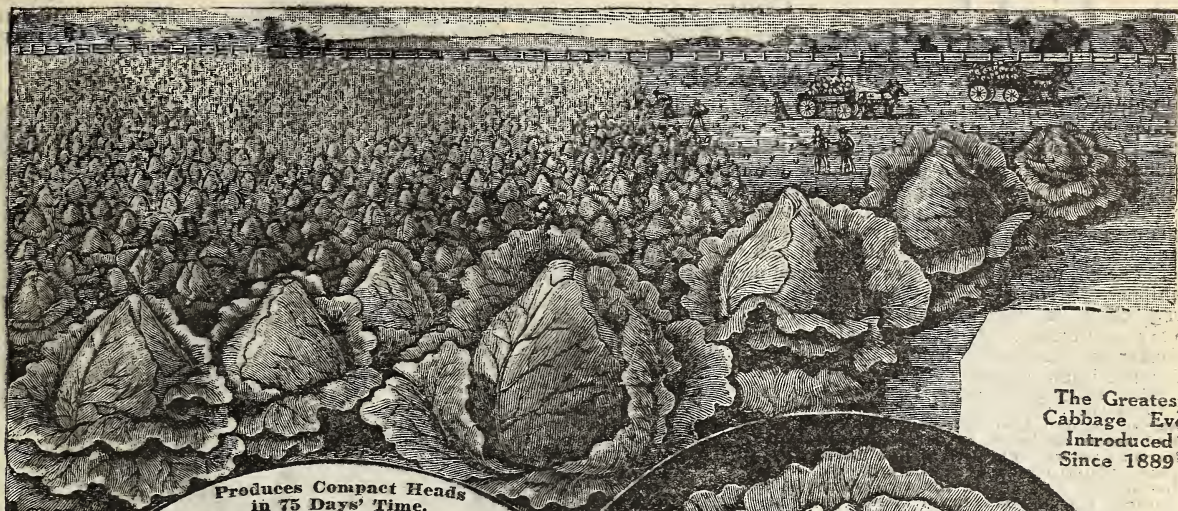

SPECIAL NOTICE

The plants when received will be somewhat wilted and have a stunted appearance, which will be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce results superior to common or home grown plants.

They Surely Are Hardy

Your Cabbage Plants stood four or five freezes of 8 above zero.—Chas. L. Guffin, Lumberport, W. Va.

Produces Compact Heads
in 75 Days' Time.

The Greatest
Cabbage Ever
Introduced
Since 1889

Oz., 50c **SALZER'S LIGHTNING** ¼ lb., \$1.50

One of the most important crops of the Market Gardener is Cabbage. Success in this depends largely upon the quality of seed used. Salzer's Cabbage Seed is the finest grown, having been taken only from carefully selected typical plants, and can be depended upon to grow and produce uniform heads true to name, and in earliness, size, shape, fully equal to the best in the market. **Lightning** is the earliest of all cabbages, producing good sized, marketable heads. First introduced by us in 1889, and pronounced by one and all the greatest addition for the past FIFTY YEARS to the cabbage family. Produces fine sized, marketable heads, 75 DAYS FROM SOWING OF THE SEED. Thousands of gardeners are now depending on our **Lightning** for their first early crop. It is very hardy, always sure to head and always the **earliest in the market**. The heads are very uniform, of medium size, conical in form, very firm, and in quality A No. 1. Heart is solid and well blanched. The plants resist cold and are very hardy, are very compact, have but very few outer leaves, can therefore be planted closely together and yield a large crop per acre.

OUR **LIGHTNING** is ripe and solid when other sorts are still in leaves. It is simply without an equal in earliness, richness, deliciousness of flavor and all the splendid qualities that go to make a good Cabbage. No vegetable pays better than early Cabbage. None known to the trade is as early as **SALZER'S LIGHTNING**. If you are a market gardener, you will want this; if you have a city garden, you cannot get along without it. If you wish the **EARLIEST CABBAGE** in the world, you must plant **SALZER'S LIGHTNING**.

218—Pkg., 15c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.50; lb., \$4.50, postpaid.

SOW SALZER'S SEEDS

The *Salzer's Lightning Cabbage Seed* I ordered from you produced the finest cabbage I ever grew in my thirty-five years of trucking.

W. P. Steele, Box 26, Northumberland, Pa.

A Real
Money-
Maker for
Gardeners

SALZER'S EXTRA EARLY JERSEY WAKEFIELD

A splendid extra-early cabbage that enables gardeners to get high prices by marketing the early crops. The plants are exceedingly hardy, not only resisting cold but other unfavorable conditions as well. They are compact and erect or very slightly spreading, with few outer leaves, which are thick, smooth, nearly oval and a deep green. The stem is short. The heads are of medium size, very solid, uniformly pointed and of excellent quality, with a solid, well blanched heart. Matures from 10 days to two weeks later than **Salzer's Lightning**. Is an old standby for early main crop and very popular in all sections of the country. We offer only pure bred American grown seed, which has been carefully tested at our great Cliffwood Farms.

214—Pkg., 10c; oz., 25c; ¼ lb., 50c; lb., \$2.75, postpaid

SOW SALZER'S SEEDS

Some time ago I sent to you for seed and I never before had such a nice garden. The cabbage sure was fine. Your seed is good and can be relied upon.

H. S. Morrow, Box 516, Purcell, Okla.

MAKE SURE YOU GET GOOD SEED. SALZER'S IS NORTHERN GROWN, CLIFFWOOD TESTED.

Cabbage *Cliffwood* *Tested Seed*

**SALZER'S
GENUINE
SUREHEAD**

SALZER'S GOLDEN ACRE

Matures hard, round heads, nine inches in diameter in about 80 days from sowing seed. Is rapidly coming to the front as one of the most valuable cabbage introductions of recent years. Remarkably uniform in size and quickness of growth, is very compact, with few outer leaves, permitting close planting, heads are extremely hard, solid and heavy. Heart is nicely blanched and of exceptional quality. Is a splendid shipper. Stem is short, the heads growing close to the ground and ripening very uniformly. It is a great money maker for market gardeners and valuable for the home garden.

Mrs. Mary R. Mooney, R. D. 1, Box 25, Crown City, Ohio, writes, "I tried a package of Golden Acre last year and by July 4 had heads as large as gallon buckets and hard as rocks. They were fine flavor, too." (See illustration.) Although we only listed this fine strain for two years, it is finding such great favor with our customers that we have trebled our stocks this spring to take care of the demand.

220—Pkg., 20c; ½ oz., 60c; oz., \$1.15; ¼ lb., \$3.50, postpaid.

COPENHAGEN MARKET

A superb variety that is a universal favorite with market gardeners. It is a second early cabbage and bears very heavy heads, permitting a large yield per acre. It is of vigorous growth, but compact, upright and with few outer leaves, heads are nearly round, medium light green, leaves thick and smooth. Stems are short, the heads growing close to the ground and averaging about 10 pounds in weight. Uniform in shape and size and of excellent quality. The entire crop can be harvested at one time. This fine variety comes from Denmark and our seed is pure. Danish grown. Copenhagen Market is a second early of the Danish cabbages. Matures in about 85 days. See Page 18 for plants.

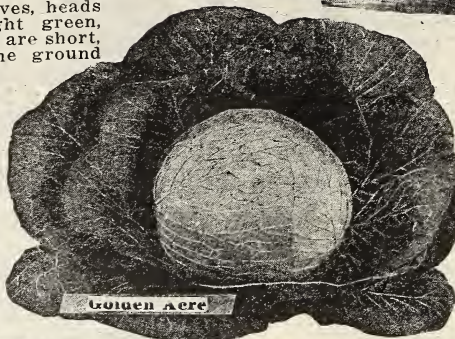

244—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.50, postpaid.

EARLY FLAT DUTCH

It is a large cropper and a dependable header. A short stemmed variety. Belongs to the second earlies. Matures in about 105 days. Grows compact and upright. Leaves few and short. Flat round, solid heads, which are very large for size of plant. Large yielder. Good keeper. Crisp tender and of fine flavor, and good for sauerkraut. See page 18 for plants of this variety.

228—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.50, postpaid.

SALZER'S SUREHEAD

Splendid main-crop variety. Salzer's special strain of Genuine Surehead never fails to make large solid heads of best quality cabbage, with few outer leaves, as shown in illustration, and weighing ordinarily from 12 to 15 pounds. Heads are very uniform in shape, of the favorite Flat Dutch type, and are very large, round, flattened at the top, extra hard, and fine in texture. Ready for market in about 110 days, and as its name indicates it is certain to head. A splendid keeper for winter use, a good shipper, and invaluable for the home garden or market.

249—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.50, postpaid.

LARGE CHARLESTON WAKEFIELD

Heads are firm and solid, larger than Early Wakefield, and about two weeks later in maturity. Averages 10 to 12 pounds and frequently more. A sure header, uniform in growth, crisp, sweet, firm and solid, and a good shipper. Extensively planted in the South. For plants see Page 18.

212—Pkg., 10c; oz., 30c; ¼ lb., 90c; lb., \$2.50, postpaid.

SUCCESSION

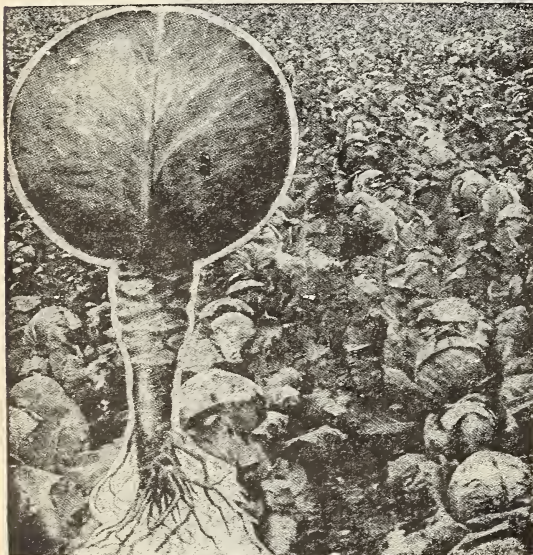

Stands today unrivalled as a second-early or main-crop sort. The heads are of medium size, round, slightly flattened, firm, solid, average 12 to 15 pounds in weight, and do not easily split or burst. Heads become solid long before they are fully grown, so that although immature, they may be cut long before they are at their best, making this variety available for use over an unusually long period. See Page 18 for plants.

233—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.50, postpaid.

PREMIUM LATE FLAT DUTCH

A short stem variety. Heads are large, flat, but deep. Solid, crisp, tender and of mild flavor. Matures in about 120 days.

253—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.50, postpaid.

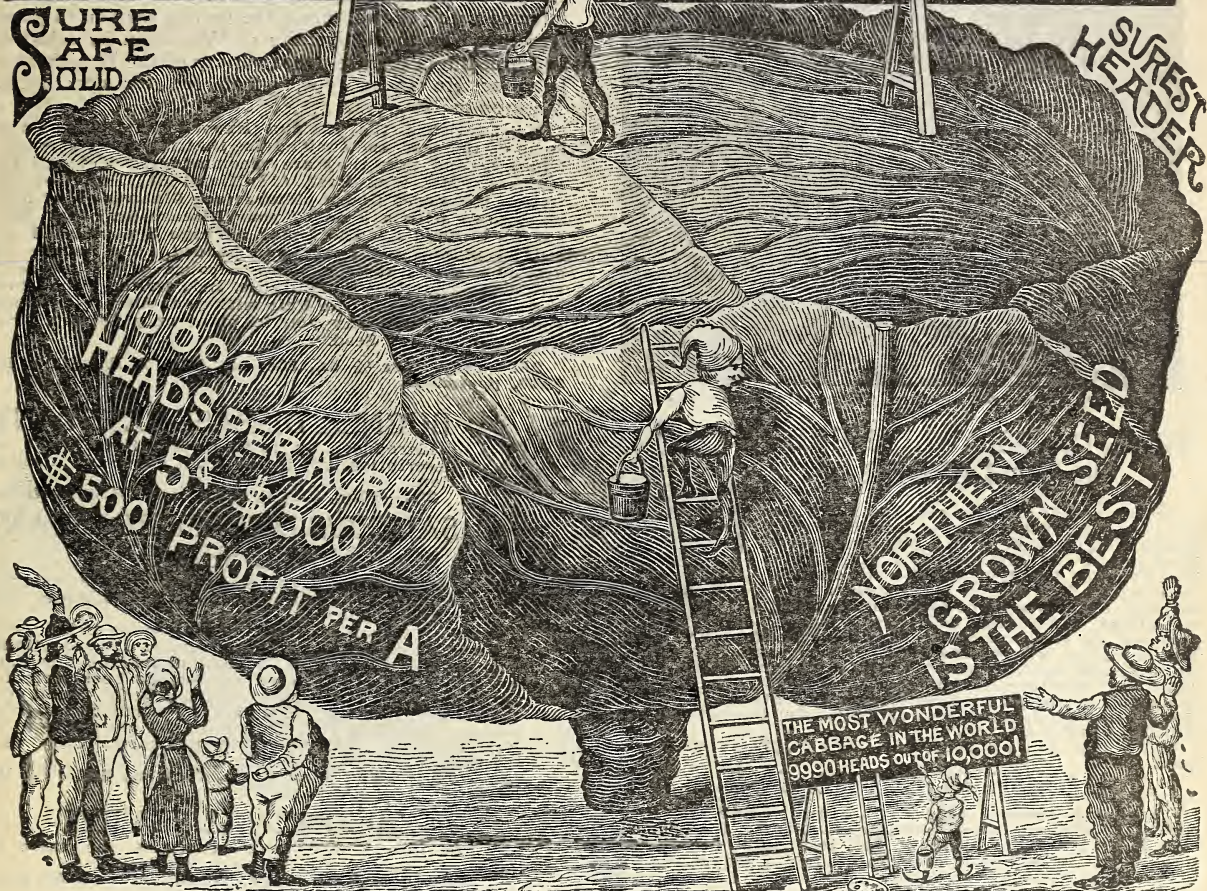

Copenhagen Market. A Great Cabbage

My Flat Dutch Cabbage weighed 15 to 20 lbs. a head, and my Copenhagen Market, 12 to 15 lbs. a head.
—John Honzik, Malin, Oregon.

SALZER'S GIANT FLAT DUTCH

**SURE
SAFE
SOLID**

**SUREST
HEADER**

THE GRANDEST, BEST KEEPING, SUREST HEADING, LARGE CABBAGE IN THE WORLD

For almost half a century this grand cabbage has held absolute sway as the undisputed leader of all late flat cabbages. So famous and well-known has it become, that it is not an uncommon occurrence for stores to give the preference to market gardeners who can furnish them with these large, solid, heavy cabbages. It is surprising how many of the retail customers insist upon purchasing only Salzer's Giant Flat Dutch Cabbages for their winter use. They know that its flavor, quality, and tenderness is unequalled by any other variety.

On the city markets, the attractive, fine appearing heads sell themselves to thrifty purchasers. The home gardener who once plants this superb variety, finds it so far superior in every respect to any other late sort that he has ever tried, that where Salzer's Giant Flat Dutch has once gotten a foot-hold in a garden, it has never been supplanted by other varieties, but is sown year after year. Unsurpassed in quality and taste, sureness of heading, weight, size, attractiveness, far superior for sauerkraut and slaw. Once planted, always planted. Pronounced everywhere to be the greatest late flat cabbage ever introduced, and the finest of any in existence.

For sureness in heading and regularity in growth, SALZER'S GIANT FLAT DUTCH certainly heads the list. Heads are 12 to 14 inches in diameter, averaging 18 to 20 pounds in weight. It forms every time, very large, very hard, solid heads, crisp, tender, sweet, uniform in shape, color and handsome appearance. It has a very short stem, is a very compact grower, forms few loose leaves, which turn in the head and if planted closely will yield enormous crops. Reports of 999 marketable heads from 1,000 plants set out are of frequent occurrence. It keeps well until late in Spring and is good for shipping. There are many magnificent strains of Cabbage Seed offered in this catalogue, but we think we can safely say that SALZER'S GIANT FLAT DUTCH is equaled and surpassed by none.

250—Salzer's Giant Flat Dutch Cabbage: Pkg., 15¢; ½ oz., 30¢; 50¢; ¼ lb., \$1.50; per lb., \$4.50, postpaid.

SOW SALZER'S SEEDS

We took Sweepstakes in the County School Fair the second of April and are going to take Sweepstakes this Fall in the County Fair, with your seeds.

Mrs. Lena Platt, Weatherly School, Parnell, Texas.

My husband has sent so many years to you and has had such good results that he doesn't seem to care what the price is, if he only gets your seeds.

Mrs. J. H. Gould, Box 114, West Stockbridge, Mass.

I was so pleased with the seeds we got from you last year, that I am sending our whole order to you this year.

Harry Macy, Brimfield, Ill.

I have always had good success with your seeds and always found them as represented.

Bert H. De Long, Spenceville, Ohio.

I bought seeds from you several years ago when I was in Illinois, and I don't think you can buy better seeds anywhere than Salzer's handle. Your cabbage seed, especially, can't be beat.

S. W. Atwood, R. D. 2, Pentwater, Mich.

PLANT ONLY SALZER'S CLIFFWOOD TESTED, NORTHERN GROWN SEEDS

Salzer's Disease-Resistant Wisconsin Hollander

TRUE DANISH BALLHEAD OR HOLLANDER

An extremely popular cabbage for winter. A magnificent hardy, late cabbage, making handsome, firm, solid and very hard heads. Of great solidity and excellent keeping qualities, and therefore much in demand for winter use. Grows luxuriantly on almost all soils and under most conditions, withstands hot, dry weather, does not rot easily in wet seasons, and heads never burst. Crisp, sweet, tender and unsurpassed for boiling, cold slaw, or sauerkraut. Stems are rather long and produce large, round, compact heads, weighing when trimmed, more than any other cabbage. One of the best late cabbages for the home gardener and the trucker.

245—Pkg., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.25, postpaid.

DANISH ROUNDHEAD

The short-stemmed type of the famous and much-prized Danish "Ballhead." Salzer's Danish Roundhead is almost two weeks earlier, has less outer foliage, and is still more blight resistant than its progenitor. The heads are set on shorter stalks than Ballhead, which is preferred by many growers. They are extremely hard and solid, of great weight, sweet flavor, crisp and tender and the heart is beautifully blanched. Our seed is true Danish grown and produces heads "hard as a bullet and heavy as lead." The best late, round cabbage.

246—Pkg., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.25, postpaid.

IMPROVED AMERICAN SAVOY

Savoy Cabbage is much prized in Europe and also by those who are familiar with it in this country. They have crimped or crumpled leaves and are most tender, of milder and sweeter flavor than the smooth-leaved varieties. Equal in quality to Cauliflower and make a good substitute for it where this vegetable cannot be grown. Also used extensively for salads.

Plant is of strong growth with a number of outer leaves growing closely about the head. The head grows to a large size, round as a ball, very solid, and the heart is tender and sweet. Frost improves the delicious and delicate flavor. If you have never grown it, it will be a pleasant surprise for you.

284—Pkg., 10c; oz., 30c; ¼ lb., \$1.00; lb., \$3.50, postpaid.

DANISH STONEHEAD CABBAGE

The best red cabbage. Salzer's Stonehead produces ball-shaped heads of great solidity and unusually dark purplish color, which extends to the center of the head, showing only a small portion of white when cutting across the veins and tissues. Of strong, compact growth, producing heads uniform in size and shape, from six to eight inches in diameter. Matures in about 120 days. The best keeper of any of the Red Cabbages. Most desirable for slicing for slaws, salads, etc. Ripens in about 110 days.

273—Pkg., 10c; ½ oz., 20c; oz., 30c; ¼ lb., \$1.00; lb., \$3.50, postpaid.

SALZER'S DISEASE-RESISTANT WISCONSIN HOLLANDER

Salzer's Disease-Resistant strains beat the "yellows" or "yellow rot." If by any chance your field should be infected with yellows, this is the variety for you to plant. Developed by the University of Wisconsin by selecting and breeding a disease-proof variety of the Danish Ballhead or Hollander type, which see for description. Matures in 120 days.

We furnished the Indiana Experiment Station with some of the seed and they advise that it proved very satisfactory and that they are recommending it to all the farmers. Mr. Wm. Post, 618 Miami St., Hamilton, O., writes, "Enclosed find a picture (see illustration at left) of my son with a head of your Disease-Resistant Wisconsin Hollander. The heads average 8 pounds. I set out 93 plants and every one headed. The people all around me lost their cabbage because of 'yellow rot.'" Mr. W. L. Thatcher, Summitville, Ind., writes, "Took first and second prizes at the Fair with your disease-resistant cabbage." It will pay you to plant only Salzer's True Disease-Resistant Seed.

259—Pkg., 15c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.50; lb., \$5.00, postpaid.

BUGNER DISEASE-RESISTANT

Introduced by us this year. See Page 1 for description and inside front cover for illustration.

261—Pkg., 20c; ½ oz., 80c; oz., \$1.50, postpaid.

SALZER'S DISEASE-RESISTANT ALL SEASON

Developed under the same disease-resistant conditions as the Wisconsin Hollander described above.

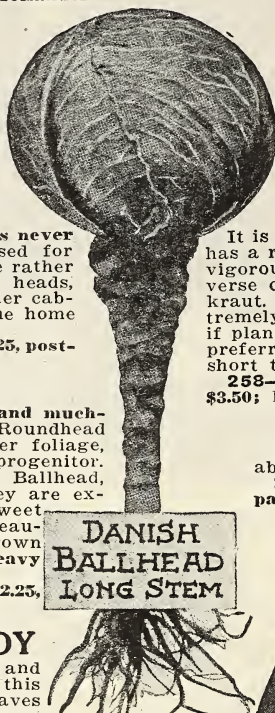

It is an all season cabbage in every sense of the word, has a reputation for heading uniformly. Its exceptional vigorosity will produce a head under the most adverse conditions. Considered one of the best sorts for kraut. The heads are very large, nearly round, extremely hard and solid. They are small ribbed and even if planted very late will keep well and are much to be preferred to the big ribbed winter sorts. Crop very short this year.

258—Price: Pkg., 20c; ½ oz., 60c; oz., \$1.00; ¼ lb., \$3.50; lb., \$12.50, postpaid.

SALZER'S ALL SEASON

Not disease resistant, otherwise the same as above variety.

227—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.50, postpaid.

DANISH BALLHEAD LONG STEM

Danish Roundhead

I would like to give you a larger order, but I just have a small garden.—Mrs. G. Stegner, 2912 Pitt St., Anderson, Ind.

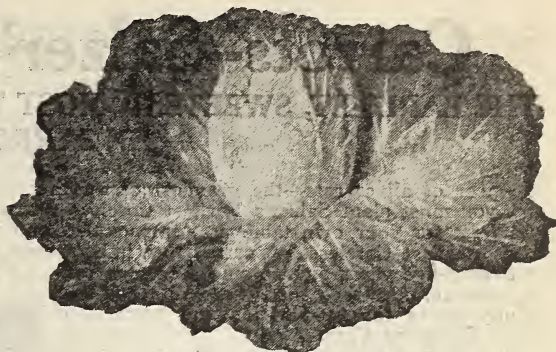

Cabbage

SALZER'S CHINESE OR CELERY CABBAGE (WONG BOK) (CELERY CABBAGE)

Has a mild cabbage flavor, very delicate and delicious. Wong Bok makes delicious cold slaw, also a very fine salad when served like lettuce. When cooked it makes greens delicately cabbage-flavored and not at all like boiled cabbage. It blanches almost to clear white by tying the plants closely with burlap, when full grown. It requires rather cool weather, and where the summers are warm, sowing must be delayed until early August. Wong Bok has rather short and broad heads, composed of well-blanching, tightly folded leaves and ribs which are tender, juicy and agreeably pungent.

In appearance, Chinese Cabbage is very similar to Cos Lettuce, and for table use is unexcelled either by lettuce or other cabbage.

260—Pkg., 10c oz., 25c; ¼ lb., 85c; lb., \$3.00, postpaid.

SALZER'S CHINESE CABBAGE

Egg Plant

SALZER'S NEW YORK PURPLE

Salzer's Egg Plant is not only a good substitute for meat, but it makes a delicious and tempting dish when sliced and fried, or when stuffed and baked. Egg Plant seed germinates slowly and should be started under glass, with moderately high temperature, about March 1st. When about 3 inches high, transplant carefully to the garden or field, but not until all danger of frost is over. Our strains of Egg Plant are carefully bred and tested at Cliffwood Farms and are unexcelled, regardless of price.

Salzer's New York Purple is the principal market variety; it is early, prolific and entirely spineless. Extra large fruits, weighing several pounds each, with a circumference of twelve to fifteen inches, have often been grown of this strain, and as much as thirty pounds of fruit from one plant. The fruits are of deep purple color, quite smooth, and have white delicious flesh. Ready for table in about 95 days.

494—Pkg., 10c; oz., 50c; ¼ lb., \$1.65, postpaid.

SALZER'S BLACK BEAUTY

A most desirable variety for the home garden and truckers, especially in the North, as it is quite early, maturing ten to twelve days ahead of the New York Purple. The fruits are broad, thick, symmetrical in shape, of a rich, lustrous, purplish black color, and of splendid flavor. Not quite so productive nor as large as those of the New York Purple, but this is offset by its earliness. Entirely free from spines or thorns.

492—Pkg., 10c; oz., 55c; ¼ lb., \$1.75, postpaid.

SOW SALZER'S SEEDS

I planted a package of your New York Purple Egg Plant and from one plant I gathered two eggs, one measuring 18½ inches in circumference, and the other, 17½ inches. You can use my name in recommendation of this plant if you wish.

John J. Riley, Buckhorn, Kentucky.

Salzer's New York Purple Egg Plant

Endive

SALZER'S MOSS CURLED

The finest and best salad for fall and winter use. It also makes beautiful garnishing, splendid "greens" and excellent flavoring for stews and soups. Can be grown practically all the year round. Sow the seed in the open ground from the end of March until early June, and for a continuous supply, sow at intervals of from 3 to 4 weeks. For use, the plants must be blanched and this is done by gathering leaves together and tying loosely at top with a wisp of straw or soft twine for about two weeks.

Salzer's Moss Curled is a dense cluster of leaves finely cut or lacinated, resembling a tuft of moss 10 to 12 inches in diameter. Rich green in color but blanch to a beautiful creamy white, with a piquant and crisp flavor. Makes a delicious summer and fall salad.

502—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25, postpaid.

EVER WHITE CURLED

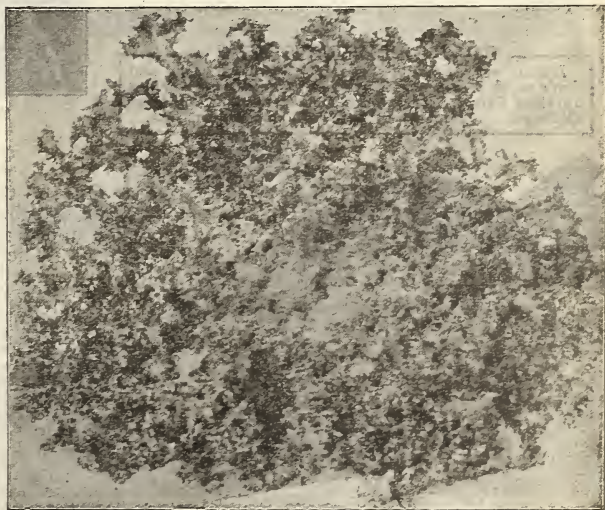

Leaves as finely curled or mossed as the above variety, but of an attractive, lighter green color. Blanching easily, has a delicious, crisp flavor, and frequently does not require tying up.

501—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

BROADLEAVED BATAVIAN (Escarolle)

Large broad leaved, forming a fairly firm head, 16 inches in diameter; blanches nearly white, and is of fine flavor, unsurpassed for salads; also much used for greens, cooked like spinach. Largely grown. Ready for use in about 55 days.

500—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25, postpaid.

Salzer's Moss Curled Endive

Carrots--Salzer's Earliest Coreless

THE EARLIEST, SWEETEST, MOST TENDER AND ONLY REALLY CORELESS CARROT GROWN

The peer of all carrots—the grandest carrot in cultivation! Market gardeners, if you want highest, top-notch prices, you must plant Salzer's Earliest Coreless Carrot. Home Gardeners, if you want to have carrots that will be a real treat for your own table use, carrots that you will take pride in showing to your neighbor, you must plant Salzer's Earliest Coreless. A carrot that is in a class all by itself, and has been ever since it was introduced by us over twenty-five years ago. Some seedsmen may list this or offer you "just as good" stock, but insist upon Salzer's true, genuine, pure-bred seed. Seed that has been carefully tested for germination and trueness to type at Cliffwood Farms.

As in all else, Salzer's Earliest Coreless Carrot reigns supreme in the carrot world. Those who once plant it never discard this incomparable strain. Those who have never planted it, are missing a real treat. Our Earliest Coreless will demonstrate what splendid flavor, what tenderness, what attractive color, what lusciousness, what symmetry, can be bred into carrots. The painstaking trial and development of this superb strain is necessarily expensive, but it will pay everyone to allow a few cents more in order to include Salzer's Earliest Coreless in their seed order. When planting seeds, the best is none too good. It is the cheapest in the end as everyone knows, and whenever you go out in the garden to get some carrots for dinner, you will be mighty glad that you planted Salzer's Earliest Coreless this spring.

It is a distinct variety, resembling somewhat the Early Nantes, but it is more uniform in shape, of finer texture and entirely free of any heart and is very much earlier, maturing about 2 weeks ahead of all other half long sorts, although fully as productive as any of them, the roots usually measuring 6 to 7 inches in length and 1½ inches through.

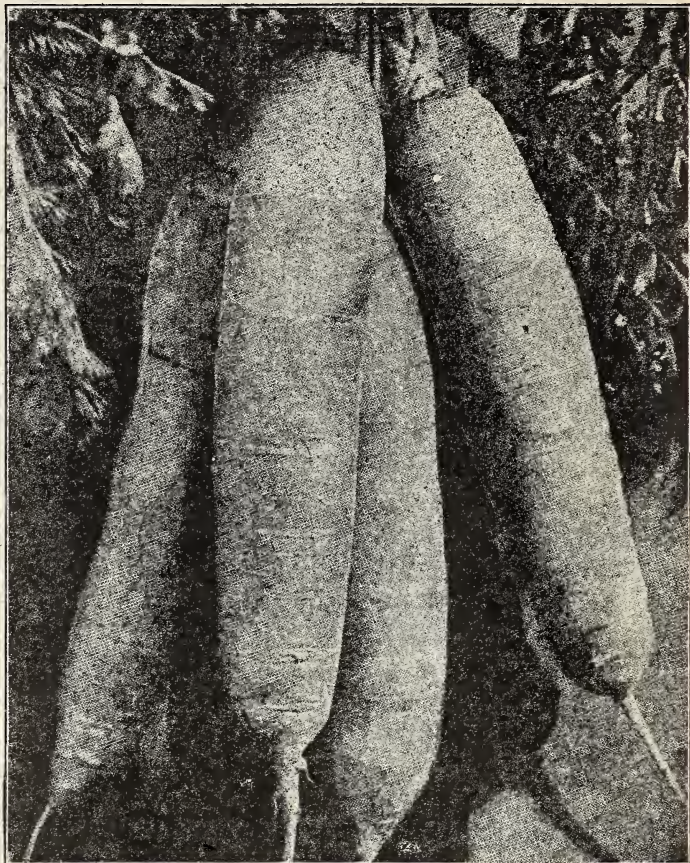

Salzer's Earliest Coreless in shape and color is one of the most handsome of Carrots. The roots are of cylindrical form, blunt at the end, very symmetrical, smooth skin, fine neck and small top. The color is a beautiful red, brighter and deeper than that of any other Carrot. It is a color that will draw the attention of the buyer on the market.

But the greatest feature of this new variety is the entire absence of the stringy, coarse heart or core found in all other Carrots. It is of most delicious quality and owing to the fine texture of the red flesh and its tender, delicate flavor, Salzer's Earliest Coreless is called the sweetest of all Carrots by all those who have tasted it.

295—Pkg., 15c; oz., 25c; ¼ lb., 70c; lb., \$2.00, postpaid.

SOW SALZER'S SEEDS

I have used Salzer's Seeds for over 25 years and don't think I can plant a garden without your Earliest Coreless Carrot, Everbearing Cucumber and Lightning Cabbage. Mrs. Mary E. Smith, Isabel, So. Dak.

Salzer's Earliest Coreless. Finest Carrot in Cultivation

SALZER'S DANVER'S HALF LONG

One of the most popular carrots in America. Planted on a wide scale by market gardeners, as the roots are of very fine quality, attractive appearance, and always find a ready sale everywhere.

The handsome roots are of orange-scarlet color, measuring about six inches in length by two inches at the shoulder and tapering to a half-point or stump-root at the bottom. Remarkably sweet and tender, fine grained, and free from any woody fibre. It is a first class carrot for all soils, and yields so heavily that it is also being planted for stock-feeding. Excellent to store for winter and a splendid shipper. Owing to severe and continued drouths in 1924, carrot seed is not so plentiful this year. Be sure that you buy only good, fresh seed. Salzer's Seed is all first carefully tested at Cliffwood Farms and every package contains seeds of known value.

293—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25, postpaid.

Salzer's Danver's Half Long

We are not always sure of a garden unless we have your seeds.—W. G. Winslow, Selkirk, Mich.

SALZER'S SELECT OXHEART

Also known as Guerande. The best and most popular of the short, thick-formed carrots. It is a heavy yielder and because of its shape it is highly desirable for heavy soils. The roots are about 5 inches long, $3\frac{1}{2}$ to 4 inches wide at the shoulder and taper down to a 2-inch stump-rooted bottom. Of the finest quality for table use, very free from any hard core, and both skin and flesh are rich orange colored. An excellent sort for the private garden as well as the trucker, being especially valuable for spring and early summer crop. Of great value on shallow soils, where the longer varieties will not succeed.

302—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25, postpaid.

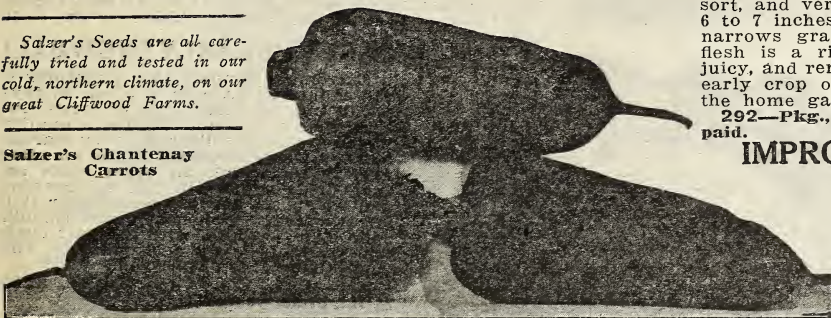

FEONIA CARROT

See Page 1 and Inside Front Cover for description and illustration in color of this superb carrot introduction.

304—Pkg., 25c, postpaid.

Salzer's Seeds are all carefully tried and tested in our cold, northern climate, on our great Cliffwood Farms.

Salzer's Chantenay Carrots

SALZER'S CHANTENAY

Also called Model. A half-long, stump-rooted sort, and very popular for bunching. It averages 6 to 7 inches in length, is broad at the neck and narrows gradually to a round, blunt base. The flesh is a rich, orange-red, fine grained, tender, juicy, and remarkably free from core. An excellent early crop or main crop carrot and splendid for the home garden.

292—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.25, postpaid.

IMPROVED LONG ORANGE

Very handsome, straight, smooth roots of bright red color, frequently 12 inches long, and 3 inches in diameter at the neck. Does best in light, well prepared soil. A splendid Carrot for table use and field culture, combining great productiveness with fine, regular shape and has tender sweet flesh.

300—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 30c; lb., \$1.00, postpaid.

Field Carrots

SALZER'S MASTODON

Field carrots are of high nutritive value and seem also to be a sort of tonic, keeping the stock in good condition. Horses are especially fond of them and in a good many stables, horses are fed carrots once a day. The wise dairyman knows the value of carrots for cows, as they will not only increase the flow of milk but will also improve the quality, and will give a rich, golden color to the butter. Sow seed thinly in drills 3 feet apart, using four pounds to the acre. To get the heaviest crops, fertilize well.

Salzer's Mastodon Field Carrot is the most productive variety and it is easily harvested. It is of creamy white color with a green crown. The roots are smooth, 8 to 10 inches in length, about 3 inches broad at the shoulder, and taper gradually to the bottom. The flesh is crisp, solid, sweet, white and very nutritious. A splendid keeper, and a prodigious cropper, yielding in suitable ground from 20 to 30 tons per acre.

As to quality, Mr. D. D. Birks, Metaline, Wash., writes, "We are sending you 3 carrots which were grown from your Mastodon seed. We tried cooking them early in the season and have never quit. I have given them to several friends and all agree with me that they are the best carrots they ever ate. We haven't eaten any of our table carrots yet, and they are good, too." If Salzer's Mastodon is so palatable for the table, is it any wonder that stock relish it?

1463—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 40c; lb., \$1.00, postpaid.

Please use variety number when ordering.

IMPROVED WHITE BELGIAN

Roots average 2 inches in diameter at the shoulder, tapering gradually throughout the length of 12 inches or more. Flesh and skin is pure white, and grows a third or more above the ground. Does best on rich, deep soils. Very sweet and tender, very nutritious and a good keeper.

1471—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 25c; lb., 70c, postpaid.

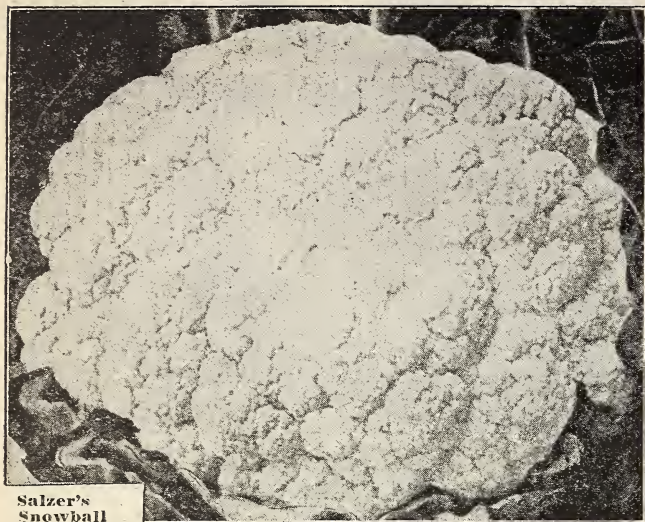

IMPROVED NORMAN BELGIAN

Similar to the above in growth and form, but the flesh is light orange. Fine grained, sweet, tender and very productive. A good keeper and relished by all stock.

1467—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 25c; lb., 70c, postpaid.

Can truthfully say that your seeds are better than any others that I have come across.—Arno Koempel, Jr., 808 Euclid Ave., Ambler, Pa.

Salzer's
Snowball

SALZER'S FIRST CROP

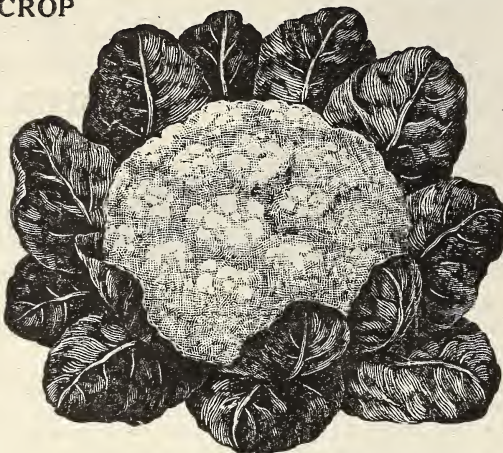

A splendid market gardener's variety, with stone-hard, snow-white heads.

Being of dwarf, compact growth, with but a small number of leaves, it is an ideal Cauliflower for forcing during winter and spring.

Trials at Cliffwood Farms prove this to be the very earliest sort, maturing fine heads in 90 days' time, unusually uniform in growth, type and maturity, and sure to head under ordinary conditions. It is noted for the close manner in which the leaves tightly enfold the head, causing the inner leaves to almost cover the flower and practically eliminating any tying up.

The heads are of beautiful appearance, solid, of medium size, snowy white, compact curds, and find a ready sale everywhere. An ideal sort for the home garden.

321—Pkg., 15c; ¼ oz., 65c; oz., \$2.25; ¼ lb., \$8.00, postpaid.

SALZER'S FIRST CROP

DRY WEATHER OR DANISH GIANT

This variety is of vigorous and dwarf growth, and produces stone-hard and snow-white heads, unsurpassed in quality, which average larger than those of the Salzer's Surehead, but are a week later. The foliage is very heavy, fully protecting the heads, which are less liable to blight in hot weather than those of the earlier sorts. As indicated by the name, for dry, hot climates it is to be preferred to all other sorts, being a sure header there when other sorts fail. Even in the driest weather, it is of a vigorous growth and produces hard and very large heads with compact curds of excellent quality.

316—Pkg., 15c; ¼ oz., 60c; oz., \$2.00; ¼ lb., \$7.50, postpaid.

LARGE WHITE BROCCOLI

Winter Cauliflower

In growth and habit like cauliflower but far more hardy, and of special value in the North where cauliflower does not do well. It is an important market crop, and thousands of cars are shipped to the markets every season. Heads are very large, firm, pure white, and of fine quality. For Southern and Western states, where the winters are not severe, it will be found a profitable crop, by making late and successive plantings in order to mature the heads from January to April, for shipping to the winter markets.

200—Pkg., 10c; ¼ oz., 25c; oz., 70c; ¼ lb., \$2.50, postpaid.

Cauliflower

SALZER'S EARLIEST SUREHEAD

See Page 33 for Color Illustration
IT HEADS WHERE OTHERS FAIL

Grandest of all! Whether for forcing or open ground, planted early or late, it is the best, surest header of all. It is particularly desirable for forcing under glass. On our trial grounds every plant produced a **SUPERB HEAD AND SURPASSED ALL OTHER VARIETIES OF EQUAL SIZE IN EARLINESS AND QUALITY.**

We do not know of a finer, more tender and surer heading cauliflower than Salzer's Earliest Surehead. The plants are of strong growth with erect, dark green, pointed leaves growing closely about the heads, which are pure snowy white, with very close and compact curds of wonderfully fine quality. Its close growing, compact habits enable the planter to grow more on the same space of ground than can be done with most other sorts. The heads are of large size, reaching 10 inches or more in diameter on good soils, are nearly globe shaped, solid, and very heavy.

This sureness of heading is highly essential to the market gardener and just as necessary for the home gardener. Truckers once having sown Salzer's Earliest Surehead will plant no other, as it has certainly made a lot of money for them. To make the best heads, cauliflower plants need cool, moist weather, good soil and thorough cultivation. Salzer's Earliest Surehead matures in about 95 days and is a sure header.

317—Pkg., 20c; ¼ oz., 75c; oz., \$2.50; ¼ lb., \$8.50, postpaid.

SALZER'S EARLY SNOWBALL

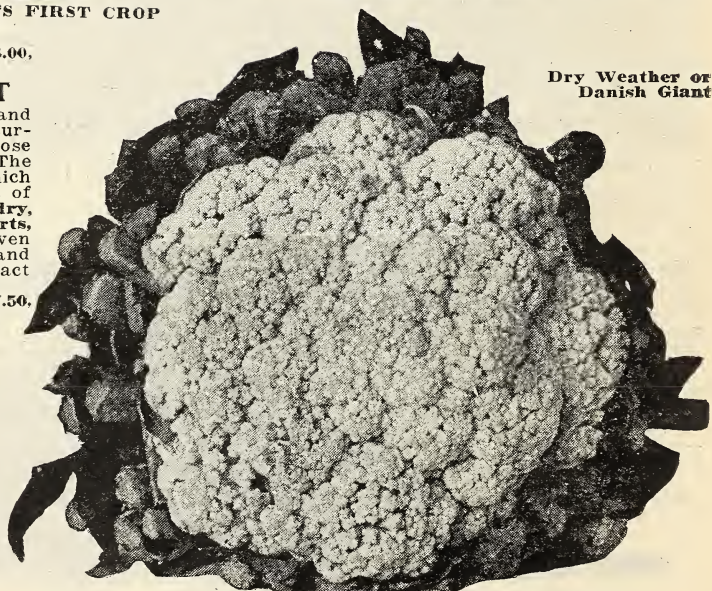

Extremely popular in all sections of the country. Matures in about 97 days, producing uniform heads of large size, handsome form, and exquisite quality, which are good sellers in every market. Salzer's Early Snowball is the standard variety by which all other sorts are judged. For planting at all seasons, and as an all purpose cauliflower it is unsurpassed. The heads are smooth, solid, snowy white, with compact curds of excellent flavor and quality. This sort is bound to please you.

319—Pkg., 15c; ¼ oz., 60c; oz., \$2.00; ¼ lb., \$7.50, postpaid.

EARLY PARIS

Extremely early, dwarf, having fine white heads, solid and compact curds. Quality is good. This sort is considerably cheaper in price, and remains very much in demand with many of our customers.

313—Pkg., 10c; ¼ oz., 30c; oz., 85c; ¼ lb., \$3.00, postpaid.

Salzer's Wonderful Celery

Earliest of All

Rich Golden Color

Blanches Easily

Fine Flavor

Tender

Increased Size

SALZER'S WONDERFUL

Resistant to Rust and Blight

A NEW INTRODUCTION

Earliest in maturity, superior eating quality, increased size, beautiful golden color, superior keeping qualities, marked resistance to rust and blight—these are the outstanding characteristics of this superb celery. We have named it **WONDERFUL**—a name which is most fitting and appropriate, and you may be sure we take unusual pleasure in introducing it to our customers and friends this year.

We have been carefully testing, developing and re-testing this grand variety in our rigorous northern climate, checking and re-checking field notes, making comparisons, etc., and the concentrated efforts of several years, of our expert gardeners, have now culminated in our being able to offer Salzer's Wonderful Celery for sale this spring, confident that it is a real winner, and that it is going to please you in every respect. Our friends know that any strain which Salzer has had under observation and which he introduces, is of first rank and sterling quality, and is a corking good one. When almost every mail brings us letters like that of Mrs. George Bailey, R. D. 3, Box 1, Alton, Mo., when she writes, "Salzer's Seeds are the best I have ever found, especially your Lightning Cabbage and Fireball Beet. Have planted your seeds for more than 15

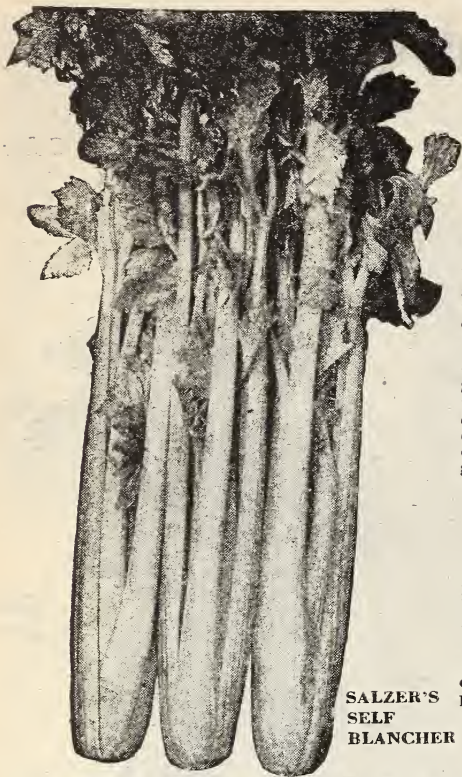

years,"—well, such testimonials in themselves bespeak the value of Salzer's introductions, and why people "Sow Salzer's Seeds."

Salzer's Wonderful produces fine stocky plants with large, broad, thick stalks that blanch easily and quickly to a beautiful clear waxen yellow. They are solid, crisp, brittle, tender, of a much superior flavor and quality, and are entirely free from stringiness of any kind. Trials at Cliffwood Farms prove it to be the very earliest celery, being fit for use the latter part of August, and remaining in use until the later winter sorts mature. This earliness spells top prices from the early fall trade, for the trucker, and the earliest, most delicious, crisp and beautiful celery for the home gardener's own table use. You will be proud of this celery when you serve it at dinner.

Note in the illustration how compactly the stalks grow. Salzer's Wonderful grows uniformly like this. The plants are remarkably resistant to blight and rust, a factor of great importance. Earliness, size, attractive color, shape, superior flavor, resistance to blight and rust!—the name **WONDERFUL** is about the only fitting one for this grand celery. Owing to limited stocks, we cannot sell more than an ounce to a customer this season.

345—Pkg., 25c; 2 pkgs, 40c; ¼ oz., \$1.25; ½ oz., \$2.00; oz., \$3.50, postpaid.

Your seed is unsurpassed. Everything is growing remarkably.—H. Alwes, 109 Poplar St., Ottawa, Kansas.

**SALZER'S
SELF
BLANCHER**

Celery

SALZER'S SELF-BLANCHER

Thick Heavy Stalks, Beautiful, Silvery White Color.

Salzer's Self-Blancher has been bred from the White Plume, over which it is a great improvement. It blanches more readily, is earlier, grows more stalks, is heavier and is a much better keeper than the old variety.

Next to Salzer's Wonderful it is the earliest celery that can be grown. We introduced Salzer's Self-Blancher a number of years ago and have kept on improving it year after year, and we believe that now it is more largely grown than any other self-blanching variety. It has certainly become renowned for earliness, beauty, quality and flavor. Is of dwarf and compact habit, with light green foliage, stalks are thick and solid, unusually meaty, of a delicious rich flavor, pure white, heavy, tender and crisp. As it keeps so exceptionally well, it is widely grown for fall and winter use.

Many people who have never been able to grow celery before can grow this one to perfection, and succeed with it as well as with other vegetables. Salzer's Self-Blancher is singularly free from the habit most other blanching varieties have of reverting back to the original green celery. To obtain best results, celery should have rich, well-manured soil and plenty of water. For the earliest crops, seed should be sown in boxes in February or March, and for the Fall or main crop, it may be sown in the open ground, as early as the ground can be worked into good condition.

334—Price: Pkg., 15c; oz., 50c; ¼ lb., \$1.25; lb., \$4.50, postpaid.

SALZER'S GOLDEN SELF-BLANCHING

ORIGINATOR'S FRENCH GROWN SEED

The beautiful appearance of the plant, with its close habit, compact growth, and straight, vigorous stalks is indescribable. The ribs are thick, broad, fleshy and the hearts large and solid. As the plants mature, the inner stems and leaves turn to a beautiful golden yellow. Blanches easily, quickly, and perfectly.

Salzer's Golden Self-Blanching is early. It is easy to cultivate and in planted very extensively and owing

to a vigorous dwarf grower and very early it is a desirable variety. It is to its handsome waxen-yellow color, its superb quality, entire freedom from stringiness, crispness and tenderness and its delightful, rich, nutty flavor, this variety is most popular and the leading celery in many markets. The strain we handle is grown in France, it is the finest in the market and produces plants uniform in growth and color, with heavy, solid stalks. We offer only true French grown stock, obtained from the originator, and much superior to the ordinary seed.

333—Pkg., 15c; oz., 85c; ¼ lb., \$2.75; lb., \$10.00, postpaid.

SALZER'S SELECT WHITE PLUME

A fine, popular celery, very early. While growing, the leaves and stalks are green, tinted white, but very quickly after "earthing up," they blanch to a pure snowy white. Stalks broad, thick, tender, crisp, fine rich nutty flavor and excellent quality. An old popular stand-by.

335—Pkg., 10c; oz., 30c; ¼ lb., \$1.00; lb., \$3.50, postpaid.

SALZER'S WINTER QUEEN

The standard variety for winter keeping. It is the finest dwarf winter celery that we have ever grown on Cliffwood Farms. The plants are large, of close habit and compact growth, stalks are very large, broad, solid, crisp, tender and of a delicious flavor. Blanches easily to a beautiful creamy white. The stalks are all of even length and present a handsome appearance when bunched. It is a splendid keeper and stands shipping well.

343—Pkg., 10c; oz., 25c; ¼ lb., 80c; lb., \$2.75, postpaid.

GIANT PASCAL WINTER

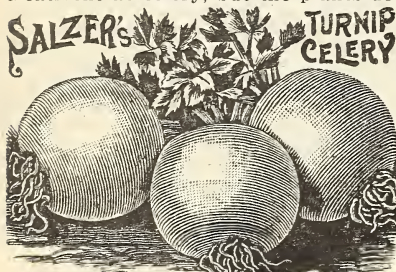

Stalks are very large, thick, solid, unusually tender and crisp, snapping like glass. This is the finest of all winter celeries for the home garden, but it is too brittle to stand much shipping. Color is a rich, dark green, until tilled and earthed up, when it blanches readily to a rich golden yellow. Is a splendid keeper for winter use.

342—Pkg., 10c; oz., 30c; ¼ lb., \$1.00; lb., \$3.50, postpaid.

TURNIP ROOTED CELERY OR CELERIAC

Differs from other celery in that the roots are cultivated for use instead of the tops. Used for soups, stews and salads, or boiled like Parsnips or Turnips.

It has a rich, meaty, distinct celery flavor and it deserves much wider cultivation, as it has real merit. Keeps well over winter. Seed should be sown and given the same treatment as celery, but the plants do not require earthing up.

GIANT PRAGUE

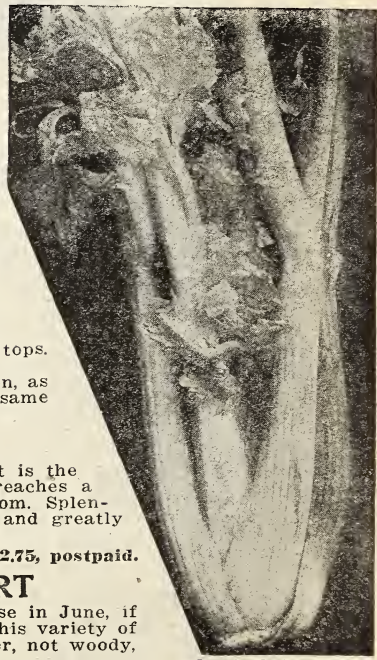

Excels in quality, size and appearance. It is the main crop variety, nearly globe-shaped, reaches a large size, and has few rootlets at the bottom. Splendid keeper. Flesh richly flavored, tender and greatly prized either cooked or as a salad.

352—Pkg., 10c; oz., 25c; ¼ lb., 80c; lb., \$2.75, postpaid.

LARGE EARLY ERFURT

This turnip rooted celery is ready for use in June, if planted early. Considered the earliest of this variety of celery. The flesh is pure white, very tender, not woody, and of finest quality.

351—Pkg., 10c; oz., 25c; ¼ lb., 80c; lb., \$2.75, postpaid.

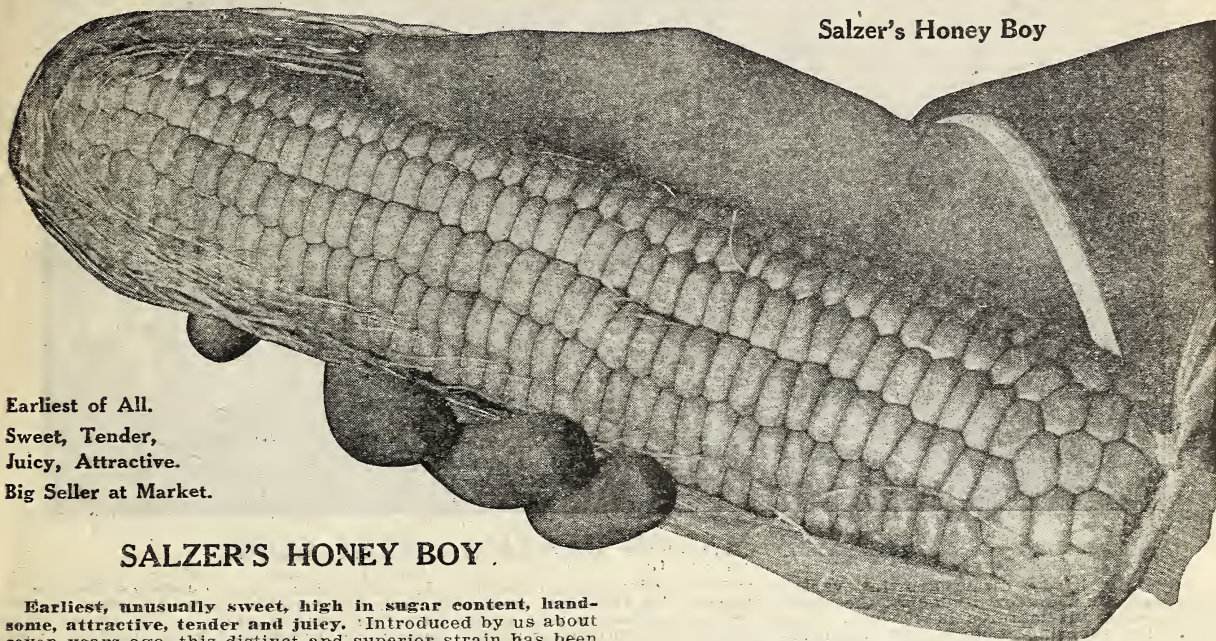

Salzer's Golden Self-Blanching

I find your seeds to be the best I have ever used.—Mrs. J. W. Myers, Gower, Mo.

Sweet Corn—Two Leading Varieties

Salzer's Honey Boy

**Earliest of All.
Sweet, Tender,
Juicy, Attractive.
Big Seller at Market.**

SALZER'S HONEY BOY.

Earliest, unusually sweet, high in sugar content, handsome, attractive, tender and juicy. Introduced by us about seven years ago, this distinct and superior strain has been universally displacing every other variety in popularity. It is popular with the market gardener, as maturing in 55 days in this northern climate, it enables him to get the first edible sweet corn to market and to reap the consequent high prices. Popular with the home gardener as it enables him to grow delicious, melting quality sweet corn for his table in an astonishingly short time. We control the entire supply of Salzer's Honey Boy. Get your seed from us and you will be sure of genuine, true seed.

Developed for a short season, it is the best extra early sweet corn for any district and especially for the entire Northwest. Like all extra-early varieties, the stalks are slender and grow $3\frac{1}{2}$ to 4 feet high, and the ears are about twenty inches above the ground. Being a free stooler, it shoots up many stalks, hence is a heavy yielder. Ears are straight and uniform, handsome, nicely rounded at the tips, average 7 inches in length and contain 8 to 10 rows of creamy white, fat, plump, juicy and unusually sweet and delicious kernels. It is a whirlwind for maturing, and you will be mighty glad you planted it.

366—Pkg., 15c; 1 lb., 50c; 2 lbs., 85c; 5 lbs., \$2.00, postpaid. Not prepaid, 10 lbs. or more, at 25c per lb.

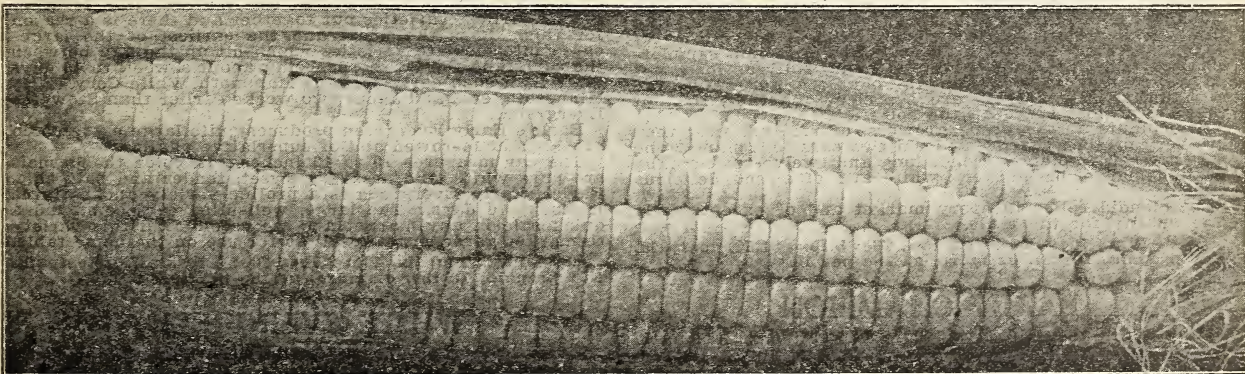

SALZER'S 4TH OF JULY

For Color Illustration See Page 34

This introduction of ours, of a quarter of a century ago, must yield first place for extreme extra-earliness to Honey Boy, but only in this respect. It is the **LARGEST EARED** and **HEAVIEST YIELDING EXTRA EARLY SWEET CORN**, bar none. A great seller at market. **Sixty days from planting** one can pluck mature sweet corn, so that at your Independence Day dinner you can serve sweet, luscious, tender, finest quality corn on the cob—ears 10 inches and more in length, each having 8 to 10 rows, symmetrical, handsome, and tapering gradually to a pointed tip.

Stalks grow about 5 feet high and generally produce from 2 to 3 fine long ears. The kernels which are tightly set, are small, deeper than broad, very sweet, very white, solid, plump, and are of an exquisite, fine quality, usually found only in the later sorts. It is grown successfully everywhere. Mr. W. A. Zimmerman, 530 Gartland Avenue, Sandusky, Ohio, writes, "Your 4th of July Sweet Corn is the best I ever heard of and I want some more of it this year." Mrs. Herman Allgner, Brainerd, Minn., writes, "Your Independence Sweet Corn and your tomatoes sure can't be beat." Corn is short this year. Order early.

373—Pkg., 15c; 1 lb., 45c; 2 lbs., 85c; 5 lbs., \$1.85, postpaid. Not prepaid, 10 lbs. or more, at 24c per lb.

SALZER'S INDEPENDENCE OR 4TH OF JULY. A GRAND, EARLY, LARGE-EARED CORN.

Planted some of your Honey Boy Sweet Corn last summer and it is the earliest and best I ever tasted.

—Noah H. Diller, Pandora, Ohio.

SALZER'S GOLDEN BANTAM SWEET CORN

An early, hardy, dwarf growing variety, and one of the most popular in cultivation today. **Salzer's Bantam is nationally famous for producing the most delicious, the sweetest, tenderest, and most richly colored, golden yellow sweet corn.** It matures in 70 days. Many of our customers who prefer Salzer's Golden Bantam to any of the white corns are planting it at regular intervals to obtain a continuous supply during the season, and in our latitude it can be sown as late as the middle of July, and will furnish corn for the table before frost. It is of extreme hardiness. The stalky plants grow from 4 to 5 feet high and each stalk usually bears 2 and more good ears, which are 6 to 7 inches long, straight, rounded at the tips, of a rich, golden yellow color, 8-rowed and packed with broad, deep, tender kernels, exceptionally meaty and of the very finest flavor. For early, medium early, or late, many of our customers will plant only Golden Bantam. But they use Salzer's Seeds, for best results are only to be had when they "Sow Salzer's Seeds."

372—Pkg., 10c; 1b., 45c; 2 lbs., 85c; 5 lbs., \$1.85, postpaid. Not prepaid, 10 lbs. or more, at 22c per lb.

SALZER'S PEEP O'DAY

This corn we find about 4 to 6 days later than Salzer's famous 4th of July, illustrated on the preceding page. It is much planted in the Northwest and is a first-class extra early corn. The ear is small, rarely over 5 inches in length, with 8 to 12 rows of kernels. The quality is very good for such an early corn. The stalks grow from 2 to 3 feet high, have few leaves and should be set close together, so that the hills or rows are just far enough apart to admit cultivation.

375—Pkg., 10c; 1b., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 18c per lb.

SALZER'S MAMMOTH WHITE CORY

The best second early variety and largely planted by market gardeners to follow the extra early sorts like Honey Boy, Salzer's Independence, Peep O'Day, etc.

A finely bred, real sweet corn, with handsome symmetrical ears, maturing as early and being fully as long, but having four more rows, than the old Cory, and unlike the old variety, the kernels are set close together, so that there is no lost space on the cob.

The plants are vigorous growers, of medium size; they are very prolific, bearing at least two ears to a plant. The ears are seven to eight inches long and twelve-rowed. The grain is large, broad, very white and of sweet, delicious quality.

A splendid seller in every market and of exceptionally fine quality for the table.

374—Pkg., 10c; 1b., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 18c per lb.

EARLY CHAMPION

Matures in about 70 days. Ears 8 to 10 inches in length. Kernels pure white. Very sweet, tender and juicy. Medium early.

394—Pkg., 10c; 1b., 30c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid. Not prepaid, 10 lbs. or more, at 17c per lb.

EARLY MINNESOTA

A favorite old variety only a few days later than Cory and one of the most productive early sorts.

The stalks grow six feet high, produce two eight-inch long ears; which are covered with 8 to 10 rows of broad kernels, which are tender and sweet.

A good variety for the market as well as for the private garden. This grand old stand-by remains one of our biggest sellers, proving it has not lost any of its great popularity. It always gives satisfaction.

369—Pkg., 10c; 1b., 30c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid. Not prepaid, 10 lbs. or more, at 17c per lb.

EARLE'S EARLY EVERGREEN

This Sweet Corn has fairly leaped into popularity and it is safe to say that there is more Earle's Early Evergreen Corn planted today for second earliest than any 10 other second earliest varieties put together and there is a reason for this. It is the finest and the earliest of the large-eared intermediate varieties which fill up the gap between the early and the late corns, being about a week to 10 days later than such early sorts as Mammoth White Cory, Early Minnesota, etc., and about two weeks earlier than Stowell's Evergreen.

Earle's Early Evergreen produces quite large ears, which are 12- and 14-rowed and of superlative quality.

The ear measures 10 to 12 inches. In color the kernels are pure white, and are very sweet, tender and palatable. Earle's Early Evergreen is a prolific variety and matures in about 70 days. The large, well-filled ears command a quick sale in any market and we recommend this variety to market gardeners, as well as for use on the home table.

393—Pkg., 10c; 1b., 40c; 2 lbs., 70c; 5 lbs., \$1.50, postpaid. Not prepaid, 10 lbs. or more, at 18c per lb.

WHITE EVERGREEN

It is of vigorous growth, produces large ears with deep kernels of fine quality and matures in about 95 days.

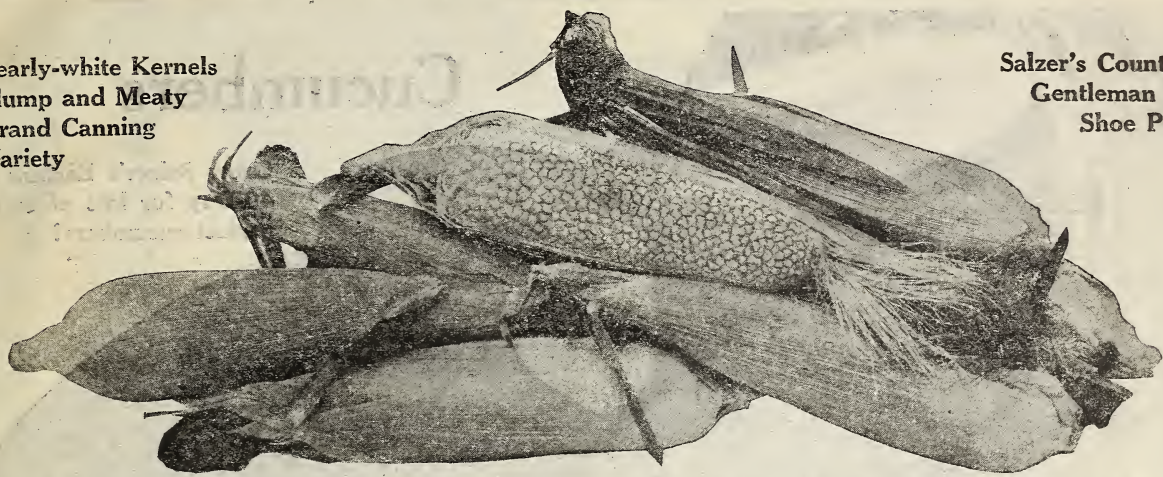

400—Pkg., 10c; 1b., 30c; 2 lbs., 50c; 5 lbs., \$1.10, postpaid. Not prepaid, 10 lbs. or more, at 15c per lb.

I planted your Early Minnesota Sweet Corn last year, and had the best results I have ever seen here.

—C. A. Hubbard, Sandpoint, Idaho.

Pearly-white Kernels
Plump and Meaty
Grand Canning
Variety

Salzer's Country
Gentleman or
Shoe Peg

SALZER'S COUNTRY GENTLEMAN

One of the best late sweet corns, remarkably fine flavored and sweet, very popular for canning. Has a small white cob, closely packed with perfectly round kernels, irregularly arranged, slender and very deep, resembling "shoe-pegs." Because of this long, deep kernel, it is admirably adapted for canning. Stalks grow 6 to 7 feet high, bearing 2 to 3 ears each. Ears are 8 to 9 inches long with a narrow, core-like cob, and are of a delicious sweetness, tender, juicy, and remain "in the milk" longer than other varieties as they are encased in a heavy husk. Matures in about 90 days. It is always easily identified by its dense irregular rows, and melting quality. Very productive.

392—Pkg., 10c; lb., 50c; 2 lbs., 85c; 5 lbs., \$2.00, postpaid. Not prepaid, 10 lbs. or more, at 21c per lb.

STOWELL'S EVERGREEN

The standard main crop variety. A fine all-around table variety of excellent quality. Stowell's Evergreen is a late sweet corn and takes a good time to mature. The stalks are strong and vigorous, grow 6 to 7 feet high, and bear abundantly, ears that are 8 inches long, each with fourteen to eighteen rows of pearly-white, sugary, deep-set, tender, melting kernels of excellent quality. Under good conditions each stalk has three ears. For the home garden, the market, or the canneries, it is always an immense success. If planted at the same time as the early and second early sorts, it will keep your table supplied until October. More Stowell's Evergreen is grown for commercial canning than any other variety.

402—Pkg., 10c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid. Not prepaid, 10 lbs. or more, at 19c per lb.

SALZER'S GOLDEN EVERGREEN

A NEW INTRODUCTION

The late, main crop, yellow sweet corn. Salzer's Golden Evergreen is a cross between Stowell's Evergreen and Golden Bantam, and combines the size of ear of the former with the rich golden yellow and delicious buttery quality of the latter. The plants grow vigorously to a height of 6 to 7 feet, they are strong, profusely leaved, and each stalk bears two fine ears, seven to eight inches long, and packed with delicious golden grains in straight rows, of the finest and sweetest flavor. For the home garden it will be a real treat, and for the market it will bring fancy prices. It furnishes larger ears than the Golden Bantam, and as it is later, it prolongs the season considerably. Plant both Salzer's Golden Bantam and Salzer's Golden Evergreen, and you will have a generous and thorough supply of the finest golden yellow sweet corn throughout the entire season. We predict a great future for this variety.

405—Pkg., 15c; lb., 50c; 2 lbs., 90c; 5 lbs., \$2.00, postpaid. Not prepaid, 10 lbs. or more, at 25c per lb.

EARLY EVERGREEN

Slightly smaller ears than those of the Stowell's but fit for the table from a week to 10 days earlier. Ears seven to eight inches long, with 16 to 20 rows of deep grains of the very best quality. Matures in about 90 days.

395—Pkg., 10c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid. Not prepaid, 10 lbs. or more, at 17c per lb.

Popcorn

Sow the seed in rows, 3 feet apart, about the time beans can be planted. No matter how short the row, always plant more than one row, so that the ears will be properly pollinated. Thin the plants to 10 inches apart in the rows.

TOM THUMB

The kernels are similar in color and shape to the older types of white rice, except they are more slender, and longer. Is of dwarf growing habit. Ear about two to three inches long. The kernels on an average cob, however, will produce nearly twice as much popped corn. Matures in about 65 days.

422—Pkg., 10c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid. Not prepaid, 10 lbs. or more, at 15c per lb.

WHITE RICE

One of the finest, most prolific Popcorns grown; largely planted. Matures in about 80 days.

423—Pkg., 5c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.10, postpaid. Not prepaid, 10 lbs. or more, at 12c per lb.

SALZER'S SILVER BALL

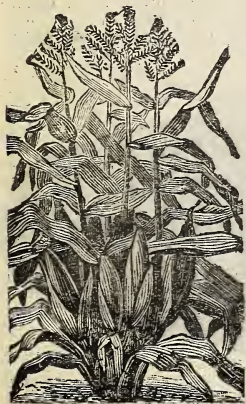

Very productive, tender and crisp; pops readily and very large. A package will be sufficient for family use. Takes about 80 days to mature.

420—Pkg., 10c; lb., 30c; 2 lbs., 50c; 5 lbs., \$1.10, postpaid. Not prepaid, 10 lbs. or more, at 12c per lb.

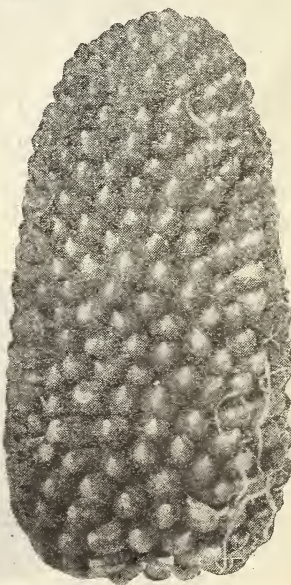

POPCORN FOR POPPING PURPOSES

425—TOM THUMB—Price, lb., 25c; 2 lbs., 45c; 5 lbs., \$1.00, postpaid. Not prepaid, 10 lbs. or more, at 11c per lb.

424—WHITE RICE—Price lb., 25c; 2 lbs., 45c; 5 lbs., 90c; postpaid. Not prepaid, 10 lbs. or more, at 9c per lb.

WHITE RICE

TOM THUMB

The seeds I ordered from you made a very good garden.—Miss Anna C. McCabe, Box 53, New Burnside, Ill.

Cucumbers

Grow Salzer's Earliest or 40-Day for lots of early, perfect cucumbers!

**SALZER'S
40-Day Cucumber**

SALZER'S EARLIEST OR 40-DAY CUCUMBER

An ideal slicer, excellent for pickling, heavy yielder, the earliest of all the White Spine varieties, producing fine, marketable fruits in 40 days' time. Has been steadily improved at Cliffwood Farms, and we have never yet found any strain to equal Salzer's 40-Day in earliness, uniformity, productiveness, and superb quality. Market gardeners who reap the highest prices, and home gardeners who want the best and earliest cucumbers, will plant only Salzer's 40-Day.

It is a pedigreed strain of the highest type. Like most all extra early strains it is devoid of that tough, hard, green, unpalatable condition, at all stages.

Extremely early, ready for table use in about 40 days. The fruits, about 7 inches long, are straight, nearly cylindrical, blunt at the ends and of very dark green color; with distinct pale green lines at the blossom end. Uniform in shape and size. An ideal cucumber for slicing, excellent for pickling, the flesh is firm and crisp, and of delightful flavor. The vines are vigorous in growth, very healthy, holding the fruit for a long period.

Read this:—"Send me your catalog as I want some of your 40-day Cucumber seed. Four years ago my sister gave me some of this seed and I planted 10 hills. I canned 12½ gallons of pickles and sold \$7.00 worth of cucumbers from these 10 hills." (Signed) Mrs. Oren G. Adair, Box 28, Frontenac, Kansas. Plantings of seeds of the high Salzer quality, are what pay. Sow good seed. Insist upon Salzer's.

447—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$1.75; 2 lbs., \$3.00, postpaid.

SALZER'S IMPROVED LONG GREEN

Salzer's Improved Long Green is the finest selection of long green cucumber obtainable. It is a medium late, slicing variety, also very good for pickling. Finds a ready sale at all markets on account of its large size, attractive appearance, fine shape, and excellent quality and flavor.

It is extremely prolific and is the best variety for hardiness and disease resistance.

Fruits are from ten to fifteen inches in length when fully matured, of somewhat slender girth, and of attractive dark green color, with spines or warts uniformly distributed on the surface. It produces early a fine quality of small cucumbers, excellent for pickling. While in the slicing stage the fruits are very attractive. Crisp, tender, and of good flavor.

Being a hardy type it is very productive. The vines are strong, vigorous and of rapid growth. Matures in about 70 days.

448—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.50; 2 lbs., \$2.75, postpaid.

SALZER'S IMPROVED WHITE SPINE

One of the most prolific and earliest of the older types of White Spine cucumbers, and considered one of the most dependable varieties to grow and very popular for table use. Vines are of vigorous growth. A prolific and early fruiter. Dark green color, well covered with white spines and uniformly straight. About nine inches long. Inclined to be pointed at the end. Matures in about 65 days.

The flesh is crisp, tender and of fine quality. A desirable variety for salads, slicing and pickling.

438—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25; 2 lbs., \$2.25, postpaid.

Plant Salzer's Prolific
and pick basketsful
of the finest and best
cucumbers for pickling

SALZER'S PROLIFIC PICKLE

Does it pay to plant Salzer's Northern Grown Seeds? Mr. Anton Endress, R. D. 1, Box 8, Springboro, Pa., writes, "I received \$642.00 on the market for my crop from 2½ lbs. of Salzer's Prolific Pickle Seed." Think of such returns as that!

Salzer's Prolific Pickle is the one unbeatable pickling cucumber, it is enormously productive, it is uniform, it is a splendid shipper, it is early, it is of wonderfully fine quality. Housewives purchase it at market in preference to any other. Home gardeners first plant Salzer's Prolific and then if there is room, they plant other varieties. We control the entire stock of this grand strain. Be sure of good seed. Get it from Salzer's.

Slender, cylindrical, with large prominent spines, color dark green. Measures about 5½x2¼ inches, and has square ends, making it very attractive. The flesh is solid and thick in texture, excellent in quality. The vines set fruit when young and usually continue to bear longer than any other variety. A select strain of the old reliable Snow Pickling variety. Matures in about 55 days.

469—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.50; 2 lbs., \$2.80, postpaid.

DAVIS' PERFECT

A superb variety for slicing, a great shipper, solid white flesh, with remarkably small seed cavity.

The vines are hardy and vigorous. Bears fruit for a prolonged period. Fruits somewhat long and slender, averaging about ten to eleven inches in length. Color deep dark green. White spined. Tapers at both ends. Uniform in shape. Quite prolific. An excellent shipper. Retains its color for a long time. Matures in approximately 60 days. Flesh is cool, crisp, tender and of fine flavor.

441—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.50; 2 lbs., \$2.80, postpaid.

SALZER'S KLONDIKE

A very productive variety. Medium early, matures in about 60 days. A white spine sort of attractive appearance. Very dark green in color, faintly striped at the ends. Retains its deep green color longer than any of the other varieties and for this reason used principally for long distance shipping. Tapers at the blossom end, somewhat blunt at stem end. Fruits about seven to eight inches long. Uniform in size and shape.

The quality is excellent for slicing, salads and pickling. The flesh is white, crisp and of fine flavor.

449—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25; 2 lbs., \$2.30, postpaid.

SALZER'S EVERBEARING

Ranks next to Salzer's Prolific in popularity for pickling purposes. It is just a fraction smaller than the Prolific, is very productive, and of special value in districts where the late maturing kinds will not ripen.

Is a continuous bearer throughout the season, hence its name "Everbearing." If the fruits are gathered continuously, the vines will fruit freely the entire summer.

A very early and extremely productive variety. Matures in about 60 days. The fruits average four to five inches in length. Diameter about one to one and a half inches. Rich dark green color. One of the best sorts for pickling, salads and slicing. Flesh white, crisp, cool and of pleasing flavor.

466—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25; 2 lbs., \$2.30, postpaid.

SALZER'S CHICAGO PICKLING

A grand old stand-by, and is just as great a favorite today as ever. It has square ends, smooth skin, is very productive and very disease-resistant. Measures about 6x2½ inches, and has a rich, deep green color.

Has a national reputation for shipping qualities. Matures in about 60 days. Flesh crisp, cool and of pleasing flavor.

462—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00; 2 lbs., \$1.90, postpaid.

LEMON CUCUMBER

As its name indicates it is somewhat similar in shape to a lemon, and it is used for pickling and in salads. The seeds may be taken out and it may be stuffed with relishes.

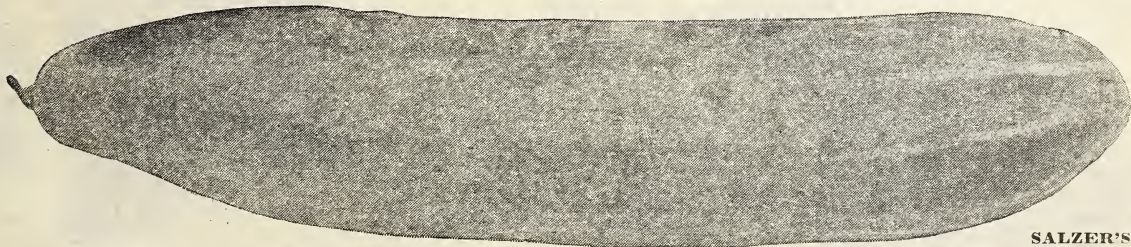

When ready to use it has the color of a ripe lemon. The skin is smooth. The fruits are very attractive in appearance and grow from two and one-half to three inches in diameter. The flesh is tender, crisp and possesses a delicate sweetness and flavor. They are fine for pickling, either green or ripe. For slicing they should be used just as the fruits are turning yellow.

480—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$2.00, postpaid.

WEST INDIA GHERKINS

The smallest of the pickle varieties, maturing in approximately 50 days. Fruits average from two to two and one-half inches. Should be pickled when young and tender. Oval shape, prickly surface. Enormously prolific.

483—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$2.00; 2 lbs., \$3.50, postpaid.

SALZER'S
DAVIS PERFECT

Am so sorry I did not send to you folks for all my garden seed. Next year Salzer will get my whole order.

—Miss Robbie Craig, 5th and Rees St., Leavenworth, Kans.

Kohlrabi

SALZER'S EARLY WHITE VIENNA

When cooked before it is fully grown (that is, when about two inches in diameter), it is tender and excellent, combining both the flavors of cabbage and turnip. Should be cooked the same as you would cook turnips. It is hardy and thrives everywhere. Our Early White Vienna is grown from well selected seed and tested thoroughly for trueness to type. This variety will give you great satisfaction.

A select early strain. White bulbs, tinged with green. Small leaves. Tops are about eight to ten inches long. Ready for the table in 50 days after setting out plant. Being extremely early it is a desirable sort for forcing. Quality very fine. Flesh is white and delicate.

523—Pkg., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.50, postpaid.

SALZER'S EARLY PURPLE VIENNA

Excellent for soups, or cooked like turnips, and enjoys almost as much popularity as the Early White Vienna, and similar to it in many ways. The leaves, stems, and outside of the bulbs are purple, but the flesh is an attractive light green.

Planted at intervals, tender bulbs can be produced throughout the season. Ready to use in about 50 days after setting out plants. Best time to use is when the roots are about 2½ inches in diameter.

522—Pkg., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.50, postpaid.

SALZER'S LARGE AMERICAN FLAG LEEK

A splendid vegetable for flavoring soups, etc. Treat same as onions; both leaves and bulbs are used. Leeks are very hardy and the flavor is much improved by freezing. In fall, plant a few in sand in the cellar for winter use. Produces large, thick stems of mild flavor. Matures in about 90 days.

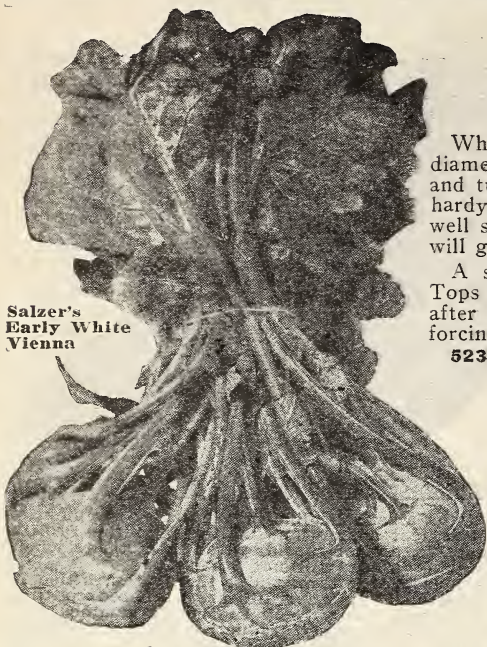

531—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.25, postpaid.

SOUTHERN GIANT MUSTARD (CHINESE)

Mustard is planted extensively in the South for boiling greens during the fall and winter months, and should be more widely grown in the North. When freshly picked, the leaves are cooked and eaten like spinach. They do not lose much in substance by cooking and have a very agreeable flavor. Highly esteemed in warm countries for use as green vegetables.

Are easily cultivated and ready for use in six weeks from sowing. To those of our customers who have never planted Mustard, we recommend they give it a trial. Makes a deliciously pungent salad. Plants yield until frost.

725—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.50, postpaid.

Salzer's
Early White
Vienna

KALE

Also called Borecole. A popular boiling green, tasting somewhat like Spinach. Easily grown and should be in every garden.

SALZER'S MOSS CURLED

Robust, very compact in growth, with dense moss curled leaves of deep green color. The stems produce curly sprouts which are tender and of a fine flavor. Grows about 30 inches high; stands cold which improves its deliciousness.

512—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

TALL SCOTCH GREEN

Grows 3 to 4 feet high, and furnishes you with an ornamental plant as well as with a fall and winter supply of healthy boiling greens. Narrow leaves, finely curled and beautifully fringed. It is a hardy variety and yields a large crop of fine leaves. Improved by frost.

514—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.50, postpaid.

Tall Scotch Green

SALZER'S FRENCH GIANT DANDELION

This should not be confused with the wild Dandelion, as it is a much improved strain. Good for the blood, and in France it is largely grown for this purpose. It is a blood purifier! It is delicious in the extreme, and is in great demand as a salad par excellence. Sow in May or June, cultivate well, and the leaves can be cut the following spring.

490—Pkg., 15c; oz., 45c; ¼ lb., \$1.50, postpaid.

SALZER'S MUSHROOM SPAWN

Leaflet, "Mushroom Culture," free upon request.

Anyone can make big money by growing these delicacies for hotels, restaurants and private trade. Can be grown in cellars, sheds and small caves, etc. Mushroom produces no seed, but instead a white fibrous substance, called spawn, which we furnish in bricks. If you have an unused cellar or shed, you can greatly increase your income. It is not difficult to grow.

729—Brick, 35c; 5 bricks, \$1.65, postpaid.

A Bed of Salzer's Mushrooms

Salzer's Giant Mustard

"I had good success with your seeds last spring."—Mrs. H. Hirshberg, Bynum, Montana.

SALZER'S EARLIEST

LETTUCE

SALZER'S EARLIEST LETTUCE

EARLIEST CURLED OR LOOSE LEAVED LETTUCE, DELICIOUSLY CRISP AND TENDER, EASIEST TO GROW

Does not form a head, but yields an abundant crop of attractive light green leaves, heavily curled, of remarkably crisp texture, and of the finest flavor. The quality and flavor even of the outside leaves is fully equal to, if not better than, the tender heart leaves of many heading varieties. Salzer's Earliest is the most widely planted in all sections of the country, and especially in the great West. It is such a strong grower that it thrives everywhere, anybody can grow it, and every single one who plants Salzer's Earliest has an enormous crop of remarkably fine early lettuce.

It is an admirable variety for outdoor planting, especially in early spring and it is also most suitable for greenhouse forcing. It is the lettuce for planting all summer long. Extremely popular for winter markets. The lower leaves grow clear of the ground so that it rarely suffers from rot. It is an ideal shipper and will prove most profitable for the grower, whether he sows seed in a hotbed or out of doors. It is the best non-heading lettuce for the home garden. Salzer's Earliest Lettuce affords crisp, tender, attractive, finest quality leaves long before the heading sorts have commenced to close up. Lettuce seed is short this year. Beware of seed that is sold too cheaply. Salzer's is the best. It is all carefully tried and tested at our great Cliffwood Farms.

540—Pkg., 15c; oz., 25c; ¼ lb., 70c; lb., \$2.25, postpaid.

SALZER'S CRISP AS ICE LETTUCE

A beautiful lettuce of medium size and medium early. Salzer's Crisp As Ice is a cabbage butter head lettuce, the leaves having a rich, attractive, deep green base, and upper portion covered with dark brown, giving the plant a deep brown or bronze appearance. It forms a firm solid head of most excellent quality and is one of the best for the home garden, being unsurpassed in delicate flavor and brittle quality.

This head lettuce, when cut open, has such a rich, creamy heart, and is so tender and brittle, that when it was introduced in about 1894, it was immediately and rightly named Crisp As Ice. It enjoys a wide popularity and is extensively grown. We recommend Salzer's Crisp As Ice unreservedly for the home gardener who wants a delicious, tender, brittle head lettuce. Mr. H. J. Welker, Myerstown, Pa., writes, "Your Crisp As Ice Lettuce has proved all you say about it. We never tasted such crisp and fine lettuce."

556—Pkg., 15c; oz., 30c; ¼ lb., 80c; lb., \$2.75, postpaid.

SOW SALZER'S SEEDS

Both your flower and vegetable seeds do well in this climate and give fine results.

Mrs. F. Reimers,
6535 S. E. 27th Ave., Portland, Ore.

Your 556 Crisp As Ice is the best head lettuce I ever saw or tasted.—Leigh H. Abel, 22 Parkwood Ave., Johnstown, N. Y.

BLACK SEEDED SIMPSON

One of the standard varieties. A non-heading, curled, bunching, crisp variety, attractive light green color. It reaches a large size, grows quickly, is early, of fine quality, tender and sweet, and thrives splendidly during the hot summer months. Easily grown by the home gardener and much used by market gardeners for hot bed culture.

554—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 55c; lb., \$2.00, postpaid.

WHITE SEEDED SIMPSON

Also known as Early Curled Simpson. A curled or crisp non-heading type, medium large, much crumpled leaves of a light green color. It is an early growing, hardy variety and is sure to give fine results even under unfavorable conditions. Tender, crisp and of excellent quality.

559—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.25, postpaid.

SALZER'S GRAND RAPIDS

Curled or crisp, non-heading, light green, leaves wavy, fringed and very curly, a good shipper. Very popular and widely grown.

541—Pkg., 10c; oz., 25c; $\frac{1}{4}$ lb., 65c; lb., \$2.50, postpaid.

SALZER'S CREAM BUTTER

Salzer's California Cream Butter is a cabbage, butter head type, with thick leaves, large in size, of a beautiful and attractive rich dark green, tinged and spotted with brown. The heart of this excellent head lettuce is a rich golden yellow and has a most agreeable and delicate buttery flavor, hence the name Cream Butter. It is of first class quality, it is a good shipper, and it forms a fine solid head under any ordinary conditions.

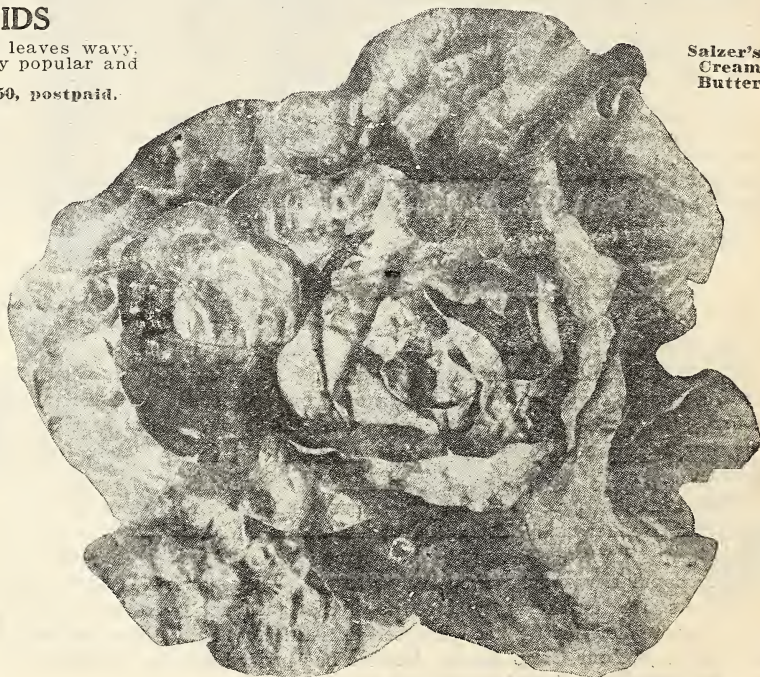

Not used for forcing, but outdoors it succeeds well everywhere and at all times of the season. It is an extremely solid heading variety, thrives well in hot weather, and is to be recommended for the home garden. It is good for open ground planting at all seasons in the South, and many cars of this variety are annually shipped to Northern markets. Mr. R. J. Whiting, R. D. 1, Winter, Wisconsin, writes, "I think Salzer's Cream Butter Lettuce is the finest head lettuce I have ever grown."

561—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 70c; lb., \$2.25, postpaid.

SALZER'S PRIZEHEAD LETTUCE

Is one of the best and most reliable varieties for all-year-around cultivation. The name is a trifle misleading, as it is a loose leaved or curled variety, and does not make a head. Plants form a loose cluster of leaves which are exceedingly tender, quite blistered and crumpled, sweet, crisp, and are of light brown color varying to a medium green base. It is one of the best home garden varieties as it grows quickly and makes a lot of good eating leaves which are of remarkably good flavor. Salzer's Prizehead reaches a very large size without losing its tenderness or crispness. Because of this unusual tenderness, it does not stand shipping well to distant markets. This superb strain was introduced in about 1875 and for many years we have been developing and re-selecting it at Cliffwood Farms, so that our seed of this variety is unsurpassed in quality, regardless of price.

575—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.25, postpaid.

Have used your seed for over 30 years, and always found them even better than you represent them to be.

—W. T. Shakespeare, Lamoni, Ia.

SALZER'S NEW YORK OR WONDERFUL

A curled or crisp, heading variety, large, dark green and slightly curled on the edges. It is the most extensively grown of any of the head lettuces by market gardeners, and it is likewise in much favor with home gardeners everywhere. The mature head is flattish globular, and has well folded leaves with the immediate outside leaves slightly incurved to protect the head from sunburn. Salzer's New York is easily identified at all stages of its growth. Do not confuse this variety with Iceberg, which, although somewhat similar, has a decided brown tinge to it, while New York is green.

Because of its immense size, fine color, crisp tenderness, and delicate flavor, it is always in demand in hotels throughout the country. The heads range from 16 to 18 inches in diameter and weigh from 3 to 3½ pounds each. This is the same variety that is so widely grown in California and the heads shipped in carload lots by the thousand. **Crop is very short this year.** Be sure you get Salzer's Seeds. We have carefully tested and developed this strain, and our seeds are unsurpassed.

The heart is beautifully blanched, creamy white, crisp, tender, and free from any trace of bitterness. It is robust and is a standard hot weather variety anywhere. Although more expensive than other varieties, it is one of the most generally grown, because of the phenomenal crop it produces.

565—Pkg., 15c; oz., 35c; ¼ lb., 95c; lb., \$3.50, postpaid.

SALZER'S MAY KING

Salzer's May King is a cabbage, butter head type, medium small, light green, tinged slightly at edges with brown. It is a very early head lettuce and especially good for outdoor culture, very popular and very suitable for both home gardeners and truckers. The heart is well folded, solid, and blanches to a beautiful light golden yellow. It is tender, brittle, juicy, and of a fine buttery flavor. Very hardy, and a sure header under even unfavorable conditions. It attains a size suitable for use, before most other heading varieties. Salzer's May King is a compact grower and is sure to give the greatest satisfaction.

560—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$2.25, postpaid.

Salzer's May King Lettuce

Salzer's
New York
or
Wonderful

Big Boston

SALZER'S BIG BOSTON

"It gives me great pleasure to announce that my Big Boston Lettuce (your seed) won First Prize at the Minnesota State Fair this year."

So writes Mrs. Lulu Schulze, 4021 Woodland Ave., Duluth, Minn. Clifford Farms has played an important part in bringing this grand lettuce up to its present degree of excellence. Careful development of the seed is evidenced in the yield.

Salzer's Big Boston is a cabbage head, butter type, medium large, about 11 inches across, finely shaped, globular, medium light green with a slight tinge of brown on margins of outer leaves. It is early and hardy, and stands shipping well. The leaf is smooth and is practically not blistered or crumpled, with a tendency to a bright sheen. Heads are tender, brittle, juicy, fine buttery flavor, and the interior is an attractive light golden yellow. Our seeds are the perfected strain of the original Big Boston Lettuce, which is the great market garden and family variety.

553—Pkg., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.50, postpaid.

PARIS WHITE COS

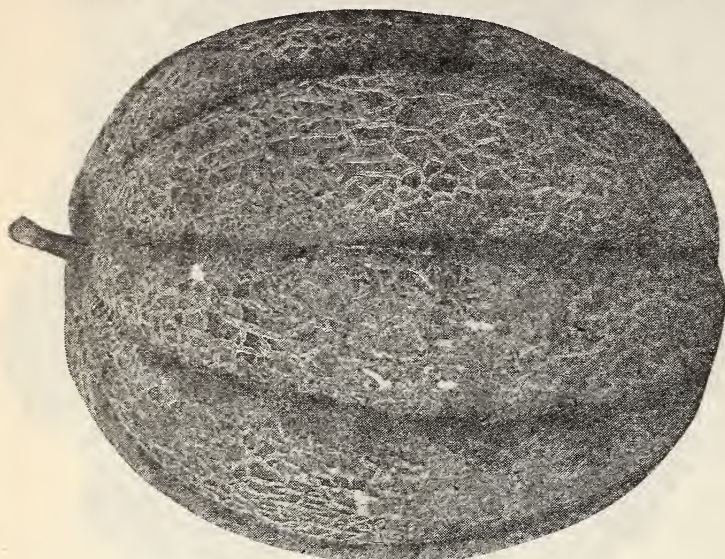

The Cos Lettuces are distinguished from other lettuces in that their leaves are elongated and almost always somewhat spoon-shaped. They are grown in exactly the same way as other lettuce.

When young, the leaves are pale green. When full grown, they form a loose, conical head, outer leaves light green and rather crimped, inner leaves very pale green with the midrib white and very prominent. Very crisp and has a delicious flavor. We strongly urge you to try this variety, as we believe you will be well pleased with it. Succeeds very well everywhere, never wilts under the severest sun and can be grown to an immense size; plants weighing six pounds have been grown of this variety.

598—Pkg., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.50, postpaid.

LETTUCE SEED IS SHORT THIS YEAR. BE SURE TO PLANT GOOD SEED.

Muskmelon---Salmon and Yellow-Flesh Varieties

Salzer's Juicy Fruit Muskmelon

YELLOW MEATED JAPAN

A large, pink-meated muskmelon, very sweet and delicious, and popular for both market and home gardens, but it is not adapted for shipping. A medium late variety.

It is large, nearly round, slightly ribbed, and covered with a thin gray netting. The skin turns yellowish white when ripe. The thick salmon-colored flesh is lusciously sweet, melting, and of a rich, spicy flavor.

It is medium late, the vines are healthy, strong growers, and exceedingly productive.

646—Pkg., 10c; oz., 20c; ¼ lb., 55c; lb., \$1.75, postpaid.

GOLDEN FLESHED HONEY DEW

Of the same fine characteristics as the Green Fleshed Honey Dew described on the opposite page, except that the sweet and sugary flesh is a beautiful, rich golden yellow.

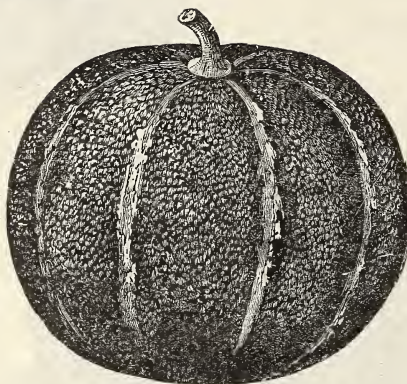

634—Pkg., 10c; oz., 25c; ¼ lb., 65c; lb., \$2.25, postpaid.

SALZER'S OSAGE

On the heavy soils where other varieties do not thrive, Salzer's Osage will succeed; in sandy soils it does even better and is a money-maker for gardeners. It is very seldom that Salzer's Osage does not produce a fine fruit and it holds its rich flavor longer than many other sorts. Splendidly adapted to the cooler climates. Matures in about 90 days.

Salzer's Osage is oval or egg shaped, thick, luscious salmon-colored flesh, slightly ribbed, dark green in color, and nicely netted. Skin turns to a mottled light and dark green as it ripens, with a trace of yellow. Although it will not ship great distances, it is very popular for near-by markets and is an ideal melon for the home garden. A very meaty, luscious, sweet, sugary melon, and we recommend it as one of the finest all-purpose muskmelons. Our Clifford developed seed cannot be equaled.

642—Pkg., 10c; oz., 20c; ¼ lb., 55c; lb., \$2.00, postpaid.

Salzer's Emerald Gem

EMERALD GEM

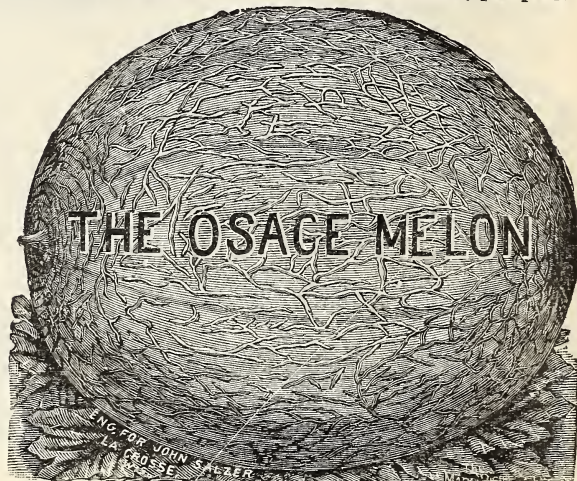

The skin is smooth and deep emerald color, the flesh is thick and of delicate salmon tint. The vines bear early and are exceedingly prolific. It is not recommended for shipping, but it is one of the best quality melons for nearby markets or for home use. Flesh is very thick, with thin rind and small seed cavity. Fruits measure four to five inches in diameter and mature in about 70 days.

639—Pkg., 10c; oz., 20c; ¼ lb., 40c; lb., \$1.25, postpaid.

POLLOCK NO. 25

A salmon-tinted melon of the well-known Rockyford type. Runs very uniform in size, is early and is of the highest quality, with flesh thick, sweet and sugary. Is a splendid shipper.

614—Pkg., 10c; oz., 20c; ¼ lb., 40c; lb., \$1.25, postpaid.

I raised some of your Juicy Fruit Melons, weighing 15½ lbs. and 32 inches in circumference. They are the best melons I ever tasted.—C. Noordhoeck, R. D. 7, Box 121, Wichita, Kans.

GREEN-FLESH VARIETIES SALZER'S EARLIEST RIPE MUSKMELON

Earliest of All. Our attention was called to this Melon many years ago by a market gardener near La Crosse, who for the past years has always had Muskmelons from 8 to 15 days ahead of his neighbors. These Melons were of uniform size, of fine shape and appearance, green fleshed, extremely delicious, and sold readily in our markets at from \$1.25 to \$2.00 per dozen, the profit to an acre being something enormous, as all the Melons were usually sold before other sorts came into the market.

THIS IS THE EARLIEST GREEN-FLESHED MUSKMELON that we know of, being ready for the market in about 60 days after planting. It is nearly round, as may be seen by the illustration, of good size, about five inches in diameter, and of a dark green color outside, heavily netted. The flesh is very thick, of a rich green color, sweet, luscious and melting, and the flavor is unsurpassed by that of any other variety. It is an enormous cropper, bearing for a long time. We sold more than 100,000 packages of this Earliest Melon last year, and we have made just that many thousand melon growers pleased, delighted and happy. If you want to make money on Earliest Melons there is no other variety in the wide world that you can plant that will give quicker returns than SALZER'S EARLIEST RIPE MUSKMELON.

606—Pkg., 10c; oz., 25c; ¼ lb., 65c; lb., \$2.25, postpaid.

SALZER'S SELECTED ROCKYFORD

The standard green-fleshed shipping melon. It is round in shape, heavily netted, and runs very uniform in size. Thousands of cars of Salzer's Selected Rockyford are annually shipped great distances to market. It is one of the finest melons in cultivation, and is found on the bills of fare in all the leading hotels and restaurants of America. The green flesh is firm, thick, of sweet and melting quality, and may be eaten close to the rind. Seed cavity is unusually small. The netting is extremely well developed, closely laced, of gray color, covering the entire fruit. The vines are of vigorous growth, disease-resistant and are enormously productive. Fruits average about 1½ pounds in weight, just the size demanded by hotels and restaurants.

A great market variety and especially recommended for shipping. Matures in about 80 days.

604—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.50, postpaid.

MONTREAL MARKET

The largest of all green-fleshed varieties, and the flavor is deliciously sweet. The fruit is nearly round, slightly flattened at the ends, with broad, regular, deep ribs, skin dark green, densely netted. Flesh is thick, light green, of luscious and melting quality. Because of its immense size, it is a fine variety for fairs and exhibition purposes. Matures in about 100 days.

612—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.50, postpaid.

GREEN FLESHED HONEY DEW

Medium sized, 6 to 7 pounds in weight, about 7 inches in diameter, and slightly oblong. Skin is smooth and when ripe is lemon yellow. Flesh is very thick, light emerald green color, fine-grained, melting, delicious, and good to the rind. Picked just before they are ripe and stored in a cool place, they will keep for a long time. Splendid shipper.

635—Pkg., 10c; oz., 20c; ¼ lb., 55c; lb., \$2.00, postpaid.

VINE PEACH

Similar to, and cultivated like, Muskmelons. Fruits are the size of peaches, bright orange color and are splendid for sweet pickles, pies or preserves.

618—Pkg., 10c; oz., 40c; ¼ lb., \$1.35, postpaid.

EXTRA EARLY HACKENSACK

Also called Turk's Cap. The flavor is sweet and delicious, with green flesh. Has flattened ends, thick irregular ribs and is densely netted. A heavy yielder and very popular.

609—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25, postpaid.

SALZER'S NEW BUSH

Has vines of a bushy type, permitting close planting. Plants grow 18 inches wide and yield heavily. Fruits are deeply netted, with shallow ribs, flesh is light green and of exquisite quality. Matures in 100 days.

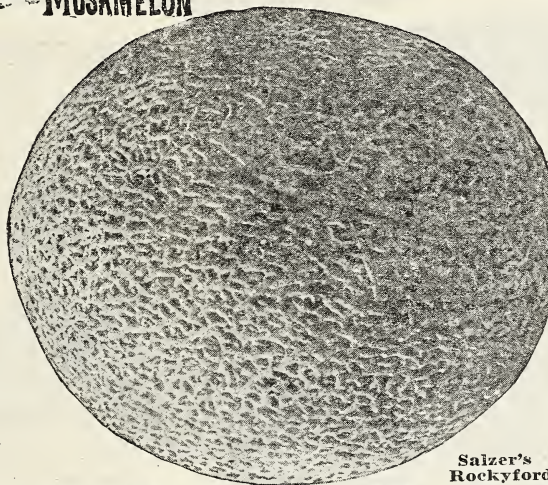

613—Pkg., 10c; oz., 35c; ¼ lb., \$1.25, postpaid.

MEXICAN BANANA

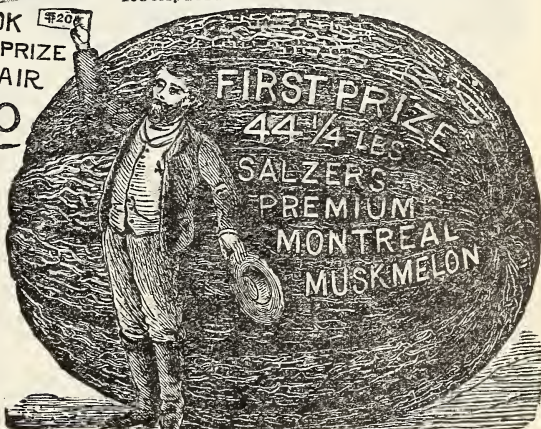

An extremely long melon, tapering at both ends, lemon colored skin when mature, pink flesh, and really having delicious eating qualities.

It resembles the banana in many respects, only that it is very much larger, growing from 18 to 30 inches long and from 4 to 6 inches in diameter.

641—Pkg., 10c; oz., 15c; ¼ lb., 50c; lb., \$1.75, postpaid.

Salzer's
Rockyford

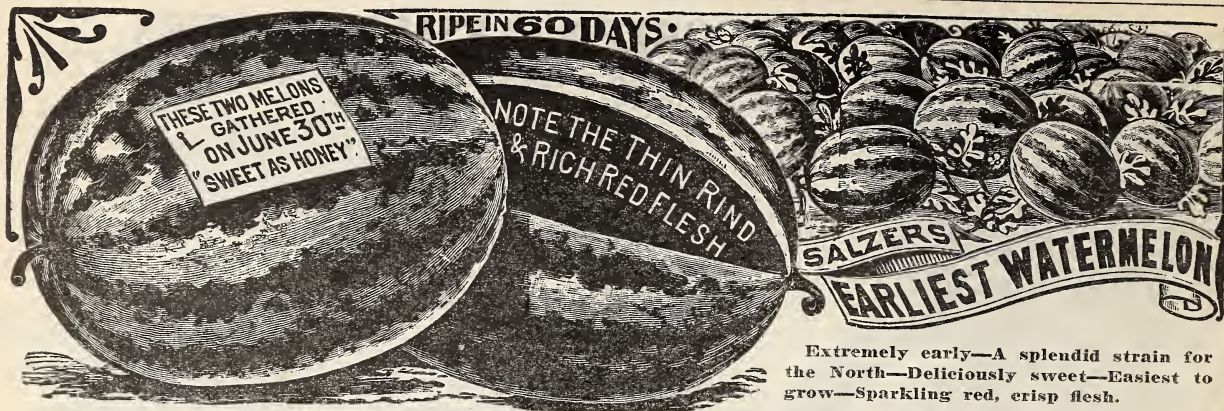

Salzer's Montreal Market

Mexican Banana

When you plant Salzer's Seeds, they come up and grow.—Gerald Willet, Owensboro, Ky.

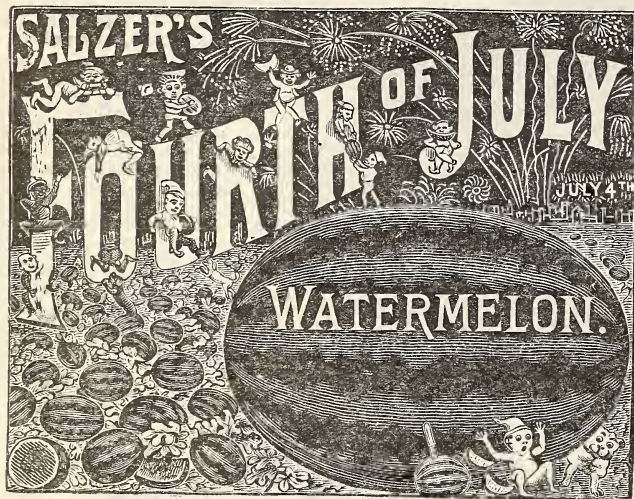

Extremely early—A splendid strain for the North—Deliciously sweet—Easiest to grow—Sparkling red, crisp flesh.

SALZER'S EARLIEST WATERMELON

Especially bred and developed for those sections which have a short growing season, Salzer's Earliest is sure to be the first watermelon on the market, being fit for the table in about 60 days. On the La Crosse market, the earliest melons fetch prices of 50c to 80c each! Salzer's Earliest has been a money maker for market gardeners for years and is in no less demand by the home gardener who wants the very earliest, sweet, luscious watermelons for his own use.

Salzer's Earliest reaches a large size, weighing from 25 to 30 pounds, is rather round in shape, of an attractive light green color and striped irregularly with darker green. It is enormously prolific, vines are vigorous and hardy and it is decidedly a short season melon and especially adapted for the North. The sparkling, crisp, red flesh is of wonderfully fine texture, has a delicious and exceptionally sweet flavor and ripens down to the rind. Unusually uniform in size and shape, it is a splendid shipper, and is a leading market variety in all parts of the country. It is unquestionably the very best extra early watermelon grown and we strongly recommend it. Even in sections too cool to ordinarily grow a crop of watermelons, Salzer's Earliest will ripen and produce fine large melons.

667—Pkg., 15c; oz., 25c; ¼ lb., 70c; 1b., \$2.00; 2 lbs., \$3.50; 5 lbs., \$7.50, postpaid.

SALZER'S FOURTH OF JULY

A sure yielder, a heavy cropper and second only to Salzer's Earliest as an extra-early watermelon. The melting sweetness of this superb melon, the delicious, exquisitely flavored flesh, its hardness and ease of growth, have delighted gardeners everywhere. As far north as Canada, Salzer's Fourth of July will supply the tables just as bountifully as it does in the sunny regions of the South. Matures an abundant crop of first quality melons twelve inches long and nine inches in diameter, weighing about 25 pounds. The rich, red, fine-grained flesh ripens clear to the rind and is most luscious and refreshing. Not suited for shipping but a grand melon for home use and near-by markets. Thrives even under neglect. Matures in about 65 days.

671—Pkg., 10c; oz., 25c; ¼ lb., 60c; 1b., \$1.80; 2 lbs., \$3.25, postpaid.

KING AND QUEEN

Introduced by us this year. See Page 1 for description and inside front cover for illustration.

657—Pkg., 15c; oz., 30c; ¼ lb., 85c; 1b., \$2.50, postpaid.

GOLDEN HEART

A heavy yielding bright golden fleshed melon of rich luscious sugary flavor. It is nearly round in shape with a dark green rind and still darker green mottled stripes. Matures in 90 days. The rich yellow flesh extends clear to the rind. Averages 20 pounds in weight.

692—Pkg., 10c; oz., 15c; ¼ lb., 45c; 1b., \$1.50; 2 lbs., \$2.50, postpaid.

ICE CREAM OR PEERLESS

A white seeded early variety of exceptional merit. Has oblong shape and a very thin rind of a light green color, faintly mottled. A very prolific variety, not adapted for shipping, but fine for home or nearby markets. Splendid for the North; matures in 80 days.

The vines are vigorous, hardy and productive. Flesh is bright scarlet, crisp and exceedingly sweet.

677—Pkg., 5c; oz., 15c; ¼ lb., 35c; 1b., 95c; 2 lbs., \$1.50, postpaid.

COLE'S EARLY

Almost round, dark green, thin rind, black seeded, and very sweet. Not a shipper but fine for nearby markets. Bright red flesh, crisp, solid and sweet. Very early. Matures in 80 days.

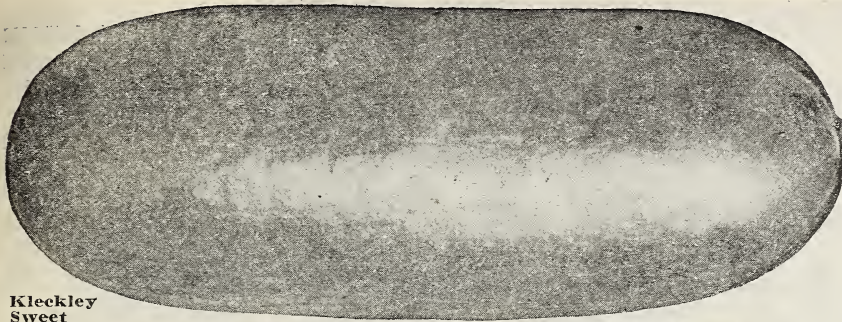

664—Pkg., 10c; oz., 15c; ¼ lb., 30c; 1b., 95c; 2 lbs., \$1.50, postpaid.

RED SEEDED CITRON

Grown exclusively for preserves and pickles. The fruits are perfectly round, striped alternately dark and light green. The flesh is thick, hard, and clear white and the vines are enormously productive. Makes delicious preserves. Seed is red. Matures in 95 days. Will keep for long periods.

663—Pkg., 10c; oz., 15c; ¼ lb., 40c; 1b., \$1.25, postpaid.

I ALWAYS WANT MY SEEDS TO COME FROM SALZER'S.—Mrs. H. A. Mason, Newton Falls, Ohio.

Kleckley
Sweet

KLECKLEY SWEET

Also called Monte Cristo. Fruits are large and it is one of the most widely used for nearby markets. Has a big, solid, superb quality heart and as its name indicates, the flavor is wonderfully sweet. Matures in 80 days.

It is long and symmetrical in shape, frequently reaching 22 inches or more in length, and weighs about 40 pounds. Kleckley Sweet is a medium early strain, the skin is a dark green, and the flesh is a bright red color, very tender and melting.

689—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25; 2 lbs., \$2.20, postpaid.

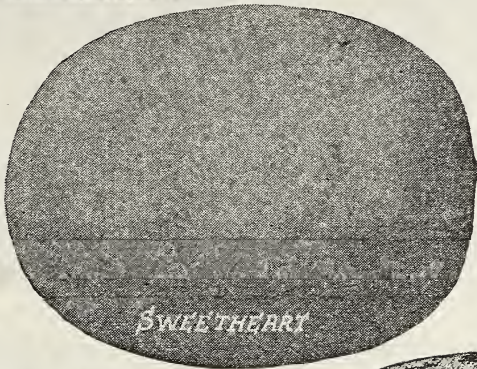

SWEETHEART

A medium early variety producing extremely large melons of excellent quality, the tough, elastic rind making it an excellent shipper. The seeds are black and the flesh very fine. It has an extremely "sweet heart" which is the all desirable essential in a melon.

Vigorous and productive vines. Large, oval, heavy fruits that ripen evenly. The rind is firm, light green, veined or mottled with darker shade.

Bright red flesh, solid, sweet and free from core (hence its name). Keeps well and improves after ripening.

688—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.25; 2 lbs., \$2.00, postpaid.

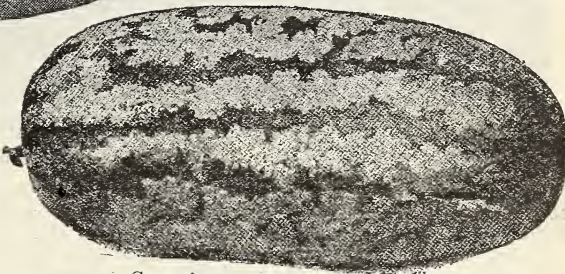

SWEETHEART

GEORGIA RATTLESNAKE

A long, fairly large melon with light green color irregularly mottled with dark green stripes. An excellent shipping melon with unexcelled eating qualities, the Rattlesnake is a standard variety. The seed is white with dark tips and the weight about 25 pounds.

Equally well known as Gypsy Melon. This home and market melon has been a favorite for thirty years. Thin rind, solid, dark red flesh, sweet and tender. Matures in about 90 days.

672—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.25; 2 lbs., \$2.00, postpaid.

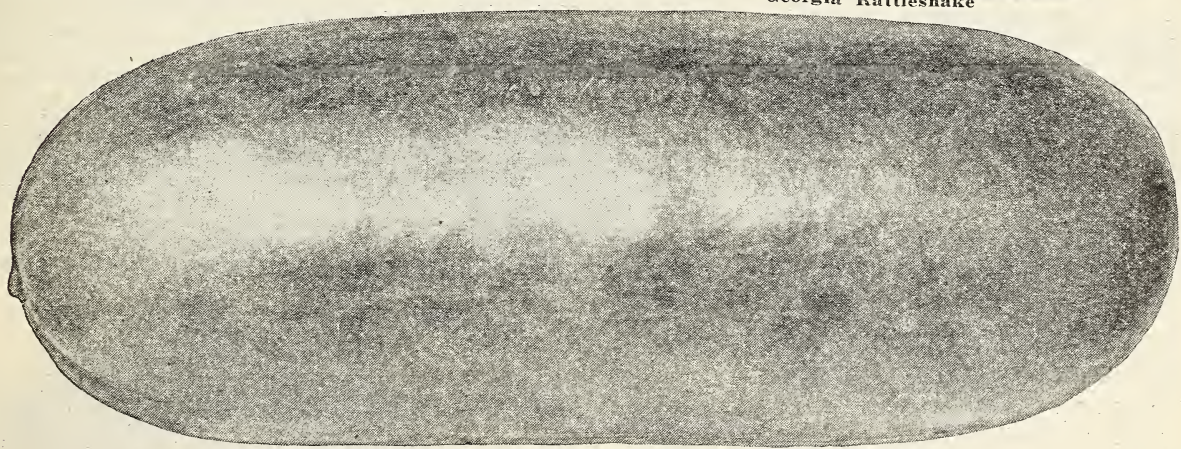

Georgia Rattlesnake

SALZER'S IRISH GREY

Salzer's Irish Grey is a long melon, rather large in size and ranks high with leading shippers. The rind is yellowish light green in color, the seed is white and its average weight is 25 pounds. Eating qualities exceptionally good. We especially recommend Salzer's Irish Grey, because its ability to stand shipping is fully equal to the Tom Watson.

The red flesh is unusually sweet, free from hard centers or stringiness, very firm and compact and does not break when sliced. It ripens in about 90 days and stays in good condition for a long period; withstands long shipping.

699—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.25; 2 lbs., \$2.00, postpaid.

IMPROVED TOM WATSON—THE PRINCE OF WATERMELONS

Without a peer! A melon in a class by itself! Salzer's Tom Watson has surprised everybody by its rapid rise in popularity. It is unsurpassed as a shipper and the big, fine quality melons sell on sight at any market. De Groot and Son of Madison, Nebraska, write, "Sold a load of 62 of your melons at market in 15 minutes." This is a record seldom, if ever, equalled.

The seeds are brown with a sprinkling of white, the rind is deep green indistinctly veined, the shape is long and cylindrical and the melons often attain a weight of 40 pounds and more. The length averages 20 to 30 inches by 10 to 12 inches in diameter, and the deep red, firm flesh extends to within three-quarters of an inch of the rind. Is rather late in maturing.

It is a superior, tough, thick rind, shipping melon, adapted for long distance markets.

The vines are very vigorous and most productive. The flesh is rich red, crisp and of luscious flavor.

693—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.25; 2 lbs., \$2.00; 5 lbs., \$4.25, postpaid.

"People ask me, 'Who has the best seeds?' I always tell them, 'Salzer's'."—V. H. Stevens, 46 Wood St., Willoughby, O.

THE FINEST ONIONS
ARE GROWN FROM
SALZER'S SEEDS

SALZER'S SELECT SOUTHPORT STRAINS OF ONION SEED

See Color Illustration on Page 33

Under heavy expense, Salzer's Select Southport Onion seed has been bred and developed, until today we can proudly and truthfully state that our strains produce the heaviest, largest, and most solid onions—onions that are delicious in flavor, that are perfectly globe-shaped, and that are exceptional keepers.

Salzer's Select Southport strains reign supreme in the most severe test of an onion, which is its keeping quality. There are none better for keeping. The young plants provide a very delicious salad in spring, and may be used boiled or raw before maturity, or cured and kept through the winter. Our Southport strains have been bred to produce the same uniform shape, and to leave the onions practically devoid of neck when the tops have been dried off. This feature is extremely important, as the necks are a menace to the keeping quality of the onions. We are ideally situated to supply our customers with the finest stocks, no matter how large the order, and are certain that our strains will give the utmost satisfaction.

SALZER'S SELECT SOUTHPORT YELLOW GLOBE

Our selection of Southport Yellow Globe is an especially fine Onion. It is of quite large size, averaging from 3 to 3½ inches in diameter, of beautiful globe shape, with a very attractive light yellow colored skin, and is a heavy yielder. Matures in approximately 110 days. The bulbs ripen down to a solid ball, thus insuring the best keeping qualities. The flesh is a creamy white, fine grained, exceedingly mild, crisp, tender and sweet. Very popular on account of its cooking qualities. Immense yields have been reported by private and market growers. Mr. Earl Nicholas, Mingo, Kans., writes, "Had 180 square rods in onions this year and they netted me \$250.00 clear. You always have real seed and it produces real goods, which, as a result, sell for good prices."

752—Pkg., 10c; oz., 20c; ¼ lb., 60c; 1b., \$2.15; 2 lbs., \$3.95; 5 lbs., \$9.15, postpaid.

SALZER'S SELECT SOUTHPORT RED GLOBE

Our Southport Red Globe onions are a most attractive variety, with outer skin a rich purplish-red. Like our Yellow Globe, they have been bred to uniformity, as little neck as possible, and a size of about 3 to 3½ inches. The Red Globe has a very attractive appearance, with the flesh faintly tinged a purplish-red. It has a trifle stronger flavor than the yellow and white varieties, and has the same excellent keeping quality as the yellow. Under good cultivation our customers report yields of 1,000 bu. and more per acre. The slim, slender necks insure an early and sure ripening. The tops die down uniformly when the onions are ready to be pulled, and the fully matured and properly cured onion will keep all winter.

Takes about 110 days to mature.

750—Pkg., 10c; oz., 20c; ¼ lb., 60c; 1b., \$2.15; 2 lbs., \$3.95; 5 lbs., \$9.15, postpaid.

SALZER'S SELECT SOUTHPORT WHITE GLOBE

A most beautiful Onion. A very ball of silver with thin, delicate, pure white skin. The white globe onions do not grow as large nor do they yield as well as their colored brethren, but they average from 2 to 2½ inches in diameter, and the yields on good lands under proper cultivation are from 800 to 900 bu. per acre. The flesh is fine grained, crisp, of a very fine flavor and snowy white in color. Our strain is grown with the greatest care and is so superlative in quality that it has become nationally known. This white onion is in great demand in every market and will always bring the top price. Care, however, should be taken in harvesting and storing these Onions so as to always have them of the finest appearance. As soon as harvested they are best stored away in a cool, dark shed to dry, for if exposed to sunshine, rain or dew they will surely be discolored. Matures in about 120 days.

751—Pkg., 10c; oz., 25c; ¼ lb., 85c; 1b., \$3.00; 2 lbs., \$5.60; 5 lbs., \$13.15, postpaid.

WRITE FOR SPECIAL PRICES OF ONION SEED IN QUANTITIES.

SALZER'S SELECTED GREAT RED WETHERSFIELD

The Most Largely Grown Red Variety—the Greatest Cropping and the Standard American Red Onion

Large bulbs, flattened, but quite thick, with rich, dark purplish skin and pure white flesh of good, mild flavor. Our stock is well bred and will invariably grow crops quite free from necky and mis-shapen bulbs, and onions of the largest size averaging about ½ lb. each, but specimen bulbs of one and even two pounds have often been grown from our seed. Salzer's Great Red Wethersfield produces larger crops than any other American red onion and these bulbs keep longer in good condition than those of any other sort. It gives its largest yield on rich land, but on poor and dry soils it yields better than any other sort. It is a medium early kind, maturing in about 100 days, and is adapted to varied soils and to adverse climatic conditions. Has an exceedingly fine neck, and long, slender leaves of a clear green color.

From every section of America we have received glowing letters of the success our customers had with this splendid Onion, sweeping every state and county fair before them. One raised 16 bu. from 1 ounce; another 200 bus. from 1 pound; a third over 1,000 bus. per acre, etc.

This is the onion for the farmer, the citizen and the gardener to grow, to put in their cellars for the winter, because it is one of the easiest to grow, is certainly one of the best keeping Onions, always being of excellent quality. It's the greatest money-maker, because it is so heavy a yielder, and all Onions are so fine that they sell at good prices in all markets. John Honzik, Malin, Ore., writes, "My Red Wethersfield Onions, your seed, weighed from 1 to 2 lbs. each."

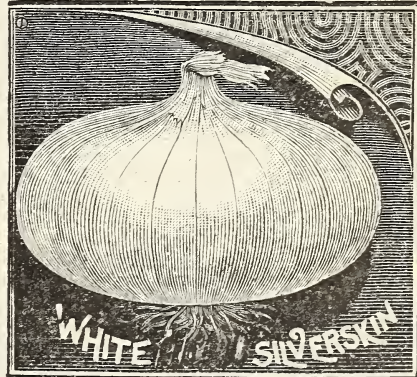

791—Pkg., 10c; oz., 20c; ¼ lb., 55c; lb., \$1.95; 2 lbs., \$3.50; 5 lbs., \$8.00, postpaid.

WHITE PORTUGAL OR SILVERSKIN

A very popular and widely grown white onion. It is a splendid sort for growing white onion sets, pickles, and for early bunching green onions, and we urge every gardener to make a liberal sowing of this variety for continuous use. There are none that furnish more delicious young plants for salad purposes and for boiling greens during their growing season. The large, mature onion is of mild and pleasant flavor and is of somewhat flattened shape. A great seller on the market. It is very popular for family use, it is an ideal slicer and the smaller bulbs are unsurpassed for pickling purposes. Matures quickly and may be sown as late as June to produce small pickling onions by fall. Keeping qualities are not

of the best, but it is splendid for early winter use. Matures in 110 days.

757—Pkg., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.25; 2 lbs., \$4.40; 5 lbs., \$10.75, postpaid.

White Portugal or Silverskin

AUSTRALIAN BROWN

Unsurpassed in keeping qualities, early and a sure and heavy cropper. It keeps well into spring without sprouting or shriveling, and much longer than other varieties. Salzer's Australian Brown is a hard variety, of medium size, with rather thick skin of a rich amber brown color. Flesh is white, fine-grained, very mild and sweet in flavor. It begins to form a bulb at an early period of its growth, and quickly reaches maturity. Matures in about 105 days. Extensively grown for onion sets and a splendid variety for the North. The winter supply of a great many people consists chiefly of this variety.

737—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.35; 2 lbs., \$2.60; 5 lbs., \$5.75, postpaid.

SALZER'S PRIZETAKER

THE GIANT OF ALL YELLOW ONIONS

HEY! THERE! SAVE ME A FEW BASKETS OF PRIZETAKERS!

NOT ENOUGH PRIZETAKERS TO MEET THE DEMAND

"NOTHING DOING UNTIL MY NEIGHBOR IS SOLD OUT AND THAT WON'T BE LONG"

GROW BETTER ONIONS

"I am sending you a picture of my field of Salzer's Prizetaker Onions. They are beautiful onions. The yield was heavy and many of the onions weighed $3\frac{1}{2}$ to $4\frac{1}{2}$ pounds each."—Joseph Dezurik, Royalton, Minn.

See Page 48 for plants of this variety.

SOW SALZER'S SEEDS

"I planted $\frac{1}{4}$ acre of your Prizetaker Onion Seed last spring and grew the finest onions ever. Am sending an order for more seed as I want to plant part of my next year's crop this fall."—H. K. Porter Morgan, Utah.

See Page 48 for plants of this variety.

SALZER'S FAMOUS PRIZETAKER

Among large onions, Salzer's Prizetaker always attracts attention by its fine size and great beauty. It is of the same type as the large Spanish onions that have been imported and sold at high prices. Plant Salzer's Famous Prizetaker this year and see what splendid size, what perfect symmetry, what delicious mildness, what fine even grain, what productiveness, what all-around attractiveness has been developed and bred into this onion at Cliff-wood Farms. No need for the large Spanish onions only to sell at high prices. They cannot be distinguished from Salzer's Prizetaker, and Salzer's Prizetaker is even more superior in delicious flavor and fine appearance. It always sells at sight and at high prices—seldom for less than 5c per pound. In addition, Prizetaker comes in at a time when other onions are scarce, so the price is always high. It is a money maker for the trucker and has always given the best of satisfaction to the home gardener.

Is of clear, bright straw color, very productive, beautifully globe shaped, has a very small neck and ripens up fine and hard. Flesh is pure white, crisp, extremely sweet and mild in flavor, being unequalled even by the Spanish onions. Keeping qualities not of the best, but this is no drawback, as the onions find a ready sale always, at higher prices than other onions. Succeeds well in all sections of the country; matures rather late, in 130 to 140 days. See Page 48 for onion plants.

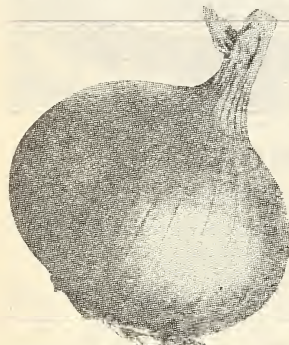

748—Pkg. 10c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00; 2 lbs., \$3.75; 5 lbs., \$8.75, postpaid.

SALZER'S YELLOW GLOBE DANVERS

It is an excellent early variety, quick to mature, and is a remarkably good keeper. Because of its quickness in maturing it is an ideal onion to plant in the North. Yellow Globe Danvers is very productive, is an excellent keeper, is mild and full flavored, and has a uniform rounded shape, which is almost spherical. It is perhaps the best all around onion, and is very highly esteemed and very well liked by all those who grow only one variety. Of a rich, coppery yellow, it reaches $2\frac{1}{2}$ to 3 inches in size, with coats numerous and closely set.

Extensively used for general cultivation for home and market. A main crop and standard yellow onion everywhere. Produces medium to large sized bulbs of a uniform globe shape that ripen very evenly. Necks ripen down small. It is a good, reliable shipper. Attractive, rich, yellow skin.

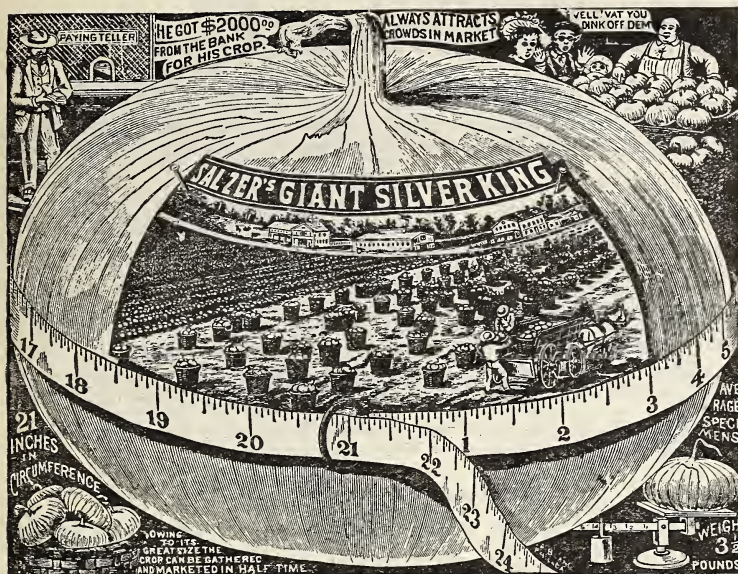

The flesh is creamy white, crisp, tender, mild and of fine flavor. For general table and cooking use this variety is unexcelled. Grows well anywhere in the United States. Matures in 120 days.

Salzer's Yellow Globe Danvers
(Much reduced in size.)

755—Pkg., 10c; oz., 15c; $\frac{1}{4}$ lb., 50c; lb., \$1.75; 2 lbs., \$3.25; 5 lbs., \$6.95, postpaid.

We cannot do without your good and very fine onion seed.—Miss Anna B. Warnock, R. D. 3, Box 66, Lyndon, Ohio.

SALZER'S GIANT SILVER KING ONION

Ideal for exhibition, fancy market or for the home table. We have grown specimens at Cliffwood Farms, 22 inches in circumference instead of 21 inches, as shown in the illustration, and weighing 4 pounds. Matures early and is uniformly large and of fine shape, flattish round and thick. The silvery white skin is very thin and the fine grained, white flesh is of such mild and deliciously sweet flavor that it can be eaten raw like an apple. Fully grown, they measure five to seven inches in diameter; they mature evenly and keep well in storage. No other white onion attains such mammoth size, nor will any other white variety grow so uniformly large. Salzer's Giant Silver King is enormously productive and every one desiring the largest and handsomest white onions of the finest flavor will be more than satisfied with this superb strain. Matures in 110 days.

742—Pkg., 10c; oz., 25c; ¼ lb., 70c; lb., \$2.50; 2 lbs., \$4.75; 5 lbs., \$11.25, postpaid.

WHITE BERMUDA

Salzer's White Bermuda onion seed is grown by us at Teneriffe, Canary Islands, and is of the finest quality obtainable. Can be grown in the North as well as in the South, with fine results, as they are a quick maturing variety, and heavy yielders.

A good many carloads of them are produced in Texas, which are grown during the winter, and arrive in the northern states some time in May; they are the earliest, large, new onions that can be had in spring, and these large, beautiful, mild flavored bulbs always find a ready market at very good prices and have proven a source of great profit to the growers.

It is a large yielder, consequently a highly profitable type to grow. The name is somewhat misleading, as the skin is a pale yellow or straw color; the flesh, however, is a clear, sparkling white. It is extremely mild, deliciously tender, and of a pleasing flavor. See Page 48 for plants.

756—Pkg., 10c; oz., 25c; ¼ lb., 80c; lb., \$3.00; 2 lbs., \$5.75, postpaid.

RED BERMUDA

The old original variety and as popular as ever. Very flat, grows about 3 to 3½ inches in diameter. Has a skin of light pink color. The flesh is pinkish white. Teneriffe grown seed.

749—Pkg., 10c; oz., 20c; ¼ lb., 75c; lb., \$2.50; 2 lbs., \$4.75, postpaid.

SALZER'S WHITE QUEEN

Our finest pickling onion, also known as White Pearl. It is of exceptional quality and the best of all the white picklers, growing to a size of about 1 inch by ½ inch thick, with a fine neck, and is an exceedingly early strain. Onions remain hard and solid and more than one crop may be gathered for pickling in one season from successive sowings. Although used more for pickling, they are of value for early green bunch onions for early use. They have a mild, sweet flavor. It is not quite as good a keeper as the Paris Silver Skin below, but it is a smaller onion and hence more used for pickling.

787—Pkg., 10c; oz., 20c; ¼ lb., 70c; lb., \$2.50; 2 lbs., \$4.75, postpaid.

PARIS SILVER SKIN

Silvery white, flattened bulbs. It is one of the best early sorts, very good for pickling and is of mild, pleasant flavor. Also much used for early green bunching onions. Trifle larger than the White Queen.

731—Pkg., 10c; oz., 20c; ¼ lb., 70c; lb., \$2.50; 2 lbs., \$4.75, postpaid.

EARLY WHITE WELSH

Planted for green onions only; this variety does not form bulbs, but only a small enlargement at the base of each shoot; it is extremely early. It is a perennial and stays in the ground for years. Market gardeners will find it a profitable crop.

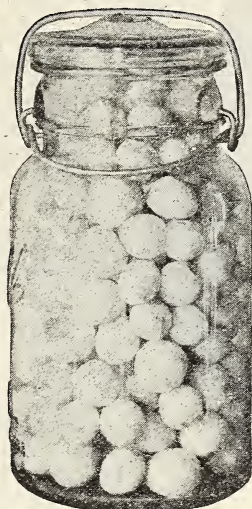

738—Pkg., 10c; oz., 25c; ¼ lb., 80c; lb., \$2.75, postpaid.

ONION SEED IN MIXTURE

Contains various sorts of onions, all colors, shapes and sizes. If you wish a mild, white onion for salads, if you wish one with a stronger flavor, or a red, yellow, or brown color—you can pick whatever you want, whenever you want it, if you plant our onion seed mixture. For years we listed this as "Grandpa's Conglomeration," and it has always been popular.

758—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.50, postpaid.

Have bought your seeds for 30 years and have always found them the very best.—John T. Hirt, R. D. A, Box 333, Modesto, Calif.

SALZER'S WHITE QUEEN

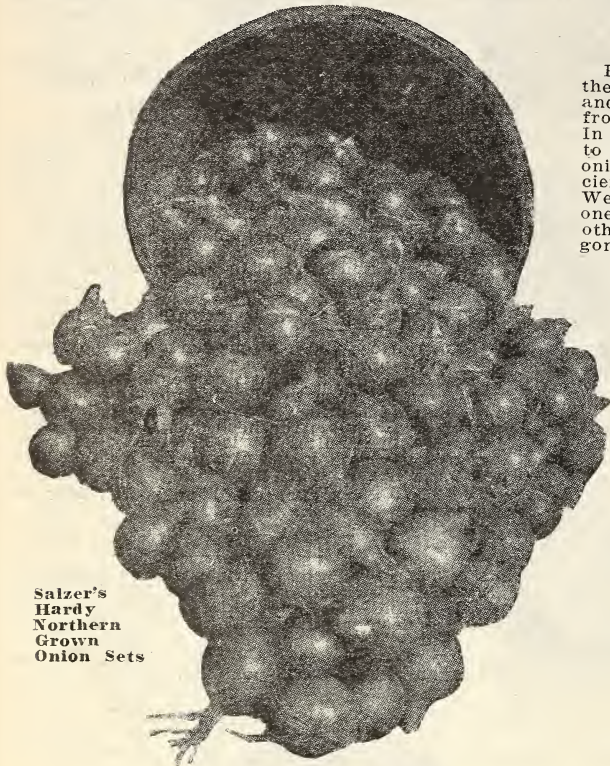

Salzer's Extra-Hardy Onion Plants

You no doubt know how easily and satisfactorily onions are grown from sets. Now we can furnish genuine Prizetaker and Bermuda onion plants. We listed these two varieties last year and are growing 5,000,000 plants for the anticipated demand this year. The plants grow better shaped onions and onions that keep better than those grown from sets. They are even more hardy than the Cabbage Plants listed on Page 18, standing heavier frosts and even light freezes without being killed.

You can have extremely early green onions for pulling and you can have fine, large, mature onions about 2 weeks earlier than can be had from sets and very much earlier than from seed. Also, onions from plants seldom run to seed, which is a big advantage to growers. You can set these plants out just as soon as you can get them into the ground—the same as with cabbage plants. This means that you'll get earlier crops of fully developed and larger onions—the very first onions for your own table use or the very earliest onions that bring the top prices at market. We can only supply Prizetaker and Bermuda plants for description of which see Pages 46 and 47. Orders must be for at least 100, and in multiples of 100 of one variety. That is, we cannot ship any orders for 50 or 150 of one variety and the balance in the other variety.

SALZER'S PRIZETAKER AND WHITE BERMUDA PLANTS—100 plants for 55c; 200 plants for \$1.10; 300 plants for \$1.65; 400 for \$1.85; 500 for \$2.00; 600 for \$2.30; 700 for \$2.70; 800 for \$3.10; 900 for \$3.30; 1,000 for \$3.50, postpaid. Not prepaid: 1,000, 2,000, or 3,000 at \$2.75 per 1,000; 4,000 and more at \$2.25 per 1,000. Shipping weight, per 1,000 plants, 25 pounds.

NOTE: Onion plants are shipped between December 1st and May 1st. They are shipped direct from our growing station and are therefore not sent with seed orders. No orders accepted after May 1.

Salzer's
Hardy
Northern
Grown
Onion Sets

Salzer's Onion Sets

Planting our Hardy Northern Grown Onion Sets reduces the amount of labor to a minimum, the crop is surer to grow and is ready for use several weeks in advance of that grown from seed. We urge the small planter especially, to use them. In fact, the ideal way is to use both sets and seeds—the sets to grow spring and summer onions, and the seed to grow onions for late fall and winter use. A pound or two is sufficient for a small family and about 10 bushel plant an acre. We sell sets by weight only; one bushel equals 32 pounds, and one quart, one pound. When one variety is exhausted, unless otherwise ordered, we ship another. Thus, if yellow are all gone, we fill an order with white or red, etc.

Crop very short.

SALZER'S PERENNIAL TOP SETS

Also known as Egyptian Top Sets. Stay in the ground all year long, and produce onions as soon as the snow leaves. They are hardy and will bear for many years.

See current price list.

SALZER'S GARLIC

Salzer's Garlic—Lb., 45c; 2 lbs., 85c; 8 lbs., \$3.15, postpaid.

Okra

Okra is sometimes known as Gumbo. It is used largely in the South, but is also becoming popular in the North, being eaten either as a separate dish, or in soups, stews, etc., or for pickles. It is easy to grow and succeeds just as well in the North as in the South. Very prolific. Should be gathered and eaten while still young and tender. To keep for winter use, slice the pods into narrow rings when young and tender, string them and hang in the shade to dry.

PERKINS MAMMOTH LONG POD

About three feet high; pods often eight to nine inches long when ready for use, of dark green color, produced in great quantities and quite early, being fit for use in about 50 days after sowing.

731—Pkg., 10c; oz., 15c; ¼ lb., 20c; lb., 75c, postpaid.

WHITE VELVET

It is very distinct in appearance, and unlike other varieties, the pod is not ridged, but is perfectly smooth and round. It is superior in flavor and tenderness. The plants are comparatively dwarf and of compact branching growth; the pods are of extra large size and produced in great abundance.

732—Pkg., 10c; oz., 15c; ¼ lb., 20c; 1 lb., 75c, postpaid.

Mammoth
Okra

Had wonderful results from your White Onion Sets last year. Every one grew. They keep fine, as we still have ½ bushel that are as good as ever.—Mrs. Ben L. Sheldon, Roscoe, S. D.

Salzer's
Double
Moss Curled

Parsnip

SALZER'S HOLLOW CROWN

Parsnips prefer very wet soil and will thrive where carrots will not grow. They make splendid stock feed, and horses prefer them to carrots. A freeze is required to sweeten them. For the best results, deep soil is needed, and fresh manure should not be used as it will cause the roots to divide.

Salzer's Hollow Crown is a grand variety, one of the best. It is enormously productive, roots are 10 to 12 inches long and about 3 inches thick at the shoulder. It is rich in saccharine, has smooth white skin, is uniform in shape, is sweet, tender, sugary. Not only of fine table quality, but the heavy yield and high sugar content make it very desirable for stock feeding. Parsnips will improve the richness of your cows' milk and are also relished by horses. Matures in 130 days.

832—Pkg., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.25; 2 lbs., \$2.25; 5 lbs., \$5.00, postpaid.

SALZER'S DELMONICO

This nationally famous strain, introduced by us, does not require such deep soil for its cultivation. It is a stump rooted variety and hence easily harvested. Roots reach a length of about 8 inches, with a thick broad shoulder, skin is smooth and white, and the flesh is fine-grained, sweet, sugary, tender and most excellent for table use. Very early, maturing in about 115 days. It is a most prolific yielder, it contains more saccharine, is sweeter and more nutritious than other sorts, and as it is so easily harvested, large acreages are grown for stock feeding. Thrives on almost any soil. This splendid variety surpasses every other in yield and quality.

833—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$1.75; 2 lbs., \$3.25; 5 lbs., \$7.50, postpaid.

Rhubarb---SALZER'S MONARCH

Rhubarb is used extensively for making tarts, pies, sauces and preserves. It is very palatable and delicious. No plant is more easily increased and multiplied than rhubarb. Every family should have some Salzer's Monarch Rhubarb in their garden. No other Rhubarb excels Monarch in richness, tenderness, juiciness, earliness, or freedom from stringiness. Rich, attractive crimson color—vastly superior to the old sorts. Stalks grow to large size without loss to its quality. Cliffwood grown seed. See Page 8 for Roots.

1053—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.25, postpaid.

Parsley---DOUBLE MOSS CURLED

Salzer's Double Moss Curled grows about 7 or 8 inches high, is of rich dark green color and vigorous and compact growth. It is a handsome decorative type, the leaves being beautifully crimped and curled; often used as a border for beds and walks and is unsurpassed for garnishing meat dishes, etc., and for flavoring soups and other dishes. Parsley germinates slowly, but it is hardy and easy to grow and thrives on almost any soil. Matures in about 65 days. May be potted and grown indoors for winter use. Mrs. Wm. Schuette, Box 225, Carpentersville, Ill., writes, "Had the loveliest parsley from your seed that I ever saw. It did not freeze out until January 16."

822—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

DWARF TRIPLE CURLED

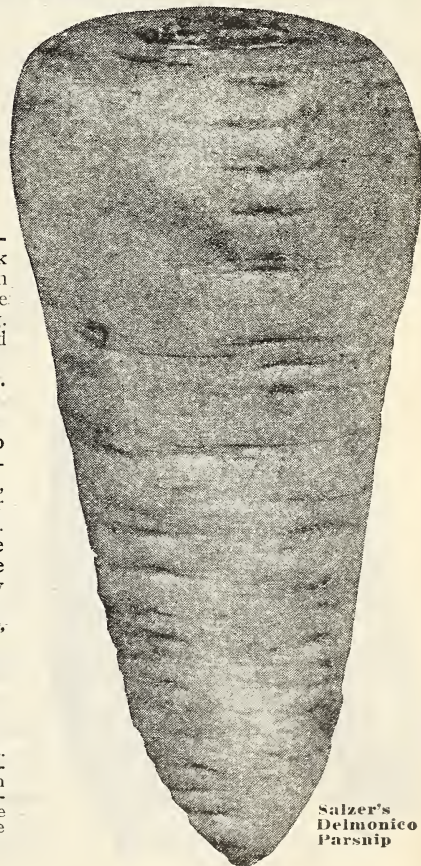

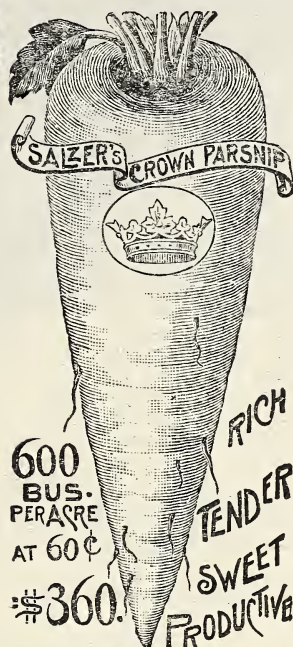

A quick growing, distinct dwarf and handsome variety of compact growth with finely cut and closely curled leaves of a deep emerald-green color; very attractive when used for garnishing, also excellent for flavoring, the leaves being very aromatic. A good variety for general cultivation. Ready for use in approximately 70 days from sowing of seed.

823—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.10, postpaid.

TURNIP ROOTED

This variety of parsley is grown for its thick, fleshy root, which resembles a small parsnip, and is most delicious in soups, stews, etc. Flesh is white and fine grained. Try it this year. Matures in 90 days and keeps well for winter use. The leaves are plain, and hence not so attractive for garnishing.

826—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

Salzer's
Delmonico
Parsnip

Your Delmonico Parsnips yielded 50 bushels out of 6 rows, 20 rods long. Sold them at \$1.00 a bushel.

—H. Carver, 592 Charlotte St., Peterborough, Ontario, Canada.

Peas

Round Seeded
Extra Early Sorts

SALZER'S EARLIEST AND BEST

This Pea is the EARLIEST WHITE, SMOOTH PEA on earth! It's the pea for you, Mr. Market Gardener, Mr. Home Gardener, to plant, whether by the package or by the bushel. It's the greatest, earliest, big profit pea! Hundreds of thousands of customers, small buyers and large buyers, all over the United States and in foreign countries, have sown this world-famous strain, and everybody acknowledges it the earliest, finest quality, and biggest money-making round, smooth pea in cultivation.

Salzer's Earliest and Best matures the entire crop at one time. It grows from 18 to 30 inches high, is extremely prolific, bearing from 8 to 12 straight pods, each containing 7 to 8 medium sized, smooth, round peas, which are sweet and of excellent flavor. They are yellowish-white when ripe. Ready to pick for the market in 42 days. Yields of from 250 to 300 bushels of green peas per acre have been reported of this variety, and have been sold at from \$1.75 and even more, per bushel. It is the pea to plant for an extra-early money making crop. Can be sown as early in spring as the ground can be properly prepared. Salzer's Earliest and Best is a grand variety for succession sowing, owing to its ability to resist mildew and to defy frost, both in spring and in the fall.

846—Pkg., 10c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid. Not prepaid: 10 lbs. or more, at 15c per lb.

SALZER'S SCORCHER

Another great extra-early, hard, smooth pea, of medium height, very productive and a splendid canner. A companion in earliness to the above strain, as we have bred and developed it to mature only a day or two later than Earliest and Best. The pods are of medium size, about 2 3/4 inches long and are literally packed with smooth, bluish-green sugary peas of melting quality. The vines, of vigorous growth, grow 2 to 3 feet high, and are very prolific. It has table quality, it is extra-early, it is immensely productive, it is most popular for canning, it produces a crop under varied conditions. Entire crop can be picked at one time. Order early as crop is short.

848—Pkg., 10c; lb., 45c; 2 lbs., \$5c; 5 lbs., \$2.00, postpaid. Not prepaid: 10 lbs. or more, at 24c per lb.

SALZER'S ALASKA

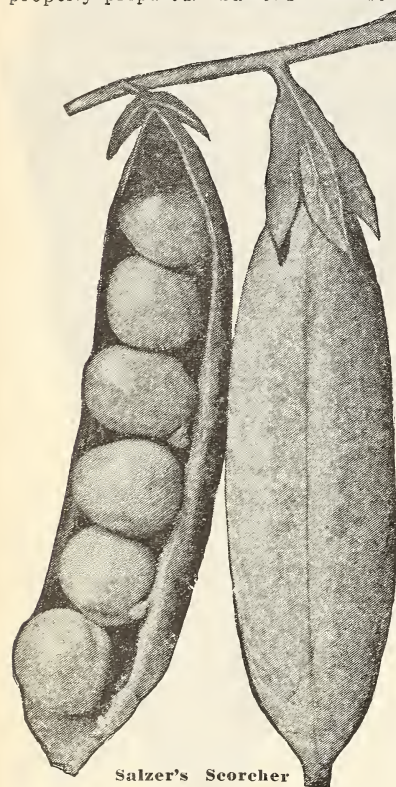

Crop is very short this year. Order early so you will not be disappointed. An extra-early, standard, smooth pea, widely grown for canning. A heavy yielding, vigorous growing vines about 2 feet high, bearing fine pods of a dark green color, about 2 1/2 inches in length, and blunt at the apex. They are well filled with small, smooth peas of a bluish-green color. Matures in about 50 days. Matures practically the entire crop at one time.

844—Pkg., 10c; lb., 40c; 2 lbs., 70c; 5 lbs., \$1.65, postpaid. Not prepaid: 10 lbs. or more, at 21c per lb.

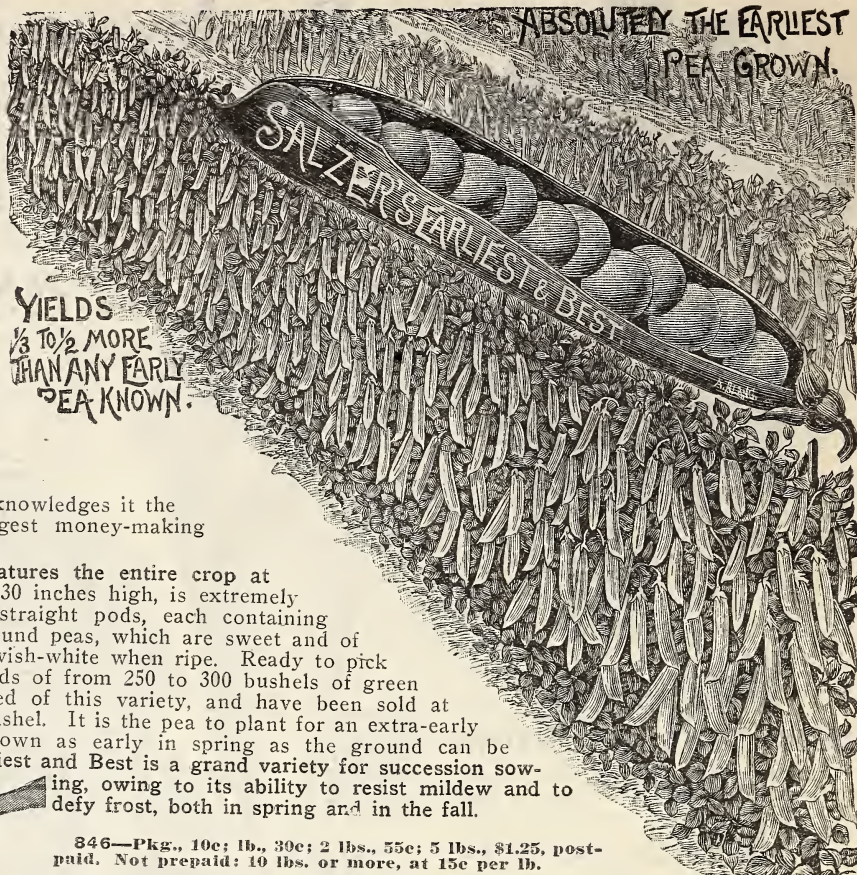

HUMOGERM INOCULATING BACTERIA FOR PEAS

We recommend the inoculation of peas before planting. Inoculated peas grow faster, mature earlier, and produce a larger crop. Full instructions on each package. Peas weight 60 pounds to the bushel.

Pea in Cultivation.

SALZER'S RECORD BREAKER SIX WEEKS PEA

See Color Illustration on Page 34

"I planted your Record Breaker Pea and I cannot say too much for it. It speaks for itself. I was surprised at their swift maturity and productiveness. You know what the farmer wants is a rush crop and your seeds surely 'rush' the crops."

So writes Mrs. Anna Munger, Hayward, Wisconsin. Wisconsin produces about half of the entire pea crop of the entire country; its pea canneries constitute a gigantic industry! Is it any wonder then, that Salzer's Northern Grown Peas are the finest obtainable? Our Record Breaker Six Weeks is a whirlwind for quality and maturity. Sweet, luscious, melting, highest quality, wrinkled peas, ready to be picked, for table or market, in 42 days.

Pods are rich dark green color, about 3 inches long, narrow and nearly round, borne singly, containing 7 to 9 peas each. Grows about 12 inches high, vines are vigorous and hardy. The seed is slightly dented. Pods are produced in riotous profusion and are literally jammed with delicious sugary peas, that fairly "melt in your mouth." It will please you beyond all expectation. Splendid for the home gardener, as well as the market gardener. Peas are short this year, and we urge you to place your order as early as possible.

849—Pkg., 15c; 1b., 60c; 2 lbs., \$1.15; 5 lbs., \$2.75, postpaid. Not prepaid: 10 lbs. or more, at 34c per lb.

SALZER'S LITTLE MARVEL

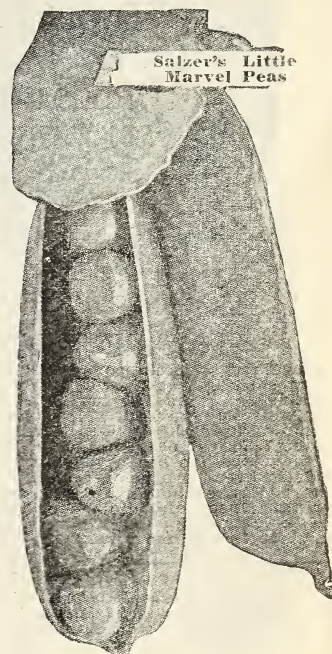

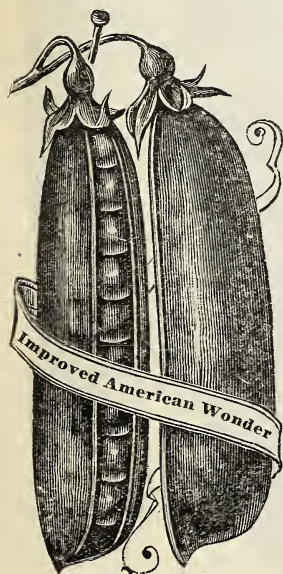

A superb extra-early dwarf, wrinkled pea, remarkable for its very early and very heavy crop of dark green pods, which are filled with 7 and 8 large, dark green peas of a sugary, delicious flavor and melting quality. Vines of vigorous growth, reaching a height of 15 to 18 inches. Has received Award of Merit from the Royal Horticultural Society. One pound of seed has produced a crop of 300 pounds of peas. A veritable marvel of earliness, quality and productiveness. Matures in about 48 days.

831—Pkg., 10c; 1b., 40c; 2 lbs., 75c; 5 lbs., \$1.75, postpaid. Not prepaid: 10 lbs. or more, at 21c per lb.

IMPROVED AMERICAN WONDER

Extra-early, dwarf or short-vine variety, growing about 12 inches tall, bearing short, rich green pods filled with 6 to 8 luscious wrinkled peas. Exceedingly productive and a great favorite in all sections, especially for the home gardener as it requires no support. Matures in about 48 days. Fresh early peas, from your own garden, are the most delicious you can get.

878—Pkg., 10c; 1b., 40c; 2 lbs., 75c; 5 lbs., \$1.75, postpaid. Not prepaid: 10 lbs. or more, at 20c per lb.

Only have a small garden plot, as we live in town, but we like your seeds best of all.—Mrs. A. Brackett, 1945 Wilson, St., Selma, Calif.

Peas--Early and Second Early

SALZER'S GIANT LAXTONIAN

It is extremely large, in fact the largest podded of all the early dwarf wrinkled varieties. It is delightfully sweet in flavor. It is one of the most luscious or melting peas possible to grow. Being large, it, of course, naturally follows that it is very productive.

In the Laxtonian we have a superlative quality dwarf type of the exquisitely flavored Gradus, with larger pods and growing only 16 to 18 inches high, requiring no support, a few days earlier in season, and of a little darker green color. Laxtonian has made for itself a new class of wrinkled garden peas, the giant podded early dwarfs. Ripens about the same time as the first early and is ready to pick, green for table, in about 55 days from time seed is sown. The pods measure 4 inches or more in length, slightly curved with a sharp curve at the end and are as large as those of the Telephone and of a dark green color. Similar to Gradus in shape, filled with eight to ten large, delicious peas, almost double the size of any other early dwarf peas. Unsurpassed in quality and yield by any other dwarf pea.

880—Pkg., 10c; lb., 50c; 2 lbs., 95c; 5 lbs., \$2.15, postpaid. Not prepaid: 10 lbs. or more, at 24c per lb.

SALZER'S GRADUS

An early wrinkled pea of superb quality, a real table luxury. Often called "Prosperity." The hardy and vigorous vines grow about 2½ feet high, pale green in color, and bear singly and most freely, from top to bottom of the vine, huge pods about 4 inches long, that contain 7 to 10 peas of delicious quality, sweet, tender and sugary. Matures its crop in about 57 days. Pods are straight, light green and slightly rounded at the point. This remarkable pea is one of the most widely known in cultivation and is ideal for market gardeners and home gardeners alike. We receive numerous testimonials every year as to the great satisfaction this variety gives.

855—Pkg., 10c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.85, postpaid. Not prepaid: 10 lbs. or more, at 21c per lb.

THOMAS LAXTON

A splendid market-gardener sort, and especially recommended for the home garden. The most productive of the tall, wrinkled, early sorts, and in quality one of the very best. The pods are large, about 4 inches long, square on the end, and contain a large number of sweet, tender and luscious peas of melting quality. Vines 3 to 3½ feet long, rich dark green in color; pods contain 6 to 8 peas. Matures in about 59 days.

858—Pkg., 10c; lb., 45c; 2 lbs., 80c; 5 lbs., \$1.85, postpaid. Not prepaid: 10 lbs. or more, at 21c per lb.

For best results, inoculate your peas and beans.

DWARF TELEPHONE OR DAISY

Developed and improved steadily at our Cliffwood Farms from carefully selected stock, we firmly believe our seeds are the very best obtainable. This fine, wrinkled variety has all of the qualities of the old well known Tall Telephone pea, but is of dwarf growing habit, attaining a height of 15 to 17 inches, and likewise very popular. Requires about 75 days to mature.

The vines are healthy and of vigorous growth, producing their large pods in great profusion and about a week earlier than the tall variety. The pods are about 5 to 6 inches long and contain eight to ten green, wrinkled peas of delicious flavor. Crop is very short.

892—Pkg., 15c; lb., 55c; 2 lbs., \$1.00; 5 lbs., \$2.25, postpaid. Not prepaid: 10 lbs. or more, at 32c per lb.

SOW SALZER'S SEEDS

I am more than pleased with the seed I ordered from you. Although this summer has been awful cold, and we had many frosts, and rain almost every day, my garden has been wonderfully nice. Some of my friends will send their orders to you next year.

Mrs. J. A. Wuorisale, 213 Oak St., Ishpeming, Mich.

Salzer's
Gradus Peas

Peas---Late Varieties

SALZER'S GIANT EXHIBITION

See Color Illustration on Page 34.

To those who wish huge podded peas, we suggest that they plant our Giant Exhibition. It is a late maturing kind. Is a wrinkled pea, very productive, the huge pods being well packed with peas, which, although large, are of a fine quality, sweet, sugary flavor and not tough as one would expect. The pods frequently grow to seven and even eight inches in length, depending of course somewhat on the soil, and it is not unusual to find between ten and twelve peas to the pod. The lateness of Salzer's Giant Exhibition is fully offset by its productiveness and its vigorosity. It has numerous first prizes to its credit, from various fairs, which accounts for its being named Exhibition. The pods are uniform in size, of a rich dark green color, and well packed with large size peas. One of the best main crop varieties.

Pods rather straight, with curve near end. Vines grow vigorously. Ready to use in about 85 days. To those of our customers who want immense size, a most delicious, heavy yielding pea—we recommend Salzer's Giant Exhibition. It will take first prize wherever exhibited.

872—Pkg., 15c; lb., 60c; 2 lbs., \$1.10; 5 lbs., \$2.60, postpaid. Not prepaid: 10 lbs. or more, at 32c per lb.

SALZER'S ALDERMAN

Also called "Improved Telephone." Foliage and pods dark green. Telephone Peas have been, and still are, owing to their large size and high quality, splendid sellers in every market, but this new variety, Alderman, is now much preferred. The dark green pods will retain their fine, marketable appearance much longer than the lighter colored ones of the old sort, and even after shipping a long distance, will look fresh and handsome. Pods are very uniform in shape and borne in the greatest profusion.

The vines are of strong, luxuriant growth, attaining a height of 4 to 5 feet. Matures in about 85 days. Pods measure about 6 inches and more in length and are densely filled with large, wrinkled peas, sweet and tender, of unsurpassable flavor. One of the finest late or main crop varieties.

864—Pkg., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.70, postpaid. Not prepaid: 10 lbs. or more, at 20c per lb.

DWARF DEFIANCE

A late maturing, wrinkled pea, very much in demand by the home gardener because of its compact, bushy growth, permitting a good heavy yield in a limited space. Of fine sugary, melting quality, and one that will please you. Vines reach a height of about 20 inches and are very productive. Pods are of a rich, dark green color, and the peas retain their tenderness long after they are picked.

The vines are very vigorous and hardy. The pods are long, broad, pointed, and dark green in color. Frequently measure 6 inches or more in length.

898—Pkg., 10c; lb., 45c; 2 lbs., 85c; 5 lbs., \$2.00, postpaid. Not prepaid: 10 lbs. or more, at 22c per lb.

SALZER'S IMPROVED STRATEGEM

A wrinkled variety, very prolific. Very large dark green pods, filled with large dark green peas, sweet, tender and of exquisite quality. Vines are vigorous and grow 18 to 20 inches high. Our stock of this splendid, well-known variety, cannot be surpassed. Matures in about 80 days.

895—Pkg., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75, postpaid. Not prepaid: 10 lbs. or more, at 19c per lb.

SALZER'S EDIBLE PODDED OR SUGAR PEAS

Edible Podded Peas may be eaten entirely, pods as well as peas. They have been developed to be devoid of the thin, tough lining on the inside of the pods, and consequently are always soft and tender, and do not open when ripe. They are used in the same way as snap or string beans, and are also liked for pickling. Because of their having no lining, they are not grown where peas are wanted for shelling.

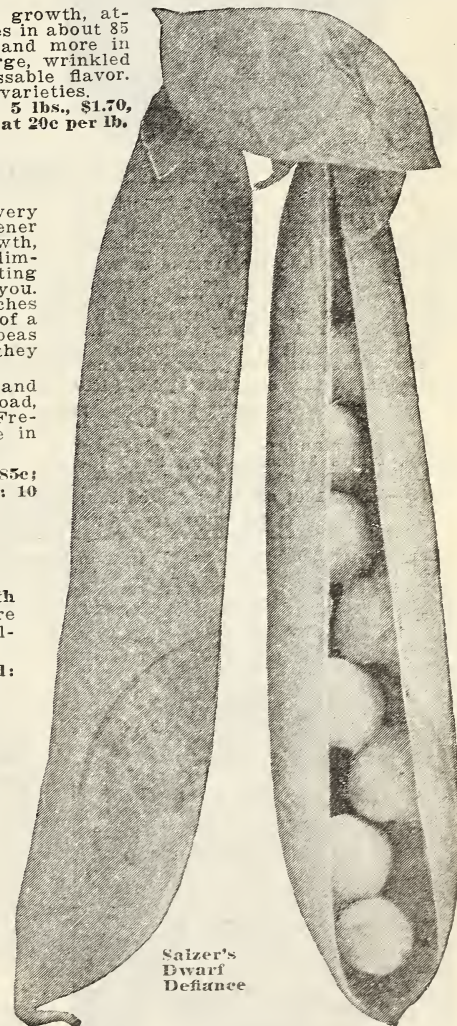

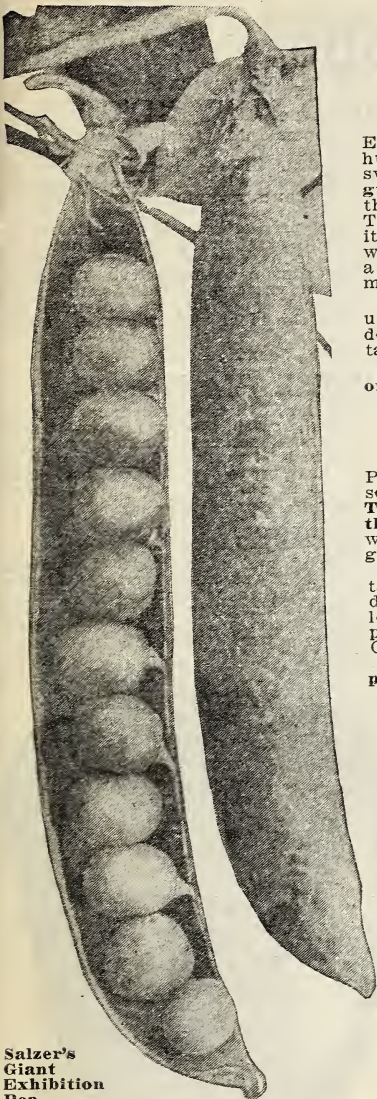

DWARF GRAY SUGAR PEA. Height, about eighteen inches. Pods are broad and flat and of finest quality. Very productive.

912—Pkg., 10c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50, postpaid. Not prepaid: 10 lbs. or more, at 17c per lb.

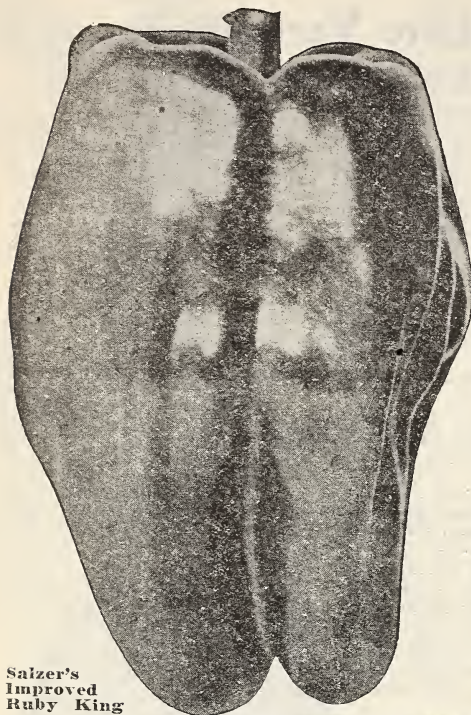

MAMMOTH LUSCIOUS SUGAR PEA. Vines very tall, 5 to 6 feet; pods about 6 to 7 inches long and 1½ inches broad. A heavy cropper of best quality pods.

913—Pkg., 10c; lb., 40c; 2 lbs., 75c; 5 lbs., \$1.75, postpaid. Not prepaid: 10 lbs. or more, at 19c per lb.

We have found your seed to be all and even more than you claim for them.—Hattie Humphries, R. D. 6, Box 1, Shelbyville, Ind.

Salzer's
Dwarf
Defiance

Salzer's
Improved
Ruby King

Pepper

SALZER'S IMPROVED RUBY KING

Salzer's Improved Ruby King is the dependable, standard pepper that cannot be beaten. It is very productive, early, has a mild flavor, thick flesh, and is very attractive. Our seed is of the best that can be obtained, and we know you will be pleased with this superb strain. Exceptionally large, sweet flavored fruit, plants growing about 30 inches high.

Plants are vigorous, compact and very productive. Ripens its fruits early and with uniformity. Fruits frequently run four and one-half inches in length, having usually three lobes. Deep rich green color when young, ripening to a bright rich crimson at maturity. The flesh is thick and of mild flavor. An excellent variety for salads, mangoes and to stuff. Tender, meaty and of sweet spicy flavor. Splendid for both the market and home garden. It is the most widely grown of any variety. Matures in about 130 days.

929—Pkg., 10c; oz., 35c; ¼ lb., \$1.10; lb., \$4.00, postpaid.

SALZER'S CHINESE GIANT

Enormous peppers, 12 inches and even more in circumference. Plants are about 2 feet high, of strong vigorous growth, stocky and erect, and bear fruits which are quite square, average 4 inches in diameter and are of a bright glossy scarlet when ripe. Flesh is thick and mild. May be eaten like an apple when young. We have grown specimens weighing 21¾ ounces at Clifwood Farms. Matures in 140 days. Crop very short.

922—Pkg., 10c; oz., 45c; ¼ lb., \$1.60; lb., \$6.00, postpaid.

HARRIS' EARLIEST

We introduced this fine pepper last year, and are receiving hundreds of testimonials from those who tried it. It is extremely early and hence splendidly adapted for the North, as it is mature before danger of frost. The scarlet fruits are of a good marketable size, 3 to 4 inches long and has fine thick flesh, tender and so mild it may be eaten from the hand. Plants are 12 to 18 inches high, compact, bushy and extremely productive. Matures in 128 days. Be sure to try it this year.

931—Pkg., 15c; oz., 55c; ¼ lb., \$2.00; lb., \$7.50, postpaid.

SALZER'S PIMIENTO

Pimiento is of a different type than the other well known peppers. It is used very much in salads to give them a tasty and attractive appearance, and because of its many uses and great popularity, it is grown very widely by canners. It is of the sweetest flavor, and does not contain a trace of fieriness. Are fine for stuffing as well as for salads.

It is a productive strain, exceptionally smooth, glossy and of mild, delicious flavor. Plants are vigorous and upright, growing about thirty inches high with short, broad, dark green leaves. Deep green fruits, becoming deep red as they mature. Ripens in about 130 days.

Used in salad, it is very delicious. Its thickness of flesh permits removing of skin, an essential of great value not easily accomplished with other sorts.

927—Pkg., 10c; oz., 30c; ¼ lb., \$1.10; lb., \$4.00, postpaid.

BELL OR BULL NOSE

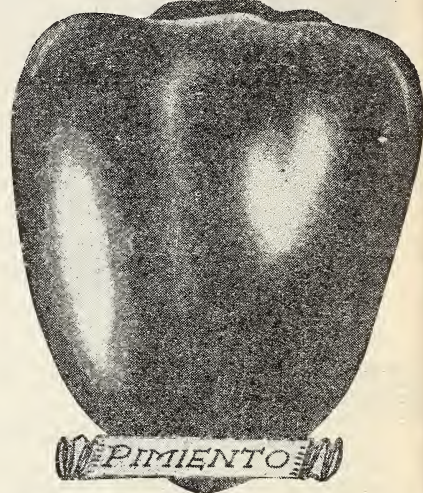

An early, standard, rich scarlet pepper. Plants 2 feet high, compact and bushy, fruits 3 inches long by 2 inches thick, sweet and spicy, but not "hot." Matures in 140 days. Widely grown.

919—Pkg., 10c; oz., 30c; ¼ lb., 55c; lb., \$3.00, postpaid.

SALZER'S ANAHEIM CHILI

Largely used by canners. Bright crimson fruits about 8 inches long and 1¾ inches in diameter, and flesh thick, sweet and mild. Plants are of vigorous, erect growth and enormously productive. Matures in 140 days.

913—Pkg., 10c; oz., 35c; ¼ lb., \$1.10; lb., \$4.00, postpaid.

PIMIENTO

SMALL RED CHILI

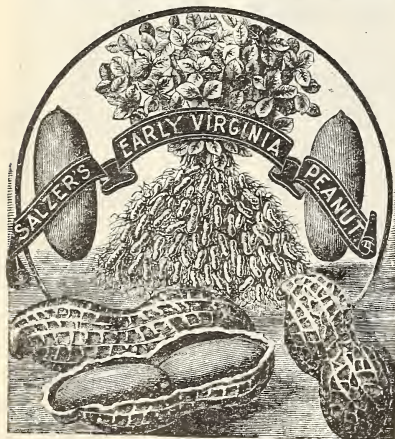

A very "hot" pepper. A rather small, bright-red variety, about 2 inches long, slender and pointed. Widely used for salads, pickling and Chili sauce; very pungent. 921—Pkg., 10c; oz., 35c; ¼ lb., \$1.10; lb., \$4.00, postpaid.

Peanut---SALZER'S EARLY VIRGINIA

Salzer's Early Virginia is a productive variety, with very erect stems and large pods and kernels. It is a paying crop on sandy soils in the North, and ripened for us at La Crosse, to perfection, yielding enormously. Not only yields lots of nuts, but it is an excellent forage crop as well as a green fertilizer. Remove shells and plant kernels 6 inches apart in rows 4 feet apart. Not only can your children make money with peanuts, but it is now a regular man-sized crop for light and sandy soils. 841—Pkg., 10c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50, postpaid. Not prepaid: 10 lbs. or more, at 21c per lb.

EARLY SPANISH

Smaller kernels but much sweeter and finer flavored. Yields a heavy crop of nuts. An excellent forage plant for light land in hot, dry seasons. The tops are cut and cured for hay just before frost. 840—Pkg., 10c; lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50, postpaid. Not prepaid: 10 lbs. or more, at 21c per lb.

I have used your seeds and am more than pleased with the results.—Fred W. Scott, R. D. 4, 60 and Q St., Omaha, Nebr.

Pumpkin

SALZER'S YANKEE PIE

For the tastiest, most delicious pumpkin pies, plant Salzer's Yankee Pie. It's the finest of all and ranks enormously high in sugar content.

It is round and slightly flattened, with shallow ribs, rather small, about 10 inches in diameter, and of exquisite quality. The tender, rich yellow flesh is very thick, meaty and sweet, and the skin is a deep orange. There is no finer pumpkin, especially for the home garden. Matures in about 70 days and is an excellent keeper. Very hardy and very productive. Hundreds of thousands of customers sow this strain year after year. It is the best in cultivation today, for the table. Enormously productive.

956—Pkg., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.50; 2 lbs., \$2.75, postpaid.

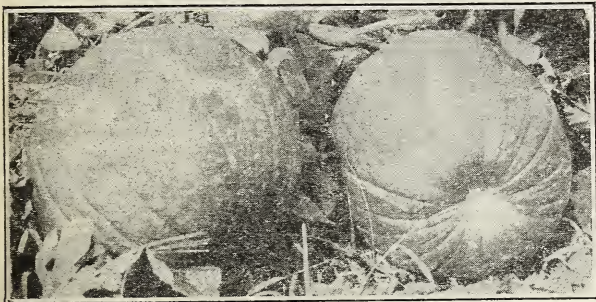

Salzer's
Yankee
Pie

CONNECTICUT FIELD

Pumpkins are very easily grown in among sweet corn or field corn, or wherever there is room for vines to spread. Connecticut Field is a standard corn-field variety and is widely grown for stock-feeding, as well as table use.

Vines are wonderfully prolific; fruits average 25 pounds in weight, are round and flat on the ends with a smooth hard rind. Flesh is yellow, thick, dry, fine flavored, sweet and of excellent keeping qualities. A standard variety with canners. Matures in 75 days.

943—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.40; 5 lbs., \$3.00, postpaid.

Salzer's Connecticut Field Pumpkin

SALZER'S MAMMOTH

Love for a large pumpkin seems to be the inborn desire of everybody. When size, quality and big profits are all combined in one, then the grower is particularly proud of the strain. Salzer's Mammoth exceeds the average idea of "large." It really is immense in size.

As would be expected, it is unusually productive; in fact, it is the largest yielding of the pumpkins and of exceptionally fine quality and flavor.

Very extensively grown. Splendid for stock feeding as well as for the table. A popular type with the home grower, considered the best for exhibition purposes and a dependable sort in every way. Deep creamy red color. Nearly round, slightly flattened at top and bottom.

Flesh is deep orange red and fine grained. A good variety to plant with corn. One of the best for winter storage. Matures fully in about 110 days. We have grown specimens of this variety, weighing 200 lbs.

951—Pkg., 10c; oz., 20c; ¼ lb., 60c; lb., \$2.00; 2 lbs., \$3.75; 5 lbs., \$8.50, postpaid.

Salsify

SALZER'S SANDWICH ISLAND

Widely grown for fall and winter use and is popularly called Oyster Plant, because it has such a delicious oyster-like flavor. They are fine when boiled, when used in soups, or when sliced and fried. Salsify succeeds best in light, well-enriched soil. Sow early in spring, in shallow drills, 15 inches apart.

Salzer's Sandwich Island grows a fine, fleshy root 6 to 8 inches long and about 1 inch thick. The white flesh is of superior oyster-like flavor and is very nutritious. Matures in 140 days. It is hardy and may be left in the ground over winter, or may be stored in a pit or cool cellar after cutting off the leaves.

1060—Pkg., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.50, postpaid.

JAPANESE PIE

The flesh in appearance and taste very closely resembles the sweet potato and is considered a treat by all who have ever eaten it. Fine grained, dry and sweet. They ripen early, keep well and are fine for home use. It is one of the easiest pumpkins to grow. A large crook-neck sort with dark green skin mottled with yellow stripes. Matures in about 80 days.

946—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.25, postpaid.

LARGE SWEET CHEESE

Gets its name from its peculiar cheese shape, being flattened on both ends and large in circumference. Matures in about 90 days.

The rind is cream colored and slightly ribbed. In wide use for canning and keeps exceptionally well. It is a heavy yielder and a good main crop variety. The thick yellow flesh is tender, sweet and of finest quality. Splendid for stock feeding as well as for table use. It is one of the old, widely used kinds of exceptional merit.

950—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.40; 5 lbs., \$3.25, postpaid.

SMALL SUGAR

Much smaller than the field varieties, rich in sugar, finely grained and sweet. Exceptionally fine pumpkin for pies.

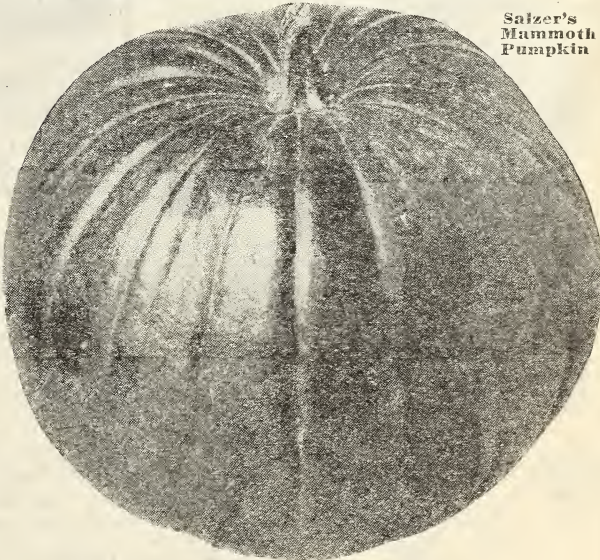

It is a very prolific type, producing nice, uniform size and shape pumpkins in abundance. Considered one of the hardest and easiest to grow. Matures in about 70 days.

953—Pkg., 10c; oz., 15c; ¼ lb., 50c; lb., \$1.00, postpaid.

SALZER'S MIXED PUMPKIN

A mixture of the choicest and finest pumpkin seed. Have some of each variety in one patch in your garden, without having to purchase a package of each.

957—Pkg., 5c; oz., 10c; ¼ lb., 20c; lb., 75c, postpaid.

Salzer's
Mammoth
Pumpkin

We raised some large pumpkins from your seed. One weighed 51½ lbs., and took first prize at the Fair.
—A. K. Moe, R. D. 2, Maxbass, N. D.

Radish--- The Two Famous Extra-Earliest Radishes

Handsome—Deliciously Spicy

SALZER'S EARLY BIRD

This incomparable radish produces roots ready for the table in about 12 days' time, roots that are uniform in size and shape, even in maturity, with small tops and of beautiful and attractive bright red color. It is also the best strain for growing under glass.

Mr. Henry A. Hagerbaumer, R. D. 6, Box 3, Quincy, Ill., writes: "This is the second year I am using your Early Bird Radish in my greenhouse. It sure can't be beat for forcing under glass."

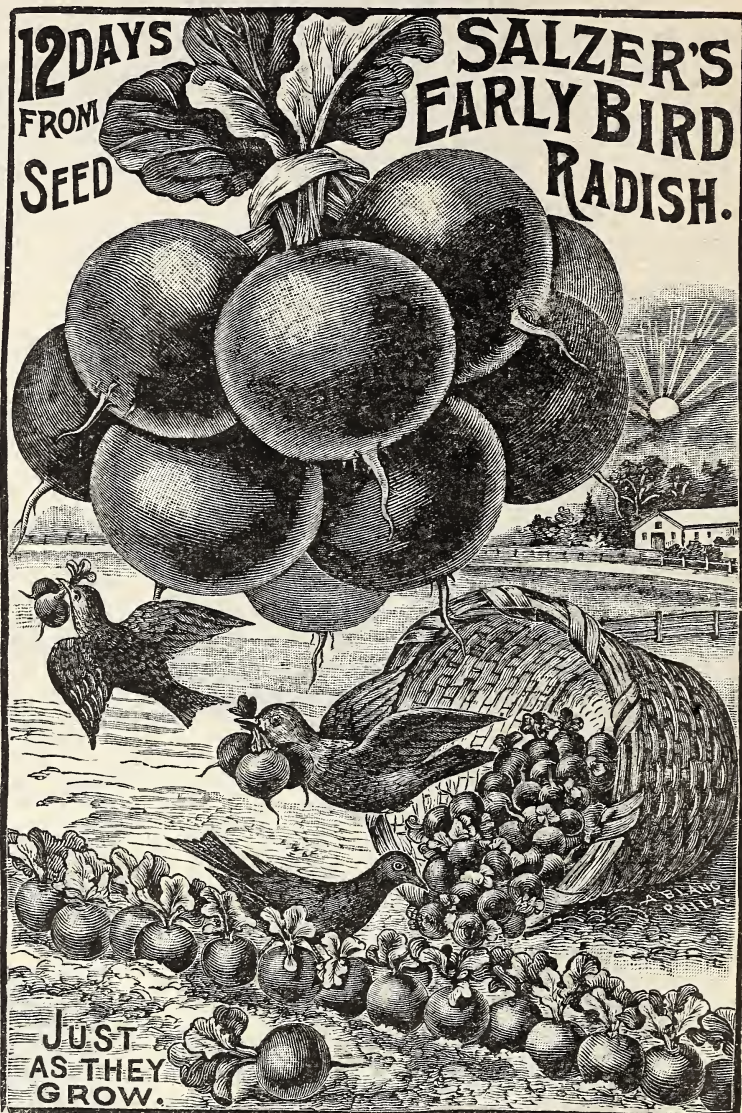

Mr. Charles J. Dodge, R. D. 2, Granville, N. Y., writes: "Sowed one pound of your Early Bird Radish Seed and sold the radishes for \$57.60."

We introduced this grand variety just 32 years ago and have been extensively developing and improving it ever since, so get your seed from us if you want genuine, true-to-type seed. Don't take anything "just as good." Salzer's Early Bird is of globe-shape, bright scarlet color, has very short tops, flesh is pure white, fine grained, crisp, nice, spicy taste, and never becomes hollow or pithy. Averages $\frac{1}{2}$ to 1 inch in diameter, according to maturity. It is alike most valuable for outdoor planting in spring or in autumn, and always commands top prices. It is a sure yielder and never disappoints the market gardener nor the home gardener.

975—Pkg., 10c; oz., 25c; $\frac{1}{4}$ lb., 70c; lb., \$2.00; 2 lbs., \$3.75; 5 lbs., \$8.75, postpaid.

SOW SALZER'S SEEDS

Your Juicy Fruit Muskmelon is the most wonderful melon I ever raised.—D. M. Cameron, 39 Chestnut St., Lockport, N. Y.

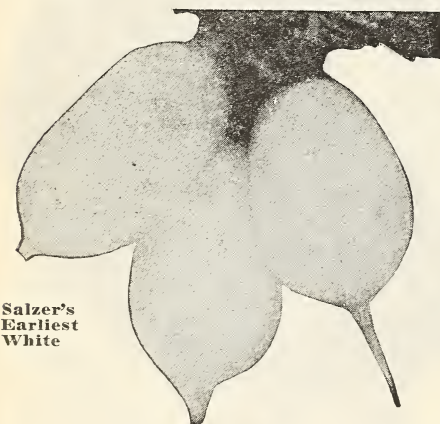

SALZER'S EARLIEST WHITE

Pure white color, almost like crystal, so clear and transparent! Matures in about 15 days. It is a highly developed strain of finest quality and produces the earliest radishes that can be grown.

It is of olive shape, is adapted to all soils, has a very short top, unusually thin skin, never becomes woody, flesh crisp, tender, and fine, spicy taste. Equally good for outdoor sowing or for growing under glass. Home gardeners, sow the two varieties on this page. Have the earliest, finest radishes in your neighborhood. Market gardeners, sow these two varieties and make money. Mr. Albert Korgan, Council Bluffs, Iowa, writes: "Your Earliest White Radishes sure are wonderful."

1006—Pkg., 10c; oz., 20c; $\frac{1}{4}$ lb., 50c; lb., \$1.50; 2 lbs., \$2.80; 5 lbs., \$6.50, postpaid.

We have found your seeds to be splendid and of the very best quality.—C. L. Burroughs, Morgan Center, Vermont.

SALZER'S SPARKLER RADISH

A splendid variety, also known as American Half Red, Half White.. Greatly prized for its handsome appearance and attractiveness, and decidedly popular. It received its name from its bright, sparkling, red color. Always accustomed to unusual values, our customers will find this as fine a value as we have ever offered. A rapid seller on the market and a good money maker. Salzer's Sparkler is very crisp, solid, and sweet flavored, and carefully bred for short tops.

In shape it is nearly round, of a deep scarlet color, with the lower one-third white, which is slightly flattened. In size it runs from one to one and one-quarter inches. Does not become pithy until it reaches its maximum size, holding its crispness longer than most varieties. A splendid home garden variety. Tops short, which is one reason for its extensive cultivation. The quality is very fine, flesh is solid, crisp, tender, fine grained and sweet. Matures in about 25 days.

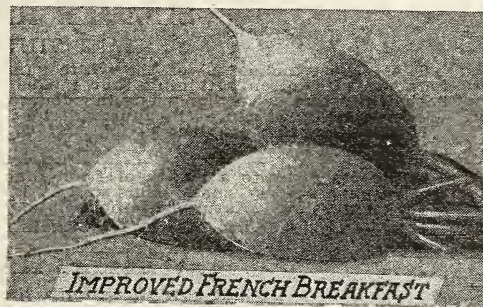

986—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.10; 2 lbs., \$2.10; 5 lbs., \$5.00, postpaid.

SCARLET GLOBE, VICK'S

Special Strain

This variety is one of the best all-around radishes grown. Is an old, dependable, standard strain, in great demand and valuable for the home garden and market gardener. Scarlet Globe has a comparatively small amount of foliage, making it a particularly attractive market sort. Fine oval shape, a rich scarlet color, crisp, tender flesh, juicy, mild, and a very early type, well adapted to forcing. Was introduced back in 1884 and since it has retained its popularity up till now, it is self-evident that it is a dependable strain. Our seed is superior in vigor, trueness to type, and is especially well adapted to varied soils and climates and will give you the finest satisfaction. It is exceptionally early. The flesh is pure white, mild, crisp, juicy and tender. Measures about three-fourths of an inch in diameter to one and one-quarter in length.

1014—Salzer's Special Strain:
Pkg., 10c; oz., 15c; ¼ lb., 45c;
lb., \$1.50; 2 lbs., \$2.75; 5 lbs.,
\$6.50, postpaid.

IMPROVED FRENCH BREAKFAST

A leading olive shaped variety, of rapid growth and splendid for forcing. Small size and is of beautiful and attractive, deep, rich, scarlet color, with the lower portion a clear, snow white. Because of its handsome appearance, fine, rich spiciness, crispness and tenderness, it is a mighty good variety for your own table use and is one of the best sellers at market. In diameter it measures about ¾ inch and averages about 1½ inches in length. Has small tops and matures in about 22 days. Flesh is pure, sparkling white, tender, juicy and agreeably spicy. Be sure to "Sow Salzer's Seeds." Sow radish seed early and often, to have them all summer.

1010—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00; 2 lbs., \$1.85; 5 lbs., \$4.45, postpaid.

SALZER'S CRIMSON GIANT GLOBE

A grand, early, globe-shaped Radish, double the size of any of the early globe or turnip shaped type, and a rapid grower. A superb radish for bunching and equally suitable for forcing or planting outdoors in the home garden. Matures in about 28 days; the fine large roots reach about 2 inches in length and 1½ inches in diameter, with thin, tender skin of deep crimson. The juicy, tender flesh is purest white, crisp and of mild, spicy flavor. The radishes reach a weight of about 1½ ounces each, but notwithstanding their immense size, they do not get hollow or pithy, the flesh remaining crisp, solid and juicy.

973—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.15; 2 lbs., \$2.10; 5 lbs., \$4.80, postpaid.

Crimson Giant Globe

Salzer's
Famous
Sparkler
Radish

SALZER'S BLOOD RED SNOW WHITE TIPPED

Beautiful in the extreme! The lively scarlet color points off to a pure white tip, giving it a most attractive appearance. It's a producer! It's perfection itself when it comes to quality and earliness! Splendid for forcing, also fine to plant as a succession variety. Radishes run uniform in both shape and size, averaging about ¾ inch in diameter. The skin is thin and tops are very short. The sparkling, snow white flesh is crisp, tender, fine grained and sweet. Does not become pithy or hollow. Matures in about 20 days. Very widely grown.

972—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00; 2 lbs., \$1.85; 5 lbs., \$4.45, postpaid.

Have radishes all summer

Radish

Sow early and often

SALZER'S ICICLE

See Color Illustration on Page 34.

We are proud of the distinction which Salzer's Icicle Radish has earned for itself. It is admittedly the earliest and the finest of the long white varieties. A beautiful, almost transparent, white radish about four inches long, with unusually small tops, remains in good condition a long time, does not get pithy, and is very crisp and brittle. This variety is highly esteemed and is so different from all other kinds that it has a place of its own in the radish family and as such our customers grow it, regardless of what other variety they may use.

The earliest and finest of the long white varieties. Ready for the table in about three weeks. They are fit for the table when quite small. The leaves are short, very few in number, permitting close planting. It is crisp, tender and mild in flavor. Frequently called the finest of all radishes.

1021—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

LONG SCARLET SHORT TOP

Like the Icicle variety, home and market growers generally grow a red or scarlet radish of the long types. This is the popular favorite and crowds the Icicle very close for first place in popular esteem. It has proven itself a variety of exceptional merit for quality and dependability. Fact is, it can be relied upon to produce nice tender brittle radishes under the most trying conditions.

A long, bright red variety. Excellent for market and home use. It is medium, early, maturing in about 35 days. Averages six to eight inches long. The best variety for those who like a long red radish. Very popular everywhere. The crown grows about one inch above ground. It is straight, smooth, fine grained and sweet.

1023—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

SUMMER RADISHES

GIANT STUTTGART

The largest and latest of the white summer radishes. The roots grow to an immense size, often attaining four inches in diameter. The skin is white, the flesh white and crisp and keeps in good condition for a long time. Suitable for winter storing. Matures in approximately 42 days.

1033—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

WHITE STRASSBURG

The roots grow to a length of from four to five inches, but they can be used when comparatively small. This variety keeps continuously crisp and tender for a very long time. Matures in about 40 days.

1034—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

WINTER RADISHES

Do not sow these until the latter part of June.

CHINESE ROSE OR SCARLET CHINA

The roots grow from four to five inches long, are cylindrical, the largest at the bottom, blunt at both ends. The skin is deep rose. The flesh is white, firm, crisp and pungent. Keeps well. Matures in about 50 days.

1043—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

WHITE CHINESE OR CELESTIAL

The finest and the largest of the White Chinese Radishes. The roots grow to a very large size, averaging about fifteen to eighteen inches in length, and have a diameter of five inches. They grow mostly above the ground. The skin is pure white and the flesh always crisp, mild and juicy. Takes about 50 days to mature.

1045—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

ROUND BLACK SPANISH

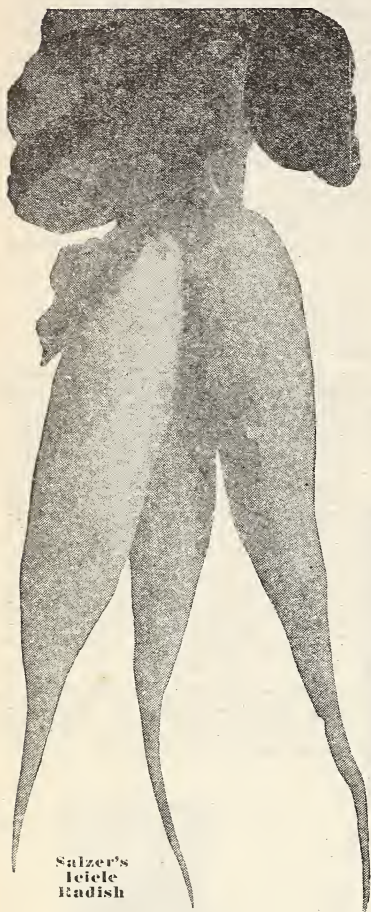

The roots are from three to four inches in diameter, almost round and very black skinned. The flesh is white, firm, pungent and well flavored. Keeps well all winter. Sow about the middle of June, as these varieties are apt to become hard and woody if sown in the spring. Matures in about 55 days.

1041—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

LONG BLACK SPANISH

Growing ten to twelve inches long, having a diameter of from two to three inches. The skin is black and the flesh white, firm and pungent. Like the round sort, it keeps well throughout the winter. Matures in about 55 days.

1044—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

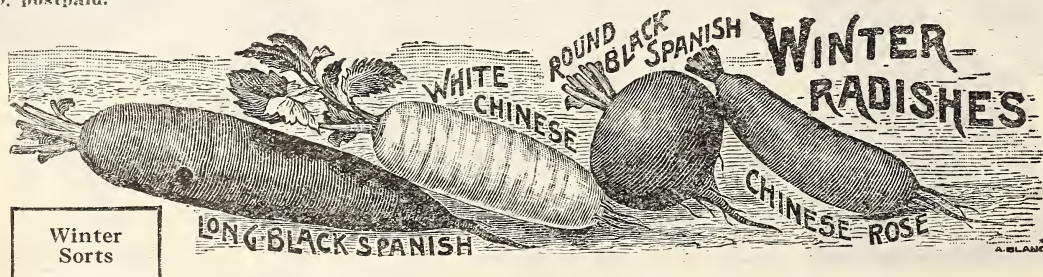

Salzer's
Icicle
Radish

EARLY WHITE TURNIP

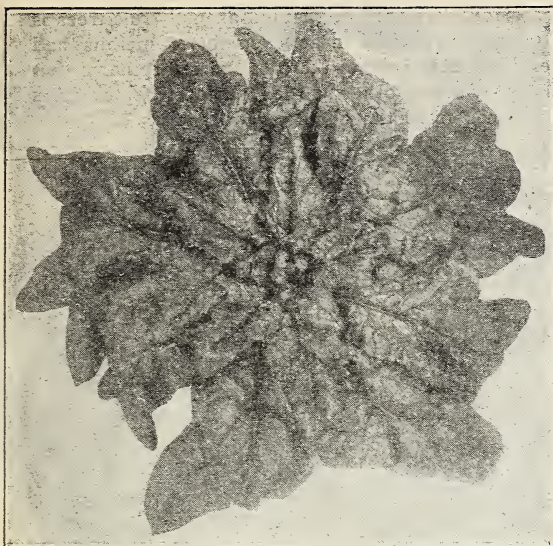

A turnip-shaped white Radish. Its color is pure white, almost crystal, so clear and transparent. Its quality is excellent. It is of a turnip shape, has a short top, is very rapid growing and sells at sight at a high price in all markets when once known. Miss Ann Sima, Prairie du Chien, Wis., writes, "We find your Early White Turnip Radish is one of the best."

980—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

Winter
Sorts

ICICLE IS THE BEST LONG WHITE RADISH. TRY IT.

Salzer's King of Denmark Spinach
SALZER'S TRIUMPH

This grand strain was introduced by us over 16 years ago. Withstands hot weather longer than most other sorts, hence highly desirable for making succession sowings, so that this delicious, healthful vegetable can be enjoyed not only during cool weather, but during the summer as well. Does not run to seed easily. The numerous, short stemmed leaves are heavily crumpled, thick warded and are fine and tender when cooked. Succeeds in all sections of the country. Do not overlook this strain for your garden.

1071—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.30; 5 lbs., \$2.50, postpaid.

Rutabaga

SALZER'S MAMMOTH RUSSIAN

Rutabagas are also known as Swedish Turnips, Swedes, or Russian Turnips. They have firmer flesh than turnips, however, are more solid, and hence keep later into spring. Like turnips, they are excellent for stock feeding and as a rotation crop. Stock thrive and increase in value rapidly when turnips and rutabagas are fed in liberal quantities and next to mangels are one of the cheapest feeds on the farm. It is also the finest and sweetest rutabaga for table use, and is devoid of woodiness. We consider it the heaviest yielding, the largest and the most uniform variety, that withstands most cold and will submit to most heat. It is the most attractive. It has the most protein. Has very short neck. Easily harvested. Sow about two pounds per acre.

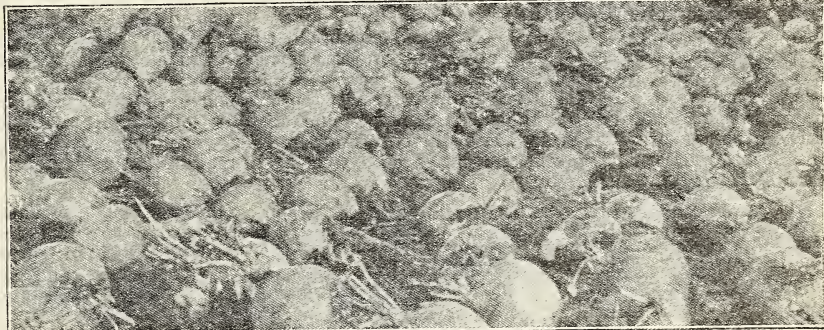

Flesh is fine grained, golden yellow, mild flavored, solid and particularly palatable, making it by far the best of all varieties for the table as well as for stock. Ready for use in about 75 days. 1510—Pkg., 10c; oz., 20c; ¼ lb., 35c; lb., \$1.25; 2 lbs., \$2.25; 5 lbs., \$4.90; 10 lbs., \$7.50, postpaid.

AMERICAN PURPLE TOP

It is unusually productive, giving big yields of the finest rutabagas; also a splendid variety for table use. Roots of large size, globular, with flesh of deep yellow color, fine grained, and of finest quality. Skin yellow with purple top. 1508—Pkg., 5c; oz., 10c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.30; 5 lbs., \$3.00; 10 lbs., \$5.00, postpaid.

SALZER'S WHITE SWEET RUSSIAN

Has white flesh of a milder and sweeter flavor and contains more saccharine than the yellow-fleshed sorts. For stock feeding it is in great demand. Matures in about 80 days and is an extremely productive variety. It has tankard shaped roots, a small neck and upright leaves. Not so desirable for table use, but fine for stock. 1512—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 95c; 2 lbs., \$1.60; 5 lbs., \$3.50; 10 lbs., \$6.00, postpaid.

A Crop of Salzer's Mammoth Russian Rutabagas

Spinach

KING OF DENMARK

(Antvorskov)

This new Spinach is going to eventually replace all other varieties for spring planting. It is slow to go to seed, and continues to grow and hold its fine quality weeks after other sorts have gone to seed. For a number of years we have been working and developing a strain that would withstand the hot sun, extreme dry spells and not go to seed easily, and in our King of Denmark, after painstaking efforts and trials at Cliffwood Farms, we have at last succeeded in combining these qualities in this wonderful strain. Our seed is grown in Denmark, hence extremely hardy, vigorous and productive. Our customers need have no hesitation about growing this variety for it is a supremely good type and can be depended upon to produce exceptionally fine spinach in abundance. A fine strain for canning.

It forms large, low, compact tufts. The tender leaves are large, broad and rounded. Exceedingly bushy, slightly crumpled and of a glossy dark green color. Ready for use as early as any spinach and retains its condition about two weeks longer. Matures in about 45 days. Yields abundantly.

1065—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 85c; 2 lbs., \$1.50; 5 lbs., \$3.00, postpaid.

SALZER'S SAVOY OR BLOOMSDALE

The earliest spinach, extremely hardy, and a superb shipper. It grows quickly to a suitable size for use and refuses to run to seed, to a remarkable degree. Upright growing plants with thick, glossy, tender dark green leaves, of a good standard size, broad, pointed, twisted, curled and wrinkled. Matures in about 40 days.

1070—Pkg., 10c; oz., 15c; ¼ lb., 20c; lb., 60c; 2 lbs., \$1.10; 5 lbs., \$2.25, postpaid.

WINTER PRICKLY

A splendid fall and winter variety, but is also well adapted for spring use. Produces hardy, large plants of vigorous growth with thick and dark green leaves. Heavy yielder.

1073—Pkg., 5c; oz., 10c; ¼ lb., 15c; lb., 50c; 2 lbs., 85c; 5 lbs., \$1.35, postpaid.

Sunflower

SALZER'S JUMBO

Bears large heads, frequently 12 to 20 inches in diameter and sometimes yielding 1,000 pounds of seed per acre. Makes splendid feed for chickens and parrots. Sunflowers also produce 20 to 30 tons palatable silage per acre and can be successfully grown where spring is late and frosts are early.

4703—Pkg., 5c; ¼ lb., 10c; lb., 30c; 2 lbs., 55c; 5 lbs., \$1.25, postpaid. Not prepaid: 10 lbs. or more, at 17c per lb.

Tobacco

IMPROVED WHITE BURLEY. The popular Kentucky sort.

1528—Pkg., 10c; oz., 60c; ¼ lb., \$1.70; lb., \$5.00, postpaid.

WISCONSIN COMSTOCK SPANISH. Wrappers and fillers.

1520—Pkg., 10c; oz., 60c; ¼ lb., \$1.70; lb., \$5.00, postpaid.

ROOT ROT RESISTANT. For tobacco sick soils.

1533—Pkg., 15c; oz., 75c; ¼ lb., \$2.25; lb., \$6.50, postpaid.

SALZER'S MAMMOTH RUSSIAN RUTABAGA COMMENDABLE FOR PRIVATE USE AND STOCK FEEDING

DO YOU KNOW that authoritative writers claim that tomato foliage placed or planted around fruit trees is effective in preventing the access of insects to the trees; that tomatoes planted near cucumbers, melons and watermelons drive away cabbage butterflies and that tomato extracts help control the cabbage caterpillars; that concentrated tomato extracts are very effective against aphids and various other garden pests; that tomatoes planted between the rows of vines in a vineyard, protect the vines from the deadly Phylloxera?

Tomato

SALZER'S EARLIEST OF ALL

See Color Illustration on Page 34

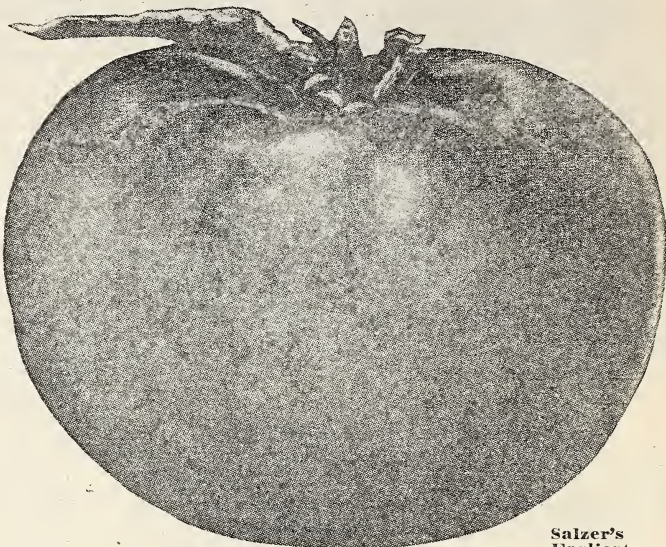

The tomato is recognized by the medical profession as holding five points of merit which makes it actually indispensable in the vegetable garden. These points are that the tomato is the richest of all foods in vitamins; it is the most wonderful and effective blood cleanser of all foods; it is the best of all vegetables for keeping the stomach and intestines in condition; it is an extraordinary tonic for the kidneys, and it is used widely in curing diabetes and Bright's disease. In addition, it is extremely valuable for feeding the juice to infants, accomplishing wonders in cleansing and building up the tiny stomachs. For these reasons, which are being more and more recognized, the tomato is yearly gaining in prominence.

Earliness in tomatoes is essential for the market grower and highly desirable for the home garden. Salzer's Earliest of All is the best extra-early so far produced; it is our very earliest strain; it is a "short season" tomato. Ripening as it does in about 108 days, in the North, it is especially well adapted to all sections of the country, which makes it so decidedly popular. Finely bred for uniformity in size, attractiveness, extra earliness, and trueness to type, Salzer Quality is nowhere better evidenced than in this fine, highly praised variety. If you want the very earliest tomatoes, combined with fine flavor, meatiness, productiveness, attractiveness, and tenderness, you should plant our Earliest of All. It is bound to please the most particular.

The fruits are of good size, brilliant scarlet color, nearly round, entirely smooth, and remarkably handsome. The flesh is solid, and of the finest flavor. The fruits are borne continuously in large numbers until killed by frost. They have a tough skin, firm flesh, making them good shippers and keepers.

Mrs. L. N. Runyon, Box 295, Chinook, Montana, writes, "Have grown Salzer's Earliest of All for five years and not only I, but everyone here that has grown it, greatly esteem the firm flesh, sweet pleasing flavor and the delicious taste of these tomatoes."

1113—Pkg., 15c; oz., 65c; ¼ lb., \$1.85; lb., \$6.25, postpaid.

Salzer's
Earliest
of All

SALZER'S IMPROVED PONDEROSA

Rightly named "Ponderosa" because of the large size it attains. Fruit is very solid, with few seeds. Our seed stock of this strain is the finest obtainable, and while very often large tomatoes, from their very size, are rough and have a tendency to split, we have developed and selected this seed so exhaustively that we have removed the roughness and splitting tendency as far as it is possible to do so. Note the large size and perfect condition of the tomatoes in the accompanying illustration.

Vines are vigorous and bear well. Fruits large, oblong, purplish red, with thin skin. Flesh is solid, with a very small seed cavity, making it a most desirable variety for slicing. To all who desire large size, solidity and flavor, we unhesitatingly recommend it. The vines are vigorous and very productive. Requires about 140 days to mature.

Chas. Stone, Bishop, Calif., writes: "Bought one package of Salzer's Improved Ponderosa last year and took first prize with them at the County Fair." See Page 62 for Yellow Ponderosa.

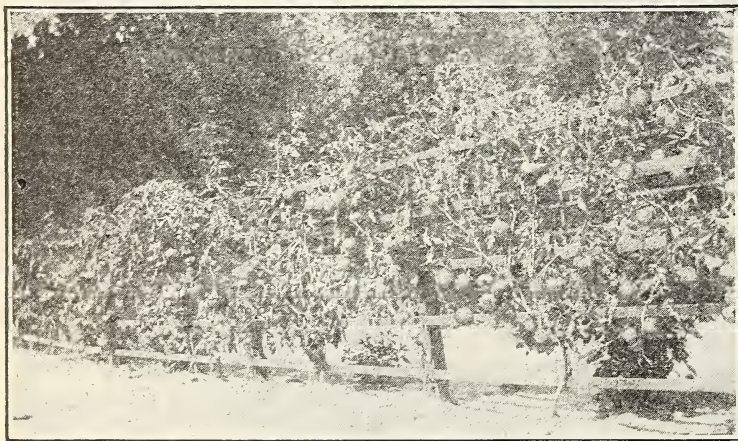

1142—Pkg., 10c; oz., 60c; ¼ lb., \$1.75; lb., \$6.00, postpaid.

NORTON WILT-RESISTANT

The variety for those who are troubled with tomato blight. See Page 1 for description and inside front cover for color illustration.

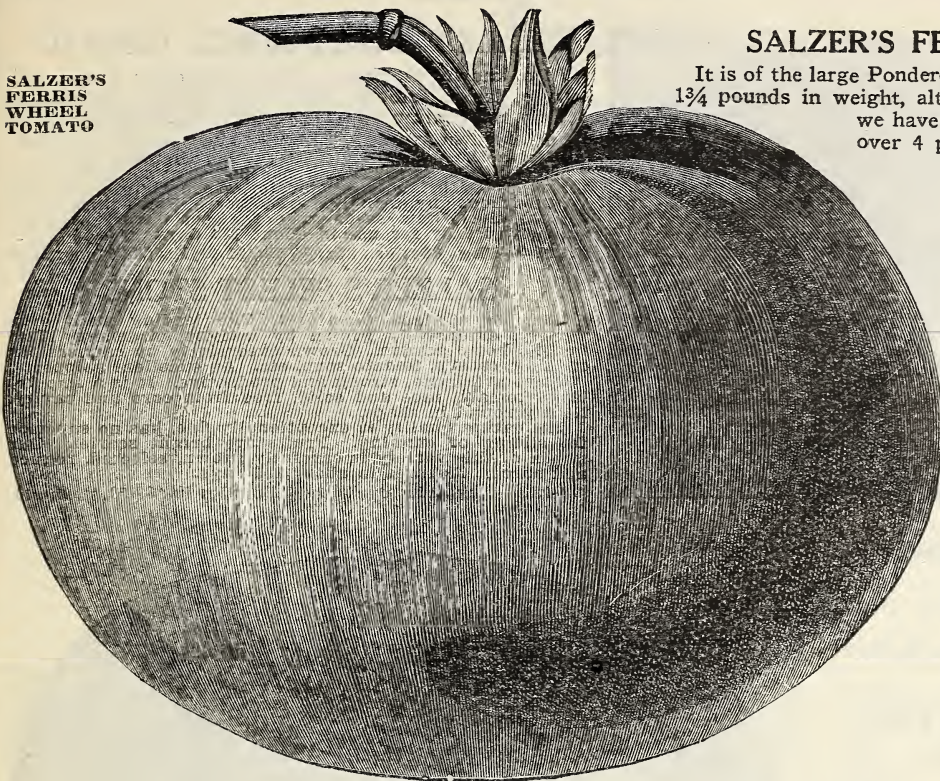

1129—Pkg., 20c; oz., \$1.10; ¼ lb., \$3.75, postpaid.

Salzer's Improved Ponderosa Tomatoes

Never had such a fine garden as when I ordered my seeds from you.—Mrs. F. Kircher, R. D. 4, Sauk Centre, Minn.

**SALZER'S
FERRIS
WHEEL
TOMATO**

SALZER'S FERRIS WHEEL

It is of the large Ponderosa type and averages about $1\frac{3}{4}$ pounds in weight, although at Cliffwood Farms we have grown specimens weighing over 4 pounds. Fruits have thick,

solid, meaty flesh, which is of the finest quality, delicious, sub-acid flavor and very small seed cavity. The vines are strong and vigorous and easily bear their enormous weight of fruits which are of handsome appearance, smooth, and which have a rich dark purplish-crimson skin. Salzer's Ferris Wheel has been continually developed for immense size, uniformity, flavor, productiveness and to resist any tendency to split. Matures in about 142 days. A grand tomato for the home gardener as well as for market gardeners.

1139—Pkg., 15c; oz., 70c; $\frac{1}{4}$ lb., \$2.25; lb., \$8.00, postpaid.

EARLIANA

An extra-early deep red tomato, widely grown in all sections of the country. The vines are compact in growth, with short, close jointed branches. It is very productive, bearing good sized fruit, uniform in size (about three inches in diameter), which has solid, thick flesh of excellent quality. Splendid for shipping. Matures in about 118 days.

1117—Pkg., 10c; oz., 30c; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50, postpaid.

JUNE PINK

A large and decidedly pink-fruited variety, vines of spreading growth. The fruits average about 5 to 6 ounces in weight, are nearly round and slightly ribbed. Flesh is solid, of fine texture and best quality. Of great value to the gardener who grows for markets where pink tomatoes only, sell readily. Matures in 120 days.

1141—Pkg., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.50, postpaid.

SALZER'S NEW GLOBE

An outstanding variety, fruits perfectly round, medium size, purplish red color, flesh solid and a great shipper. Vines are of vigorous growth and produce an immense crop. Is extensively planted by southern gardeners for early shipment to the North. Splendid for the home gardener as it is an ideal slicer. Matures in about 127 days.

1151—Pkg., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.10; lb., \$4.00, postpaid.

SALZER'S COLOSSAL

A magnificent red tomato, sometimes reaching almost the size of Salzer's Ferris Wheel. Solid as beef-steak, meaty and delicious, highly desirable for slicing. Very smooth and uniform in size. Matures in about 149 days.

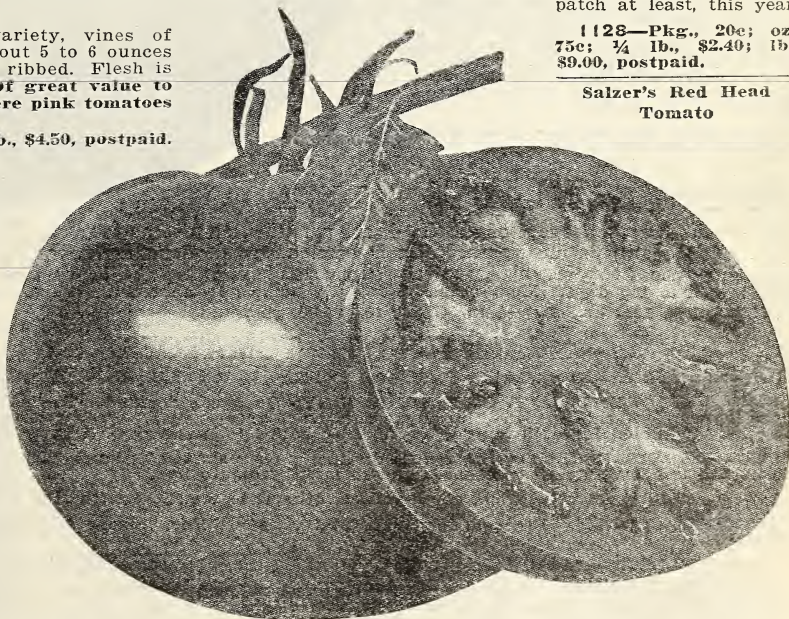

1127—Pkg., 10c; oz., 50c; $\frac{1}{4}$ lb., \$1.60; lb., \$6.00, postpaid.

SALZER'S RED HEAD

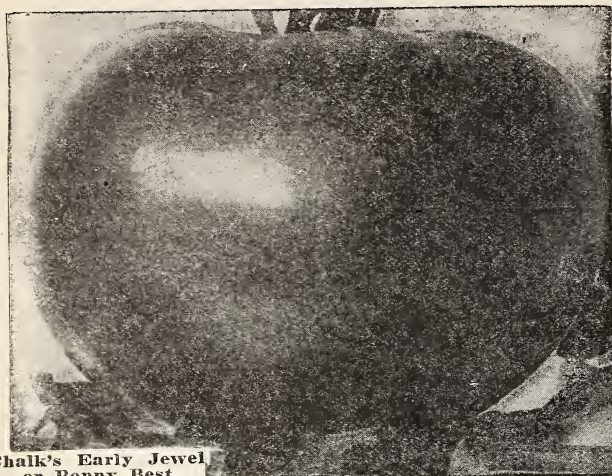

We introduced this tomato last year and the numerous reports received indicate it is giving great satisfaction. It is very early, maturing in about 120 days, reaches a good large size, is extremely productive and bears continuously. Fruits are bright red, nearly globe-shaped, and are very meaty with but a very small seed cavity. Ripens fully and uniformly to the stem, to a rich red color, vines are of medium growth and seem practically resistant to blight. It is an excellent canning variety. If you did not plant it last year, be sure to try out a small patch at least, this year.

1128—Pkg., 20c; oz., 75c; $\frac{1}{4}$ lb., \$2.40; lb., \$9.00, postpaid.

**Salzer's Red Head
Tomato**

From one package of your tomato seed, we had enough tomatoes for three families. They were the largest we ever raised, and as many as eight in a cluster.—V. K. Tudor, R. D. 3, Box 188, Richmond, Ky.

Chalk's Early Jewel
or Bonny Best

YELLOW PONDEROSA

Same fine characteristics as the Ponderosa described on Page 60, except that the color is a rich golden yellow.

1179—Pkg., 10c; oz., 40c; ¼ lb., \$1.35; lb., \$5.00, postpaid.

SALZER'S GIANT TREE

We have seen the Salzer's Giant Tree Tomato grown for exhibition purposes, 15 feet tall. Regular climbing trees. It is really a remarkable tomato, remarkable in size and quality, remarkable that it should grow like a tree. This makes a fine type of plant for exhibition purposes, as well as for the market or home garden; is very productive, and bears large tomatoes.

We have seen fruit on a plant eight feet tall, way out of reach of chickens, ducks, dogs, wet, soft weather, etc., etc., of a most delightful quality, round, rich, luscious. Fruit of Salzer's Giant Tree Tomato are large in diameter, weighing often from one to two pounds. Matures in 140 days.

1159—Pkg., 20c; oz., 70c; ¼ lb., \$2.25; lb., \$8.25, postpaid.

SALZER'S DWARF GIANT TOMATO

The fruits are the largest of all the dwarf varieties, almost as large as Ponderosa, solid, and of purplish-crimson color. The quality is unsurpassed. It is of rich, sweet, delicious flavor, and the fruits are almost seedless. The plants grow about two feet high, are very strong, easily carrying the heavy tomatoes. Salzer's Dwarf Giant matures its fruit in about 140 days. Most valuable for the home gardener with limited space.

1157—Pkg., 10c; oz., 45c; ¼ lb., \$1.25; lb., \$4.00, postpaid.

SMALL FRUITED TOMATOES

Prices on undernoted varieties: Pkg., 10c; oz., 55c; ¼ lb., \$2.10; lb., \$8.00, postpaid.

1189—**YELLOW HUSK OR GROUND CHERRY.** In great demand. The delight of the children, who eat this healthy, luscious fruit with great relish. Prepared as preserves, they are unequalled for delicacy of flavor. Also called **Strawberry** or **Winter Cherry.**

1187—**RED PEAR.** Bright red fruits, distinctly pear shaped, it has a rich and distinct flavor, and is a favorite for preserves and to make "tomato figs."

1191—**YELLOW PEAR.** Rich, clear yellow, otherwise identical with Red Pear.

1186—**YELLOW PEACH.** Blended deep rose and orange. For preserves, pickles and exhibition.

1190—**YELLOW PEACH.** Clear lemon yellow. Otherwise same as above.

1185—**RED CHERRY.** Small, round fruits, one-half inch in diameter, of bright scarlet color. Widely used for salads and for pickling.

1188—**YELLOW CHERRY.** This variety differs from Red Cherry only in color.

CHALK'S EARLY JEWEL TOMATO

Also known as Bonny Best. An early bright red tomato, large, smooth, and finely flavored, producing heavily and continuously throughout the season. Seed is all of our own growing, carefully and specially selected, and is the best obtainable. A good main crop variety.

The fruits are very big, handsome, very solid and deep through. Of bright scarlet color, ripen right up to the stem without any cracks or green core. Flesh thick, with comparatively few seeds and of sweet flavor. A good shipper. Ready for use in about 125 days.

1114—Pkg., 10c; oz., 35c; ¼ lb., \$1.10; lb., \$4.00, postpaid.

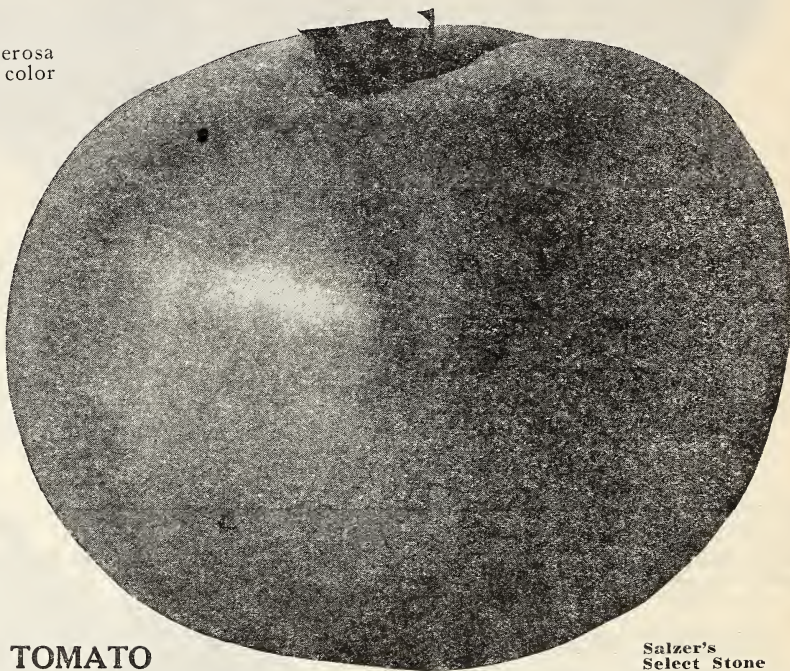

SALZER'S SELECT STONE

King of the red tomatoes! The leading main crop variety, extensively grown by market gardeners, ideal for the home garden. Grown extensively by canners for canning, catsup, tomato soup, etc. An excellent shipper.

Vines are large, strong and productive. It is a smooth, large tomato, nice and solid, free from core and cavity. Nearly round in shape.

The eating quality is exceptionally fine, has no superior for slicing or canning. Fruits are bright scarlet. Our strain of this variety is carefully grown, selected, rogued and cured. Matures in about 135 days.

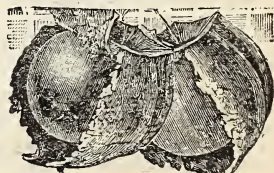

1122—Pkg., 10c; oz., 30c; ¼ lb., 95c; lb., \$3.50, postpaid.

Salzer's
Select Stone

SOW SALZER'S SEEDS

I wish you could see my tomato plants from your seed. They are sure fine, loaded with tomatoes of immense size and perfect shape.
Mrs. H. A. Smith,
St. Maries, Ida.

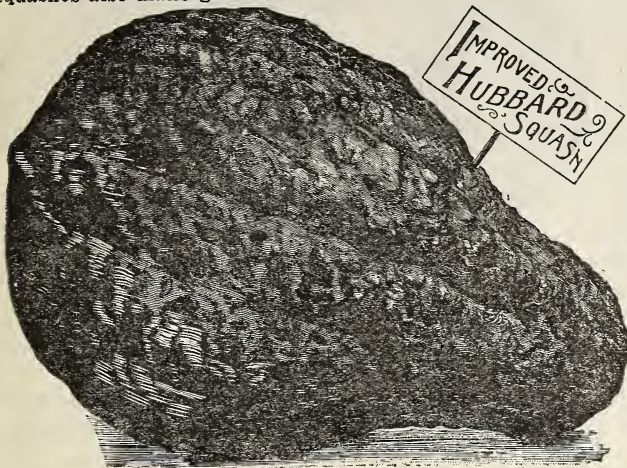

Ground Cherry

I HAVE PHENOMENAL SUCCESS WITH YOUR SEEDS.—Carl A. Willie, Lake Katrine, N. Y.

Squash

A very nutritious and valuable vegetable. The summer varieties are ready for the table early in the season, and are not adapted for storing. The winter sorts are used in fall and can be stored until the following spring. The winter squashes also make good stock feed.

SALZER'S IMPROVED HUBBARD

Salzer's Improved Hubbard is the most popular winter squash in existence and it cannot be excelled for general purposes. Exhaustive tests, constant development for trueness to type and purity, have produced an exceptionally fine strain of seed, and in this variety our customers will find our finest value in winter squashes. It is recognized as a standard for both the home and market growing. A heavy yielder and one that is sure to please you. Average weight about 10 pounds.

The vines are of a hardy, vigorous, trailing growth. The fruits are large and rich dark bronze green in color. Moderately warted and has a very hard shell, slightly curved at the stem end. The flesh is bright orange-yellow, fine grained, thick, dry and richly flavored.

1099—Pkg., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, 2 lbs., \$2.85; 5 lbs., \$6.85, postpaid.

SALZER'S GOLDEN HUBBARD

In shape very similar to the above strain. Trifle smaller however, but earlier and more prolific.

The rind is a golden color and is somewhat warted. It is the earliest of the Hubbards and an extremely heavy producer. The average weight of the fruits is about 8 pounds; occasionally light cream colored stripes are seen at the blossom end. Has finely grained flesh, thick, and richly flavored, and is a favorite with canners; has excellent keeping qualities. The shell is hard and strong, making it a good shipper.

1097—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.75; 2 lbs., \$3.25; 5 lbs., \$7.35, postpaid.

KITCHENETTE

We are introducing this fine squash this year. Turn to Page 1 for description and to inside front cover for color illustration.

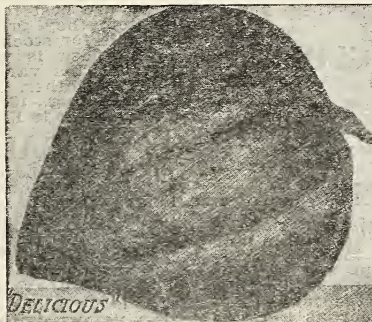

1090—Pkg., 15c; oz., 30c; ¼ lb., 85c; lb., \$2.50, postpaid.

DELICIOUS

A winter squash, finely flavored, somewhat top shaped and has a rich, dark green skin. It is a standard strain and very popular; of exceptional merit for table use. The fruits weigh about 10 pounds and keep exceptionally well in storage.

The rind is deep dark green, mottled with lighter shadings, but not as thick skin as the Improved or Golden Hubbard. The thick flesh is very fine grained, sweet, dry and dark orange in color. It is a fine shipper. A good home garden and market gardener's variety, and will keep until Spring without difficulty.

1094—Pkg., 10c; oz., 20c; ¼ lb., 45c; lb., \$1.75; 2 lbs., \$3.25; 5 lbs., \$7.50, postpaid.

MAMMOTH WHITE BUSH SCALLOP

The great summer squash that is so popular at all markets. Always brings good prices.

It is quite flat, with ridged or scalloped edges, very thick, and the vines are extremely productive and disease-resisting. Our seed has been carefully selected and bred for uniformity in maturing and in size and to produce handsome squashes that attract attention on the market. Is widely grown for home use as well as for the market. It makes an appetizing dish, and we know you will be exceptionally well pleased with it. Flesh is very tender and melting. Differs radically in flavor from the winter types, and is of true bush habit. An early maturing variety of finest quality and very prolific.

1086—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

SALZER'S GIANT SUMMER CROOKNECK

An old standard summer squash. One of the earliest and largest of the summer "crooknecks." Fruits are large, from 1½ to 2 feet long, with a thickly warted surface and deep yellow color. Flesh is tender and of fine quality. Splendid for both market gardeners and for home table use. Very productive.

1085—Pkg., 10c; oz., 20c; ¼ lb., 40c; lb., \$1.25, postpaid.

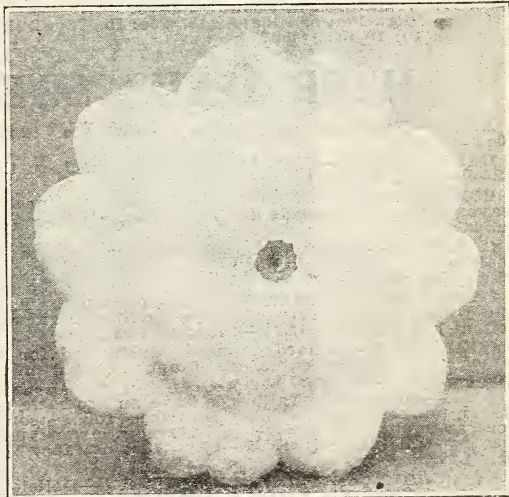

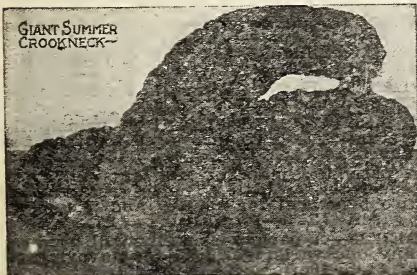

MIXED SQUASH SEED

Many of our customers want a patch of ground which will produce a variety of squashes at different times. Our mixed squash seed will furnish you with winter and summer squashes of different sizes and kinds, and contains only the highest grade seeds, of the best quality. Our squash mixture will surely please you.

1103—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00, postpaid.

SOW SALZER'S SEEDS

Your seeds were especially fine this year, and our garden has been a great boon to us. St. Mary Magdalen's Academy, Silver City, New Mexico.

Mammoth White Bush Scallop

summersquashes of different sizes and kinds, of the best quality. Our squash mixture will surely please you.

ALWAYS FOUND YOUR SEEDS THE BEST I COULD BUY.—Andrew Roesch, Terre Haute, Indiana.

Turnip

SALZER'S SNOWBALL

Splendid table qualities. One of the earliest, round, white turnips, producing medium large, round roots of perfect shape, with only a single tap root; they are of attractive appearance and showy; quite smooth, skin and flesh snowy white. The foliage is small and of light green color. The flesh is firm, mild and sweet; one of the finest turnips for private use as well as for the market gardener. Matures in about 40 days.

1204—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.40; 5 lbs., \$3.25; 10 lbs., \$5.50, postpaid.

PURPLE TOP STRAP LEAF

An old standard variety, extensively grown.

It is splendid for early spring and late fall sowing, producing in about six weeks' time a usable, tender, mild, sweet turnip. The leaves are short, the roots quite flat with upper half a purplish color and the lower half white. The flesh is pure white, crisp and finely grained. It grows rapidly from the very start.

1211—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.25; 5 lbs., \$2.90; 10 lbs., \$4.90, postpaid.

SALZER'S GOLDEN BALL

Medium sized, round roots of deep golden-yellow skin and flesh, which is firm, crisp and of excellent quality for the table. The most delicately flavored and finest yellow turnip for table use. Very early.

Adapted to spring as well as fall planting and keeps very well. Matures in about 42 days.

1236—Pkg., 10c; oz., 15c; ¼ lb., 30c; lb., \$1.00; 2 lbs., \$1.75; 5 lbs., \$4.15; 10 lbs., \$7.75, postpaid.

SALZER'S MILK WHITE GLOBE

Salzer's Milk White Globe is one of the best White Turnips for winter use grown. It is globe shaped, grows very large, of delicious flavor, and has sweet, juicy, white flesh of solid texture. Just the turnip to grow for stock and to store for kitchen use. Ready in about 50 days.

1208—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c, postpaid.

SALZER'S COWHORN

The long carrot-like shape of this turnip has made it immensely popular with farmers where more friable land is desired. Its penetrating growing habit loosens up the land and makes a better and richer growing soil for succeeding crops. Aside from this, it has all the other good qualities of a turnip and is splendid for the table. Excellent for stock; superb for plowing under as a green fertilizer. This turnip grows partly above ground. The skin is of a clear white color with a shade of green on the crown. Matures in about 60 days.

1202—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.35; 5 lbs., \$3.10; 10 lbs., \$5.25, postpaid.

HERB SEEDS, SWEET, POT AND MEDICINAL

ANISE—For flavoring cookies, candies, etc. 1242—Pkg., 10c; oz., 35c.

BASIL, SWEET—Leaves are used for mock-turtle soups. 1244—Pkg., 10c; oz., 40c.

BORAGE—The flowers furnish bee pasture. The leaves are used in salads and lemonades. 1246—Pkg., 10c; oz., 25c.

CARAWAY—Seeds are used to flavor roasts and for cookies, etc. Plants do not seed until second year. 1249—Pkg., 10c; oz., 20c; ¼ lb., 60c.

CATNIP OR CATMINT—A hardy perennial. The leaves and young shoots are used for seasoning. Makes also excellent bee pasture. 1277—Pkg., 10c; oz., 60c.

CORIANDER—A hardy annual. Cultivated for its seed, which has an agreeable taste and is used in candies. 1253—Pkg., 10c; oz., 15c.

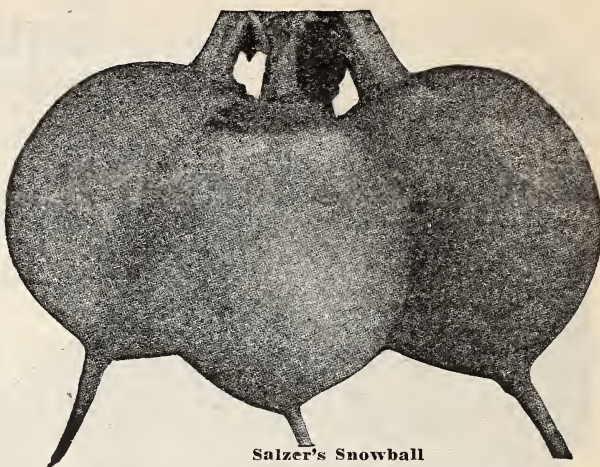

DILL—An annual. The seeds have an aromatic odor and warm pungent taste. They are used for seasoning and possess medicinal properties, but their largest use is for making Dill pickles. 1254—Pkg., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00.

FINOCCHIO, or FLORENCE FENNEL—Delicious as a salad or boiled. Flavor somewhat like celery. 1256—Pkg., 10c; oz., 25c.

LAVENDER (Lavendula Spica)—A hardy perennial. It is used to perfume linen. 1260—Pkg., 10c; oz., 60c.

MARJORAM, SWEET—Perennial, but not hardy in the north. An aromatic herb for seasoning. The young, tender tops and leaves are used green in summer to flavor broths, dressing, etc. 1261—Pkg., 10c; oz., 50c.

MINT, PEPPER—Leaves and stems are used for flavoring. 1262—Pkg., 20c.

Salzer's Snowball

PURPLE TOP WHITE GLOBE

A good producer and a fine keeper, splendid for table, tip-top for stock.

It is of fairly symmetrical globe shape. One of the heaviest cropping garden turnips and an excellent keeper. It is ideal in size and attractive in appearance. The roots are large, and white with purple color above ground. The roots are best for eating when about three inches in diameter; they grow, however, much larger and are very suitable for stock feeding.

The flesh is white, tender, fine grained and mild in flavor. This variety is probably more generally planted than any other. Ready for use in 50 days.

1212—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.25; 5 lbs., \$2.75; 10 lbs., \$5.00, postpaid.

SALZER'S WHITE EGG

One of the best for the private garden and meets with a ready sale on all markets. Has oval roots about ½ longer than broad, skin white and smooth, flesh firm, white, and of fine quality. Grows ½ out of the ground.

1217—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.40; 5 lbs., \$3.25; 10 lbs., \$5.50, postpaid.

YELLOW ABERDEEN PURPLE TOP

A large globe-shaped, table and stock variety. Outer skin yellow, with purple top. Flesh light yellow, sweet, excellent for table and relished by stock. Hardy and can be sown in July. Fine for early winter use. Matures in 60 days.

1237—Pkg., 10c; oz., 15c; ¼ lb., 25c; lb., 75c; 2 lbs., \$1.25; 5 lbs., \$2.75; 10 lbs., \$5.00, postpaid.

MINT, SPEAR—A hardy perennial. Leaves and ends of shoots are used for seasoning and for mint sauce. 1263—Pkg., 20c.

ROSEMARY—The leaves are used for flavoring meats and soups. Plants do not reach a size suitable for use until the second season. 1265—Pkg., 10c; oz., 75c.

SAFFRON—A hardy annual. Cultivated for its flowers, which are used principally for coloring, sometimes for flavoring. The flowers should be picked while in full bloom. 1267—Pkg., 10c; oz., 25c.

SAGE—A hardy perennial. One of the most extensively used herbs for seasoning. Cut the leaves and the tender shoots just as the plant is coming into flower and dry quickly in the shade. 1268—Pkg., 10c; oz., 75c; ¼ lb., \$2.00.

SAGE PLANTS, HOLT'S MAMMOTH—Hardy perennial plants of very strong growth. Each, 15c; ½ doz., 85c; doz., \$1.50.

SAVORY, SUMMER (Bohnenkraut)—The dried stems, leaves and flowers are extensively used for seasoning, especially in dressings and soups and also with string beans. 1269—Pkg., 10c; oz., 35c.

SPEAR MINT PLANTS—Hardy perennial. Each, 15c; ½ doz., 85c; doz., \$1.50, postpaid.

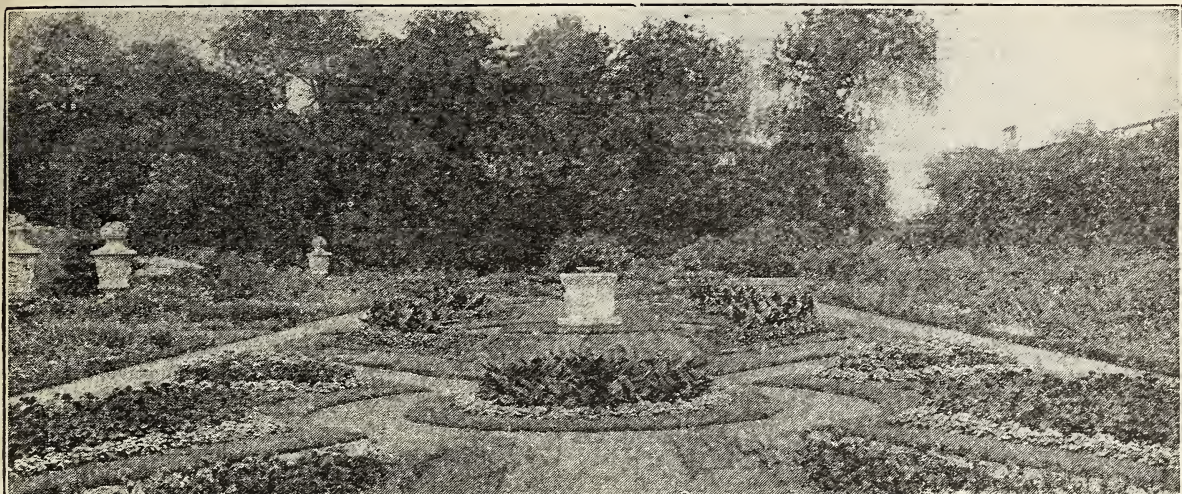

THYME, BROAD LEAVED ENGLISH—Used principally for seasoning. Sometimes the leaves are used to make tea for relieving nervous headache. 1272—Pkg., 10c; oz., 60c.

WORMWOOD—A perennial plant of fragrant and spicy odor, but with intensely bitter taste. The leaves are used as a tonic. It is also beneficial for poultry and should be planted in poultry yards. 1273—Pkg., 10c; oz., 25c.

1281—MIXED HERBS—A package usually will produce enough plants of any one variety desired for flavoring or medicinal purposes. Pkg., 10c; oz., 40c, postpaid.

Have been getting your seeds for many years and they are certainly fine.—Fred Bohde, R. D. 11, Box 62, Ft. Wayne, Ind.

SALZER'S SELECTED FLOWER SEEDS

We have grown and produced superior flower seed for over 55 years, and feel that in presenting the following flower seed pages, that we are qualified in saying that you cannot secure choicer pedigreed stocks in this country. Rather than list the poor sorts and varieties at five cents a package we have confined our efforts in producing only the very best or Super Strains. All of our varieties are tested at Cliffwood Farms and those who have experienced trouble in successfully growing flowers can rest assured that if Salzer's Super Strains are planted that your garden will produce a brilliant mass of blooms such as you have never had the pleasure of growing before. All flower seeds are Postpaid.

A—For Annuals. They grow from seed and die the first year.

B—For Biennials. Bloom and die the second year. Some varieties will bloom the first year if planted early.

P—For Perennials. Usually bloom the second year and live indefinitely. Many varieties bloom the first year.

H—For House Plants. Plants that are generally grown indoors.

C—For Climbing. Vines and plants of climbing habit.

1574—CHILDREN'S FLOWER GARDEN COLLECTION

This collection is composed of the popular, old fashioned flowers which everyone loves. They are so easy to grow and so reasonable a price that each garden should try this collection and let the children learn to love and appreciate nature. 10 packets for 25c.

I have tried the Cliffwood Superstrains you sent me and they are wonderful—Mrs. S. Morris, Detroit, Mich.

Asters-A

SALZER'S BEAUTY ASTERS

A new race of giant flowers borne on long and stout stems two feet long. The sensation of the Aster family, excellent for sections having short seasons, of vigorous growth, bearing dense double flowers of beautiful shades. This is the finest Aster we have ever produced. You will be pleased. Try them. Plants three feet high, easily grown and seem to thrive everywhere.

Mrs. Philip Rome, Emmett, Idaho, writes, "I am sending you a picture of some of your asters grown in Idaho. The plants are over four feet high and the flowers are four inches and even more in diameter, all of them beautiful colors."

Mrs. Annabel Davis, Wells, Nevada, writes, "I grew flowers from your seeds that were beautiful. Last year I took premiums at the County Fair on both your Asters and your Pansies." Salzer's Seeds are prize winners.

1711—Peach Blossom. An exquisite pinkish orange.

1712—Lavender Beauty. Beautiful soft lavender.

1713—Purple Beauty. Deep rich purple. Glorious flowers.

1714—September Beauty. A rare shade, delicate shell-pink.

1715—Finest Mixed. A fine mixture of the above rare shades.

Price of above: Each, 15c per Pkt.; 4 Pkts., 50c; ¼ oz., 95c.

SOW SALZER'S SEEDS

My garden is greatly admired by the people of this town. I think your asters are the most beautiful I have ever seen so I am sending you a picture of them.

Mrs. John Loeb, Bowdle, S. D.

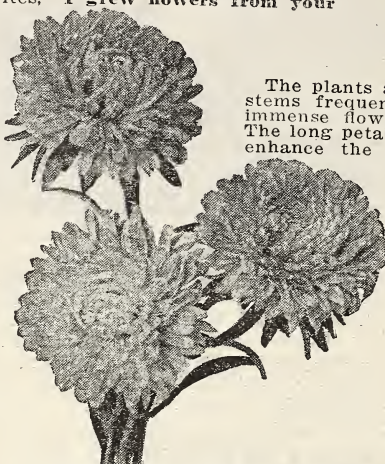

Salzer's Giant Crego Aster

GIANT CREGO

The plants are vigorous and productive, sending up stems frequently two feet in length, each carrying immense flowers often measuring six inches across. The long petals curl across each other so fluffily as to enhance the beauty of the flowers. Blooms from August to the end of September.

D. M. Shumaker, R. D. 1, Cly, Pa., writes, "I grew the most beautiful Crego Asters I have ever seen, from your seed."

Salzer's Giant Branching Asters

| 1725—GIANT FINEST MIXED | 10c | 45c |

1578—One pkt. each of the above seven separate colors for 50c.

SALZER'S GIANT BRANCHING

Particularly desirable for cut flowers and interior decorations. The flowers are extra large, double, full centered and borne on strong stems, frequently sixteen inches in length. They are a late variety and are in their prime from September on.

This type is American in its origin and is excellently adapted to our climatic conditions. Flowers are large and double, our excellent strain throwing no single flowers.

1576—One pkt. each of the above six separate colors for 50c.

SALZER'S AMERICAN ASTERS

1735—FIRE KING OR TRIUMPH. Plants eight inches high, covered with large, handsome, double flowers of peony form; intensely brilliant scarlet. Pkt., 15c.

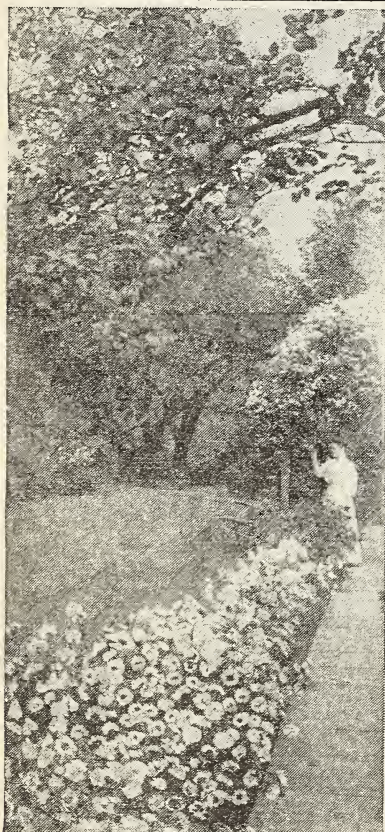

1736—SNOWBALL. An exclusive aster, growing about one foot in height and producing a profusion of handsome, pure white flowers. Pkt., 10c.

1754—SALZER'S CHOICE MIXED. This mixture is immensely popular and is doubtless one of the best ten cent mixtures offered today. Blooms from August till frost. The colors are brilliant, varied and charming. Pkt., 10c; ¼ oz., 25c.

1696—PEONY-FLOWERED PERFECTION, MIXED. A mid-season variety blooming in August. One of the most perfect flowers, very double, large and finely shaped with in-curved petals. Pkt., 10c; ¼ oz., 35c.

1755—SALZER'S GORGEOUS PRIZE MIXTURE. To those desiring a beautiful garden of asters, in almost endless types, varieties and exquisite colors, we particularly recommend our Gorgeous Prize Mixture. Pkt., 15c; ¼ oz., 45c.

1756—PERENNIAL ASTERS. Bright, beautiful flowers. Perfectly hardy, live for many years. Pkt., 10c.

The Grand Fire King Aster

Your flower seed last year was most satisfactory.—Sr. M. Bernadette, R. D. 2, Box 16, St. Cloud, Wis.

Scabiosa--A

Also known as Pin-Cushion, Mourning Bride and Sweet Scabiosa. These, ever beautiful, hardy annuals grow about 2½ feet high, and bloom from July on, until cut down by frost. They are very easily grown and are highly desirable for cutting as well as for beds and borders. The great abundance and long succession of richly colored, fragrant blossoms on long stems, make it one of the most useful corative plants of the garden.

Flower heads are about two inches across, the florets are double and surround the thimble-shaped cone, giving a fancied resemblance to a pin-cushion. We have been fully developing and improving the tall, double, large-flowering varieties below, at our great Cliffwood Farms, for size of flower, length of stem, brilliance of color, and ease of growth, our seed cannot be surpassed.

| Pkt., 15c; ¼ oz., 50c. | | |

Pansies--A

SALZER'S FROST PROOF PANSIES

Salzer's Frost Proof Pansies are what their name implies; they successfully winter through the severe climate of this north country and will bloom long after frost. For a number of years Frost Proof Pansies at our Cliffwood Farm have delightfully surprised us with the number of beautiful blossoms we pick during the cold months.

The flowers themselves are very large, often measuring 3 inches across and are produced in a beautiful variance of colors from deepest black to snow white. In our 57 years of experience we have never introduced a strain of flowers which we feel will give as much pleasure as our Frost Proof strain of Pansies. Mr. C. Jackson, North Tonawanda, N. Y., writes, "Your Pansies are the talk of the neighborhood." Mr. C. W. Fenn, R. D. 1, Terryville, Conn., writes, "Had splendid success with your Frost Proof Pansy Seed last year."

We are able to give you varieties in straight colors as listed, or our blended Cliffwood mixture in which all colors, bronze, blue, mahogany, yellow, mauve, black, etc., are represented. Have pansies after all other flowers are killed by frost.

- 2295—SNOWDRIFT. Snowy white. Beautiful.
- 2296—NORTHERN LIGHTS. A combination of all the pansy colors; attractively shaded and blotched.
- 2297—ALASKA. Red, pink and wine colored shadings.
- 2298—ICELAND. A rich dark blue. Stunning.
- 2299—YUKON. Mahogany, bronze, red, blue and gold.
- 2312—CLIFFWOOD MIXED. All of above colors carefully mixed. A beautiful array of colors and shadings.

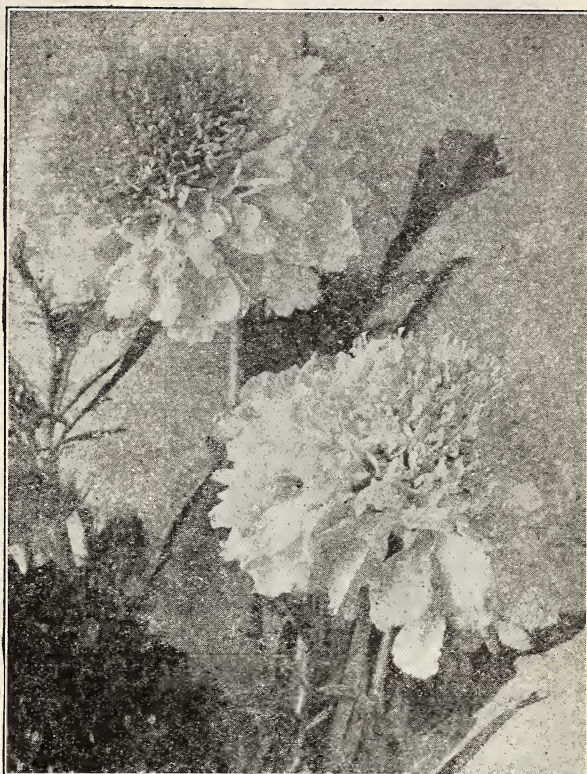

Each of above varieties: Pkt., 25c; 4 pkts., 85c; ¼ oz., \$1.95. One each of above 5 separate colors for \$1.00.

MASTERPIECE (Ruffled Giant Pansy)

2310—The truly giant-sized flowers are of the most striking character; the petals having a rich velvety substance, and being heavily ruffled give the effect of a double flower. The colors are mainly dark rich shades, bordered, blotched or veined in contrasting colors. Pkt., 20c; ¼ oz., \$1.00.

TRIUMPH OF THE GIANT PANSY

2311—The flowers are of enormous size and round form. The petals have undulated curled borders, are very broad and cover each other, making the flower appear almost double. The colors are rich, brilliant and beautiful. Pkt., 20c; 3 pkts. for 50c.

Salzer's Double Flowering Mixed Scabiosa

SALZER'S MASTODON PANSIES

This is a highly developed strain of monster sized pansies seldom measuring less than three inches in diameter. From the undnotated array of colors you will perceive that it covers not only a wide range, but includes some of the most beautiful pansy colors grown. We consider these the finest pedigreed pansies in America.

- 2300—PRINCE HENRY. Dark blue. Beautiful.
- 2306—PARISIAN. Beautiful yellow.
- 2301—GRAND DUKE MICHEL. White as snow.
- 2302—MADAM PERRETT. Shaded wine, pink and red.
- 2304—JUPITER. Red, bronze, mahogany, blue, black and gold. These shades and blotches are striking.
- 2307—BRONZE. All the different shades from burnished brass to gold. Tinged with all the colors known to pansies.

Each of above varieties: Pkt., 20c; 3 for 50c; ¼ oz., 95c.
 2293—VOLCANO (Purple Bronze).—Pkt., 25c.
 2276—FINEST MIXTURE. All of above colors mixed. Pkt., 20c; 3 for 50c; ¼ oz., 95c.

AMERICAN BEDDING VARIETIES

On account of their very free blooming habit, compact growth, wide range of colors, exceptional hardness and vigorous growth, they are highly prized for mass and bedding purposes. We specialize in Pansy seed and are making a strenuous effort to increase our Pansy seed business, hence exercise every care to produce and send out seed of a known quality that will not fail to satisfy.

1583—One pkt. each of the above eight separate colors for 70c.

2272—AMERICAN BEDDING, MIXED. All colors, Pkt., 10c; ¼ oz., 45c; ¼ oz., 85c.

2275—GOOD MIXED. Flowers are frequently three inches across. Perfect beauties of most exquisite colors. Pkt., 5c; ¼ oz., 40c.

Everyone thought your Frost Proof, Cliffwood Mixed Pansies the largest they had ever seen.—Mrs. Mary Peake, Potosi, Wis.

Bed of Ageratum bordered by White Leaved Centaurea

ABUTILON (Flowering Maple)—H

1602—**FINEST MIXED.** Ornamental, tender, shrub-like plant with large bell-shape flowers, blooming continually. (See illustration below.) Pkt., 10c.

ACHILLEA—P

1604—**THE PEARL.** A hardy perennial; covered from spring until frost with many very double, pure white flowers. Grows two feet high. Pkt., 10c.

AGERATUM—A

1610—**LITTLE BLUE STAR.** This Ageratum is an everblooming type, flowering continually until heavy frost. Each head will remain in bloom fully a month. Nothing excels it for borders and edgings. Ageratum is one of the best of bedding plants being constantly in bloom until frost. Very easy to raise from seed. Annual. Five inches high. (See color illustration page 67, also illustration opposite.) Pkt., 15c; ½ oz., 50c.

1612—**MEXICANUM BLUE PERFECTION.** Lavender-blue flowers. Excellent as a pot plant during winter. Annual. Eighteen inches high. Pkt., 10c; ¼ oz., 25c.

AQUILEGIA (Columbine)—P

1652—**VULGARIS.** One of the most beautiful of our native flowers. This variety is one of the most graceful of all. At Cliffwood this variety of Columbine was in evidence from June until frost, literally covered with its spiked blossoms. The color, a rich violet blue. So easy to grow from seed. Hardy perennial. About three feet high. Pkt., 10c.

1651—**ERFURT PRIZE.** This blend contains only the finest double varieties and the flowers are of a rarer shade of pink, yellow, garter, henna and deep purple. A mixture we have never seen equalled in beauty of the colorings and the sturdiness of the plants. Our strain will please the most critical. Pkt., 15c.

1653—**MRS. SCOTT ELLIOTT, LONG SPURRED.** Rare and beautiful, large, long-spurred, double flowers in various shades of lavender, yellow, indigo, blue, and white. Mixed colors only. Pkt., 15c.

SWEET ALYSSUM—A

1622—**MARITIMUM.** This old favorite with its exceptional fragrance and over-abundance of bloom make it almost an indispensable border plant. Unexcelled for edging, massing, basket, pot or rock work. A continuous bloomer and fills many places where other flowers of short blooming habit are not desired. Color snow white. Annual. Height, ten inches. Pkt., 5c; oz., 35c.

1623—**OCEAN SPRAY.** Of the many varieties of Alyssum, our introduction, "Ocean Spray," is unrivalled for beauty and fragrance. Used in many arboretums and finest rock gardens in the country. A variety which cannot be surpassed. Very large blossoms of delicious fragrance with many flowers on a single plant. Annual. Height, six inches. (See illustration below.) Pkt., 15c; ½ oz., 40c, postpaid.

1625—**SAXATILE COMPACTUM (Basket of Gold).** Hardy perennial. Flowers brilliant golden yellow. Silvery gray foliage. Pkt., 10c; ¼ oz., 35c.

ARCTOTIS—"Blue-Eyed African Daisy"—A

1656—**GRANDIS.** The plants form much-branched bushes about two to three feet across with silvery-white, deeply-cut foliage. Daisy-like flowers often two and one-half inches in diameter, of silvery-white color on upper surface with a sky-blue eye, the reverse petals pale lilac-blue. A most attractive annual. Pkt., 10c; ¼ oz., 30c.

ASPARAGUS FERN—H

1658—**PLUMOSUS NANUS (Lace Fern).** Most delicately, graceful foliage. A dainty pot plant for indoor decoration. Pkt., 15c.

1659—**SPRENGERI (Emerald Feather).** Of drooping growth. Makes a pretty and graceful plant for hanging baskets. Pkt., 10c.

Abutilon the bit.

A BORDER OF OCEAN SPRAY SWEET ALYSSUM

My family has bought seeds from you for the past three generations.—Edw. M. Sinoid, R. D. 1, Box 63, Mason-town, W. Va.

ANTIRRHINUM (Snapdragon)—A

Antirrhinum, Majus Nanum, Semi-Dwarf

From the foremost grower of Snapdragon seed in England we are able to offer our customers an unrivaled strain of this ever-increasing popular flower. Snapdragons are found in almost every garden because they are so easy to grow and have such a glorious range of colors. However, our new giant varieties should not be confused with the older types, for they greatly surpass them in beauty of flower and color. They are of magnificent size and closely placed on the spike. A package of each prepaid for 60¢ of the following named varieties will give you a flower bed or border of brilliant hues:

1645—AMBER QUEEN. Canary yellow, overlaid chamois pink. Exquisite.

1646—BLACK PRINCE. Rich dark crimson, dark foliage. A beauty.

1647—DEFIANCE. Vivid orange or flame

1648—NELROSE. Coral pink.

1649—ROSE QUEEN. Delicate rose.

Pkt., each 15c; one packet of each of above varieties, 60c.

1643—CLIFFWOOD HALF DWARF GIANT MIXED. This strain has proven immensely popular, especially in the last few years, since snapdragons have come into such prominence for bedding and masses. The La Crosse Parks are known far and wide for their beauty and snapdragons are perhaps the most prominent in their general use. Try this mixture this year.

It is especially commended for those who wish a showy flower that will remain in bloom throughout the summer. For cutting and house decoration it is unequalled. Height, twenty inches. Pkt., 15c; $\frac{1}{4}$ oz., 30c.

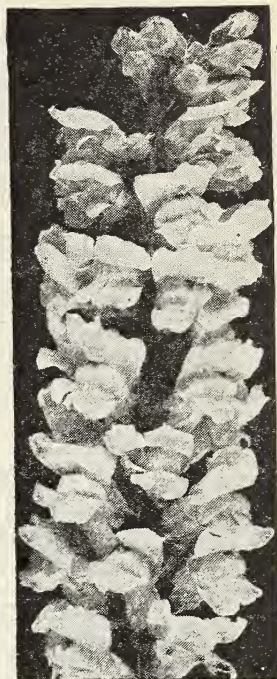

1642—DWARF GIANT MIXED. Height, ten inches. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

1644—TALL LARGE FLOWERING MIXED. Height, thirty inches. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

SOW SALZER'S SEEDS

Your Pansies and Snapdragons were really wonderful, not only in the size and color of the blossoms but in the great abundance of lovely flowers.

Mrs. A. S. Eaton, Hopkinton, N. H.

Amber Queen Antirrhinum

GIANT DOUBLE BALSAM (Lady Slipper)—A

This is one of the most gorgeous old-fashioned flowers. The plants often have six to twelve branches, literally covered with large rose-like flowers. There is more bloom display to a Balsam than any plant of equal size. Easy to grow but will thrive best in a sunny location. Transplanting will give the plants a better shape and produce finer flowers. Salzer's Superior Mixed comprises the finest double sorts. Annual. Height, two feet. (See illustration.)

Giant Double Balsam

1762—APPLE BLOSSOM SHADE, pink and white. Pkt., 10c.

1763—CRIMSON KING, blood red. Pkt., 10c.

1764—PERFECTION, snow white. Pkt., 10c.

1772—THE KING, intense scarlet. Pkt., 10c.

1766—SOLFERINO, white, lilac and scarlet. Pkt., 10c.

1778—CLIFFWOOD LARGE DOUBLE MIXED. Pkt., 15c.

1774—FINEST MIXED. Pkt., 10c; $\frac{1}{4}$ oz., 50c.

1776—SALZER'S SUPERIOR MIXED. Pkt., 5c; $\frac{1}{4}$ oz., 45c.

BALLOON VINE—AC

1760—A graceful and ornamental annual climber. The dainty white blossoms are followed by inflated seed-pods which resemble miniature balloons. Height, twelve feet. Pkt., 10c.

BEGONIAS—H

Everblooming Bedding Varieties

1784—ERFORDIA. Bright rosy carmine. Pkt., 25c.

1785—VERNON. Orange carmine, red foliage. Pkt., 15c.

Tuberous-Rooted Varieties

For summer decoration or window gardening. Bloom the first season from seed, if sown in February or March.

1789—FRILLED. Beautifully frilled and wavy petals. Pkt., 25c.

1790—SINGLE. Finest mixture. Pkt., 15c.

1788—DOUBLE. Finest mixture. Pkt., 25c.

BLUE LACE FLOWER (Didiscus Coeruleus)—A

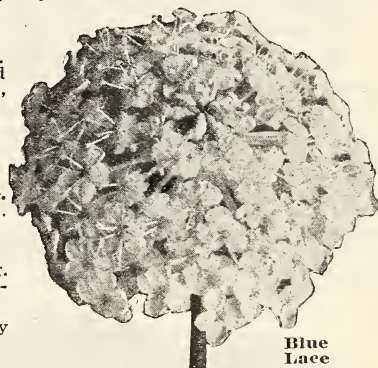

1965—While inspecting novelties at Cliffwood Farm we were attracted by the unusual beauty of the Blue Lace Flower. As its name implies, it bears a lacy flower of clear bluish color. Grows upright about 2 feet high, branches freely, each end bearing a cluster of light blue flowers spreading umbrella-like. Each blossom is carried on a thin, long tube lending the flower-head a delicate and dainty touch. Foremost for cut flowers, lasting unusually long in water, also desirable for mass growing with other flowers. Of easy culture and blooms continuously from midsummer till frost. Pkt., 10c.

BROWALLIA (Amethyst)—A

One of our favorite profuse-blooming bedding plants, covered with rich, beautiful, verbenalike flowers during the summer and autumn months, supplying a very uncommon shade of intense blue; grows freely in any rich soil; blooms finely in the winter if the plants are lifted in autumn and cut back.

1845—ELATA BLUE, rich blue. Pkt., 15c. 1847—ELATA WHITE, pure white. Pkt., 15c.

1846—ELATA VIOLET, deep violet. Pkt., 15c. 1848—ELATA MIXED, mixed colors. Pkt., 10c.

Blue
Lace
Flower

CALCEOLARIA—H

An ornamental and beautiful house plant producing a mass of flowers which are large, showy, sac-shaped or slipper-like, and which are creamy white and various shades of yellow, often splashed or blotched with dark reddish brown. Very rarely do two plants have flowers marked exactly alike. Can be grown indoors to perfection in a temperature of 60° F. Start the seed any time except in hot weather. The leaves are large, felty, and of close growing habit.

1810—HYBRIDA, GRANDIFLORA. Large flowering, mixed colors. Pkt., 25c.

CALENDULA (Pot Marigold)—A

A free flowering dwarf, bushy annual. The bright colored flowers are borne on long stems and bloom continuously from early summer until late fall. An ideal pot plant for winter. Height, one foot.

1813—ORANGE KING. One of the most striking and most beautiful flowers possible to grow. Exceptionally free blooming and the flower retains a vivid deep orange color that is most fascinating and attractive. To those of our customers not familiar with it, we urge a trial. Is hardy, vigorous and a beautiful sight in the garden. The double flowers attain an immense size. Pkt., 10c; oz., 35c.

1815—BALL CALENDULA. A new variety. The Calendula is one of the best and showiest of the free flowering annuals used so much for borders and cutting. A Mr. Ball has after years of work, developed a new strain which we offer for the first time. The flowers produced are supreme in quality and size and unusual in orange-yellow coloring. You will indeed be pleased with this new variety. Pkt., 15c; ¼ oz., 45c.

1812—LEMON QUEEN. Very large and double flowers of lemon yellow. A beauty. Pkt., 10c; oz., 35c.

1814—ALL SORTS FINEST MIXED. Rich colors. Pkt., 10c; oz., 30c.

CALLIOPSIS—A

Half-hardy perennial of quick growth and bearing a profusion of bright-colored flowers. When cut with a part of the foliage, they make a very attractive bouquet. Sow the seed thinly where the plants are to bloom in a well prepared seed bed as early in spring as the soil can be dug.

1818—GOLDEN WAVE. Brilliant annuals, with large, bright flowers borne in great profusion. Pkt., 10c; ¼ oz., 20c.

1819—FINEST MIXTURE CALLIOPSIS. Magnificent, new dwarf, compact strain. (See illustration.) Pkt., 10c; ¼ oz., 15c.

CANDYTUFT—A

An annual flower that is always popular. It has no superior for profusion of bloom. Few flowers are better liked and give greater satisfaction. Has a wide reputation for its strong, healthy, vigorous nature. One of the most prominent for border use and cutting. Growing on spikes in cluster form they are one veritable mass or sheet of color. Easy to grow, very hardy. Height, one foot. (See illustration below.)

1835—FRAGRANT. White, sweet scented. Pkt., 10c; ¼ oz., 20c.

1837—NEW CRIMSON. Pkt., 10c; ¼ oz., 25c.

1838—ROSE CARDINAL. Enormous umbels of beautiful deep rosy red. Pkt., 10c; ¼ oz., 20c.

1840—SUMMER GLORY. A rare mixture of large flowering dwarf hybrids, the finest strain in cultivation. Pkt., 10c; ¼ oz., 25c.

1834—FINEST MIXED. Annual sorts. Pkt., 10c; ¼ oz., 20c.

1836—GIBALTARICA, HYBRIDA MIXED—(Perennial). White flowers, shading to lilac. An excellent variety for the hardy border. Pkt., 10c.

1839—SEMPERVIRENS—(Perennial). Pure white, much used in cemeteries. One foot high. Pkt., 10c.

1842—GIANT WHITE HYACINTH FLOWERED. The very finest white, a new introduction. The flowers are of immense size, form in large trusses well above the foliage. Finest for cut flowers. Pkt., 15c; ¼ oz., 75c.

Candytuft

Finest
Mixture
Calliopsis

CANARY BIRD VINE —A-C

1832—A rapid growing climber of the Nasturtium family, with handsome, finely cut foliage, producing an abundance of bright canary-yellow, bird-like blossoms from July until frost. An excellent winter window vine. Height, fifteen feet. Pkt., 10c; ½ oz., 30c.

Canary-Bird Vine

Sow Salzer's Seeds

My Balsam or Lady Slippers were beautiful. I never had such a fine variety of colors before.
—Mrs. William Lorang, 29 S. Commonwealth Ave., Elgin, Ill.

CAMPANULA (Bellflower)—P

Imposing hardy plants, profusely covered with large bell-shaped flowers. Height about two feet. Often called Canterbury Bells.

1822—CUP AND SAUCER (Calycanthema). Biennial. Plants form perfect pyramids of bloom, frequently bearing 100 to 200 exquisite blossoms for weeks in early summer. Finest mixed. Pkt., 10c; ¼ oz., 35c.

1823—MEDIUM DOUBLE MIXED (Canterbury Bells). Pkt., 10c; ¼ oz., 25c.

1824—MEDIUM SINGLE MIXED (Canterbury Bells). Pkt., 10c; ¼ oz., 25c.

1826—PERSICIFOLIA WHITE. Hardy perennial. Large, handsome white bell-shaped flowers. Pkt., 10c.

1825—PERSICIFOLIA BLUE. Hardy perennial. An excellent companion to the white variety. Pkt., 10c.

SOW SALZER'S SEEDS

I bought my seeds from you last spring and among these I have your best strain of Sweet Peas; they are gorgeous.—Dr. M. Williams, Watkins, Minn.

Giant
Marguerite
Carnation

CANNAS—A

One of the most effective of showy foliage plants. The seed should be soaked in warm water until they swell. Plant indoors one-half inch deep in rich soil and keep moist until sprouted. Reselected seed only.

1850—DARK LEAVED VARIETIES, mixed. Pkt., 10c.

1852—SALZER'S FINEST MIXTURE. Contains many large flowering varieties. Pkt., 15c.

CARNATION—A-B

Free blooming and one of the most delightful summer flowers to grow in the open border. A great favorite.

1861—PERPETUAL EARLY-FLOWERING (Double Chabauds). A very fine, early and large-flowering strain. It contains a great variety of colors and shades; very fine for pot plants. Mixed colors. Pkt., 15c.

1859—GIANT MARGUERITE. These beautiful, double, fringed flowers often measure three inches across. They are quite hardy and with a little protection will live over winter outdoors. (See illustration.) Mixed colors. Pkt., 15c; ¼ oz., 75c.

1862—SALZER'S CLIFFWOOD MIXED. To the best of our knowledge we are the only seedsmen growing carnations for seed. Grown in the North, the seed is exceptionally hardy and free blooming. A superb strain. Seeds taken from large show flowers only. For blooming indoors in winter or outdoors in summer. Pkt., 25c; ¼ oz., 85c.

CARDINAL CLIMBER—A-C

(Ipomea Quamoclit Hybrida)

1856—One of the finest annual climbers known today. Very graceful and beautiful, growing rapidly and in a warm, sunny location with good soil, it reaches often a height of twenty feet; densely clothed with lacerated, rich green leaves. The numerous clusters of fiery scarlet, tubular, spear-shaped flowers resemble the cypress vine, but are much larger, often measuring one and one-quarter inches across. (See illustration) Pkt., 15c; ¼ oz., \$1.00.

CENTAUREA—A

They are of easy culture, very popular, and will amply repay any care or attention given them. The Cyanus type is also known as Bachelor's Button, Corn Flower and Ragged Sailor. If kept picked, bloom from July until late fall.

1881—CYANUS, Rose. Pkt., 10c; ½ oz., 25c. **1876—CYANUS, Single Mixed. Pkt., 10c; ½ oz., 20c.**

1882—CYANUS, White. Pkt., 10c; ½ oz., 25c. **1875—CYANUS, Double Mixed. Pkt., 10c; ½ oz., 20c.**

1883—CYANUS, Blue. Pkt., 10c; ½ oz., 25c.

1891—MARGARITAE. Satiny white. Pkt., 10c; ¼ oz., 25c.

1890—IMPERIALIS (Sweet Sultan). This strikingly beautiful type is rapidly supplanting the old favorite cornflower. Undoubtedly one of the finest of Centaureas for cut flowers, and if placed in water, are lasting. Have artistic shaped, sweet-scented flowers. Annual. Height, three feet. All colors mixed: Pkt., 10c; ¼ oz., 25c.

1884—DUSTY MILLER or WHITE LEAVED CENTAUREA. Only grown for its lovely finely-cut silvery gray foliage. Grows 1½ to 2 feet high. Pkt., 10c.

CARDINAL CLIMBER

CHRYSANTHEMUM—A

1892—ANNUAL. No flower in cultivation more generously rewards the grower than this exquisite type. The plants grow very large and bushy, and are covered with numerous blossoms, each about one and one-half inches across. As a summer hedge, or background covering unsightly spots, this cannot be equaled. Single and double varieties mixed in many colors. Pkt., 10c; ¼ oz., 25c.

1893—JAPANESE HYBRIDS (Perennial). This is the class that produces the large show flowers of late fall. Sown indoors in February or March, the plants bloom in fall. Rarest Mixture. Pkt., 25c.

COLUMBINE—P

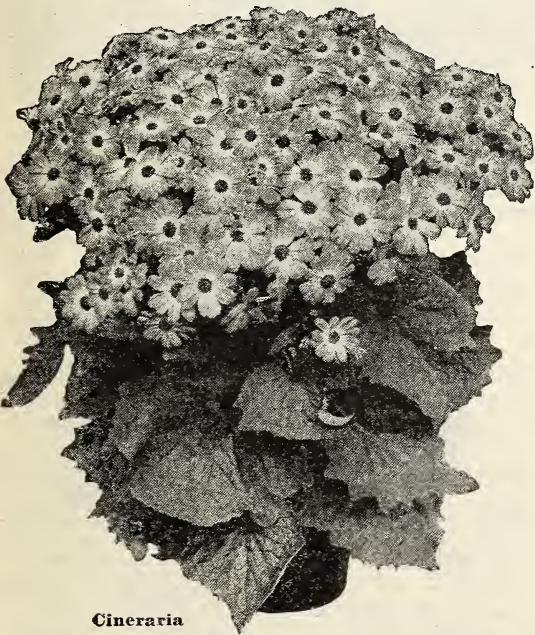

1652—See Aquilegia, page 70

CINERARIA—G

A beautiful plant for spring decoration of the window or conservatory; may also be planted out in summer. They grow from twelve to eighteen inches high, and are completely covered with a mass of flowers, often two and three inches across, of the richest colors, in white, blue, violet and crimson shades. Seed may be sown indoors at any time excepting the hot summer months.

1897—CINERARIA MULTIFLORA NANA, Mixed. An exceedingly choice and rare strain of giant flowers. Our seed is grown by a famous English specialist. Flowers seldom measure less than 3 inches in diameter, with plants of a very robust and dwarf habit. Comprises the following colors, mixed: light rose, dark rose, red, crimson, blue, violet, etc. Pkt., 50c.

1899—SALZER'S FINEST MIXED. A mixture of the finest, large flowering strains and most brilliant colors. Pkt., 20c.

Cineraria

Your seeds last year were very satisfactory.—Jas. L. Hayes, Box 197, Ironwood, Mich.

Cosmos, Mammoth Early Flowering

CLEMATIS PANICULATA—P

1903—A hardy climber, for permanent positions. Produces a mass of white star-like flowers and grows about 30 feet in a season. Flowers after first year. Pkt., 10c.

COBAEA SCANDENS (Cathedral Bells)—A-C

1904—A fine, rapidly growing, annual climber, with handsome foliage and large bell-shaped flowers of deep violet blue color. A well-established plant will often grow from 20 to 50 feet in a season. Pkt., 10c; ¼ oz., 25c.

COIX LACRYMA (Job's Tears)—A

1906—Ornamental grass, bearing clusters of large pointed seed which is much in demand. Fine for making beads. Height about 2 feet. Pkt., 10c; oz., 20c.

COLEUS

1908—FINEST MIXED. Richly colored foliage. Pkt., 20c.

COREOPSIS GRANDIFLORA—P

1912—One of the finest hardy perennial plants. Bright yellow flowers, which bloom from June until frost. Always in demand. Pkt., 10c; ¼ oz., 25c.

CYCLAMEN—G

1924—Popular free flowering bulbous plants for house culture, producing graceful orchid-like flowers during the fall, winter and spring. Colors range from white to darkest crimson, with all intermediate shades. Salzer's Show Mixture, Pkt., 20c.

CYPRESS VINE—A-C

1926—Well-known annual climbers with fern-like foliage and bright blossoms. Height, 10 feet. Mixed colors. Pkt., 10c.

DOUBLE DAISY (Bellis Perennis)—B-P

A low-growing spring-flowering plant, a companion to the pansy and forget-me-not. Loves a shady place and will reward the gardener with a mass of blossoms for succeeding years if left undisturbed.

1935—GIANT DAISY (Bellis Monstrosa). A new strain of very robust growth, each plant producing on long, stiff stems, numerous flowers measuring often three inches across, resembling finely shaped asters. Mixed colors. Pkt., 15c; ½ oz., 75c.

1936—LONGFELLOW. Large, double, dark pink flowers. Pkt., 10c; ¼ oz., 50c.

1938—SNOWBALL. Large double white flowers. Pkt., 10c; ¼ oz., 50c.

1934—FINEST DOUBLE MIXED. Large flowering sorts. Pkt., 10c; ½ oz., 30c.

1937—SHASTA DAISY. Large single flowers with white, cream and yellow-colored petals and small golden centers, long stems; hardy perennial. Height, two feet. Pkt., 10c; ½ oz., 50c.

SOW SALZER'S SEEDS

Have had perfectly marvelous results from your flower seed. From 2 pkts. of Sweet Peas, I had over 10 dozen blossoms at each picking. And my Dahla-Zinnias are simply beautiful.—Mrs. J. A. Morse, 1142 South Garnsey, Santa Ana, Calif.

COSMOS—A

Many growers of flowers have found so much difficulty in securing a sure blooming type of Cosmos that we have spent a number of years developing a strain that would be safe and sure, and in offering you this Cliffwood-grown variety we assure you of the most dependable type possible to obtain. The Cosmos usually bought elsewhere requires such a long season to bloom in that the summer is practically over before they flower.

This seed matured here, where the summer season is short, is the best evidence necessary for its earliness. The plants grow vigorously, bloom profusely and are very hardy.

The best cosmos for northern latitudes. Blooms several weeks earlier than the taller growing sorts and the flowers are much larger than the ordinary Early Blooming variety.

1920—CLIFFWOOD MIXED. All colors, mixed. Pkt., 15c; ¼ oz., 40c; oz., \$1.25.

MAMMOTH EARLY FLOWERING COSMOS—A

One of the most charming and profuse blooming annuals. Height, four to six feet. Blooms from mid-summer until frost. The large flowers are similar to single dahlias, but more delicate.

1916—GIANT FLOWERED FRINGED. A beautiful strain; all colors, mixed. Pkt., 10c; ¼ oz., 25c.

1918—LADY LENNOX. Pink. Flowers of enormous size, color shell pink. Pkt., 10c; ¼ oz., 25c.

1917—GIANT FLOWERING. Mixed. Pkt., 10c; ¼ oz., 25c; oz., 75c.

1914—EARLY BLOOMING. Mixed. Pkt., 10c; ¼ oz., 25c; oz., 75c.

NEW DOUBLE CRESTED COSMOS

When we introduced the Cliffwood varieties of Cosmos we felt we had given our customers a strain of Cosmos which would outsell all of our previous Cosmos efforts. This was true, as our Cosmos sales increased to such proportions that we were sold out before the season was over. We predict a similar sale on our Double Crested Cosmos, as this unusual flower has given much pleasure on our Cliffwood Farms this summer. The large centers and the range of colors, pink, white and crimson, will create a striking effect.

1921—Pink Beauty, 1922—White Queen, 1923—Crimson King. Each: Per pkt., 15c; 1913—Mixed, pkt., 10c.

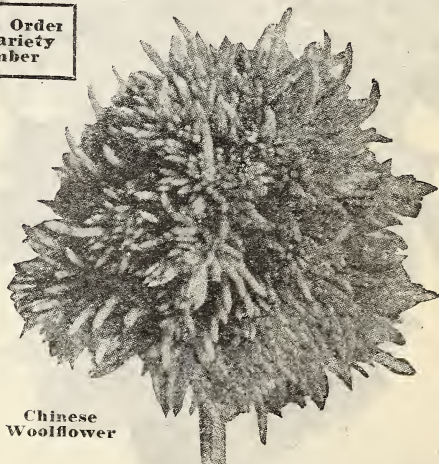

COXCOMB (Celosia)—A

1868—CRISTATA. The large flower-heads or combs are of a beautiful feathery appearance. Very showy in the flower bed and excellent as pot plants. Annual. Fine mixed. Pkt., 10c; ½ oz., 25c.

1870—PLUMOSA (Thompsoni Magnifica). The finest mixture of the ostrich feathered sorts. Plants of branching habit and each stem tipped with graceful plumes, varying in color through all shades of yellow and red. Annual. Height, thirty inches. Pkt., 10c; ½ oz., 25c.

2565—CHILDSI CRIMSON (Chinese Woolflower). Color illustration on page 68. Here we have a brilliant fire-like red, a bushy plant which grows two or three feet in height, and which will flourish in most any soil conditions. This variety is particularly effective in mass planting, as it may be planted in rows along the driveway or next to the house. It is of the feathered Coxcomb family and a very rapid grower. Pkt., 10c; ½ oz., 30c.

Chinese
Woolflower

In spite of a cold, rainy summer, all your seeds did very well. My Poppies were gorgeous.—Mrs. Walter J. Smith, Trout Creek, Mich.

ESCHOLTZIA (California Poppy)—A

One of the most showy and free flowering annuals. The low spreading plants have finely cut foliage and produce a gorgeous display of bright colored flowers resembling poppies. Blooms from early spring until frost. Height, one foot.

1966—CROCEA. Double orange. Pkt., 10c; ½ oz., 25c.

1969—GEISHA. Rich golden orange inside, orange-scarlet outside. Very striking contrast. Pkt., 10c; ½ oz., 30c.

1968—MANDARIN. Bright orange with a brilliant scarlet background. Pkt., 10c; ½ oz., 30c.

1982—FINEST MIXED. Single and double flowers. Pkt., 10c; ½ oz., 25c.

1983—AURANTIACA. The true California Poppy. A beautiful rich orange. Pkt., 10c; ½ oz., 25c.

DIANTHUS (Pinks)—A

The brilliant, contrasting colors and hardy, free blooming plants of these old favorites have kept Pinks in the fore ranks of public approval for generations. The tints, colors and formations are marvelous and striking. Those of our customers desiring an endless delight will surely find it in the growing of Annual Pinks. Sow outdoors when danger of frost is past, and in a short time they are a mass of bloom.

1952—CHINENSIS—China Pinks; large, double flowers of beautiful rich color. Pkt., 10c; ¼ oz., 60c.

1960—SNOW QUEEN—Double, large, pure white flowers. Pkt., 10c; ¼ oz., 50c.

1954—FIREBALL—Large, double, globular flowers of brilliant dark scarlet. Pkt., 10c; ¼ oz., 50c.

1956—LACINIATUS, MIRABILIS—Single fringed flowers in great variety of colors. Pkt., 10c.

1958—PLUMARIUS SEMPERFLORENS (Grass Pink, Scotch Pink)—Beautiful single hardy Pinks with fringe-edged flowers of a delightful spicy odor. Mixed colors. Pkt., 10c.

1957—PLUMARIUS NANUS FL. PL. (Double Dwarf Erfurt Clove Pink.)—Two weeks or more in advance of the order types. Possesses a much richer variety of coloring. Perennial. Pkt., 10c.

1959—SALZER'S FINEST MIXTURE—Composed of many single and double annual sorts. (See illustration.) Pkt., 10c; ¼ oz., 50c.

DELPHINIUM (Perennial Larkspur)—P

The Delphinium or Perennial Larkspur, as it is better known, with its long clustered spikes of beautiful irregular flowers, often with long spurs, is especially valuable for supplying the garden with shades of blue. These perennials are strikingly effective as a background for borders and for planting among shrubbery. Sow seed in early spring in shallow boxes or in a hot-bed. When an inch high, transplant in flats 3 to 4 inches apart each way. When the ground can be worked, set out in the garden, about 6 inches apart. Treated this way they usually flower the first season.

1951—GOLD MEDAL HYBRIDS. Of strong vigorous habit, with immense spikes from 2 to 3 feet long, of long flowers, mostly in fine shades of light blue. We doubt if this fine strain can be surpassed. Pkt., 25c; 5 pkts., \$1.00.

1947—FORMOSUM. Beautiful spikes of rich blue flowers with a white center. Pkt., 10c; ¼ oz., 50c.

1946—BELLADONNA. Blooms from June to frost; lovely pale blue color. Pkt., 15c; ¼ oz., 75c.

1948—FINEST MIXTURE. Very fine. Pkt., 10c; ¼ oz., 25c.

DELPHINIUM, EXQUISITE

1950—A new race of delphinium or larkspur, a most beautiful, stately flower, pink in color. As its name indicates, this introduction is of sterling merit and should be in every garden, it being used and in vogue by the most progressive florists. The clear shell pink of its flowers is not equaled for delicacy and beauty by any other variety. Pkt., 20c.

DAHLIA—P

The double sorts bloom the first season if sown at the beginning of April, the single sorts bloom from seed sown as late as June.

1930—Single Giant Finest Mixed. Pkt., 10c; ¼ oz., 40c.

1929—Double Giant Flowering, Mixed. Pkt., 10c; ¼ oz., 85c.

1928—Double Cactus Flowered. All colors mixed. Pkt., 15c; ¼ oz., 85c.

DATURA (Angel's Trumpet)—A

1944—Showy annual, large trumpet-shaped flowers, measuring often seven to nine inches; inside coloring pure white, and outside marbled with purple. Pkt., 10c.

DIGITALIS (Foxglove)—P

1970—No matter what you plant, be sure to set aside a space for Foxgloves. Once planted they will continue to grow year after year. Accept a timely suggestion and start a patch this year, you never will be without them again. Easily grown perennial, attaining often a height of three to five feet, and producing long spikes of beautiful tubular shaped flowers, many being spotted or blotched. Finest mixed. Pkt., 10c; ¼ oz., 25c.

DIMORPHOTHECA (African Daisy)—A

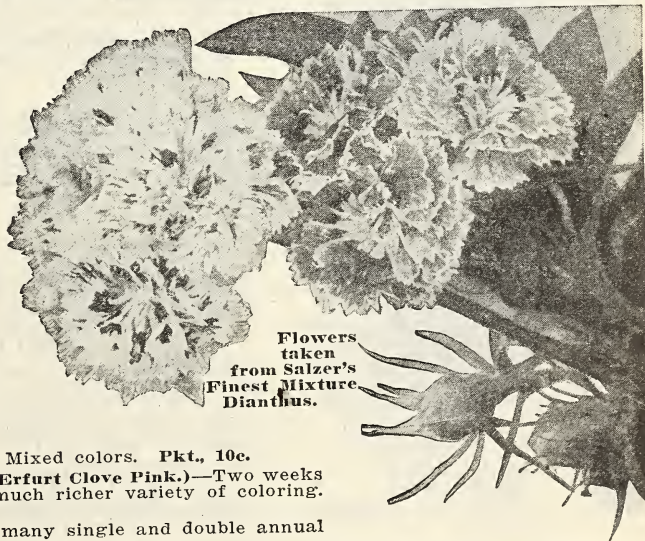

1972—AURANTIACA. A rare, extremely showy and greatly improved annual which has become a general favorite. The bushy plants grow about fifteen inches high. The flowers are often three inches across, of unique, rich, glossy orange gold color. Blooms until late fall. Pkt., 10c; ¼ oz., 30c.

DOLICHOS (Hyacinth Bean)—A-C

1976—A rapid-growing annual climber. The sweet scented blossoms are produced on large spikes or upright clusters, which are followed by ornamental seed pods. Purple and white mixed. Height, ten feet. Pkt., 10c; ½ oz., 25c.

ECHEVERIA—P

1978—(Hen and Chickens). A very fascinating, interesting and curious looking flower. Gets its name from the peculiar manner in which the parent stem sets its rosette like bloom. We recommend a trial of this beautiful plant. These tender perennials are easily grown and will furnish a real surprise. The great variety of shapes and colorings are very interesting. Pkt., 10c.

Some of your Carnations were 3 inches and more in diameter.—John Pfeifer, R. D. 1, Calvary Station, Wis.

Forget-Me-Not (Palustris Semperflorens), Pkt., 15c

FREESIA—G

Favorite house plants producing a profusion of flowers which are of delicious fragrance. Will bloom in about six months from sowing seed.

2004—NEW HYBRID. Shades of red, blue and orange mixed. Pkt., 15c.

GERANIUM

So general has become the propagation of geraniums from slips that many of our customers do not really know that they can also be grown from seed, which will provide a choice of varieties and colors.

2016—APPLE SCENTED. This favorite with sweet-scented leaves can best be grown from seed. Pkt., 25c.

2017—FINEST MIXED PELARGONIUMS (Lady Washington). Choicest and rarest varieties. Pkt., 25c.

2018—ZONALE. Mixed, single and double. Seed from the largest flowering and finest varieties. Pkt., 10c.

GLOXINIA—G

Superb house plants, producing magnificent flowers of the richest colors. Sow in March.

2027—HYBRID GRANDIFLORA. An unsurpassed strain, containing the spotted hybrid as well as the finest colored sorts. Pkt., 20c.

2026—GIANT SORTS. Magnificent flowers, measure often five inches and more in diameter. Pkt., 20c.

GYPSOPHILA (Baby's Breath)—A

Elegant, pretty, free-flowering plants with mist-like sprays of tiny star-shaped white flowers. Used largely in bouquets.

2067—PANICULATA. A hardy perennial, about two feet high with gracefully branched panicles of white flowers. Pkt., 10c; ¼ oz., 35c.

2066—ELEGANS, GRANDIFLORA, Alba. An improved large-flowering strain of the annual white sort. (See illustration.) Pkt., 10c; oz., 30c.

Gaillardia

FORGET-ME-NOT (Myosotis)—B

The Forget-Me-Nots succeed best in a shady, moist situation; hardy if given a slight protection through the winter; bloom the first year from seed if sown early. Fine for edging or in beds with Pansies.

1992—ALPESTRIS COERULEA. Bright blue; about six inches high, of trailing habit. Pkt., 10c; ½ oz., 20c.

1993—ALPESTRIS, MIXED. Pkt., 10c; ½ oz., 20c.

1994—DISSITIFLORA (Perennial). One of the earliest and best Forget-Me-Nots. It is of compact growth and produces an abundance of rich blue flowers. Pkt., 10c; ½ oz., 65c.

1997—ELIZA FONROBERT. Sky blue, white eye. Pkt., 10c; oz., \$2.00.

1995—PALUSTRIS SEMPERFLORENS (Perennial). A charming dwarf Forget-Me-Not, continuing in bloom from early spring until autumn; blue. Height, about eight inches. (See illustration.) Pkt., 15c.

1996—RUTH FISCHER (Perennial). The latest, finest and largest-flowered Forget-Me-Not, producing flowers up to one-half inch in diameter; plants of strong, vigorous growth, of exceptional value for pot culture and spring bedding. Pkt., 25c.

FOUR O'CLOCK (Marvel of Peru)—A

Well known annual. The bushy plants bear an abundance of sweet scented flowers which open late in the afternoon. Sow the seed where plants are to remain, as they will not do so well if transplanted. Height, thirty inches.

2002—FINEST MIXED. All colors. Pkt., 10c; ½ oz., 25c.

**GAILLARDIA (Blanket Flower)**

The flowers are dazzling and brilliant in colors, red and yellow predominating. Easy to grow from seed, and will produce in profusion a continuous supply of exquisite flowers on long stems. Blooms from early spring until late fall. Will thrive in poor soil and are not affected by extremes of weather. Plants of strong growth with grayish foliage. Height, eighteen inches. (See illustration.)

2010—GRANDIFLORA (P.) Mixed colors. Pkt., 10c; ¼ oz., 15c.

2011—LORENZIANA PICTA (A). Double varieties mixed. Pkt., 10c; ¼ oz., 35c.

2012—PICTA (A). Single varieties mixed. Pkt., 10c; ¼ oz., 25c.

GOURDS—A

Rapid growing annual vine with heavy foliage. The unique fruit of grotesque shapes are ornamental and useful. Height, twenty to thirty feet.

2032—MIXED VARIETIES. Large and small sorts. Pkt., 10c; oz., 20c.

HELICHRYSUM (Straw Flower)—A

See Page 82.

HELIOTROPE—A

This dear old favorite of our grandmothers is more popular today than ever. For fifteen cents, the price of a package, you can get more pleasure and satisfaction from this plant than is possible to imagine. Try it this year.

2073—REGALE. A tender annual with sprays of fragrant flowers. Easily grown from seed and can be used either as a summer bedding or a pot-plant for winter blooming. Pkt., 15c.

HELIANTHUS (Sunflower)—A

These ornamental and stately annuals should have a place in every flower garden. Planted among the shrubbery, the large golden flowers are an imposing sight all through the summer and fall. Unexcelled as a screen or hedge for hiding back yard fences, chicken yards or any unsightly corners.

2495—NANUS PURPUREUS. Red and yellow shades. Single flowers with small disc, and long rays which are slightly curled. Height, about five feet. Pkt., 10c; oz., 50c.

2496—CALIFORNICUS FL. PL. Beautiful double flowers of a dark yellow color. Height, five feet. Pkt., 10c; oz., 50c.

2500—MIXED DECORATIVE. This mixture contains the most beautiful single and double flowered sorts. Pkt., 10c; oz., 25c.

HOLLYHOCK

The stateliest of all flowers growing to a height of six feet and taller and covered with large, brilliant colored flowers in various forms. We have improved this old garden favorite until the seed and plants which are grown at Cliffwood Farm are the highest and best type yet developed. Colors ranging from white and apricot, rose, cerise and crimson to the darker shades of wine, maroon and black. Our strains will surely please you. Every garden should have some of these majestic flowers.

Annual Varieties

Bloom the first year from seed.

2078—DOUBLE FRINGED. Pkt., 10c; ¼ oz., 40c.

2079—FINEST DOUBLE MIXED. Pkt., 10c; ¼ oz., 35c.

2080—FINEST SINGLE MIXED. Pkt., 10c; ½ oz., 35c.

Perennial Varieties

2084—ALLEGHENY. Mammoth fringed flowers, double and semi-double. All colors and shades. Pkt., 10c; ¼ oz., 35c.

2086—CLIFFWOOD GROWN DOUBLE MIXED. Exceptional fine assortment of colors. Very hardy. Free blooming. Pkt., 15c; ¼ oz., 75c.

Chater's Superb Double, Perennial

We are fortunate in having been able to secure this seed from a famous grower in England, where this grand strain originated. This is the true Chater's Double, and produces very choice, large, double flowers, considered by experts as one of the finest of all Hollyhocks. Each, Pkt., 20c; 5 pkts., 90c; 7 pkts., \$1.15.

2081—DEEP SCARLET. Very attractive.

2082—YELLOW. Best yellow.

2083—NEWPORT PINK. Delicate pink.

2087—WHITE. Best of the whites.

2085—CHATER'S SUPERB DOUBLE MIXED. The finest mixture of these large double flowers. Pkt., 15c; ¼ oz., 50c.

ICE PLANT—A

2094—A trailing plant, suitable for hanging baskets and rockeries, also makes an ornamental pot plant. The leaves are covered with watery vesicles resembling ice crystals. Annual. Height, ten inches. Pkt., 10c; ¼ oz., 25c.

KOCHIA (Summer Cypress)—A

2098—An ornamental annual shrub, of unusually rapid growth, forming symmetrical-shaped bushes from two to three feet in height, of a cypress-like appearance. The leaves are slender and of a light pea-green until September, when they change to carmine and blood-red. Its bright autumn coloring has given it the name "Burning Bush." Pkt., 10c; ¼ oz., 20c.

LARKSPUR—A

Rapid growing annual of great beauty. The flowers are borne on erect spikes and are noted for the richness of their colors, particularly in blue shades. A superb flower for interior decoration. These are quite distinct from the Delphinium.

SALZER'S FAMOUS DWARF EMPEROR. This grand type grows about 2 feet high and is of candelabra habit. Very effective in borders.

2050—Violet.

2104—Rose.

2105—Mixed.

2051—Mauve.

2052—White.

SALZER'S TALL DOUBLE. Grand, large flowers; plants taller than the above.

2053—Exquisite Pink.

2056—White.

2054—Ageratum Blue.

2057—Mixed.

2055—Dark Blue.

Each of above, (Emperor and Tall): Pkt., 10c; ¼ oz., 25c.

2102—DOUBLE DWARF ROCKET. Finest mixed. Height, one foot. Pkt., 10c; ¼ oz., 25c.

2103—TALL EMPEROR. Light blue, very free flowering. Height, thirty inches. Pkt., 10c; ¼ oz., 25c.

2123—POLYPHYLLUS FINEST MIXED. Hardy perennials. Some of the most brilliant plants in cultivation; about four feet high, stout and erect, with long racemes of pea-like flowers in many colors. Pkt., 10c; ½ oz., 25c.

2122—CLIFFWOOD MIXED. The very finest annual varieties. Pkt., 10c; oz., 50c.

LUPINS—A

Hardy vines of robust growth resembling Sweet Peas, but the flowers are not fragrant. Blooms through a long season and are excellent as cut flowers. The plants die down in the fall and start growing from the roots early in spring. Height, six feet. For best results, inoculate with Humogerm.

2106—FINEST MIXED. White pink and rose. Pkt., 10c; ¼ oz., 50c.

LOBELIA—A

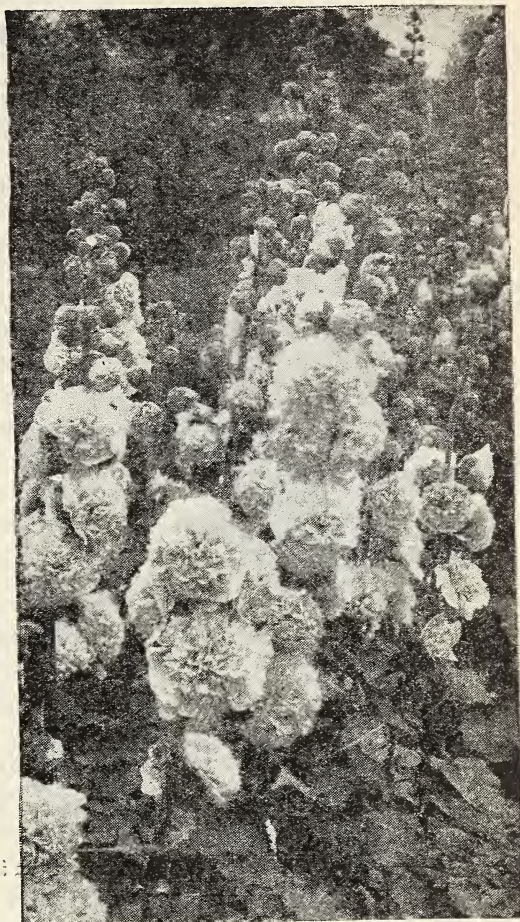

A dainty and continuous blooming annual of compact growth, remarkable for its profusion of beautiful blue flowers. Unexcelled for edging, ribbon beds, hanging baskets or window boxes. Height, about six inches.

2110—BLUE BIRD. Very effective for hanging baskets, window boxes, etc. Its intense blue lends a charm all its own. Pkt., 10c.

2112—CRYSTAL PALACE COMPACTA. Dark blue flowers, dark foliage, compact growth; fine for borders. Pkt., 10c; ½ oz., 25c.

2111—SALZER'S FINEST. An unexcelled mixture, contains compact growing sorts only in all colors. Try this variety this year for your borders; see how beautiful it is and how it sets off your flower beds. Pkt., 10c; ¼ oz., 35c.

ALL FLOWER SEEDS ARE POSTPAID TO YOUR DOOR

Annual Hollyhock

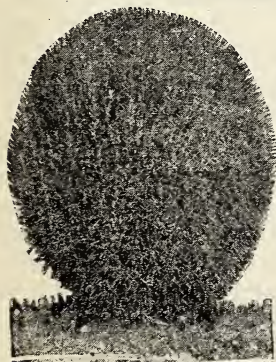

LANTANA HYBRIDA—P

2100—A shrub-like, half-hardy, perennial producing pink, yellow, orange and white flowers in great abundance, resembling the verbenas. Suitable for outdoor use in summer and also house culture. Mixed colors. Pkt., 10c.

LATHYRUS LATIFOLIUS (Perennial Peas)

Hardy vines of robust growth resembling Sweet Peas, but the flowers are not fragrant. Blooms through a long season and are excellent as cut flowers. The plants die down in the fall and start growing from the roots early in spring. Height, six feet. For best results, inoculate with Humogerm.

2106—FINEST MIXED. White pink and rose. Pkt., 10c; ¼ oz., 50c.

Kochia

Odorata Mignonette

MATHIOLA (Evening Scented Stock)—A

Dwarf growing plants, blooming from June until fall. The flowers are of exquisite fragrance, which permeates the air in the evening and after showers.
2136—BICORNIS. Sweet scented flowers of a purplish lilac color. Annual. Height, sixteen inches. Pkt., 10c; $\frac{1}{4}$ oz., 20c.

MATRICARIA (Feverfew)—A

2138—GOLDEN BALL (Eximea). Plants of compact form, with beautiful double yellow flowers. Fine for edging. Annual. Height, twelve inches. Pkt., 10c.

2139—SNOWBALL (Capensis). Dainty milk-white double spherical flowers. Very free flowering and blooms from spring until fall. Excellent as a bedding plant and for cutting. Annual. Height, eighteen inches. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

MIMULUS (Musk Plant)—A

2156—MOSCHATUS. Fine for hanging baskets, pots, greenhouse or a shady place outdoor. Musk scented foliage and small yellow flowers. Annual. Height, ten inches. This is a plant that should be in every home collection; it will keep the house beautifully scented and sweet smelling. Pkt., 20c.

SOW SALZER'S SEEDS

We couldn't get along without Salzer's Flower seeds. The finest Mignonette we ever had was from your seeds. H. F. Schmaltz, Ft. Des Moines, Ia.

MIGNONETTE (Reseda)—A

This annual is an old-time favorite and with the introduction of new types it is one of the most generally known flowers for fragrant bouquets, bedding plants and pot culture. For a continuous supply of bloom sow seed early in spring and again in mid-summer.

2146—GOLIATH. Of vigorous, compact growth, with giant trusses about six to eight inches long, densely covered with large brilliant fire-red florets, of strong, rich fragrance. Pkt., 10c; $\frac{1}{8}$ oz., 20c.

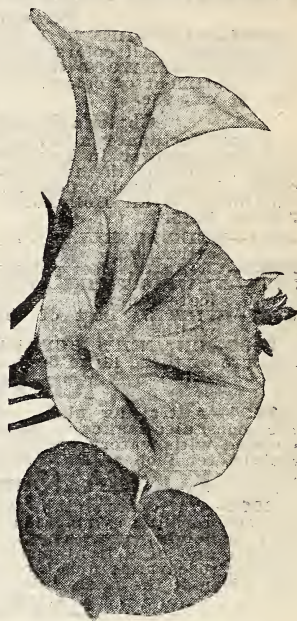

2147—MACHET. Bright red. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

2148—ODORATA. The old-fashioned variety, but very sweet scented. (See illustration.) Pkt., 10c; $\frac{1}{4}$ oz., 20c.

2149—SNOW QUEEN. Flower spikes often ten inches long, pure white and very fragrant. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

2145—GOLDEN QUEEN. A mass of gold. A very beautiful variety. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

2144—FINEST MIXED. This Mignonette mixture contains all the best sorts and cannot be excelled. Pkt., 10c; $\frac{1}{2}$ oz., 25c.

Japanese Morning Glory

MOONFLOWER—A

2160—A very popular, quick-growing annual vine, which will climb from thirty to forty feet in a single season; it has thick, glossy green foliage and produces thousands of large, white, silky blooms of rare fragrance, which open at dusk and on cloudy days. Pkt., 10c; $\frac{1}{2}$ oz., 25c.

MORNING GLORY (Convolvulus)—A

2164—TALL MORNING GLORIES. Indispensable for covering trellises, verandas, stumps, etc. **Finest Mixed.** Pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 75c.

2163—JAPANESE. The flowers are of very large size and most distinct colorings, while the foliage is also varied and attractive. The colors range from deep rich purple to pure silvery white. (See illustration.) **Finest Mixed.** Pkt., 10c; oz., 25c.

2162—DWARF MORNING GLORY. Grows about one foot high. A beautiful bedding and border plant. A free bloomer. Gives a gorgeous display of color. **Finest Mixed.** Pkt., 10c; oz., 25c.

MARIGOLD (Tagetes)—A

An annual of special merit for massing, affording a rich display of bloom in late summer when other bedding plants have lost their brilliancy. The African sorts are tall growing with large double, self-colored flowers. The French sorts produce small flowers of vivid colors and are well adapted for pot culture during the winter.

2128—DWARF AFRICAN. (Pride of the Garden.) Mixed colors. Compact bushes with immense double flowers. Height, fifteen inches. Pkt., 10c; $\frac{1}{2}$ oz., 30c.

2129—DWARF FRENCH. Mixed colors. Very showy, small double flowers. Height, ten inches. Pkt., 10c; $\frac{1}{2}$ oz., 25c.

2131—TALL AFRICAN. Mixed colors, large double flowers. Height, three feet. (See illustration.) Pkt., 10c; $\frac{1}{2}$ oz., 25c.

2132—AFRICAN LEMON QUEEN. Gorgeous yellow. Height, three feet. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

2133—AFRICAN, PRINCE OF ORANGE. Beautiful golden-orange color. Height, three feet. Pkt., 10c; $\frac{1}{4}$ oz., 25c.

NICOTIANA (Sweet Scented Tobacco)—A

The tube-shaped flowers, grown in clusters, open towards evening and are very fragrant. Blooms until frost. Height, three feet.

2233—AFFINIS HYBRIDS. Blue, red and rose colored flowers. Pkt., 10c.

2234—SANDERAE HYBRIDS. A splendid type of branching habit, in many colors. Pkt., 10c.

Marigold, Tall African

Your Zinnia and Marigold seed produced wonderful blooms.—G. Zahnd, 412 Swayse St., Marshalltown, Ia.

Salzer's Giant Flowering
Perpetual Blooming
Nasturtiums

I am sending you another order for more flower seeds. Sure have a fine garden from the seed you sent me, and it looks as though every single seed came up. Other people's gardens are not doing so well, they want to know whose seed I planted to get such a good stand.—Fannie Elrod, 3006 Edward St., Cleveland, Tenn.

NASTURTIIUMS—A

SALZER'S GIANT FLOWERING PERPETUAL BLOOMING

This race of Giant Flowering Perpetual Blooming Nasturtiums stands without a rival and is brilliantly colored, vigorous, rapidly growing and wondrously fine blooming. We control the seed of this wonderfully free-flowering Nasturtium. It blooms early and continually throughout the season. This mixture contains many brilliant and fashionable colors that are particularly adapted for dress bouquets.

The flowers are large, beautifully and exquisitely colored, borne on long stems. The many varieties contained in Salzer's Giant Flowering Perpetual Blooming Nasturtiums popularizes them as the most beautiful of all Nasturtiums. Every garden should have a bed or a border of these wonderful Nasturtiums. (See illustration.)

DWARF VARIETIES

Price of each separate color: Pkt., 10c; oz., 25c; ¼ lb., 75c.

2198—Crimson, dark leaves.

2199—Golden Yellow, dark leaves.

2200—Chameleon, various colors on same plant.

2201—Scarlet, dark leaves.

2202—White, creamy white.

2203—Orange, scarlet spotted dark leaves.

2204—Maroon, dark leaves.

2205—Violet, purplish violet.

2207—Salmon, rose, dark leaves.

2208—SALZER'S DWARF PERPETUAL BLOOMING.

Finest Mixed. Big Pkt., 10c; oz., 20c; ¼ lb., 65c; lb., \$2.00.

1594—The collection of above nine dwarf sorts; one packet each for 75c, postpaid; one oz. each for \$1.65.

TALL VARIETIES OF NASTURTIIUMS

2188—CHAMELEON. Many colors on the same plant.

2189—LILAC BROWN.

2190—CHOCOLATE.

2191—STRAW, with rosy blotches.

1595—Collection of above 8 Tall Sorts: One pkt. of each, 65c; one oz. of each, \$1.10.

2209—SALZER'S TALL PERPETUAL BLOOMING FINEST MIXED. Pkt., 10c; oz., 15c; lb., \$1.75.

OTHER MIXED SORTS

2213—TALL FINEST MIXED. All colors, pkt., 10c; oz., 15c; ¼ lb., 60c.

2214—DWARF FINEST MIXED. An elegant blend of colors. Pkt., 10c; oz., 15c; ¼ lb., 60c.

VARIEGATED AND IVY-LEAVED NASTURTIIUMS

2222—DWARF VARIEGATED LEAVED. Finest mixed. The light green foliage is variegated with yellow and white. Pkt., 10c; oz., 35c.

2221—DWARF IVY LEAVED. Finest mixed. Splendid for bedding. Pkt., 10c; oz., 35c.

2224—TALL IVY LEAVED. Finest mixed colors. Of vigorous growth and very attractive. Pkt., 10c; oz., 35c.

ORNAMENTAL GRASSES—A-P

Ornamental Grasses are used extensively for bouquets, decorative purposes, border plants and masses. Here in La Crosse, the City Parks, noted all over the state for their beauty, use Ornamental Grasses for mass beds and they make a striking, imposing and most beautiful sight.

2241—FINEST MIXED. Pkt., 10c; ½ oz., 25c.

PLATYCODON (Chinese Bell Flower)—P

Perennial plants with showy flowers. Blooms from spring until early fall. Height, one to two feet.

2372—FINEST MIXED. Blue and white flowers.

Pkt., 10c.

The Sweet Peas I got from you last year were just fine.—Clement Schaefer, 917 So. 6th St., St. Charles, Mo.

OXALIS

2246—Small free-flowering plants, with clover-like leaves, thickly starred with small, bright flowers from June until frost. Choice mixed. Many bright colors. Price: Pkt., 10c.

PORTULACA (Moss Rose)—A

Thrives in hot sun and light, sandy soil. Excellent for beds, edging and rockwork. Height six inches.

2401—FINEST SINGLE, MIXED. Pkt., 10c; ¼ oz., 25c.

2400—FINEST DOUBLE, MIXED. Pkt., 10c; ⅓ oz., 40c.

2402—PARANA. Immense, single blossoms averaging 3 inches across, of bright, ruby-red color; very free blooming. Pkt., 10c.

PETUNIA—A

Few flowers excel the Petunia in brilliant and gorgeous display, especially for massing in solid beds and window boxes. It is an annual of the easiest culture and requires little attention. Very free flowering, producing all summer an abundance of beautiful flowers.

CLIFFWOOD BALCONY PETUNIAS

This type of single Petunias, although one of the best for general outdoor culture, is used most extensively for balconies, window boxes, hanging baskets, rockeries, etc. This Cliffwood strain begins blooming early in spring and continues long after the first frosts. Seems to be no limit to its ability to flower, as it is one continuous mass of bloom. The more it is cut the more it blooms.

2330—Balcony White. A rich, snow white.

2331—Balcony Rose. A very brilliant rose pink.

2332—Balcony Blue. Rich, velvety indigo blue.

2333—Balcony Purple. Royal purple striped with white.

2334—Balcony Mixed. All of above mixed.

Pkt., each, 15c; one each of above four separate colors, 50c.

2335—CLIFFWOOD BALCONY AND BEDDING PETUNIAS.

Mixed. Best Cliffwood grown seed. Pkt., 20c; 3 for 50c.

SINGLE FLOWERING BEDDING VARIETIES

2325—HOWARD'S STAR. Crimson maroon with a clearly defined five-pointed star of bluish white. Height, eighteen inches. Pkt., 10c.

2327—ROSY MORN. Dwarf compact. Carmine pink with white throat. Height, twelve inches. Pkt., 10c.

2323—DWARF MIXED. Compact plant, fine for edging. Pkt., 10c; ¼ oz., 50c.

2329—VIOLEACEA. A grand new variety, very compact and free flowering. The blooms are a beautiful deep violet. Be sure to plant it this year. Pkt., 25c; ¼ oz., \$1.00.

2324—FINEST MIXED. An excellent mixture for brilliant flowers in all colors. Height, eighteen inches. Pkt., 10c; ¼ oz., 60c.

LARGE FLOWERING VARIETIES

2339—GIANTS OF CALIFORNIA. Flowers very large, single, in great variety of colors and markings, with deep yellow throats. (See illustration.) Pkt., 20c.

2340—RUFFLED GIANTS. Single, of extraordinary size and substance, in brilliant colors, beautifully ruffled, fluted and fringed. Pkt., 25c.

2338—SALZER'S DOUBLE FRINGED. Saved from our own unrivalled collection; will produce a large percentage of double flowers of the largest fringed varieties in bright colors and tints. Pkt., 25c.

SOW SALZER'S SEEDS

The Bedding Petunias and Dahlia Flowered Zinnias I got from you are the finest I ever saw.
Mrs. M. J. Keehn, R. D. 2, Malvern, Pa.

PRIMULA (PRIMROSE)—G

Charming plants for garden and pot culture. The Chinese and Obconica are the best varieties for house plants.

2406—AURICULA. Blooms early in spring. Yellow, brown and red flowers. Perennial. Height, six inches. Pkt., 15c.

2407—CHINESE PRIMROSE. Charming winter flowering house plants. This mixture contains only the finest fringed, free flowering sorts. Pkt., 20c.

2409—JAPONICA. Japanese primrose; bright and showy flowers borne in whorls. Mixed colors. Pkt., 20c.

2411—OBCONICA GRANDIFLORA (Large Flowering). The flowers are of soft lilac, pink, rose, lavender and crimson colors. A most desirable sort for pot culture and also does well in the open border. Pkt., 20c.

2410—MALACOIDES (Baby Primrose). Lilac flowers, an improved primrose. Pkt., 15c.

2413—VULGARIS (English Primrose). Fragrant canary yellow flowers. Perennial. Pkt., 20c.

PHLOX DRUMMONDI (Large Flowering)—A

Annual Phlox has always been a flower of prominence. When sown in massed beds it is a dazzling display of color. One of the easiest and most satisfactory plants to grow from seed and will thrive in almost any kind of soil if given a sunny position. Height, one foot. (See illustration.)

Each separate color of the undernoted sorts. Pkt., 10c; ½ oz., 80c.

2344—BRIGHT SCARLET 2346—SHELL PINK 2348—VIOLET

2345—ROSE 2347—SNOW WHITE 2349—YELLOW

2350—FINEST MIXED. All colors. Pkt., 10c; ½ oz., 60c.

1585—One pkt. each of the above six separate colors for 60c.

2360—DOUBLE FLOWERING MIXED. Desirable for cut flowers, as they last longer than the single sorts. Pkt., 15c; ½ oz., 40c.

2363—STARRED AND FRINGED. Curiously pointed, fringed and toothed flowers in colors of every conceivable shade. Pkt., 15c; ½ oz., 40c.

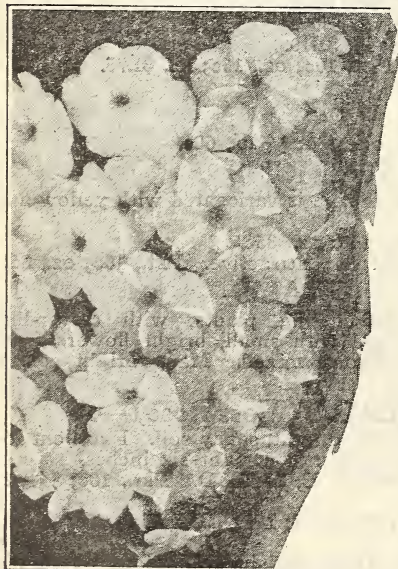

DWARF PHLOX—A

Excellent for ribbon beds, edging and pot culture. Compact growth, six to eight inches high.

2361—FIREBALL. This blood red beauty is most exquisite and effective. Pkt., 10c; ½ oz., 65c.

2359—DWARF MIXED. A choice mixture of all colors. Pkt., 10c; ½ oz., 40c.

2358—LARGE FLOWERING CECILY. The broad rounded heads of flowers are of large size, as well as the individual florets. The colors vary from light lilac through various shades of red and purple; nearly all have a large, distinct white eye. Pkt., 10c; ½ oz., 50c.

PHLOX DRUMMONDI

At the Helena State Fair I found no Phlox that would compare with the Phlox I raised from your seed.—Mrs. Chas. H. Hull, Marysville, Mont.

POPPIES—A

With little care these fascinating and brilliant flowers will grow in almost any soil. For a continuous supply of bloom sow seed at intervals of two or three weeks.

2379—FLANDERS (Salzer's). Lest we forget "In Flanders fields the poppies blow." This is the variety that our soldier boys knew so well in France. Every soldier mother should grow a few. The magnificent, large, single flowers are of a deep crimson color. For massing in solid beds, there is hardly a flower giving such stately yet dazzling display of gorgeous bloom. Height, eighteen inches. Pkt., 10c; $\frac{1}{2}$ oz., 35c.

2383—SALZER'S IMPROVED MAMMOTH SHIRLEY. (See illustration.) The single flowers are of exquisite, satiny texture ranging in color from delicate rose, apricot, pink, to rich crimson, all with white centers. Height, eighteen inches. Pkt., 15c; oz., 50c.

2374—CARDINAL. Globular fringed cardinal red flowers. Height, two feet. Pkt., 10c; $\frac{1}{2}$ oz., 40c.

2376—WHITE SWAN. Immense double fringed flowers. Height, two feet. Pkt., 10c; $\frac{1}{2}$ oz., 25c.

2382—SALZER'S DOUBLE MIXED. A fine blend of colors. Pkt., 10c; $\frac{1}{4}$ oz., 20c.

2384—FINEST MIXTURE. Single and double varieties of brilliant colors. Pkt., 10c; $\frac{1}{4}$ oz., 35c.

PEONY—FLOWERED POPPIES

2396—Here is something new, in the line of poppies, for your garden. The flowers are large, showy, double and globular shaped, resembling a double Peony. The color is a pleasing, delicate shade of shrimp-pink. Pkt., 10c; $\frac{1}{4}$ oz., 35c.

PERENNIAL POPPIES

2394—ICELAND POPPY (Papaver Nudicaule). The graceful, brilliant and fragrant flowers are produced in profusion from June to October. Plants are perfectly hardy, but bloom the first year from seed. All colors mixed. Height, one foot. Pkt., 10c; $\frac{1}{4}$ oz., 50c.

2395—ORIENTAL POPPY (Papaver Orientale). One of the most beautiful of the hardy plants. The gorgeous flowers ranging in color from pink to deepest red are often six inches across. Height, three feet. Pkt., 10c; $\frac{1}{4}$ oz., 20c.

PASSIFLORA

2316—Passion Vine, sky-blue flowers and rich green foliage. Pkt., 10c.

RHODANTHE—A

2428—Used for everlasting bouquets. The colors are beautiful and varied. Annual. Height, one foot. Pkt., 10c.

RICINUS

(Castor Oil Bean)—A

Stately, strong growing annuals with ornamental foliage.

2430—ZANZIBARIENSIS. A distinct sort surpasses in size and beauty all others. Height, twelve feet. Pkt., 10c; oz., 35c.

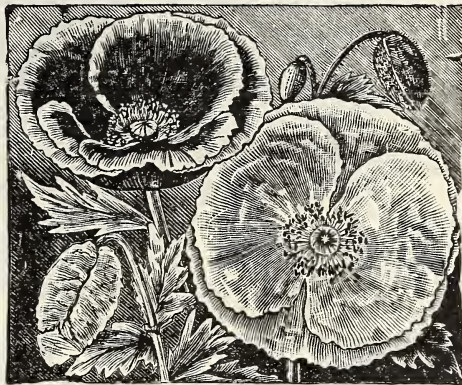

2431—MIXED. All sorts. Pkt., 10c; oz., 20c; $\frac{1}{4}$ lb., 60c; lb., \$2.00.

Salpiglossis, Emperor

Salzer's Improved
Mammoth
Shirley
Poppy

Iceland Poppy

RUDBECKIA (Golden Glow)—P

2426—One of the finest of the autumn-flowering perennials. The large flowers have rich, brilliant yellow petals surrounding a large purplish-black cone. Also known as the Cone Flower. Height, six feet. Pkt., 15c; $\frac{1}{4}$ oz., 45c.

SCABIOSA—A

(See Page 69.)

SMILAX—G-C

2460—A graceful greenhouse climber, indispensable for table decoration, bouquets, etc. Pkt., 10c.

SALPIGLOSSIS (Velvet Flower)—A

The strains are of incomparable beauty and size. They are exceedingly large flowers; make a fine, brilliant bedder. Also called Painted Tongue.

The flowers are funnel-shaped blossoms of velvety texture, with deeply sunken prominent veins, penciled and shaded with the richest tracings. Some of the showiest flower beds we have ever seen were of this beautiful and easily grown annual. Grows about 30 inches high.

2435—IMPROVED LARGE FLOWERING. Mixed. Pkt., 10c; $\frac{1}{4}$ oz., 45c.

2434—EMPEROR. Most beautiful flowers, each richly veined with gold. All shades. Mixed. Pkt., 10c; $\frac{1}{4}$ oz., 75c.

SALVIA (Flowering Sage)—A

One of the most handsome autumn-flowering plants; becomes literally ablaze with brilliant flowers. Very effective for massing.

2438—BONFIRE. The erect spikes of flowers are brilliant scarlet and stand above the dark green foliage. A very effective and gorgeous plant of compact growth. Annual. Height, two feet. Pkt., 10c; $\frac{1}{4}$ oz., 75c.

2439—FIREBALL. Compact plant covered with long scarlet spikes. Fine for pot culture. Annual. Height, fifteen inches. Pkt., 15c; $\frac{1}{4}$ oz., \$1.00.

2441—PATENS (Blue Sage). This is the celebrated blue sage that is so popular everywhere. Pkt., 20c.

2442—SPLENDENS (Scarlet Sage). Beautiful bright scarlet. Annual. Height, thirty inches. Pkt., 10c; $\frac{1}{4}$ oz., 45c.

2443—ZURICH. The earliest sort, blooms ten days ahead of any salvia. Large brilliant scarlet flowers. Annual. Height, eighteen inches. Pkt., 10c; $\frac{1}{4}$ oz., \$1.00.

The goods received from you last year are doing fine.—A. J. Faulk, M. D., Box 335, Mitchell, Nebr.

Strawflowers--A

(Helichrysum)

Large, full, double, daisy-like flower heads with prominent centers and stiff overlapping scales, produced in various bright shades on stems of good length. Highly desirable as dried flowers and for use in making winter bouquets. This is undoubtedly the most popular of the "Everlasting" flowers. The newer and improved varieties offered below are showy and attractive when grown in the garden, and they keep well as cut flowers. When dried, their bright and brilliant colorings make beautiful house decorations during winter.

The plants grow readily from seed sown in the open ground when the trees are starting out in leaf, and in order to allow them to obtain the maximum development, thin the plants out to at least one foot apart. Those flowers which you desire for winter decorations, should be cut with as long stems as possible when they are about one-third open. The foliage should then be stripped from the stems, the flowers tied in small bunches, and hung (flowers downward) in some dark, dry, cool place until cured.

Strawflowers grow from two to two and one-half feet high and are easily grown, succeeding in any good garden soil. Very effective in beds and borders. Plant a packet this spring and dry some of the flowers for next winter.

- 2068--CANARY YELLOW. The best of the yellows.
 2069--FIREBALL. The richest crimson.
 2071--SALMON QUEEN. A fine, soft salmon.
 2060--SCARLET. Very showy and attractive.
 2061--VIOLET. Pleasing shade of violet.

Price of above: Except where noted: Pkt., 15c; ¼ oz., 50c; ½ oz., \$1.50.

One each of above 6 separate colors for 70c; ¼ oz. of above 6 colors, \$2.50.

STOCKS (Gilleflower) A-Cut-and-Come-Again

DRESDEN PERPETUAL

Very popular flowers, easily grown, and are so highly fragrant and of such great beauty that they deserve a place in every garden in the country. They are considered almost indispensable where a fine display of flowers is wanted and are particularly valued for edgings, bedding and pot-culture. The improved varieties we offer, produce dense spikes of very fragrant and beautiful rosette-like double flowers in a wide range of attractive colors. Grow about twenty inches high. Sow outdoors early in spring, using well-fertilized, carefully pulverized soil, covering with ¼ inch of fine soil, firmly pressed down. Thin to 6 inches apart in rows 15 inches apart. For earlier blooming, start indoors and transplant.

Price, each of the undernoted sorts, Pkt., 10c; ½ oz., 40c.

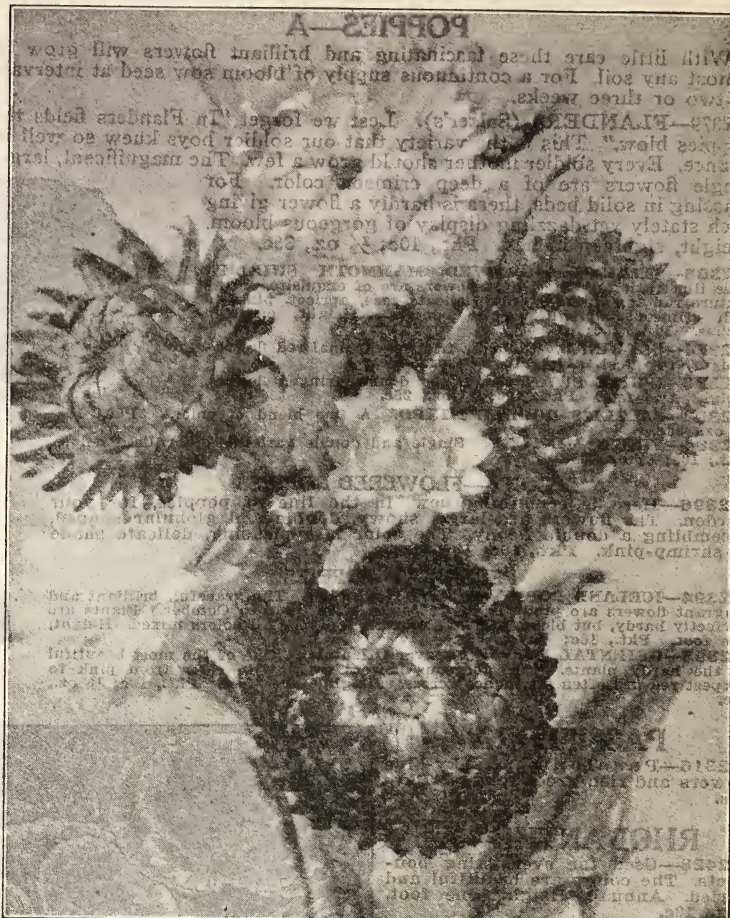

- 2482--Princess Alice. White. 2486--Mixed (all colors).
 2481--Crimson King. Velvety 2480--Beauty of Nice. Flesh Pink.
 2485--Sunburst. Canary Yellow.
 2483--Queen Alexandria. Rose. 2484--Sapphire. Blue.
 1587--One pkt., each, 6 colors, 50c.

LARGE FLOWERING TEN WEEKS

Long spikes with enormous individual double flowers which are very fragrant. Annual. Height, one foot.

Price, each of the undernoted sorts: Pkt., each, 10c; ½ oz., 40c.

- 2466--Blood Red. 2470--Light Blue.
 2467--Canary Yellow. 2471--White.
 2468--Crimson. 2472--Mixed (all colors). 10c.
 2469--Dark Blue. 1588--One pkt., each, 6 colors, 50c.

Mixed Straw Flowers

- 2062--SNOWBALL. Pure white.
 2063--MIXED. A choice mixture of the above.
 2490--EVERLASTING MIXED. All sorts and colors.
 Pkt., 10c.

One each of above 6 separate colors for 70c; ¼ oz. of above 6 colors, \$2.50.

Salzer's New Giant

Early Orchid Flowering Sweet Peas

CULTURAL DIRECTIONS: Sweet Peas are easily grown, but a little extra attention will repay you with better blooms. In Autumn or early Spring, when the site has been fixed upon where the Peas are to be planted, a trench should be dug about two feet deep, and then filled about one-third with garden refuse, leaves, etc.; then another third of well-rotted manure should be added, and the trench then filled up with good soil and left in the rough to the weather. It will be found beneficial before seed is sown in Spring to give the ground a good dusting of soot and land lime, and fork it well in. During the month of April, or as soon as frost is out of the ground, select a sunny day for sowing the seeds, which should be sown at a depth of six inches from the top of the trench. Spread the seeds

as even as possible and do not let them run together, leaving Peas from one to two inches apart in the trench. Cover the seeds with two inches of soil and fill in balance of the trench as the vines grow. As soon as the plants get about six inches high they should be supported by brush or trellis wire.

During their growth if the weather be dry, the vines will benefit by being watered twice a week. About the end of June the surface of the soil should be well mulched with good decomposed manure or cocoanut fibre. The time of blooming will be considerably lengthened by keeping the flowers well cut and allowing no pods to form. To secure best results the seed should be inoculated with Humogerm before planting. (See page 118.)

AMETHYST

2664—A brilliant, clear, royal purple color, flowers usually borne in "fours" on fine long stems. The early flowering type are of strong constitution, vigorous growth and they bloom continuously for about four months under favorable conditions. This fine purple variety, Amethyst, produces an abundance of immense flowers, showy, attractive and delightfully fragrant. Will please the most critical. Pkt., 25c; 2 pkts., 45c; oz., \$1.00.

FIRE KING

2665—The color of this new sweet pea is a scorching fiery-red or cerise-scarlet. The flowers are large, of perfect form, well waved, and in the bright sunlight they have a shining glory all their own. At our great Cliffwood Farms, where so many sweet peas are grown, it is always easily identified by its intense fiery color. Pkt., 25c; 2 pkts., 45c; oz., \$1.00.

GLITTERS

2666—Bright, glittering, fiery orange standard with wings of a deeper orange. Under glass or artificial light, it glitters and scintillates with a fire-like sheen radiating over the flowers, hence its name. The flowers are large, nicely waved, and borne on long stems, "fours" predominating. A long flowering variety that always pleases. Pkt., 25c; 2 pkts., 45c. oz., \$1.00.

GRENADIER

2667—A rich, glowing poppy scarlet, one of the best sweet peas ever introduced. The flowers are truly enormous in size, usually produced in threes and fours on very long and stiff stems, standards are broad and well waved. We have developed this superb flower so that it does not burn or fade color even at a temperature of 100 degrees under glass. Pkt., 30c; 2 pkts., 55c; oz., \$1.15.

One pkt. each of the above 4 varieties, 85c; one oz. each of the above 4 varieties, \$3.50.

Sweet Pea,
Grenadier

Salzer's Giant Orchid Flowering Sweet Peas

For Best Results, Inoculate Your Sweet Peas with Humogerm. See Page 118.

Many hundreds of varieties of sweet peas have been tried out and experimented with on our Cliffwood Farm. The best and worthiest varieties have been offered to our customers, the balance discarded.

But never until this year have we seen such an array of colors, such sweet peas in size and fragrance as our fine strain of Giant Orchid Flowering Sweet Peas. They are without question the finest and largest variety so far introduced, and when our customers once grow these Giant Orchid Sweet Peas they will not be satisfied with any other variety. The colors are exquisite, they are two weeks earlier than other varieties and the flowers are borne four to a stem. They really are the giants of the Sweet Pea family. In all our years of experience in seed growing we have never seen such a wonderful type.

The varieties which we are listing are all only the choicest and have proven, in this northern climate, to be perfectly acclimated. We feel sure that if you plant our special offer of six packages, which are postpaid for 95c, that your delightful experiences with this new giant strain will be as pleasing as ours. If conditions are at all favorable flowers will be borne for four months. All sweet peas are Cliffwood Tested and true to type.

SOW SALZER'S SEEDS

Last year I planted some of your Giant Orchid Sweet Peas and they were the finest I ever saw. I planted them March 10 and put up a 6 foot wire for them to climb on. The neighbors joked in a friendly way about such a high wire but by Aug. 15 the vines were 2 feet above the top of it, and were in bloom from June until November.—H. L. Taylor, Madrid, N. M.

EARLY ORCHID FLOWERING SWEET PEAS

2631—EARLY HEATHER BELL. Rich mauve lavender.

2632—EARLY LIBERTY. Crimson. Very large flowers.

2633—EARLY MELODY. Deep rose pink.

2634—EARLY MORNING STAR. Deep orange scarlet.

2635—EARLY SNOWFLAKE. Pure white. The best early large white.

2636—EARLY SONG BIRD. Soft pale pink. A luscious shade.

2637—EARLY MEADOW LARK. Bright primrose yellow.

2638—EARLY WARBLER. Richest mauve purple.

2639—EARLY FIRE KING. Fiery-red or cerise-scarlet.

2640—EARLY SUNSET. Rich rose blotched golden.

2641—HARMONY. Clear lavender, finest of all the lavenders.

2642—AVIATOR. Dazzling crimson scarlet. One of the best crimson scarlets yet introduced.

2643—HERCULES. Mammoth rosy pink, withstands heat and stays in bloom remarkably long.

2644—ROSE QUEEN. Rose pink, most popular pink variety grown.

2645—BLUE BIRD. Violet blue. When bunched looks like a bunch of violets.

2646—COLUMBIA. Standard salmon rose, white wings. Vigorous grower, throwing many flowers.

2649—GIANT ORCHID FLOWERING SWEET PEA MIXTURE. Finest mixed.

Each of above varieties, Pkt., 20c; oz., 90c; ¼ lb., \$3.00. Six packets, your selection, 95c. One packet each of the above 16 varieties, \$2.25.

SOW SALZER'S SEEDS

I have never grown sweet peas of such size, color and fragrance as from your Giant Orchid strain. I had beautiful flowers all summer long.

I find your seeds O. K. for this climate.—Wm. R. Hallada, R. D. 1, Goodrich, N. D.

Average Specimens of Salzer's Spencer Sweet Peas

"CLIFFWOOD" IMPROVED KING EDWARD SPENCER

Of all the Spencer Sweet Pea Novelties we consider this enlarged and intense crimson beauty one of the grandest and most perfect of them all. The exquisitely wavyed flowers often measuring two inches across are of a deep crimson color with a glossy sheen. They are of good substance and invariably borne in fours on long, stout stems. Owing to the lasting quality of the flowers this crimson beauty is incomparable for bunching. The vigorous vines grow five to six feet in height, with rich green foliage and will produce a profusion of bloom throughout the season. This grand flower should grace every garden in the country.

2606—Pkt., 15c; oz., 75c.

GRANDIFLORA SWEET PEAS LARGE FLOWERING TYPE

A strain so well known as to require no introduction. While not so large as the Spencer type, they are of good size with boldly expanded standard and wings and exquisitely sweet scented.

2507—SALZER'S FINEST MIXTURE. All large flowering sorts and a range of the best colors. Pkt., 10c; oz., 15c; lb., \$1.00.

SALZER'S SPECIALLY SELECTED SPENCER SWEET PEAS—A

No description can do justice to these wonderful Sweet Peas. The large flowers of exquisite shape, borne in threes and fours on long, stout stems are of incomparable magnificence. The vines are robust in growth and produce an abundance of bloom for a longer period than the old but popular Grandiflora type. Rather than confuse our customers we have discarded conflicting types and list here all the distinct colors.

1586—Collection of above six shades: One pkt. each, 50c; one oz. each, 80c.

CUPID, THE DWARF SWEET PEA

2505—Low growing varieties, about six to eight inches high, for edging, low beds and pot culture. They are unique and pretty. Our mixture contains every known sort and color in Dwarf Sweet Peas. Pkt., 10c; oz., 35c.

My grandfather has been dealing with Salzer's since about 50 years ago.—John Koch, Afton, Okla.

SWEET WILLIAM

(Dianthus Barbatus)

Popular free blooming plants producing clusters of brilliantly colored, sweet scented flowers on stout stems. The perennial sorts bloom the second year from seed and last for several years. Height, twenty inches.

2524—DOUBLE GIANT FLOWERED. P—Immense umbels of large double flowers measuring over one inch in diameter. Mixed colors. Perennial. Pkt., 10c; ¼ oz., 25c.

2527—SINGLE GIANT FLOWERED. P—Large heads of single flowers in a great variety of colors and markings. Perennial. (See illustration.) Pkt., 10c; ¼ oz., 20c.

2523—ANNUAL SWEET WILLIAM. Blooms early in summer from spring-sown seed and continues in flower for many weeks. All colors mixed. Pkt., 10c; ¼ oz., 25c.

THUNBERGIA (Black Eyed Susan)—A-C

Rapid growing trailing plants, used extensively in hanging baskets, window boxes and for covering verandas. Annual. Height, five feet.

2533—Buff, white and orange flowers with black eye. Pkt., 10c.

VINCA—A

2557—House and bedding plants, 18 inches high, with glossy green leaves and circular flowers. Seed should be sown early. Red and white colors mixed. Pkt., 10c.

WALLFLOWER

2564—DOUBLE MIXED. P—Deliciously fragrant double-flowers, brown and orange-purple shades predominate. These are tender perennial plants and should be wintered over in cold frames. Pkt., 10c.

2563—EXTRA EARLY ANNUAL SORTS. A distinct type. From seed sown in the spring plants will be in full bloom by August 1st, continuing until checked by frost. Magnificent, deliciously fragrant flowers of golden yellow, blood red, bright yellow and white colors. See color illustration, page 68. Mixed Colors: Pkt., 15c.

WISTARIA—P

2568—PURPLE. Pendant cluster of purple flowers. Does not bloom until second year. Grows about 40 feet high. A very hardy vine. Pkt., 10c.

WILD FLOWER GARDEN MIXTURE

2566—In this mixture we have included everything that can be successfully grown, and which will, within several weeks after planting, show bright flowers. Pkt., 10c; oz., 20c; ¼ lb., 50c.

**VIOLAS (Tufted Pansies)—P**

The tufted pansies do not produce as large flowers as the regular type, yet they bloom more profusely and for a longer time. Excellent for edging and ribbon beds.

2559—CORNUTA. If sown in April the plants will flower in June, and given protection during the winter they will bloom soon after the snow is off the ground. Annual. Height, four inches. Pkt., 10c.

Violas

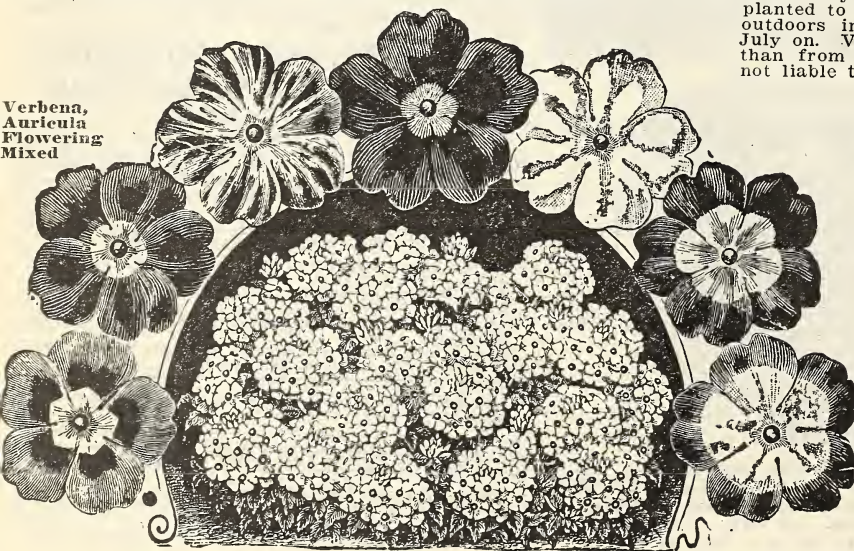

**YUCCA
FILAMENTOSA—P**

2599—One of the grandest evergreen plants for the lawn. A single panicle often contains 300 or more florets. Creamy bell-shaped flowers. Grows about five to six feet high. It is extremely ornamental; often known as Adam's Needle. Perennial. Pkt., 10c.

SALZER'S MAMMOTH FLOWERING VERBENA—A

See Color Illustration on Front Cover.

We have been carefully selecting and improving this fine strain of Verbenas for years, and can recommend it as the very best obtainable. The trusses and individual flowers are of the largest size, of brilliant colors, free-blooming and of vigorous habit. For best and quickest results seed should be sown early in the house or hotbed, and transplanted to flowering quarters in May. If sown outdoors in May, it blooms from the end of July on. Verbenas are better grown from seed than from cuttings, being more vigorous and not liable to disease.

Verbena,
Auricula
Flowering
Mixed

2676—DEFIANCE. Scarlet. Pkt., 15c; ¼ oz., 50c.

2532—DARK BLUE. Beautiful. Pkt., 15c; ¼ oz., 50c.

2678—MAYFLOWER. Unusually fragrant flowers. Mostly in shades of pink and rose. Pkt., 15c; ¼ oz., 50c.

2679—WHITE. Pure white. Pkt., 15c; ¼ oz., 50c.

2680—ITALIAN STRIPED. Florets striped with fine radiating lines. Pkt., 15c; ¼ oz., 50c.

2681—LUTEA. Rich yellow. Pkt., 15c; ¼ oz., 50c.

2544—MIXED. Above colors mixed. Pkt., 10c; ¼ oz., 40c.

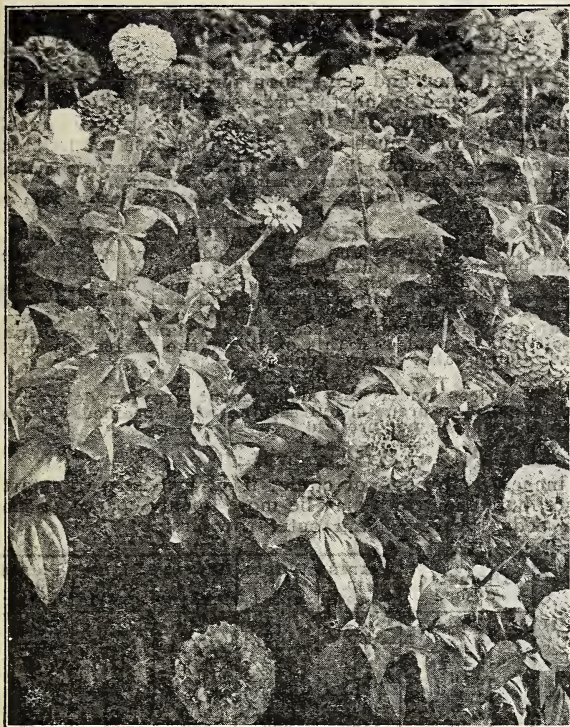

2682—AURICULA FLOWERED MIXED. Each flower has a white eye. Pkt., 10c; ¼ oz., 25c.

2546—HYBRIDA MIXED. All colors of the older types. Pkt., 10c; ¼ oz., 30c.

2675—LEMON VERBENA. Has delightfully fragrant foliage. Pkt., 10c; ¼ oz., 35c.

One Pkt. each of above six, 75c.

Your flower seeds are especially fine.—Mrs. S. Magnuson, R. D. 1, Box 14, Roxbury, Kans.

A Bed of Large Flowering Dwarf Zinnias

LARGE FLOWERING DWARF ZINNIA—A (YOUTH AND OLD AGE)

Such rapid strides have been made in the development and improvement of this useful class of annual flowers that the modern Zinnias would hardly be recognized by the gardeners of a generation or two ago. The old-fashioned Zinnias were stiff and prim and their colors were dull and raw, but the Zinnias of today are elegant in form and rival even the tulips in brilliancy and variety of color. Certain it is that few of our common flowers produce such a gorgeous display over as long a period with only a minimum of care.

The seed may be started in boxes indoors during March or sown directly in the open ground early in May. Transplanting, if necessary, should be done while the plants are still quite young, preferably when they are only about 2 or 3 inches high. They will grow almost anywhere except in shade, but they do best in a fairly rich, medium heavy soil and appreciate an occasional watering in dry weather. In thinning or transplanting leave the young plants plenty of room in which to develop; the large-flowering varieties should stand at least 1½ feet apart.

The Large Flowering Dwarf Zinnias grow bushy, compact plants about 15 inches high, bearing immense, double flowers. They are ideal for low beds or for borders.

Each of the undernoted colors: Pkt., 10c; ¼ oz., 35c.

2577—ORANGE

2580—SCARLET

2578—PINK

2581—WHITE

2579—ROSE

2582—YELLOW

1589—One packet each of the above 6 separate colors, 30c.

2583—MIXED, all colors. Pkt., 10c; ¼ oz., 40c.

2572—GIANT SHOW (Grandiflora Robusta Plenissima.) Huge flowers measuring often five to six inches across, semi-globular and very double. Grand and long-lasting effects can be produced in beds and borders with this new race. Plants grow about three feet high. Mixed colors. Pkt., 10c; ¼ oz., 50c.

Your Verbenas and Dahlia Flowered Zinnias are the most beautiful I ever saw, in color and size.
Mrs. J. F. Joffrion, Box 753, De Quincy, La.

Your Dahlia Flowered Zinnias are pronounced most wonderful by all who see them.
Mrs. W. N. Crawford, Milburn, Iowa.

SOW SALZER'S SEEDS

NEW DAHLIA FLOWERED ZINNIA

See Color Illustration, Page 67

2584—Besides producing by far the largest flowers of all the Zinnias, the Dahlia-flowered varieties are distinguished by being nearly as deep in the center as they are wide, with smaller individual petals than the ordinary varieties, but many more of them. Moreover, their colors are softer and more pleasing, being characterized by blended shades and pastel effects which, with the slightly reflexed and closely overlapping petals, give the whole flower the appearance of a fine satin cushion. The plants are tall and vigorous, producing a wealth of immense blooms from July until frost. Mixed colors, pkt., 10c.

We are offering the most popular shades separately for the second time this season, and predict a record-breaking sale on these easy to grow flowers.

2585—Exquisite. Light rose, center deep rose. Most pleasing color in Zinnias.

2586—Old Rose. A charming old rose shade. Very popular.

2587—Golden State. Deep yellow in the bud, turning to clear rich orange in full bloom.

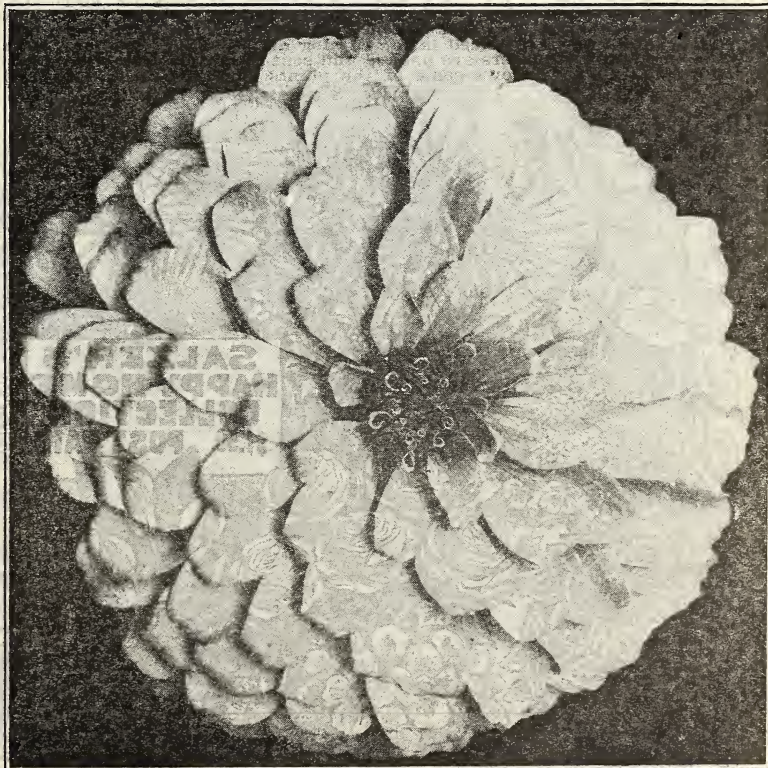

2588—Crimson Monarch. Striking crimson. Enormous flowers, often 8 inches in diameter.

2589—Dream. Deep lavender turning to purple. A rare color in Zinnias.

2590—Polar Bear. Pure white.

2591—Buttercup. A very pleasing shade of rich golden yellow.

Separate colors, each, pkt., 15c. One pkt. each of above 7 sorts, 80c. One pkt. each of the 5 separate colors illustrated on Page 67, for 60c.

Salzer's New Dahlia Flowered Zinnia

Your Dahlia Flowered Zinnias last year were wonderful.—A. Lorraine Scheffer, 1361 Sprague St., Akron, Ohio.

PLANT AND BULB DEPARTMENT

Thousands of feet of glass, innumerable propagating and cold frames, and acres upon acres at Cliffwood Farms are required to furnish the enormous supply of bulbs and plants needed to fill the orders received from all over the country. Salzer's Plants and Bulbs have a national reputation. They are the hardiest of any obtainable. They shoot up quickly and bloom early and freely, bearing flowers for a much longer time than less robust stock.

Mrs. L. Y. Rogers, Box 204, Waterville, Minn., writes, "My Roses are beautiful, the Tiger Lilies are immense and the Hollyhocks are gorgeous. Some are over 10 feet high, of various shades and much admired by tourists."

Mrs. Etta C. Myers, Box 268, Laurel Springs, N. J., writes, "My Lemon tree and the Oleander that I bought from you are growing fine. Am very well pleased with them."

ORDER EARLY

We urge our friends to place their orders as early as possible. Last year we quickly sold out of different varieties, and although we have larger stocks on hand this spring, there is less likelihood of our having run out of some kinds, and your being disappointed, if your order is received early in the season.

TIME OF SHIPMENT

All plants are shipped when stock is ready and when the weather permits planting. For the south, orders are naturally filled much earlier than for the northern states. As orders are received, we book them and ship at planting time unless you instruct us otherwise.

HOW WE SHIP

To reduce weight and volume, plants are shipped without pots and with most of the dirt removed. However, if you wish us to ship house and bedding plants in paper flower-pots with all of the original soil attached to the roots, add 10c extra for each plant so ordered. Many of our customers want to receive their plants in the original soil and in pots, and this extra charge of 10c covers the additional labor and expense.

PRICES

All prices under this department are for delivery by mail, postage prepaid, unless otherwise specified. Express shipments are not prepaid.

CIRCULAR BED PLANTING TABLE

If plants are to be 6 inches apart, start outside row 3 inches from edge of circle; if 12 inches apart, start 6 inches from edge, etc. The outer rows should be compact, but inner rows may be more openly spaced. Square beds require about the same number of plants as circular beds. Always plant outer row first.

| Diameter of bed | Plants 6 in. apart | Plants 12 in. apart | Plants 18 in. apart | Plants 24 in. apart | Plants 30 in. apart |
|-----------------|--------------------|---------------------|---------------------|---------------------|---------------------|
| 3 feet | 28 | 7 | | | |
| 4 " | 48 | 12 | 6 | | |

SALZER'S HAPPY HOME PLANT COLLECTION

15 plants, \$1.50, postpaid

To meet the demand of our plant trade we are obliged to grow large stocks of all kinds of plants and bulbs to make sure that we have enough—so after the heavy spring business is about over, in May, we take this stock of choice plants of various kinds and make them into Happy Home Collections, our selections. You will find repeatedly in this Collection plants that are priced in the catalog at 25c to 50c each and higher. This Plant Collection will be sent by mail, postpaid, and all orders are booked and sent in spring at the close of our season, or earlier, as our stock permits. The illustration below shows some of the plants contained in this Collection at the zenith of their growth.

Price, 8 plants, 90c; 15 plants, \$1.50, postpaid

NOTE: Because of regulations which delay plants in transit, causing them to deteriorate, we do not ship plants to Florida, Wyoming and Canada.

ALTERNANTHERA

Bright and dainty little foliage plants, extensively used for carpet bedding, dwarf edging and design bedding. Very showy.

AUREA—Fine leaved, bright yellow foliage. Grows compactly.

PARONYCHIOIDES—Orange-red and crimson, shaded green. Planted with above, makes a brilliant contrast!

Price of above: Each, 15c; per doz., \$1.25, postpaid. Not prepaid: \$3.00 per 100.

ANTIRRHINUM

The well-known Snap-Dragon. Strong, transplanted seedlings that will give you flowers much earlier than from seed. State color wanted: yellow, crimson, pink, white and mixed. Dozen, 75c; 25 for \$1.35; 50 for \$2.25; 100 for \$3.90, postpaid.

PHILADELPHIA PINK—A new variety. Finest pure pink Snap-Dragon grown. Dozen, \$1.00; 25 for \$1.80; 50 for \$3.25; 100 for \$5.90, postpaid.

ASTERS

With these strong, healthy, transplanted seedlings you will have flowers several weeks earlier than from seed.

GIANT BRANCHING—Dark crimson, rose, purple, white and mixed. State color wanted. Dozen, 75c; 25 for \$1.35; 50 for \$2.25; 100 for \$3.90, postpaid.

GIANT CRESCENT—Crimson, dark blue, rose, white and mixed. State color wanted. Dozen, 80c; 25 for \$1.45; 50 for \$2.35; 100 for \$4.00, postpaid.

TUBEROUS BEGONIAS

The tubers rest in the winter, but start again early in spring. They thrive magnificently either treated as a pot or garden plant, when the massive, brilliantly colored blossoms will both please and astonish you. We supply dormant bulbs only and not plants, which should be taken up before cold weather, spread out to dry, and then packed away in sand for the winter, in a cool place. State color wanted.

Single, white, yellow, red, pink: Each, 25c; 6 for \$1.40; 12 for \$2.75, postpaid.

Double, white, yellow, red, pink: Each, 30c; 6 for \$1.75; 12 for \$3.35, postpaid.

Single and Double Mixed, our selection: Each, 25c; 6 for \$1.40; 12 for \$2.75, postpaid.

Ageratum, Blue Star

Giant Branching Aster

FLOWERING BEGONIAS

Few house plants are so satisfactory in every way and so rich in color, as these beauties. Unless noted: Each, 20c; per doz., \$2.00, postpaid.

Alba Pieta—Leaves glossy green, thickly spotted silvery white, flowers white.

Alba Pieta Rosea—Long green leaves spotted silver; flowers bright rose color.

Argenta Guttata—Purple bronze leaves with silvery markings; white flowers.

Incarnate—Dark leaves with silver dots; beautiful pink flowers. Very popular. Each, 25c; per doz., \$2.50, postpaid.

Luminosa—A new variety. Free bloomer with fiery scarlet flowers.

Prima Donna—A fine bedding Begonia, bearing freely its large bright pink flowers.

Shmidtii—A dark green, small leaved variety; bears pure white flowers.

One each of the above seven Begonias for \$1.25, postpaid.

ABUTILON

Bloom continuously. Popular as pot plants and splendid for summer bedding, vases and baskets. The flowers are deeply bell-shaped, distributed over the entire plant, and are borne in great profusion throughout the whole season. Has maple shaped leaves, hence is often called the Flowering Maple. All of our plants are cool grown, thrifty and full of vitality.

GOLDEN SUNSET—Imagine a plant with fully 100 massive, clear, golden-yellow bells pendant to every branch; that's a one-year-old Golden Sunset. Each, 25c; per dozen, \$2.50, postpaid.

SNOWSTORM—Pure white flowers. Very pretty and free blooming. Each, 20c; per dozen, \$2.00, postpaid.

SOUVENIR de BONN—Deep green leaves, margined irregularly with white. Bright orange flowers, veined crimson, very free flowering. A most attractive variety. Each, 25c; per dozen, \$2.25, postpaid.

SPLENDEUR—Beautiful deep red variety. Dwarf growing, free blooming, with a fine shade of green foliage. Each, 20c; per dozen, \$2.00, postpaid.

One each of the above varieties, 80c, postpaid.

ACHYRANTHUS

They make intensely bright beds and are splendid for borders to taller growing plants. Thrive everywhere and are not easily killed by frost.

HERBSTI—Transparent leaves of rosy carmine, intensely brilliant. Dwarf and compact growth. A beauty. Each, 20c; per dozen, \$1.95, postpaid.

McNALLY—Bright, rich green with yellow arching veins; red stemmed. Robust grower. Each, 15c; per dozen, \$1.50, postpaid.

AGERATUMS

Highly desirable for summer bedding as well as for baskets and vases, on account of their supplying the serious lack of blue shades among bedding plants. Grow about 8 inches high. Splendid for edging beds, and effective if massed in quantities. Blooms profusely all season, bearing flowers in rounded umbels, with protruding soft bristles as shown in illustration. Frequently called Floss Flower.

BLUE STAR—Bright blue, star shaped flowers in large clusters. Each, 15c; per doz., \$1.35, postpaid. Not prepaid: \$8.50 per 100.

IMPERIAL WHITE—Pure white. Profuse bloomer. Each, 15c; per doz., \$1.25; postpaid. Not prepaid: \$8.25 per 100.

SWEET ALYSSUM

Used extensively for bordering and edging, and valuable for massing in quantities. It is very free blooming, flowering from early summer until late fall.

OCEAN SPRAY—Beautiful white flowers, fragrant, large, and fine for cut flowers. Height, six inches. Each, 15c; per doz., \$1.25, postpaid. Not prepaid: \$8.25 per 100.

Flowering Begonias

CACTUS

Sanseveria

Wonderful varieties from Mexico with very odd and highly colored flowers having curiously intricate designs. We have selected the following varieties because of their ease of culture and their striking flowers and designs. Note our low prices.

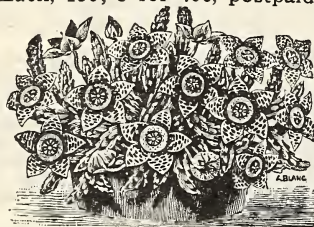

LOBSTER—A wonderfully free bloomer; frequently blooming three or four times a season. Of drooping, weeping habit. Also called "Bleeding Cactus." See illustration below. Each, 25c, postpaid.

NIGHT BLOOMING CEREUS—Free flowering. This gorgeous cactus usually opens at 7 o'clock in the evening, attaining its greatest beauty at 12; blossoms often measure 12 inches in diameter. Of easy culture, requiring little care. Each, 25c, postpaid.

PHYLLOCACTUS—The most brilliantly hued blossoms among cacti is found on this plant. Often bears 150 blossoms annually. Each, 25c, postpaid.

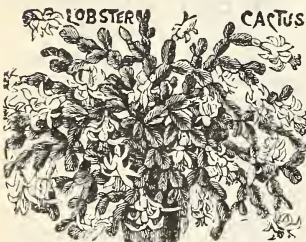

SANSEVERIA—A beauty. Will bear all manner of neglect and reward you with attractive foliage and immense spikes of blossoms. Each, 25c, postpaid.

STAPELIA—We have lowered our price as we want each one to have a Stapelia! It is a rare beauty and very odd. Beautiful buff yellow blossoms with deep maroon markings of intricate designs. Each, 15c; 3 for 40c, postpaid.

Stapelia Cactus

One each of the above five beautiful cacti for only 95c, postpaid.

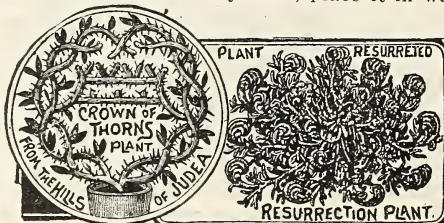

On the wild, rocky hills of Judea, and in the immediate neighborhood of Jerusalem, this emblematic plant is found. It is a peculiar plant, thorny, with a few bright green leaves and an abundance of light rose blossoms of the easiest possible culture and can be trained to assume any shape. It has been sometimes claimed the "Crown of Thorns" worn by our Savior was made from this plant and that the drink given to our Savior before His death came from the juice of this plant. Each, 25c; 3 for 60c, postpaid.

THE RESURRECTION PLANT

Where the pines and cedars of Palestine grow, comes this singular plant. Imagine a bunch of withered looking shoots, brown, stiff and apparently dead; place it in water, and within an hour it is transformed from a withered-looking bunch into a lovely patch of green moss. Each, 15c; 3 for 40c, postpaid.

SOW SALZER'S SEEDS

I sent for a Night Blooming Cereus and it has grown fine. It is almost 2 feet tall and is growing so many sprouts.—Mrs. A. Kathenbeutel, R. D. 4, Iowa Falls Iowa.

CALADIUM ESCULENTUM

CALADIUM ESCULENTUM

This plant is often called Elephant Ear on account of the enormous size of the single leaves. Look at the illustration. Stands six to seven feet high. Its mammoth leaves frequently measuring from 3 to 6 feet in circumference. It is easy to grow and no garden or lawn should be without it, as it is particularly striking when grown either singly or in a group on the lawn, with Cannas as center. Should have plenty of water and a good rich soil.

Each, 15c; 10 for \$1.25; extra large bulbs, 25c each; 10 for \$2.25, postpaid.

Night Blooming Cereus

FANCY LEAVED CALADIUM

Beautifully variegated foliage plants, splendid for window-boxes, vases, etc., or for planting out of doors in a somewhat shady location. They are one of the showiest of all of the foliage plants with their brilliant and striking hues.

The leaves are a riot of color with indescribable beauties of design. After being well started, they need liberal watering and adequate drainage. We furnish bulbs until July, at which time the plants are ready. Dig the bulbs in October and after drying, keep in a warm dry place until spring. Price: Each, 35c; 10 for \$3.25, postpaid.

BIBLE PLANTS

CROWN OF THORNS, OR EUPHORBIA

Fancy Leaved Caladium

Add 10c extra for each house plant wanted in paper pot and original soil.

Used your Stim-U-Plant Tablets and never saw geraniums grow and blossom like mine did.—Mrs. John May, R. D. 1, Erie Co., Boston, N. Y.

COLEUS

One of the finest bedding plants grown. The plants are broad-leaved, with bushy foliage which is unequalled by any other plant for brilliancy of color. Nothing can take their place for large bedding schemes and they are invaluable for borders. Coleus will grow almost anywhere. Unless noted: 15c each; \$1.50 per doz, postpaid. Not prepaid: \$8.50 per 100. See illustration at right.

BECKWITH'S GEM—Center is dark velvety maroon, bordered fiery red, the edge is green, changing to creamy yellow at point of leaf.

CHRISTMAS GEM—Reddish purple, veined red and green. The entire leaf has a very narrow green edging.

ELDORADO—Luxuriant, velvety foliage; old gold handsomely ribbed and blotched very dark garnet.

GOLDEN BEDDER—Lovely golden yellow. A beauty.

GOLDEN QUEEN—Of trailing habit, splendid for window-boxes and hanging baskets. The standard yellow; mottled green scallops at edge of leaf.

HERO—Best of the very dark colors, almost jet-black leaves, pointed and scalloped.

QUEEN VICTORIA—Bright cardinal red with distinct bright golden border.

ROB ROY—Pinkish red with crinkled edges. Admired by all.

TRAILING QUEEN—Center of bright yellow, bordered with olive green. Deeply serrated edges, green, intermingled with yellow. Of trailing habit. Each, 20c; per doz., \$2.00, postpaid.

VERSCHAFFELTI—Rich velvety crimson. Grand bedder.

One each of the above Coleus for \$1.20, postpaid.

CENTAUREA

Strong, healthy transplanted seedlings that will give you flowers much earlier than from seed. Mixed Colors: 75c per doz.; 25 for \$1.35; 50 for \$2.40; 100 for \$3.00, postpaid.

CIGAR PLANT

A bushy plant about 15 inches high, bearing large numbers of narrow, tubular, scarlet flowers, which have purple and white tips. Very attractive and always in bloom. Each, 15c; 3 for 40c, postpaid.

Cigar Plant

ENGLISH IVY

ENGLISH IVY

Rich waxy green foliage, ideal for climbing or trailing from window boxes and hanging baskets. When planted outdoors, take vines down and cover carefully for the winter. Each, 25c; 6 for \$1.25; \$2.00 per doz., postpaid.

GLOXINIA

Magnificent flowers of great brilliancy. A grand decorative summer-blooming house plant. State kind wanted. Purple bordered; Scarlet bordered; Pure white. Each, 45c; 3 for \$1.25; 6 for \$2.25, postpaid.

Gloxinia

HELIOTROPE

CENTEFLEUR—Rich, deep violet-blue, white eye. Large flowers. Each, 20c; 6 for \$1.10; per doz., \$1.95, postpaid.

FLORENCE NIGHTINGALE—Bright lavender. An old, popular sort. Each, 15c; 6 for 80c; per doz., \$1.50, postpaid.

WHITE CORAL—Pure white. Fragrant and free flowering. Each, 15c; 6 for 80c; per doz., \$1.50, postpaid.

Heliotrope, Centefleur

GERANIUMS

Our plants are all of hardy, strong and sturdy stock, grown on our great Cliffwood Farms under careful supervision.

MRS. RICHARD GLOEDE—A new introduction. A semi-double, beautiful deep rose-pink geranium, large flower, and splendidly adapted for house culture. Robust and free bloomer. Each, 25c; per doz., \$2.00, postpaid. In paper pot, 35c each, postpaid.

Unless noted: Price of the following geraniums: Each, 15c; per dozen, \$1.50, postpaid. Not prepaid: \$11.00 per 100.

BEAUTY OF POITEVINE—Double flowers, salmon pink, shading to clear salmon in center.

MRS. E. G. HILL—Large single flowers; bright salmon with a light shading at center.

JEAN OBERLE—Double flowers, an exquisite shade of hydrangea pink, shading to white at the outer edges. Immense florets and trusses. Each, 20c; per doz., \$2.00, postpaid.

JEAN VIAUD—Two-inch semi-double flowers in trusses 12 to 15 inches in circumference. Beautiful, clear, rosy pink with distinct white blotch at center.

MADAME BUCHNER—Beautiful, double, pure white flowers of an enormous size. Unsurpassed as a bedder.

MME. SALLEROI—A tri-color variety of Silver Geranium, fine for massing or borders. Thrifty grower, seldom reaching a height of more than six inches; leaves very small, of a peculiar clear green, edged with pure white. Each, 20c; per doz., \$1.90, postpaid.

NUIT POITEVINE—Handsome, intense dark crimson, single flowers, rosy purple.

S. A. NUTT—The best of the double, dark crimson scarlet bedders and blooms in great profusion. Always dependable for a constant blaze of crimson from May until snowfall.

SCARLET BEDDER—A fine double, brilliant scarlet, bedding geranium. Giant clusters of flowers. Free blooming.

ROSE—The standard, rose scented leaf-geranium. **SKELETON**—Narrow leaved, rose scented. Indispensable for bouquets.

IVY LEAVED GERANIUM—Giant flowers. Mixed colors only.

For prices, see above.

S. A. Nutt Geranium

ADD 10c EXTRA FOR EACH PLANT WANTED IN PAPER POT AND ORIGINAL SOIL.

MAMMOTH CHRYSANTHEMUMS

The undisputed "Queen" of fall blooming flowers. Their immense size, beautiful long stems, exquisite colors are fascinating beyond words. One flower is a grand display in itself.

Unless noted: Each, 20c; 6 for \$1.00; per doz., \$1.85, postpaid. Not prepaid: \$11.25 per 100.

BETSY ROSS—White. Solid incurved bloom.

CHADWICK—Rich yellow. Large flower.

CHAS. RAGER—Incurved pure white. Ideal grower.

CHIEFTAIN—Deep, clear pink. A good companion to Major Bonnaffon and Chas. Rager.

CHRYSOLORA—Grand, large, yellow. Early; perfect flower.

EARLY FROST—Fine pure white. Early.

EARLY ROSE—Beautiful rose pink. Early.

E. A. SEIDEWITZ—An incurved pink. Perfect large flowers, heavy stems. One of our best sellers.

GOLDEN GLORY—One of the best yellows.

GOLDEN GLOW—Clear yellow. Easily grown.

HARVARD—Very dark crimson. Fine for Thanksgiving. The best of the red Chrysanthemums.

HELEN FRICK—A fine pink. Very popular.

JOSEPHINE FOLEY—Large, incurved, pure white.

MAJOR BONNAFFON—Massive, incurved, golden yellow. The best of the yellows.

MISTLETOE—A grand white variety.

MRS. C. C. POLLWORTH—Immense golden yellow blooms.

MRS. DR. ENGLEHART—Pink. Large, perfect flower.

Chrysanthemum
Mrs. G. G. Mason

OCONTO—Beautiful, white, Japanese type. Perfect shape.

OCTOBER QUEEN—Splendid large, white flower. Early.

SMITH'S ADVANCE—A grand, large, early white.

WHITTIER—A golden yellow sphere of very fine finish.

YELLOW RAGER—A fine perfect yellow.

One each of the above 22 for \$3.25, postpaid.

FOUR RARE CHRYSANTHEMUMS

MRS. G. G. MASON—Blood red with gold reverse. A gorgeous flower.

ROSE DELIGHT—Pleasing deep rose-pink, finely incurved. A monster.

TIGER—Choice, large, yellow flower. Second early. Very popular.

TITANIC—Massive, white flowers, unsurpassed in beauty, of easy culture.

Price: Each, 25c; 6 for \$1.40; per doz., \$2.50; above four, 90c, postpaid.

POMPON CHRYSANTHEMUMS

These flowers run from $\frac{1}{4}$ inch to above 2 inches in diameter, are small petaled, very compact, and are usually in rather close clusters so that one spray when cut is a bouquet in itself. Make fine pot plants.

Each, 15c; per doz., \$1.35; per 100, \$9.75, postpaid.

BABY—Tiny white 'mums.

BUCKINGHAM—Bronze.

CHRISTMAS GOLD—Golden yellow.

DOTY—Rose pink.

GOLDEN CLIMAX—Rich deep yellow.

LUCIA—Lavender pink.

MENSA—Pure white.

PINK BUCKINGHAM—Pink.

SOURCE DE OR—Rich bronze.

WHITE DOTY—White.

One each of the above 10 for \$1.00, postpaid.

FUCHSIAS

Popular for winter blooming, as well as for summer bedding, window boxes, etc. Bloom profusely.

BLACK PRINCE—A splendid single kind. Young flowers are dark blue, changing to carmen-lake as they unfold; petals bright carmine. Each, 15c; 6 for 80c; per doz., \$1.50, postpaid.

MIDNIGHT—Most beautiful of all. Double, dark, purplish blue, velvety flowers; reflexed petals a rich bright carmine. Each plant is a mass of striking and contrasty flowers. Each 30c; 6 for \$1.60, postpaid.

STORM CLOUD—Very double, pure white flowers of large size, blooming profusely. The reflexed petals are bright crimson. Each, 25c; 6 for \$1.35; per doz., \$2.50, postpaid.

GUSTAV DORE—Similar to the above, except that the flowers are a fine rich, creamy white. Each, 20c; 6 for \$1.10; per doz., \$1.95, postpaid.

ROSE OF CASTLE—Parent of them all. The old fashioned, original type. Single flowers of lavender blue, shading to white at the base, reflexed petals white, veined rose. Each, 20c; 6 for \$1.10; per doz., \$1.95, postpaid.

SPECIOSA—An aristocrat. Deep scarlet, single flowers, borne at end of long, waxy, white tubes flushed salmon; reflexed petals salmon pink, tipped green. Each, 15c; 6 for 80c; per doz., \$1.50, postpaid.

One each of above 6 for \$1.10, postpaid.

ADD 10c EXTRA FOR EACH PLANT WANTED IN PAPER POT AND ORIGINAL SOIL

CHOICE CARNATIONS

Plant out in the garden after all danger of frost is over and give about 12 inches of space. With good soil and cultivation, carnations should furnish abundant bloom from July until late fall; or they may be kept "pinched back" to retard bloom, potted up at approach of frost and brought inside for winter blooming. Salzer's Choice Carnations are noted for their perfect flowers, long stems, freedom of bloom, and spicy perfume. Mrs. Clarence Johnson, R. D. 5, Box 40, Eleva, Wis., writes: "The Carnation plants you sent me are certainly splendid."

BETTY JANE—A comparatively new carnation. Large, silvery-pink flowers, long and heavy stems. Spicily fragrant. One of the finest introductions of recent years. Each, 25c; 3 for 70c; 6 for \$1.35; per doz., \$2.50; \$14.50 per 100, postpaid.

Following varieties: Each, 20c; 3 for 55c; 6 for \$1.00; per doz., \$1.75; \$11.00 per 100, postpaid.

ENCHANTRESS—Rosy blush pink, perfect flowers, carried on heavy, long stems.

HERALD—A magnificent red carnation. The large flowers are borne on stiff, long stems. Very fragrant. One of the most popular.

MATCHLESS—A large, pure white, long stemmed and free blooming. The petals are most attractively fringed and the perfume is delightful.

RED MATCHLESS—Colossal red flowers, very fragrant. A most striking red variety.

HIBISCUS

Strong growing plants with glossy foliage and large, brilliant, showy flowers. In the open ground during summer, they make a gorgeous display, blooming profusely, and they also make a fine decorative plant for a warm, sunny window.

GLORY OF THE INDIES—Fiery red, large single flowers free blooming. Gorgeous and showy. Each, 20c; per doz., \$2.00, postpaid.

PEACHBLOW—Rich, clear pink, double flowers, with small deep crimson center, 4 to 5 inches in diameter. Blooms freely even on small plants. Each, 25c; per doz., \$2.50, postpaid.

SINGLE RED—Brilliant red, single flowers, very large, profuse bloomer. Very popular. Each, 15c; per doz., \$1.60, postpaid.

Hydrangea—
Baby
Bimbenet

Carnation, Betty Jane

DAISIES

Single and double white, mixed. Strong transplanted seedlings. Doz., 60c; 50 for \$2.00; 100 for \$3.25, postpaid.

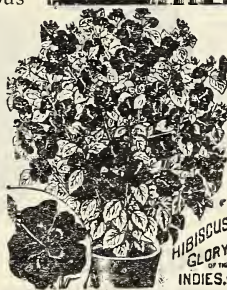

FEVERFEW

Dainty, white, double flowers, blooming profusely. Height, 8 inches. Strong transplanted seedlings. Doz., 60c; 50 for \$2.00; 100 for \$3.25, postpaid.

HYDRANGEA OTASKA

The old favorite pot hydrangea, widely used for lawn decoration in summer. Produces immense heads of usually pink, but sometimes lovely blue, flowers, of great beauty. When grown indoors, it will flower for Easter decorating. It is not hardy in the Northern States and should be brought into the house before freezing fall weather.

Each, 25c; 3 for 70c, postpaid. Add 10c extra, each, if wanted in soil and paper pot.

NEW FRENCH HYDRANGEAS

New sorts of French introduction, remarkable for large trusses of flowers and beauty of coloring. Their massive blooms outlast most other plants. They are also excellent for house culture. These plants will be practically dormant when shipped, but will soon respond to sunlight and plenty of water.

BABY BIMBENET—Very dwarf, early and free flowering. Large compact trusses of silvery rose. Each and every shoot produces flowers. Each, 25c; 3 for 70c, postpaid.

E. G. HILL—Extra early. Beautiful clear pink, immense trusses of flowers. Each, 30c; 3 for 80c, postpaid.

MME. E. MOUILLERE—One of the very best. Large trusses of bloom, frequently over three inches in diameter, pure creamy white, with rosy carmine eye. Each, 25c; 3 for 70c, postpaid.

MAD. MAURICE HAMAR—A pleasing shade of delicate flesh-pink. Each, 25c; 3 for 70c, postpaid.

TROPHEE—Vigorous growing, very free blooming. The darkest carmine red of any variety. Each, 35c; 3 for 95c, postpaid.

Add 10c extra for each plant wanted in paper pot and original soil.

A friend of mine would like your catalog as she thinks my plants are the prettiest she has seen.—Mrs. Albert Hilmer, Boelus, Nebr.

PONDEROSA LEMON

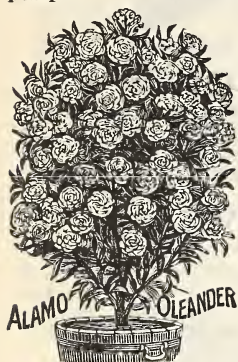

It is an ever-bearing variety. On a fair-sized plant one can find a great many of these ponderous Lemons growing at one time. It is a beautiful sight. The plant blooms, and at the same time has fruit in all stages of development, from the size of a pea up to the ripe fruit.

Each, 25c; 3 for 65c, postpaid. Cannot be sent into California.

LOBELIA

Dainty blue flowers, dwarf and compact growth. Unexcelled for edging, window boxes and hanging baskets. Strong transplanted seedlings.

Doz., 65c; 50 for \$2.00; 100 for \$3.25, postpaid.

ALAMO OLEANDERS

An old-fashioned plant, immensely popular. It is a large semi-double, pink or white bloomer, which can be grown in almost any soil or situation and kept growing all the year. When necessary, should be placed in the cellar and rested. The foliage is dark green, somewhat willow-like, and is in itself neat and pleasing.

Pink. Each, 25c; 3 for 70c, postpaid.

White. Each, 20c; 3 for 55c, postpaid.

OTAHEITE ORANGE

As a pot plant this lovely dwarf Orange is most unique. Its beauty and value is its constant bloom and continuous bearing. Blossoms, green and ripe fruit on the same plant at the same time. Each, 25c; 3 for 65c, postpaid. Cannot be sent into California.

PASSION VINE

Tender climbing vines, splendid for outdoor decoration as well as house culture. Attractive purplish blue flowers, blooming profusely for several months, and delightfully fragrant. Bring indoors for over winter. Also called 'Passiflora.' Each, 20c; per doz., \$2.00, postpaid.

Pelargonium, Easter Greeting

PANSY PLANTS

Strong, thrifty plants of superb colors and markings, grown from our own superior strains of Pansy seed. Get a hundred started plants. They are already in bloom and will give you an enormous amount of flowers all summer long.

Doz., 65c; 50 for \$2.25; 100 for \$4.00, postpaid. Not prepaid: \$27.50 per 1,000.

Cliffwood Grown, Frostproof Pansy Plants. Doz., \$1.00; 50 for \$3.65; 100 for \$6.50, postpaid.

PELARGONIUMS

Also called Pansy Geraniums and Lady Washington Geraniums. A distinct class of strong growing plants, resembling geraniums in habit, character and treatment.

Petals large and brilliantly blotched. Pelargoniums delight in hot sunlight, withstanding temperature that would shrivel other flowers, but they demand plenty of water. They bloom continuously from April to September. Cliffwood grown stock.

Unless noted: Each, 25c; 3 for 70c; per doz., \$2.50, postpaid

EASTER GREETING. This species is one of the earliest of all Pelargoniums, with enormous florets of fiery amaranth red, each petal marked with a large black blotch. (See illustration below.) Price: 30c; 3 for 80c; per doz., \$3.00, postpaid.

LUCY BECKER. A wonderful flower of wild rose pink. Each floret has from six to eight petals with dark red velvety spots edged with scarlet lake. Has very large trusses. A grand bloomer.

SWABIAN MAID. This is a new sort of Easter Greeting and has large reddish carmine flowers with black almost jet blotches. Very effective. Coloring and ever-blooming qualities like the Easter Greeting.

Passion Vine

PENNISETUM

Also called Fountain Grass. A highly ornamental, tender grass growing 3 feet high, with gracefully drooping bronze-green foliage and upright purplish plumes. Prized for planting singly or as borders for Elephant's Ear or for Cannas. Each, 20c; per doz., \$1.95, postpaid.

PRIMROSE

Charming and beautiful house plants, with varied colors of great brilliancy.

MALACOIDES (Baby Primrose). A new race of Primroses from China, that has proved very free-flowering for pot culture. Has rosettes of light green leaves with numerous wiry stems crowned with graceful, white and lilac flowers. Mixed, each, 20c; 3 for 55c, postpaid.

OBCONICA GRANDIFLORA. These Everblooming Primroses are also great favorites for indoor culture. Bear truly giant flowers, many of them 1½ inches in diameter, and bloom for a long period. Many colors, mixed.

Each, 20c; 3 for 55c, postpaid. Larger sizes, 60c each.

ROSEMARY

A delightful house plant, leaves fragrant, small lilac colored blossoms. Can be grown easily and with little care. Often sheared or clipped into the shape of a cross, etc. Each, 25c; 3 for 70c, postpaid.

Primrose or Primula

PETUNIAS

Per doz., 65c; 25 for \$1.20; 50 for \$2.00; 100 for \$3.25, postpaid.

GIANT RUFFLED. Rich, gorgeous colors, flowers single, beautifully ruffled and fringed with deep throats of various shades. Mixed only.

ROSY MORN. Compact, bushy growth, about 12 inches high. Silvery white throat, outer edge heavily shaded rose pink.

BALCONY MIXED. One of the best for outdoor culture. Colorful and striking shades, all mixed. Single gorgeous flowers.

SALVIAS

Per doz., 65c; 25 for \$1.20; 50 for \$2.00; 100 for \$3.25, postpaid.

The showiest and most practical red obtainable, for summer beds and borders. Also called "Scarlet Sage."

SPLENDENS. In autumn it is a mass of dazzling scarlet flowers that remain in bloom until killed by frost.

ZURICH. The earliest sort, dwarf and compact. Large, brilliant, scarlet flowers. Profuse bloomer.

VINCAS

Each, 15c; 6 for 80c; per doz., \$1.50, postpaid.

MAJOR VARIEGATA. Splendid vines for hanging baskets, vases, or window boxes. Beautifully variegated green and white foliage.

PERIWINKLE. Everblooming bedding plants, about 18 inches high, flowers Phlox shaped. State color wanted, rose or white.

WANDERING JEW

Fine variegated leaves striped crimson, or green and silver. These beautiful trailing vines are splendid for window boxes, and also for house culture, especially on pedestals. Specify kind wanted: GREEN, STRIPED SILVER; GREEN, STRIPED CRIMSON, or ALL GREEN. Each, 15c; 3 for 40c; per doz., \$1.50, postpaid.

PALMS

RUBBER PLANT OR FICUS ELASTICA. The true India Rubber variety. Large, handsome, thick, glossy, green leaves. It is not hard to grow, thriving even under neglect. Splendid for large room or the conservatory.

Each, 50c, postpaid.

BABY FICUS. Smaller leaved than the above.

Each, 50c, postpaid.

KENTIA BALMOREANA. Has strong stems, some upright, others arching, each crowned with branching foliage of a rich green color. Few plants give more satisfaction all the year round.

LANTANIA BORBONICA

KENTIA

Each, 65c, postpaid. Larger sizes, \$1.00 to \$1.50 each, not prepaid.

WEeping LANTANA. A great beauty. Fine for winter flowering in small hanging baskets or in pots. Color is a delicate shade of rosy lilac, changing to a violet purple, and flowers are borne freely all over the plant from the base of each leaf stalk. Has a drooping, weeping habit. Each, 20c; 6 for \$1.10; per doz., \$1.95, postpaid.

BANANA PLANT. The true banana plant. Not only very interesting, but it is a rapid grower. Foliage is massive and stately, with giant, magnificently shaped leaves. Order early. Each, 45c; 3 for \$1.30, postpaid.

LANTANIA BORBONICA. Known also as the Fan Palm because of its large, deeply divided, fan shaped leaves. Each, 25c; 3 for 70c, postpaid.

PALM SEED

Palms are of easy growth from seeds, and the delight of all who undertake to grow them.

2257—Palm Seed, mixed, packet, 10c.
2256—Phoenix Palm Seed, packet, 10c.
2254—Latania Borbonica, packet, 10c.

2255—Pandanus Utilis Seed, packet, 10c.
2250—Banana Palm Seed, packet, 10c.
2251—Dracaena Indivisa, packet, 10c.

·ADD 10c EXTRA FOR EACH PLANT WANTED IN PAPER POT AND ORIGINAL SOIL

VERBENAS

Showy, compact, flowering plants that bear masses of beautiful, highly colored flowers throughout the summer. Brilliant shades of purple, scarlet, white and pink. Mixed colors only.

Per doz., 65c; 25 for \$1.20; 50 for \$2.00; 100 for \$3.25, postpaid.

LEMON VERBENAS. Remarkably fragrant foliage, highly desirable for bouquets. No garden is complete without it.

Each, 20c; 6 for \$1.10; per doz., \$1.95, postpaid.

TUBEROSES

One of the most beautiful and delightfully fragrant of the summer flowering bulbs. Large, massive spikes of creamy white waxen flowers from July on.

EXCELSIOR. Double White Pearl. Each, 10c; doz., 95c, postpaid.

VIOLETS

"Sweeter than Roses." Of easy culture. If grown in the house for winter flowers, keep at a low temperature as they do not bloom freely in a warm room. If left out over winter, protect with a covering of leaves. Our stock is Cliffwood grown.

Each 20c; 3 for 55c; per doz., \$2.00, postpaid.

MARIE LOUISE. One of the finest Violets grown, very double and large; color, dark lavender blue.

GOVERNOR HERRICK. A wonderful large, dark blue single violet with dark glossy leaves.

WHITE SWAN. A pure white variety; flowers are double and of immense size; deliciously fragrant.

Tuberose

PALMS

UMBRELLA PLANT. Stems two to three feet high, surmounted with slender, drooping leaves. Bears small, cream colored flowers. A semi-aquatic plant, splendid for growing in water. In pots, it requires plenty of water.

Each, 25c, postpaid. Larger sizes, 50c and 75c, postpaid.

Dra. Indivisa

DRACAENA INDIVISA. The favorite center plant for boxes, vases and baskets. Has numerous slender, stiff, grasslike, green leaves. Each, 25c; 3 for 70c, postpaid.

LANTANA

A very desirable bedding and basket plant. It is immensely popular because of its showiness and its extremely fine blooming habit. It has verbena-like heads of orange, white, rose, and other colored flowers, which are in bright, catchy bloom from spring until frost, and which have an agreeable, pungent fragrance.

THOMAS MEEHAN. Its color is of orange, changing to a deep vermilion. Each, 15c; 6 for 80c; per doz., \$1.50, postpaid.

BIENCOURT. A beautiful shade of bright, rosy pink. Flowers are very large and showy. Each, 15c; 6 for 80c; per doz., \$1.50, postpaid.

WEeping LANTANA. A great beauty. Fine for winter flowering in small hanging baskets or in pots. Color is a delicate shade of rosy lilac, changing to a violet purple, and flowers are borne freely all over the plant from the base of each leaf stalk. Has a drooping, weeping habit. Each, 20c; 6 for \$1.10; per doz., \$1.95, postpaid.

BANANA PLANT. The true banana plant. Not only very interesting, but it is a rapid grower. Foliage is massive and stately, with giant, magnificently shaped leaves. Order early. Each, 45c; 3 for \$1.30, postpaid.

LANTANIA BORBONICA. Known also as the Fan Palm because of its large, deeply divided, fan shaped leaves. Each, 25c; 3 for 70c, postpaid.

ASPARAGUS PLUMOSUS

We have yet to discover a plant for table decoration that is better adapted for the purpose, or that makes a lovelier centerpiece, than this fern. The foliage is of the finest, most delicate texture, of a brilliant dark green color, and is lace-like in its fliminess. One of these ferns with six or eight stalks is a dainty mass of green, among which one may thrust the stems of a few flowers and make one of the prettiest centerpieces imaginable. It is a very popular fern and we believe you will enjoy one very much.

The foliage is so fine, so graceful, so much like a soft, vapory fern, that as a decorative plant it cannot be compared with anything we know of. Each, 15c; 3 for 40c; Plants, large enough for 4-inch pot, 25c each, postpaid.

VERONA

A handsome new variety of the Elegantissima type. It has fine "ostrich plume" foliage and a stiff mid-rib which enables the fronds to stand up with a lovely gracefulness. Rather compact, dense, and feathery. Constantly unfolding fresh fronds of light green that contrast exquisitely with the deep green of the other fronds. Very well suited for table decorations. Each, 25c; 3 for 70c, postpaid.

N. WHITMANII

A great fern, often called the Ostrich Plume Fern. The leaves are more open and the leaf segments smaller and less elongated than the Verona Fern. Of a beautiful rich green color, vigorous and rather dense growth. In wide use for pedestals and tables. Has taken several gold medals.

Each, 20c; 3 for 55c, postpaid.

BOSTON FERN

NEPHROLEPIS BOSTONIENSIS.

This wonderful fern, introduced in 1895, is the parent type of nearly all the new fern introductions of recent years. It is of free growing habit, rich dark green color, with long, gracefully drooping fronds, spreading or hanging according to the light, and often reaching a length of five feet. It is the standard variety and the best of all for general purposes. Is unexcelled for pedestal use or as a hanging basket. A universal favorite and easily grown.

Each, 25c; 3 for 70c, postpaid.

New Crested Fern (Verona)

Asparagus Plumosus

ASPARAGUS SPRENGERI

This fern is widely used for hanging baskets, for bracket use and also for cutting. It is one of the best of all plants for use around the outer edges of a large potted plant or for planting in an outside window box so it can droop over the edges of the box. Of a fine, filmy texture, the rich green trailing fronds often reach a length of four feet or more. Cannot be excelled for daintiness as a hanging fern, either in the house or on the porch. Mrs. Hannah Stoltzfus, Gap, Pa., writes, "Am especially well pleased with the Asparagus Ferns and Calla Lily you sent me." Each, 15c; 3 for 40c; Plants, large enough for 4-inch pot, 25c each, postpaid.

MAIDEN HAIR FERN

ADIANTUM. Fine, dainty foliage, very lace and filmy. This graceful and lovely fern remains as great a favorite today as ever. Splendid for table decoration. Each, 25c; 3 for 65c, postpaid.

STIM-U-PLANT

PLANT STIMULANT TABLET

Mrs. J. H. Schebaum, 821 Edith St., Washington, Mo., writes, "I bought a small size of your Stim-U-Plant early this spring and I wish you could see my flowers and plants. They are just beautiful. I never saw anything make plants grow as Stim-U-Plant does."

Stim-U-Plant is a plant food in tablet form, containing 11% Nitrogen, 12% Phosphoric Acid, and 15% Potash, and is one of the richest plant foods sold. These highly concentrated tablets produce immediate results, promoting a luxuriant, vigorous and healthy growth and increasing the size and number of the blooms. They are especially recommended for ferns. Stim-U-Plant builds up the soil, supplying the nitrogen, phosphoric acid, and potash which are so often lacking. Full directions on each package. Instead of dissolving them in water, many of our customers write us that they use them also by merely pressing a tablet into the ground at the base of the plant, especially out of doors. They encourage faster growth in roses, shrubbery, etc., as well as in plants. We strongly recommend Stim-U-Plant, as we know it will produce results.

Trial size, 15c; small size, 25c; medium size (100 tablets), 75c; large size (1,000 tablets), \$3.50, postpaid.

Add 10c extra for each fern wanted in paper pot and original soil.

Boston Fern

I had two of your rose bushes last year and they did just splendidly.—Nettie Arneson, 301 W. Douglas St., Rice Lake, Wis.

Canna—
The President

HARDY NORTHERN

CANNAS

CLIFFWOOD GROWN

Cannas are the tallest and the bulkiest of the summer bedding plants and furnish a wide range of colors. They do well in all sections of the country and their noble proportioned foliage is extremely attractive, with rich shades of chocolate, red, green, and bronze. The most effective arrangement is a massed planting in one color, but they may also be planted to produce many striking effects which are beautiful. Cannas should not be planted less than twenty inches apart each way. Dig up bulbs in fall and plant again in spring.

FOUR EXTRA-CHOICE CANNAS

THE PRESIDENT—Immense, flaming scarlet flowers. Won the gold medal from the National Department of Horticulture. It leads all of the red varieties in quality and quantity of bloom. The flowers are 7 inches across, petals are firm and long standing and do not burn, stems are stiff and strong. Foliage is rich green and burn-proof in the hottest weather. 4 feet high. Each, 20c; 6 for \$1.10; per doz., \$2.00, postpaid.

KING HUMBERT—One of the best Cannas grown. Large heart-shaped leaves of purple brown over bronze—simply gorgeous foliage. Massive orchid-like flowers, immense individual petals that are velvety orange-scarlet, flecked carmine; rose tinted at margin and base. 4 feet. Each, 20c; 6 for \$1.00; per doz., \$1.75, postpaid.

YELLOW KING HUMBERT—Orchid-like flowers that measure 5 to 7 inches across; deep rich yellow color, softly spotted and blotched with bright red. Foliage very dark green. Some plants occasionally give a scarlet or scarlet striped flower, which we consider an improvement rather than a defect. 4 feet. Each, 20c; 6 for \$1.00; per doz., \$1.75, postpaid.

MRS. ALFRED CONARD—Large, exquisitely shaded, salmon-pink flowers produced in great abundance on robust and strong stalks. It is a rare shade and the finest of all pink flowered Cannas. 4 feet. Each, 25c; 6 for \$1.25; per doz., \$2.25, postpaid.

LARGE FLOWERING CANNAS

Unless noted: Each, 15c; 6 for 80c; per doz., \$1.45, postpaid.

BLACK PRINCE—Intense velvety maroon on stems of rich mahogany color. Green foliage. 4½ feet.

BRANDYWINE—Deep blood-red, frequently edged with rich golden border. Attractive bronze foliage. 3½ feet.

BURBANK—Canary yellow, orchid-like flowers, large and firm. Rich green foliage. 5 feet.

EUREKA—Pure, waxy, lily-white flowers. Immense trusses of flowers uniform, free, and continuous bloom. Green foliage. The best, practical, white Canna grown. 4 feet. Each, 20c; 6 for \$1.10; per doz., \$2.00, postpaid.

GLADIATOR—Flowers golden yellow, dotted crimson. Green foliage. 4½ feet.

MME. CROZY—Rich scarlet, bordered golden yellow. Fine large flowers attractive green foliage. 3½ feet.

ROSEA GIGANTEA—Extra large flowers, in color a uniform deep rose almost carmine. Grows 4 feet high, the show of bloom contrasting richly with the fresh green foliage. Each, 20c; 6 for \$1.10; per doz., \$2.00, postpaid.

VENUS—A gay rosy pink, delicate in texture, with a well defined border of creamy yellow. Continuous bloomer. 4 feet.

WYOMING—Rich purplish bronze foliage, very attractive. Large perfect flowers, bright orange color, slightly flaked with rose. Grows 6 feet high.

SUNSET CANNA COLLECTION

In this excellent collection we have a striking array of marvelous colorings which will surely please you. The brilliant hues are of exquisite rose, and pink, crimson, scarlet, yellow and orange. CLIFFWOOD GROWN. Consists of 1 each of the following: MRS. ALFRED CONARD, salmon pink; NEW PRESIDENT, scarlet; BURBANK, yellow; WYOMING, rich orange, and BRANDYWINE, deep blood red. Price, postpaid, only 80c. See Page 94 for Pennisetum Plants as a border for your Cannas.

Watch-em-Grow PLANT FOOD

A Little Goes a Long Way All Commercial Fertilizers must contain among other things, these three basic chemicals in some form or another, Ammonia, Phosphoric Acid and Potash. But the secret of good fertilizer is the proportion of each. In the form it is offered to you in Watch-em-Grow, this plant food not only has just the right proportions but it is highly concentrated, so that a little goes a long way.

Guaranteed Analysis

Ammonia, soluble in water.....19%
Available Phosphoric Acid.....10%
Potash, soluble in water.....14%

Total, in perfect balance.....43%

For Potted House Plants

Dissolve a rounded teaspoonful in a cup of hot water, pour this into a gallon of cool water and you are

ready to feed your plants. For a plant in a six inch pot, pint every few days until you see a decided improvement, then use every month or so.

Cut Flowers

Drop a pinch of Watch-em-Grow powder in the water. It will make the bouquets last longer and will be worth the price of the food.

In Potting

When you change the soil of pot plants mix a teaspoonful of Watch-em-Grow with a gallon of soil before you set the plants.

For Your Garden

Both flowers and vegetables will be greatly benefited if Watch-em-Grow in the same solution as recommended for house plants is sprinkled over the seeds before they are covered. Then during the growing season, if you have any backward plants, treat them just like we suggested for house plants. You will notice the difference in a few days.

Send us 10 cents for a large trial package of Watch-em-Grow Plant Food, with directions for using. After using the contents, you can send us the empty package and only fifty cents and receive one regular sixty-cent can of Watch-em-Grow Plant Food. This makes the trial package cost you nothing in the end.

Large Trial Package only 10 cents; Big Eight-Ounce Can 60 cents, postpaid.

Have had your cannas several years and they are wonderful.—Mrs. James Mulroy, Fountain, Minn.

**Hardy
Northern****Gladioli****Cliffwood
Grown**

This class of summer flowering bulbs makes one of the most imposing and most gorgeous of displays. They make a brilliant show of field bloom and supply a generous mass of cut flowers. Gladioli, when cut, develop to a fine perfection in water and last longer than most other cut flowers. Grow best in rich, light soil exposed to plenty of sunlight, and the stately flowers alongside the house or massed in beds, produce a beautifully attractive and brilliant array. Set bulbs 2 to 3 inches deep and 2 inches apart in drills; in beds about 4 inches apart each way.

Mrs. Jos. H. Wetherholt, 2 Township Ave., Dundalk, Md., writes, "The Gladioli I got from you were most beautiful and so large. Will send or more in spring."

SALZER'S CLIFFWOOD GLADIOLI COLLECTION

This is the same collection which we illustrated for several years in color and which has become so popular. All extra-fancy, No. 1 size bulbs, and includes one each of the following: Baron Hulot, Cracker Jack, Halley, Mrs. Francis King, Mrs. Frank Pendleton, Niagara, Panama, Glory of Holland, Princepin and Willie Wigman.

Price: 1 Collection, 10 bulbs, 80c; 2 Collections, 20 bulbs, \$1.50, postpaid.

Mrs. Francis King

SPECIAL GLADIOLI OFFER

Each year we make liberal plantings of mixed bulbs, and as there is no roguing or extra special attention required, we are able to produce them in an economical manner and at a lower cost and can therefore offer them at a much lower price.

Doz., 45c; 50 for \$1.60; 100 for \$3.00, postpaid.

PRIMULINUS HYBRIDS

The original of this beautiful type of flower was introduced from South Africa. The flowers usually are a little smaller than the other gladioli, but are good size, very pretty, on tall, graceful spikes, and are particularly adapted for cutting. Colors run in beautiful shades from tan and light yellow to orange, apricot and crimson, all mixed. Healthy, vigorous, very showy and attractive.

Price: Doz., 45c; 50 for \$1.60; 100 for \$3.00, postpaid.

UP TO 25 BULBS AT DOZEN RATE; 25 AND OVER AT 100 RATE, EXCEPT COLLECTIONS OF BULBS

Salzer's Giant Perennial Phlox, Eclairer

PEONIES

CLIFFWOOD GROWN

Peonies are one of the most easily grown of all flowers, and are well adapted for massing in beds or for planting in groups throughout the shrubbery border, where their bright showiness makes them very attractive. They are exceptionally hardy, requiring no protection even in severe climates, and increase in beauty each year. Peonies should not be planted too deep, but the roots should be placed so that the crowns are covered with two inches of soil. Our fine Cliffwood Grown Peonies will give you an abundance and wealth of brilliantly hued flowers, very fragrant, which will delight you and which will command everyone's attention.

FELIX CROUSE—An extra-choice variety. Large, globular flowers. The color is exceptionally fine—a striking, brilliant, ruby-red. Very showy and effective. Each, with 3 to 4 eyes, 75c; with 5 to 7 eyes, each, \$1.25; large clump, each, \$2.75, postpaid. For price on following, see below.

EDULIS SUPERBA. Large, loose, flat crown and bright, mauve-pink color, the base of the flower being mixed with narrow lilac. Is a free bloomer, strong, upright, very early, and is unusually fragrant. One of the finest pinks for Memorial Day.

FESTIVA MAXIMA. Has pure white center, prominently flecked crimson, with outer petals sometimes faint lilac-white on first opening. Very large, globular, rose type. An early strain, a vigorous grower, strong and very tall. One of the most popular white varieties.

FRAGRANS (Double Pink). A fine Peony of medium size, compact, bomb type. Dark pink color, and very fragrant. Is a strong, vigorous grower and medium tall. Late variety and is extensively grown for cut-flowers.

PRINCE DE TALINDYKE. A very glossy flower of a beautiful dark purple-crimson color. Is a strong, vigorous and tall grower. A fine late variety, one of the best.

TRIOMPHE DU NORD. A very attractive, bright, purplish-red color with silvery reflex. Very large, compact, bomb type, and very fragrant. A tall and very free bloomer, maturing in midseason. A splendid Peony, good for cutting.

PRICE, except where noted: Roots with 3 to 4 eyes, each, 45c; one each of the above 6 for \$2.75, postpaid. Roots with 5 to 7 eyes, each, 85c; one each of the above 6 for \$5.10, postpaid. Large undivided clumps, each \$2.35; one each of the above 6 for \$13.65, postpaid.

SALZER'S PERENNIAL PHLOX

HARDY CLIFFWOOD GROWN

Our Giant Phlox are one of the most desirable of the hardy perennial plants. A great favorite of our grandmothers, they remain just as popular today. They can be used to good advantage in a border, planted in front of shrubbery, or in large groups on the lawn, and will thrive in practically any soil or position. From a few roots, many new shoots soon come up, so that within a very short time a nice phlox bed is permanently provided.

Unless noted: Each, 20c; 6 for \$1.10; per doz., \$1.95, postpaid.

BRIDESMAID. Tall white flowers with large rose-crimson center. **COLQUILCOT**. Rich, vivid, scarlet red. A choice, attractive beauty.

ECLAIREUR. Purple crimson, shading to light aureole. Each, 25c; per doz., \$2.45, postpaid.

ELIZABETH CAMPBELL. Very large spikes of flowers, distinct light salmon, changing to pink in center. Each, 35c; per doz., \$3.45, postpaid.

FRAULEIN G. VON LASSBURG. Dwarf, immense flowers of pure white.

LUMINEUX. A striking rosy red.

MISS LINGARD. Longest spikes of any phlox, waxy white with lavender eye. The very earliest to bloom; is sweetly fragrant.

MRS. CHARLES DORR. Profuse bloomer; blue mauve. Compact trusses of flowers. Each 25c; per doz., \$2.45, postpaid.

MRS. WM. JENKINS. Early. Pure white, large and very tall. Each, 15c; per doz., \$1.45, postpaid.

RHEINLANDER. A new variety. Very large flowers, a rose shade of salmon-pink with a claret-red eye. Each, 25c; per doz., \$2.45, postpaid.

RICHARD WALLACE. A fine violet-eyed, white variety.

R. P. STRUTHERS. An exquisite, soft rosy red. Choice.

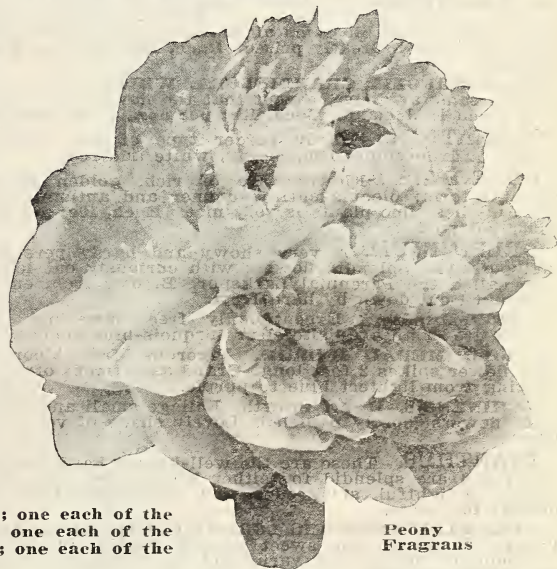

RYNSTROOM. A lively shade of deep rose-pink. One of the best for massing.

SIEBOLD. A vivid orange scarlet. Very striking.

PHLOX SUBULATA

The popular creeping Phlox or Moss Phlox. These beautiful plants have low-spreading stems and narrow, moss-like evergreen leaves, and are very often used for covering graves, surrounding the bases of trees, bordering, etc. Bloom in April and May. State colors wanted: Rose, white, and lavender-blue.

Price: Each, 15c; 6 for 75c; per doz., \$1.45; 50 for \$5.50; 100 for \$9.50, postpaid.

My Columbia Rose bushes are wonderful.—W. A. Wurster, Portsmouth, Ohio.

CLIFFWOOD Hardy Perennial Plants GROWN

FOR PERMANENT PLANTING IN BEDS OR BORDERS

Hardy, Cliffwood grown, well rooted stock which may be planted as early in the spring as the ground is workable, or in the autumn. By using plants instead of seeds, one secures a lovely array of bloom the very first year. Also, for the amateur gardener, who wants a permanent bed of flowers, plants are to be recommended, rather than seed, as it obviates the labor of transplanting. Plants are not expensive, and once established, these perennials will produce an abundance of bloom for years to come, and will provide you bountifully with cut flowers for the house. Note our low prices. Unless noted: Each, 20c; 6 for \$1.10; \$2.00; 50 for \$7.95, postpaid.

GIANT ACHILLEA. (Saxatile Compactum.) Basket of gold. Its many branches hold their great mass of pure white feverfew-like flowers about a foot above the soil. For cemetery planting, it is the most valuable of all white flowers. It blooms from May until snow flies. Each, 15c; per doz., \$1.50; 50 for \$5.50, postpaid.

ALYSSUM. (Saxatile Compactum.) Basket of gold. Grows 12 inches high, covered with clusters of bright golden yellow flowers early in summer.

AQUILEGIA. (Columbine.) The distinct, clear cut foliage and delightful shades of colors, make it one of the most popular perennials. Blooms early in spring. Desirable for rock work, along side of walls, etc. State kind wanted: **CAERULEA**, light blue; **CANADENSIS**, bright red and yellow; **VULGARIS**, rich violet blue; **CHRYSANTHA ALBA**, pure white; **ERFURT**, mixed colors.

ASTERS. (Hardy Perennial.) Also called Michaelmas Daisies. These single, fall-blooming plants thrive in any good garden soil. Bloom from October to Thanksgiving; grow 2½ ft. high. Each, 15c; per doz., \$1.50; 50 for \$5.50, postpaid.

BELLIS LONGFELLOW. (English Daisy.) Double pink, an old favorite. Each, 10c; per doz., \$1.00, postpaid.

BELLIS. Double white. The old-fashioned daisy. Each, 10c; per doz., \$1.00, postpaid.

BLEEDING HEART. It will stand the coldest winters and flourish, and a single plant will bear from 50 to 100 long spikes of blood-red, heart-shaped, drooping flowers, hence the name, Bleeding Heart. Each, 75c; 3 for \$2.00, postpaid.

CAMPANULA. (Bellflower.) These wonderful bell shaped flowers are perfectly hardy, easily grown, and make a splendid show of bloom the latter part of May and in early summer. Excellent for cut flowers and bouquets.

CUP AND SAUCER (Calycanthema). The finest type of the "cup and saucer" variety, mixed. Very hardy. Lovely colors of blue, rose, and white. State color wanted.

PERSICIFOLIA GRANDIFLORA, BLUE. Peach leaved bell flowers, having spikes about 3 feet high, covered with large, bell-shaped blossoms of charming blue color. Very hardy perennial. Greatly prized. Each, 15c; per doz., \$1.35, postpaid.

PERSICIFOLIA GRANDIFLORA, WHITE. Hardy perennial, same as above, except that the flowers are white. Very much in demand. Each, 15c; per doz., \$1.35, postpaid.

CARNATION. Hardy border type of the Dianthus family. Mixed colors range pink, white and red.

COREOPSIS. Flowers are of rich, golden yellow, graceful form; blooms entire summer and autumn. Our stock of these fine plants is very nice. Each, 10c; per doz., \$1.00, postpaid.

DELPHINIUM. A very showy and hardy perennial, easily grown. Splendid flowers with curiously cut leaves. Also called the Perennial Larkspur. Blooms from end of June until cut down by hard frost.

BELLADONNA. Exceptionally fine flowering. The blooms are of an exquisite clear turquoise-blue color.

GOLD MEDAL HYBRID. Vigorous, free blooming, with flower spikes 2 feet long. Grand assortment of colors ranging from lightest blue to purple.

CHINENSIS. Dwarf growth. Foliage small and deeply cleft, flowers loosely panicle. Lovely shade of very dark blue.

DIANTHUS. These are the well-known hardy garden pinks and are splendid for either beds or borders. They have a delightful, spicy odor, and are excellent for cut flowers for vases.

PLUMARIUS SEMPERFLORENS. (Everblooming Hardy Pinks.) Beautiful and sweet scented double, single, and semi-double flowers in a variety of colors. Each, 15c; per doz., \$1.40, postpaid.

DIANTHUS. (Barbatus.) The well known Sweet William. Vivid and brilliant shades; mixed. Each, 15c; per doz., \$1.35, postpaid.

DIGITALIS MONSTROSA. (Foxglove.) Of handsome, stately growth, reaching a height of four feet, and bearing tall spikes of white, pink, rose, and mottled flowers. Succeeds under almost all conditions and is widely used for borders, shrubbery, and half-shaded places. We can furnish in mixed colors only.

GAILLARDIA. (Grandiflora.) Very showy, hardy plants, beginning to flower in June, they continue the entire season. The large flowers are of gorgeous coloring. The center is dark red brown, while the petals are marked with rings of brilliant crimson, orange and vermilion.

GEUM. (Mrs. Bradshaw.) Brilliant, beautifully ruffled, scarlet flowers, resembling somewhat the carnation. 1½ feet high; blooms from June to September.

GYPHOPHILA PANICULATA. (Baby Breath.) Graceful branched panicles of pretty little white flowers. Blooms in August and September. Height about two to three feet. Each, 15c; per doz., \$1.35, postpaid.

HELENIUM—BIGELOVIL. Quick growing, branching plants, two to three feet high. Showy during August with clusters of deep yellow flowers, brown centered.

RIVERTON GEM. Old gold gradually changing in streaks to wall-flowered red.

HIBISCUS. A magnificent shrubby perennial, four to eight feet high, resplendent late in summer with giant flowers like single Hollyhocks. These are very hardy and easily grown.

RED MALLOW. Scarlet to crimson.

PINK MALLOW. Lovely shade of pink.

HOLLYHOCKS. (Double.) Stately, majestic, hardy plants, favorites in the old-fashioned hardy gardens. Their colossal spikes produce a showy effect which cannot be secured with another flowering plant. Colors, white, rose, yellow and red. Hollyhocks do not always run true to form and sometimes produce some single flowers.

LYCHNIS CHALCEDONICA. (Jerusalem Cross.) Brilliant scarlet in dense flat heads, fine for borders. Three feet. Flowers from June to September. Each, 15c; per doz., \$1.40, postpaid.

MYOSOTIS. (Forget-Me-Not.) This old popular favorite should be in every garden. Color blue. Four to nine inches; fine for damp places. Each, 15c; per doz., \$1.40, postpaid.

POPPY ORIENTAL. Immense flowers of brilliant, deep scarlet. Permanent gorgeous colored poppies.

RUDBECKIA. (Golden Glow.) A most distinct, large flowering, hardy plant. A magnificent grower, very branching and each branch bears many great, shining, golden yellow flowers. A plant is literally covered with bloom. Hardy as oak. Spreads rapidly. Each, 15c; per doz., \$1.25, postpaid.

SHASTA DAISY. This great white California daisy produces beautiful pure white flowers four inches across, on tall stems. Hardy and free flowering. Each, 15c; per doz., \$1.25, postpaid.

TRITOMA PFITZERI. (Red Hot Poker.) Brilliant scarlet, rimmed with orange, of cone shape fixed to end of rush-like foliage. Each, 25c; 6 for \$1.35; per doz., \$2.45, postpaid.

YUCCA. (Adams Needle.) Stately, conspicuous plant. Evergreen, broad, sword-like foliage and grows into great erect branching stems with showy flowers of a creamy-white color and bell shaped. Blooms third year.

Pride of Shelby—Decorative

CACTUS DAHLIAS

This class is of comparatively recent introduction, and is entirely distinct from any other class. The flowers are loosely and artistically formed, and very irregular, resembling the Chrysanthemum.

Unless noted: Each, 20c; 3 for 50c; per doz., \$1.80, postpaid.

COUNTESS OF LONSDALE—Long and free bloomer. Beautiful blending of amber and salmon pink. Each, 25c; 3 for 70c; per doz., \$2.25, postpaid.

EARL OF PEMBROKE—Deep purple maroon, perfect flowers. A beauty.

YELLOW KING—A very large, hybrid cactus. Rich, deep golden yellow, suffused and shaded fawn. Each, 25c; 3 for 70c; per doz., \$2.25, postpaid.

KRIEMHILDE—Shell pink, shading to white in the center. Fine for cut flowers. Each 15c; 3 for 40c; per doz., \$1.45, postpaid.

PERLE DE LYON—Pure white flowers, large, borne on good long stems.

STANDARD BEARER—An extra-choice variety. Rich fiery scarlet flowers, large and most attractive. Each, 30c; 3 for 85c; per doz., \$2.95, postpaid.

One each of the above 6 Dahlias \$1.15, postpaid.

PEONY-FLOWERED DAHLIAS

A new type of Dahlia; flowers are semi-double, having two, three or more rows of broad, flat, loosely arranged petals surrounding a conspicuous, rich, golden yellow center. Petals are often pointed, and sometimes twisted.

Unless noted: Each, 25c; 3 for 70c; per doz., \$2.15, postpaid.

MERRY WIDOW—Beautiful, brilliant scarlet. Free flowering.

MRS. GEORGE GORDON—Delicate creamy-white flowers of a large size. Best of the whites. Each, 15c; doz., \$1.45, postpaid.

QUEEN EMMA—Slightly fragrant. Delightful shade of hollyhock pink, the inner petals bounded with gold. A rare beauty and a "Queenly Dahlia" in every sense of the word.

Be sure to plant at least one in your garden. Each, 30c; 3 for 85c; per doz., \$2.95, postpaid.

One each of the above 3 Dahlias, 50c, postpaid.

POMPON DAHLIAS

Medium to small size, of perfect type and with long smooth stems. Especially good for dwarf beds or for bouquets of flowers. Each, 20c; 3 for 50c; per doz., \$1.80, postpaid.

AMBER QUEEN—Rich, clear amber, shaded apricot.

PURE LOVE—Deep lilac. Very free flowering.

SNOWCLAD—Pure white, with a lavender center.

One each of the above Dahlias, 50c, postpaid.

SPECIAL DAHLIA COLLECTION

These Collections are made from the various types of Dahlias, assorted colors only, and of our selection. Will give you a fine array of flowers. Order early as they will go fast.

Collection No. 1—Six Roots, \$1.00, postpaid.

Collection No. 2—Ten Roots, \$1.50, postpaid.

Collection No. 3—Fifteen Roots, \$2.15, postpaid.

Cliffwood DAHLIAS Grown

The most beautiful of the autumn flowers! We consider the following varieties to be the easiest to grow, to give the best show of bloom and the best all around satisfaction under varied conditions.

We supply dormant field roots only, which should be planted about six inches deep, laid flat, eyes or sprout up. Dahlias are not particular as to the soil or location, but the best results are obtained on moderately rich soil and exposed to the full sun.

DECORATIVE DAHLIAS

Decorative Dahlias are large, flat and full centered; petals quite irregularly situated, long, broad, flat and nearly straight.

BLUE OBAN—Petals are scarlet red at base and shade to lavender-blue at tips. It is the nearest to blue of any Dahlia in existence. Full, perfect flowers; a very striking color. Each, 35c; 3 for 95c; per doz., \$3.10, postpaid.

CLIFFORD W. BURTON—Bright canary yellow; beautiful, large flowers. Each, 25c; 3 for 70c; per doz., \$2.25, postpaid.

PRIDE OF SHELBY—Rich, deep fiery red. Long stems, perfect flowers. Each, 20c; 3 for 50c; per doz., \$1.80, postpaid.

PRINCE OF ORANGE—Beautiful shade of orange, tinted yellow. Each, 20c; 3 for 50c; per doz., \$1.80, postpaid.

PRINCESS JULIANA—Pure waxy white. The best white and one of the best bloomers. Each, 20c; 3 for 50c; per doz., \$1.80, postpaid.

QUEEN MARY—Pale amaranth pink; very long stems, free flowering. Each, 20c; 3 for 50c; per doz., \$1.80, postpaid.

SOUV. DE G. DOAZAN—Largest Dahlia grown. Gigantic flowers measuring 6 to 9 inches across, and sometimes 12 inches. Rich, attractive shade of orange red. Should be in every garden. Each, 35c; 3 for 95c; per doz., \$3.10, postpaid.

One each of above 7 Dahlias, \$1.45, postpaid.

Kriemhilde—Cactus

Am greatly pleased with your Dahlias and Gladioli.—Rev. Alfred I. M. Dove, Loretto, Pa.

SALZER'S CLIFFWOOD IRIS

We are offering four varieties this year. We consider these the choicest of all Iris and the ones to give the best results under varied soil and climatic conditions. They are easily grown and will bloom year after year.

This old-fashioned, well-beloved, favorite flower is known as the "Fleur de Lis" of France. Its exquisite beauty, resembling somewhat as it does the orchid, has always caused it to be one of the most highly prized flowers grown. The haunting fragrance and delicate tinting of the Iris makes its spring advent a source of the keenest pleasure and its early blooming causes it to be doubly appreciated. They have a rather tall, stately growing habit with flowers large and perhaps best described as refined, elegantly frilled, and having delicate hues. We specialize in these beautiful flowers, and our stock is the finest that can be grown.

In the descriptions (S) signifies standard or erect petals; (F) falls or drooping petals.

HONORABILIS. Splendidly named and indicative of the perfect qualities to be found in this fine Iris. Standards are a rich golden yellow; falls a velvety mahogany brown. Large, fully developed flowers. Each, 25c; 3 for 65c; doz., \$2.35, postpaid.

MARMORA. (S) Sulphur and fawn; (F) crimson-purple, margined lavender. Each, 25c; 3 for 65c; doz., \$2.35, postpaid.

IGNITA. Mauve. A brilliant contrasty Iris of exquisite mauve coloring with immense standards and falls. The grotesque shaped flowers are balanced on spikes in an attractive and imposing manner. See illustration. Each, 25c; 3 for 65c; doz., \$2.35, postpaid.

ORIENTALIS. Intensely brilliant blue flowers, the bud being inclosed in conspicuous crimson spathe valves. Each, 20c; 3 for 55c; doz., \$1.95, postpaid.

Iris
Honorabilis

SALZER'S CHOICE LILIES

Among the most stately of all garden plants. Perfectly hardy and will bloom for years to come.

AURATUM (Gold-banded Japanese Lily). One of the finest and most popular of the hardy garden lilies. Large ivory-white flowers, thickly spotted with chocolate crimson and striped with golden yellow. Each, 35c; 3 for \$1.00; 6 for \$1.90, postpaid.

ELEGANS. Glossy vermillion, spotted black. Large tulip-shaped blossoms, flowers erect and borne in large clusters. Each, 20c; 3 for 55c; 6 for \$1.00, postpaid.

HYMENOCALLIS. Also called Spider Lily and Sea Daffodil. A wonderful garden lily of a rich, pure golden yellow color and of a rather thick, velvety substance. Delicately fragrant. Each, 25c; 3 for 70c; 6 for \$1.30.

THE REGAL LILY. A new introduction. The beautiful flowers are white, slightly suffused with pink; with an enchanting glow of canary yellow at center and continuing part way up the center. Exquisitely fragrant. Blooms early in July, continuing its glorious display well into August. Easily grown. Each, 60c; 3 for \$1.70; 6 for \$3.25, postpaid.

RUBRUM OR ROSEUM. Rosy white, heavily spotted with rich crimson. Each, 30c; 3 for 80c; 6 for \$1.50, postpaid.

TIGRINUM SPLENDENS (Improved Tiger Lily). Orange-red, spotted black. Black, polished stem, sometimes 6 feet high. Each 20c; 3 for 55c; 6 for \$1.00, postpaid.

Lily of the Valley

LILY OF THE VALLEY

One of the daintiest and sweetest of flowers, having scalloped bells, creamy white color, pendant along slender stems. Leaves are broad, and the flowers being very fragrant, they make up beautiful bouquets. A valuable plant for reclaiming shaded, unused ground.

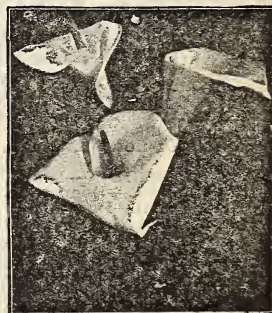

Spreads rapidly, being perfectly hardy and each succeeding year rewards the grower with a greater abundance of deliciously fragrant, snow-white blossoms.

Each, 10c; 5 for 45c; 10 for 80c; 25 for \$1.85; 50 for \$3.45, postpaid.

GODFREY CALLA LILY

The Godfrey Calla is seldom used except for house bloom, but as such it is very popular, its pure, spotless white lending an air of serenity and beauty to the rooms. It is one of the most profuse flowering of all sorts and blooms almost continuously. It has the habit of the very dwarf sorts by flowering when very small and continuing to flower all the while the plant grows larger. Because of its ease of culture and its lovely beauty, you should by all means have one in your home.

Each, 20c; 3 for 55c; large size, each, 50c, postpaid. Extra large size, each, \$1.00, by express.

The Godfrey Calla Lily

THE ROSE BUSHES I PURCHASED FROM YOU ARE BLOOMING FINE.—Edward Strobel,, 224 Webster Ave., Providence, R. I.

Salzer's Hardy Garden Roses

Mrs. Anna M. Limbaugh, 900 E. 1st Ave., Mitchell, S. D., writes, "My Los Angeles Rose is certainly a beauty and has already bloomed the second time,—10 nice large roses the first time and 11 this time, making 21 roses the first season. You are going to get lots of orders for them. Several greenhouse men have been here to see it and I am told I have a good chance for either first or second prize for the finest garden in Mitchell. They asked me where I got my Honeysuckles, Bleeding Hearts and Roses and I told them from 'Salzer's'."

PLANTING—Roses are not difficult to grow. Almost any good garden soil will do, but for the best results it must be well drained and the soil must be rich. If any of these requisites are lacking, dig the bed about 2 feet deep and in the bottom put a layer of broken bricks or crockery, large cinders, etc., about 5 or 6 inches high. Then replace the soil, well pulverized and mixed with one-third its bulk with well rotted cow or stable manure. Cow manure may be used in fresh condition, but horse manure must be well rotted or it will injure the plants. Time should be allowed for the soil to settle, the final top surface being an inch below the edges of the bed. Set the plants about 2 feet apart and as deep as they were in our fields. An examination will quickly show how deep they had been planted before. Spread the roots and work the soil in thoroughly among them, finally treading firmly and then giving it a good soaking. Roses are generally planted early in Spring. Water frequently in dry seasons and keep the surface of the bed well cultivated by weekly stirring to the depth of an inch or so. Towards the end of July a mulch or covering of long strawed manure will prove beneficial during the then customary droughts. Roses should not be planted too close to trees or shrubbery. They will do best in a southeastern exposure.

TREATMENT ON ARRIVAL—If upon arrival, the roots seem to be very dry, soak them thoroughly in water. At no time after unpacking should the roots be exposed to the

sun or dry winds. If they cannot be planted immediately, set them upright in the cellar, covering the roots with soil or burlap and never allowing them to become dry.

PRUNING—The shoots on new plants should be cut off to within 6 inches of the ground except that the ½-inch shoots need not be pruned to more than 10 inches from the ground, either before or immediately after planting. Old plants should be pruned in about March, ½ to ¾ of the previous season's growth, and all dead wood should be removed. Do not allow shoots from below the crown or collar to develop and sap the vitality of the plant. The Baby Ramblers need not be cut at all unless the stems become too numerous, and the Climbers should not be pruned until after their blooming period.

PROTECTION—Even in our cold climate, the following roses almost always withstand the winters, but to guard against severe and unusual weather, it is best to hill up the earth 10 inches high at the base of each plant, and to then cover with leaves or straw, with a top covering of some dirt or branches. The uncovered tops may be tied up with straw or burlap. Remove in Spring when danger of hard freezes is past.

DISEASES AND INSECTS—The most common pests are aphids or lice, and green and black flies. For these, we recommend our Sulphur Tobacco Soap. Caterpillars and rose grubs should be destroyed by hand picking when they first appear. For mildew, dust the leaves with powdered sulphur or our Bordeaux Mixture. For "black spot," we recommend Bordeaux Mixture.

Hardy Hybrid Tea Roses

This class of roses is splendid for outdoor culture and blooms almost constantly from June until frost. The following varieties have been found satisfactory in practically all sections of the country. We supply strong field grown dormant roots only, which will bloom freely the first year.

AUGUSTA VICTORIA

Creamy white, with delicate shadings of primrose yellow, immense substance; petals smooth and nicely arranged. A popular variety. Strong Field Grown Dormant Stock: Each, 50c; 3 for \$1.40, postpaid.

CAROLINE TESTOUT

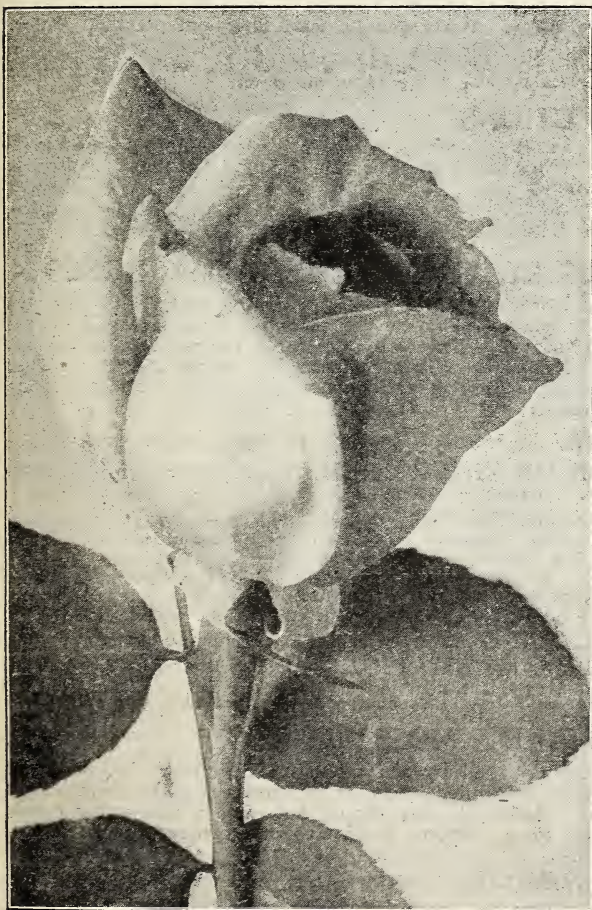

Large, full, globular flowers of bright satiny-rose with brighter center. Very free and fragrant. One of the very finest roses ever produced. Strong field Grown Dormant Stock: Each, 50c; 3 for \$1.40, postpaid.

COLUMBIA

One of the finest of the outdoor pink Roses so far introduced. It is strong and sturdy in growth, with handsome foliage which is almost immune to the ravages of black spot and mildew. The color is a glowing pink, and unlike most pink flowers, when it is fully developed, it is more vivid in color than in the bud state and the flowers last longer than any other variety. Field Grown Dormant Stock: Each, 65c; 3 for \$1.85, postpaid.

LOS ANGELES

One of the grandest all-around Roses of American origin that has ever been produced. The color is a beautiful flame pink, toned with coral and shaded finely with gold at the base of the petals. Greatly loved for its delicate, haunting fragrance and exquisite beauty. The stems are long and heavy, and the flowers unusually large. Exceptionally hardy, vigorous foliage, and free blooming. Strong Field Grown Dormant Stock: Each, 85c; 3 for \$2.45, postpaid.

The Grand Los Angeles Rose

Have had splendid success with your roses.—Miss A. Sima, Box 204, Prairie du Chien, Wisconsin.

HYBRID TEA ROSES—Cont'd.

Unless otherwise noted: Strong Field Grown Dormant Stock: Each, 50c; 3 for \$1.40; 6 for \$2.65, postpaid. All varieties are hardy.

CRUSADER. A new rose. Sturdy growth and heavy foliage, with an abundant mass of blooms,—large, rich velvety crimson roses, perfectly formed.

GORGEOUS. Flowers very large, full and exquisitely formed, produced in endless profusion. Deep orange flushed copper yellow and heavily veined with reddish copper. Strong Field Grown Dormant Stock: Each, 65c; 3 for \$1.85, postpaid.

GRUSS AN TEPLITZ. Dark red, of intense depth and richness of color, shading to a velvety crimson. Fragrant, very free blooming, and thrives everywhere. Mrs. J. H. Schaefer, 605 N. Concord St., South St. Paul, Minn., writes: "The Gruss an Teplitz I got from you has 12 lovely flowers blooming."

KILLARNEY. This well known and popular rose is of exquisite form and fragrance. The color is deep, brilliant and sparkling carmine-pink. Flowers are of immense size and have thick petals of great substance. Bush is strong and upright, with beautiful, deep bronzy green foliage. Strong Field Grown Dormant Stock: Each, 60c; 3 for \$1.70, postpaid.

LADY HILLINGDON. Very free blooming, vigorous growth, and beautiful, even, coppery shade of apricot-yellow in color, all through the year. Particularly fine in every respect.

LOS ANGELES. See Page 105.

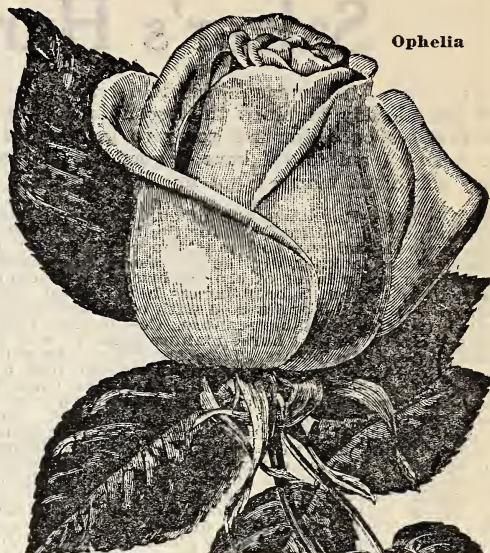

OPHELIA. Color, clear bright salmon often deepening toward golden pink; very fragrant, perfect buds and flowers, stiff stems. Heavy foliage and not prone to mildew. Good bloomer. Strong Field Grown Dormant Stock: Each, 60c; 3 for \$1.70, postpaid.

PINK LA FRANCE. A fine hardy rose. Exceedingly sweet and handsome, flowers and buds large size, color, lively shade of silvery pink, tinged with crimson. Very fragrant.

RADIANCE. Extra hardy and of vigorous growth. One of the best all around roses. In color it is a beautiful blending of carmine-rose with shades of opal and copper.

RED MAMAN COCHET. A rose that will grow and give satisfaction in almost any soil or situation. Produces flowers in profusion, on long strong shoots. Flowers are full, perfectly double, buds long and pointed. Color, warm, rosy crimson.

WHITE KILLARNEY. A duplicate of the enchanting and well known pink Killarney, with fine, perfect flowers, white as snow. Strong Field Grown Dormant Stock: Each, 60c; 3 for \$1.70, postpaid.

ROSE COLLECTIONS

All of the following are strong, field grown, dormant stock. In all collections, choice of varieties not specified is to be left to us, but no two of any one kind will be included. Note our low prices. Collections cannot be altered.

No. 3—1 Los Angeles Rose and 2 of our selection, \$1.50, postpaid.

No. 6—1 Los Angeles, 1 Columbia, 1 Killarney, and 3 of our selection, \$2.85, postpaid.

No. 10—1 Los Angeles, 1 Columbia, 1 Killarney, 1 Ophelia, 1 White Killarney, and 5 of our selection, \$4.65, postpaid.

No. A—1 Los Angeles, 1 Columbia, 1 Killarney, 1 Ophelia, 1 Radiance, 1 White Killarney, \$3.45, postpaid.

EVERBLOOMING BOURBON AND CHINA ROSES

The Bourbon and China Roses are hardy in every section and are strong and vigorous growers. Usually bloom the first year from young plants and bloom constantly throughout the season. Especially desirable for autumn flowering, also fine for pot culture. Mailing size only: Each, 25c; 3 for 70c; 6 for \$1.25, postpaid. In soil and paper pot: Each, 35c; 3 for 95c; 6 for \$1.75, postpaid.

AGRIPPINA. Fiery red; double flowers, sweetly fragrant.

CHAMPION OF THE WORLD. Lovely clear deep pink flowers of large size. Always in bloom.

EUGENE E. MARLITT. Healthy, vigorous and free blooming. Large double flowers, fragrant, of a rich bright carmine with scarlet tones which do not fade in the hottest weather.

HERMOSA. Pleasing shade of bright rose pink. Blooms in fine clusters, large, very double flowers, fragrant.

ISABELLA SPRUNT. Flowers of the richest yellow color.

LOUIS PHILLIPE. Velvety crimson. Abundant bloomer.

SOUV. DE LA MALMAISON. Blush-white, shaded flesh, large, very double, sweetly scented.

One each of the above 7, \$1.45, postpaid; in paper pots and soil, \$2.00, postpaid.

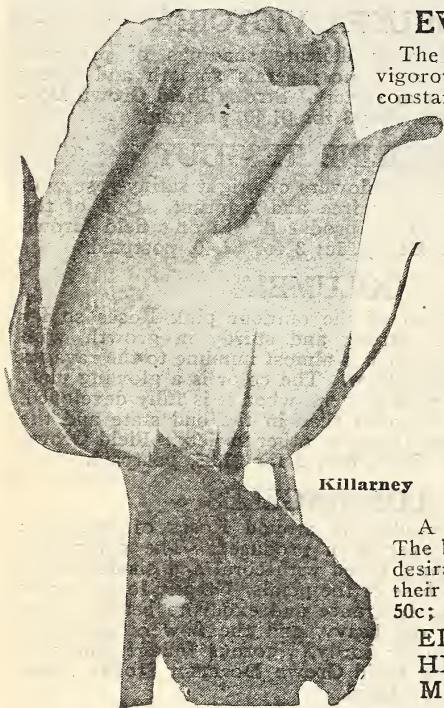

HARDY MOSS ROSES

A beautiful species distinguished by the moss-like covering of their buds. The beautiful buds, delicious fragrance, and perfect hardiness make them highly desirable for all sections. Although they bloom but once a year, they retain their beauty exceptionally long. Strong Field Grown Dormant Stock: Each, 50c; 3 for \$1.40, postpaid.

ELIZABETH ROWE. Large, deep pink buds, well mossed.

HENRI MARTIN. Deep red, large full flower, very fragrant.

MOUSSELINE. Pure white flower, buds heavily and beautifully mossed.

Killarney

Had good success with the roses I got from you last year.—Mrs. J. McMullen, 11741 Kercheval Ave., Detroit, Mich.

Gen. Jacqueminot

SALZER'S CLIFFWOOD GROWN RAMBLER ROSES

You may not have space enough in your garden to give expression to your love for roses, but these hardy, rambling, climbing varieties need only a foothold and will climb and trail over trellises, fences, poles, etc. Until they bloom, they are beautiful as vines, and about July, when the flowers come forth, they are a wondrous mass of glorious beauty. Mr. Fred Heuer, Palatine, Ill., writes, "I bought some Rambler Roses from you, and everybody was surprised at the number of flowers on them this year."

Our stock is of the finest obtainable, all hardy and northern grown under exacting conditions at Cliffwood Farms. When the flowers have finished blooming in July a severe pruning is beneficial and will encourage a vigorous growth and an abundance of flowers the following season.

AMERICAN BEAUTY, CLIMBING. This new climbing type of the real American Beauty Rose has big flowers, gloriously rich in fragrance, measuring 3 to 4 inches in diameter. The color is a glowing deep pink, the real American Beauty color. Foliage is healthy and magnificent, rich glossy green, in itself most attractive. Exceptionally hardy and winters through everywhere. **Strong Field Grown Dormant Stock:** Each, 75c; 3 for \$2.00; 6 for \$3.90, postpaid.

Price of the following: **Strong Field Grown Stock:** Each, 55c; 3 for \$1.50; 6 for \$2.85, postpaid.

CRIMSON RAMBLER. One of the best Roses known today. Hardy as oak; withstands every climate; grows rapidly and blooms all season long. Double deep crimson flowers borne in large clusters, sweetly fragrant. A plant under favorable conditions grows to a great height the first season.

DOROTHY PERKINS. A soft shell-pink color, flowering profusely in large clusters, very fragrant and lasting. A hardy, showy type and one of the most popular. Fine, smooth, dark foliage.

GARDENIA. Bright yellow, cream color when open. Very free, profuse blooming and fragrant. This is the hardy Marechal Niel; double yellow flowering. Very hardy and a great climber.

Hardy Hybrid Perpetuals

These are the well known "June Roses." They are perhaps the hardest of all, and in June and July are brilliant with large, fragrant flowers of the richest colors. If fewer and bigger flowers are wanted, prune the shoots to within about 8 inches of the ground, but if a big quantity of flowers is desired, cut the shoots back to only 2 or 3 feet. **Strong Field Grown Dormant Stock:** Each, 50c; 3 for \$1.40; 6 for \$2.65, postpaid.

FRAU KARL DRUSCHKI. The finest pure white rose. Large flowers of pure, waxy snow white, of exquisite charm and beauty.

GEN. JACQUEMINOT. Familiarly known as "Gen. Jack." Rich crimson scarlet flowers of perfect shape and exquisite fragrance. Free blooming and very desirable.

MADAME PLANTIER. Extremely hardy and especially good for cemetery planting. Flowers are pure white, large and double.

MAGNA CHARTA. Bright rose red. Strong growing, early blooming, a fine rose in every respect.

MRS. JOHN LAING. Satiny flowers of soft, clear pink, remarkably free and continuous flowering. Immense flowers on long stiff stems; fragrant.

PAUL NEYRON. Blooms from June to September on long, smooth, thornless stems, furnishing a mass of large flowers of a bright ruddy pink color. One of the best.

PRINCE CAMILLE DE ROHAN. Deep, rich velvety crimson, passing to intense maroon, shaded almost black. Noted as the finest of the dark roses, and for its abundance of large, fragrant flowers.

POLYANTHAS OR BABY RAMBLERS

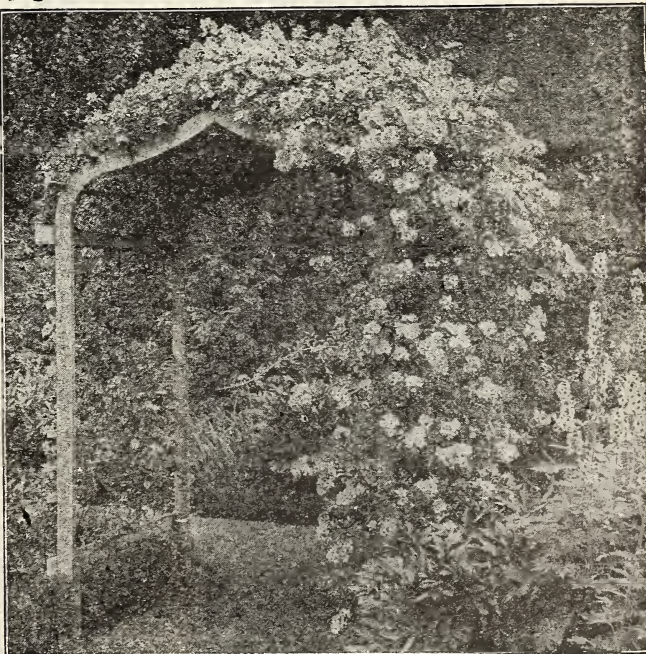

Splendid for planting along walks, driveways, around beds, etc., as they seldom grow more than 12 inches high. Hardy and always in bloom. They are ideal for cemetery planting.

Mailing size only: Each, 25c; 3 for 70c; 12 for \$2.50, postpaid. In soil and paper pot: Each, 35c; 3 for 95c; 12 for \$3.50, postpaid.

BABY RAMBLER. Large clusters of brightest crimson flowers, in bloom all the time. This is the original type; daddy of them all.

CLOTHILDE SOUPERT. The color effect is beautiful ivory-white, shading towards the center to bright silvery pink. Free flowering.

ORLEANS. Showiest of all. Deep cerise or geranium pink flowers with a distinct center of pure white. Remarkably free blooming and flowers are of unexcelled keeping qualities. A great favorite.

Salzer's Crimson Rambler on the Rampage

Am more than pleased with your roses, especially the Augusta Victoria, Paul Neyron, and Magna Charta.—Mrs. H. L. Grawe, Waverly, Iowa.

CLIFFWOOD
GROWN**HARDY FLOWERING SHRUBS** CLIFFWOOD
GROWN

All Shrubs Are Postpaid.

These ornamental flowering shrubs are perfectly hardy everywhere, they require no protection and last a lifetime.

BERBERIS THUNBERGI (Japan Barberry). Of dwarf growth, uniformly bushy and rounded in form with small, numerous leaves densely covering the thorny twigs. Very desirable as a low, compact, hardy, impassable hedge for confining lawns or dividing properties. It becomes literally covered with bright scarlet berries and the foliage turns to a showy scarlet in fall. Each, 30c; 3 for 85c; 6 for \$1.60; doz., \$2.95.

BUSH HONEYSUCKLES. Of true bush form and have bright and pretty, fragrant flowers, followed by showy berries during fall. Make fine hedges (grow 6 to 8 feet high) and are splendidly adapted for tall shrub groups. Ideal for shaded locations.

—**Fragrantissima.** Of strong growth; very fragrant, pink flowers in April. One of the best. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

—**Morrowi.** A spreading variety, grows 4 to 6 feet tall. Has rich, yellow flowers in May, followed by showy red berries. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

—**Tartarica.** Bears a profusion of lovely white flowers in May and June, followed by brilliant, red berries in fall. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

Salzer's Deutzia, Lemoinei

DEUTZIA. They flower in June, bearing masses of dainty bell or tassel-shaped flowers. Perfectly hardy.

—**Crenata Rosea.** Beautiful flowers, single, delicate pale pink. Grows 4 to 6 feet high. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

—**Lemoinei.** A new variety. Immense flowers of purest white, borne in cone-shaped heads. Of dwarf habit, free flowering. Each, 40c; 3 for \$1.10; 6 for \$2.10, doz., \$3.95.

—**Pride of Rochester.** Large, double flowers, white tinged with blush. Grows 5 to 6 feet high. Blooms in May. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

HYDRANGEA. One of the finest of all shrubs. Highly desirable for their massiveness of bloom and their long flowering season.

—**Arborescens Grandiflora** (Hills of Snow). Constantly in bloom from July until frost. Grows 3 to 5 feet high. Handsome foliage and great clusters of snow white flowers. Excellent for solid, low borders, especially in partial shade, and for growing on north side of house. Very hardy. Each, 35c; 3 for \$1.00; 6 for \$1.90; doz., \$3.60.

—**Paniculata Grandiflora.** The immense heads of bloom, often a foot long, are cream color in bud, pure white when fully expanded, changing to pink and bronze with age, and finally to brown when frosted. Attains a height of 5 to 7 feet; hardy everywhere. Splendid effects may be had by planting along driveways, along the foundations of the house, in groups among shrubbery, or as a center for beds. The blooms are often used for interior decorating for winter, after they have been frosted. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

LILAC. Best beloved of the old-time garden shrubs, whose flowers never fail to charm with their delicate beauty or refresh with their tender fragrance.

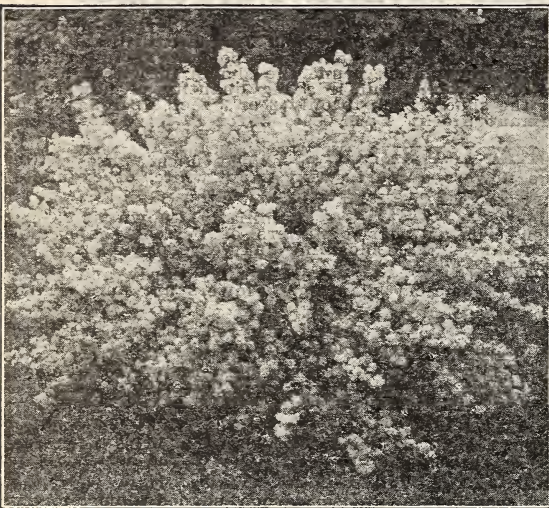

—**New Persian.** Flowers are of a beautiful reddish purple, very fragrant and borne in profusion. Blooms in early June. Handsome leaves, rich dark green and small. Each, 40c; 3 for \$1.10; 6 for \$2.10; doz., \$3.95.

—**Villosa.** The old-fashioned Lilac. Covered in early spring with fragrant, lilac-colored blooms. Each, 35c; 3 for \$1.00; 6 for \$1.90; doz., \$3.60.

—**White.** Similar to the above, except that the fragrant flowers are pure white. Each, 40c; 3 for \$1.10; 6 for \$2.10; doz., \$3.95.

PHILADELPHUS (Mock Orange). Masses of exquisite, fragrant, white flowers in May and June. Grows 8 to 10 feet high. The flowers are very profuse, similar to strawberry blossoms, but larger, white, with a rich, creamy tinge imparted by the golden stamens. Splendid for shrubbery background, tall hedges, or tall foundation planting. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

PRIVET, AMOOR RIVER. Not a flowering shrub, but is the one best hedge plant, combining beauty, hardness and efficiency. Foliage is a beautiful, glossy, dark green. Is of quick, strong, symmetrical growth. May be sheared or trimmed to any desired shape. Very hardy. Splendid for bordering walks, grounds, etc. This is very similar to the well known California Privet, but it is much hardier. Each, 20c; 3 for 55c; 6 for \$1.00; doz., \$1.90.

New Persian Lilac

SNOWBALL. This showy shrub grows about 8 feet high and flowers lavishly in Spring. Perfectly hardy and of vigorous and luxuriant growth. Its large, lovely, white balls of bloom are borne the end of May, and make a brave show for Decoration Day. Each, 40c; 3 for \$1.10; 6 for \$2.10; doz., \$3.60.

SNOWBERRY. A desirable small shrub (3 to 5 feet) that grows in almost any soil; valued for use in shaded locations.

—**Racemosus.** The true Snowberry. Bears small, rose-pink flowers in summer, which are followed by an abundance of large clustered, milk-white berries that remain on the bush until far into winter. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

—**Vulgaris.** Also called Indian Currant. Low growing, spreading, graceful habit. Similar to the above except that its berries are red and that the smaller red berries cluster in thick ropes along the slender branches. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

SPIREA. They bloom with a riotous extravagance that is most striking. Their rich green foliage is handsome and attractive, so that even when through blooming, they remain one of the most decorative of shrubs.

—**Anthony Waterer.** Also called the Perpetual Blooming Crimson Spirea. Is a dwarf variety, 3 to 5 feet high. Makes a fine, compact bush, its broad flat heads of crimson flowers continuing in perfection all summer. A splendid, showy, red shrub for dwarf shrubbery planting. Each, 40c; 3 for \$1.10; 6 for \$2.10; doz., \$3.95.

—**Opulifolia Aurea.** (Golden Spirea.) Of upright growth, reaching 8 to 10 feet. In June the large heads of double white flowers cause the tall branches to gracefully droop. The foliage is green, bordered with rich golden yellow changing to golden bronze in the fall. Very conspicuous. Each, 30c; 3 for 85c; 6 for \$1.60; doz., \$2.95.

—**Van Houttei.** The true Bridal Wreath. Grandest of all the Spires. Grows about 5 or 6 feet high. At the flowering season in May and June, the plant is gorgeous with long sprays of large, white flowers, presenting a beautiful appearance. One of the finest shrubs grown. Ornamental the year round. Very hardy. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

SUMACH, Glabra. Also called Smooth Sumach. Ideal for rear shrubbery plantings. Grows 10 to 15 feet high, with beautiful leaves which color gorgeously in Autumn. Flowers in July, followed by crimson or brown fruits. Each, 30c; 3 for 85c; 6 for \$1.60; doz., \$2.95.

TAMARIX, Gallica Indica. Grows 8 to 12 feet high, with fine

Salzer's Famous Snowball

feathery foliage like that of an evergreen. Bears small and unusually pink flowers from April on. Thrives in either wet or dry ground. Very popular and very hardy. Each, 25c; 3 for 70c; 6 for \$1.30; doz., \$2.45.

VIBURNUM. Showy shrubs of vigorous growth, blooming freely in Spring and vividly brightening Fall with gleaming fruits and richly colored foliage.

—**Dentatum.** The well known Arrow-wood. 8 to 12 feet high and very hardy. Bears creamy white flowers in May and June; foliage is bright green, the heart-shaped leaves turning to purple and red. Each, 30c; 3 for 85c; 6 for \$1.60; doz., \$2.95.

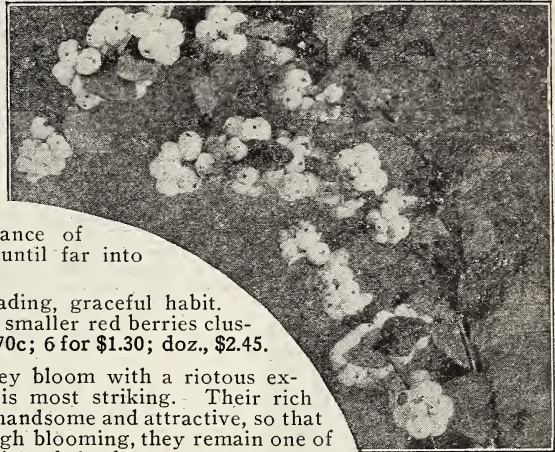

—**Opulus.** (High Bush Cranberry.) 8 to 10 feet. Handsome, dense, brilliant green foliage. Its red berries, which resemble cranberries, enliven the late summer and persist on bare branches into the winter. Very hardy. Each, 35c; 3 for \$1.00; 6 for \$1.90; doz., \$3.60.

WEIGELA. These beautiful shrubs bloom in great profusion in May, June and July. 3 to 5 feet high.

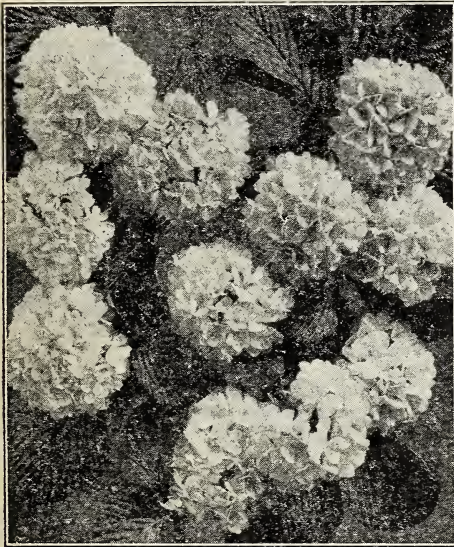

—**Candida.** Lovely snow-white flowers in late June, and occasionally throughout the summer. Each, 40c; 3 for \$1.10; 6 for \$2.10; doz., \$3.95.

—**Rosea.** An elegant shrub with fine rose colored flowers of erect and compact growth. 3 to 5 feet high. Very conspicuous. Each, 30c; 3 for 85c; 6 for \$1.60; doz., \$2.95.

—**Variegated.** Flowers are soft pink. Foliage is very attractive, being bordered with creamy white. Splendid for planting among your dark leaved shrubbery, to lighten it and to give variety to it. Each, 35c; 3 for \$1.00; 6 for \$1.90; doz., \$3.60.

Snowberry

Spirea van Houttei

Your plants and seeds can't be beat.—Mrs. Freda Berndt, R. D. 1, Box 17, Bushton, Kansas.

THREE GIANT CLIMBERS

NEW GIANT MOON FLOWER

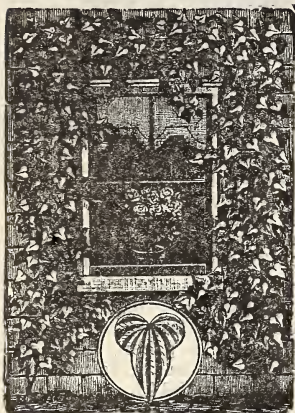

Often growing 50 feet in one season; blooms continuously from June to November, its moon-like giant flowers being of the purest white, blooming only at night or on dull days; gives out a delicious odor similar to the jasmine. Extra strong plants. Each, 20c; 4 for 75c; 12 for \$1.95, postpaid.

COBEA SCANDENS, OR CATHEDRAL BELLS

Three or four plants placed along the side of the house will cover it fully twenty feet wide and rival each other as to which will reach the top of the roof first; it displays a purple bell-shaped blossom glory unknown in any other flower or vine. Each, 25c; 4 for 90c; 12 for \$2.45, postpaid.

BLUE MEXICAN GLORY

This magnificent blue flowering Glory blossoms in great profusion. It is similar to the Moon Flower in growth, with blossoms 3 or more inches in diameter. Each, 20c; 4 for 75c; 12 for \$1.95, postpaid.

Cinnamon Vine

HONEYSUCKLES

Grand climbing vines and highly desirable because of the enchanting fragrance of their flowers. Honeysuckles are vigorous growers. These are the true varieties that are loved throughout the world.

Unless noted: Each, 30c; 3 for 85c; per doz., \$3.25, postpaid.

AUREA—The golden leaved Honeysuckle. Leaves veined and netted with yellow; flowers yellow and sweet scented.

HALLEANA — Intensely sweet scented. Flowers are buff yellow, shading to white. Also known as Hall's Japan Honeysuckle. Each, 25c; 3 for 70c; per doz., \$2.45, postpaid.

SCARLET TRUMPET (*Sempervirens*) — Trumpet shaped flowers of bright scarlet and very fragrant. Also known as Royal Scarlet. Profuse bloomer.

The Clematis Jackmanii I got from you bore over a thousand blossoms last year.—Mrs. S. Y. Purdy, 617 Lakeview St., Sandpoint, Idaho.

Cobaea Scandens

HARDY OUT-DOOR CLIMBERS

SALZER'S GENUINE CINNAMON VINE

This is one of the finest climbers. Leaves are beautifully heart-shaped, and it has dainty flowers of the most exquisite cinnamon perfume. It is easily grown and is perfectly hardy. Also makes charming window plants, indoors or out. In winter they die down, but the roots are not harmed. We furnish tubers only, and they should be planted 8 inches or a foot apart, any time up to July, in rich, mellow soil, covering them about 2 inches. The vines sometimes do not bloom till second year. For house plants, dig up roots early in the fall, and expose in a warm, sunny place several weeks before potting. Strong Tubers, each, 10c; 6 for 50c. Large Tubers, 15c each; 6 for 80c, postpaid.

AMPELOPSIS

ENGLEMANII—Deeply cut leaves which turn to a beautiful crimson in fall. Perfectly hardy, of luxuriant growth, dense foliage. Splendid for walls, trees, etc. Each, 30c; 4 for \$1.00; per doz., \$2.90, postpaid.

VEITCHII—The well-known Boston Ivy. One of the finest of all hardy climbers, as it clings firmly to the smoothest surface, covering it closely with over-lapping foliage. Rich deep green color in summer, changing to brightest shades of crimson and yellow in autumn. Stock very scarce. Each, 40c, postpaid.

BITTERSWEET

(*Celastrus Scandens*.) Handsome glossy foliage, yellow flowers in June, and large clusters of beautiful, orange crimson berries, retained on the vine all winter. The graceful sprays of berries make splendid house decorations. Each, 30c; 4 for \$1.10; per doz., \$3.10, postpaid.

CLEMATIS

A grand climber for pillars and trellises, old trees, pegged down for bedding, running over rockwork, etc. They delight in rich soil and sun. Unless noted: Each, (2-year-old strong plants) 60c; 3 for \$1.75; per doz., \$6.75, postpaid.

JACKMANNII—Large blossoms of a rich velvety, violet-purple color. Blooms very freely.

MAD. ED. ANDRE—Immense blossoms of a distinct crimson red. Free flowering.

HENRYII—Creamy white flowers, very large, freely blooming.

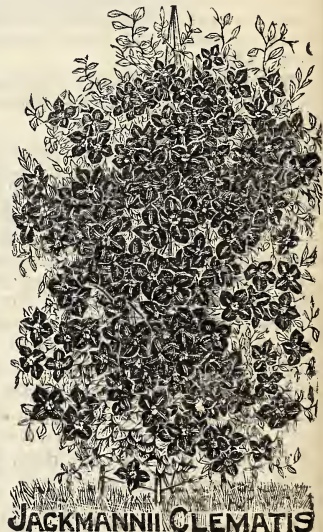

PANICULATA—The sweet scented Japan Clematis. The pure white flowers are of medium size, fragrant, and are literally borne in immense sheets in September. Rich, glossy green foliage. An extra choice variety for trellises and porches. Each, 30c; 3 for 85c; per doz., \$3.25, postpaid. For price on the other Clematis, see above.

MATRIMONY VINE

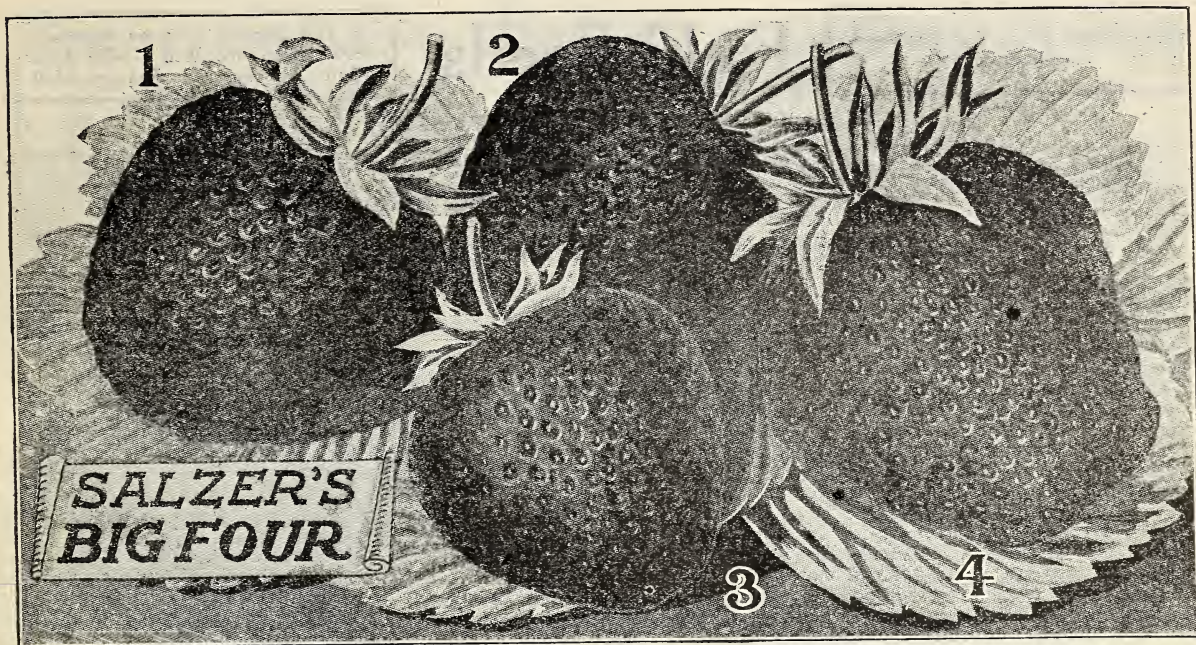

The Chinese Matrimony Vine; a general utility hardy climbing vine that flourishes everywhere. Bears a profusion of handsome purple flowers in summer, followed by scarlet berries until late in winter. Splendid vine for retaining banks. Each, 25c; 3 for 70c; per doz., \$2.45, postpaid.

ROYAL SCARLET HONEYSUCKLE

JACKMANNII CLEMATIS

SALZER'S HARDY NORTHERN GROWN STRAWBERRIES

Mrs. Frank Driskell, R. D. 2, Box 41, Elmwood, Ills., writes, "Two years ago we ordered 100 Strawberry Plants from you and now we have a very fine bed of them. Last year we sold \$27.00 worth, and had enough for home use and gave lots of them away. People came from 20 miles away to get our berries. Everything we bought from you proved satisfactory."

All of the varieties listed below have "Perfect Flowers" and are not termed "Pistillate." We consider these varieties to be the most dependable and the most profitable to plant. We have tested and tried them out carefully at Cliffwood Farms, and we believe that you too will find them the best that can be planted.

Good cultivation is necessary for the best results, a liberal mulching during the summer is beneficial and the plants should never suffer for lack of water. When plants are received dip them in water at once and bury the roots in moist, shady ground until ready to set out.

(1) **DR. BURRILL (Early).** An exceptionally fine early strain, a marvel, of vigor, productiveness, quality, color, and size, seldom found in any one variety. The berries are large, delicious and beautifully formed, of a dark glossy red color, with rich green calyx and yellow seeds, making a combination that gives them an unusually attractive appearance. Fruit is very solid and meaty. The plants have a rich, dark green foliage and a very strong root system, so that it is not easily affected by drought or by leaf diseases. Very productive, blooms over a large season, and a splendid canner and shipper. We strongly recommend this variety.

(2) **SENATOR DUNLAP (Second Early).** An old and dependable variety and very well adapted to varied soils and climates. This strawberry is of the Warfield type, fruit is good size, regular form, rich, beautiful bright red color and glossy. Flesh is meaty, firm, is a splendid

keeper and shipper, and of excellent quality and fine for canning. Ripens next to Dr. Burrill. A wonderful variety for those who haven't time to give it special care because it will produce a good crop under positive neglect.

(3) **GIBSON (Medium Late).** It commences to ripen with the second earliest and continues for a long season, making a heavy yield of fruit. The fruit stems are large and strong, and the dark green foliage is ample protection for the blossoms and fruit. It is a very strong variety with perfect blossoms and makes an excellent sort for pollenizing non-perfect varieties. The berry is large and regular in shape, holding its size well to end of season. Its color is a rich dark red clear through. Its flavor is fine, just right for home use. Withstands considerable frost.

(4) **GANDY (Late).** This is a good reliable late bearing variety. Its fruit is very large, uniform in shape, firm and a good shipper. It is a variety that never fails to fruit and to produce a good sized crop. The plants are healthy, hardy and do well everywhere. They are large and it is a money maker. It always sells well on the markets owing to its large size and fine appearance.

PRICES, of above, postpaid (no less than 25 sold of any one variety): Per 25, 40c; per 50, 60c; per 100 (25 of each if wanted), \$1.00; per 500, \$4.00; per 1,000 (any number of varieties), \$8.00. Full cultural directions sent with each order.

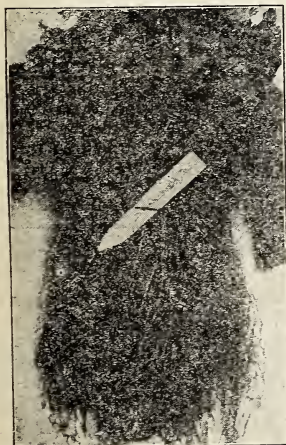

PROGRESSIVE EVERBEARING STRAWBERRIES

They produce a never ending yield of medium large berries, sweet, mild, and beautifully colored, throughout the entire summer and fall, until snow flies. To obtain the largest size and the best quality of berries in the fall keep the flowers picked off until about August 1st. The plants are extremely vigorous and hardy, resembling Senator Dunlap in their ability to withstand neglect and adverse conditions. A splendid type for those who have never planted strawberries before. This variety is furnishing the bulk of the fall supply for the market, and we strongly recommend it. Plants set out in spring will bear the following fall, and produce heavily thereafter.

PRICE, postpaid: 25 for 35c; 50 for \$1.00; 100 for \$1.80; 200 for \$3.50; 300 for \$5.00; 500 for \$8.00; 1,000 for \$14.95. Full cultural directions sent with each order.

Salzer's Strawberry Plants

The Strawberry Plants you sent me are all doing splendidly.—H. O. DeHart, Carnarvon, Iowa.

Field Seeds

If You Should Lose or Misplace
Price List, We Will Gladly Mail
You Another by Return Mail

CONDITION OF SALE ON FIELD SEEDS

Recognizing that our customers have the opportunity of securing analysis and germination of any and all field seeds, we, the John A. Salzer Seed Company, do not give, and our employees are forbidden to give, any warranty, expressed or implied, as to description, quality, productiveness, or any other matter of any field seeds and potatoes we send out and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they must at once be returned and money will be refunded.

SALZER'S GIANT WHITE HULLESS BARLEY

The demand for our seed barley is increasing each year as its fine qualities are becoming more and more widely known. Barley is very early, in some sections being ready for harvesting the end of June or the first of July; the yield is almost invariably good, being often more per acre than oats; its muscle and bone-producing qualities make it a splendid feed; it is one of the best nurse crops for grasses. Barley culture is similar to that of oats or spring wheat. Fall-plowed ground is preferable to spring plowing. Do the work shallow and harrow the ground thoroughly after seeding. Sow early, using 2 to 2½ bushels per acre for broadcasting.

We consider our Giant White Hulless Barley the best variety to grow. It is not a malting variety, but for feeding purposes is unexcelled for earliness, yield, and quality. Especially valuable in those sections where corn does not mature, as a bushel of White Hulless is equal to a bushel of corn for feed. White Hulless is six-rowed, but in threshing, the kernels shell out (without the hulls) and look like wheat. Yield frequently runs from 50 to 80 bushels per acre. Often grown for hay. The absence of beards makes it safe to feed to all kinds of stock, and it is of great nutritive value. (See illustration.) We ship this variety in cotton bags only.

4275—Lb., 25c, postpaid. Not prepaid: Peck, 75c. See current price list for larger quantities.

Salzer's
Giant
White
Hulless
Barley

Four bushels of Barley can be packed in a bag.

SALZER'S BEARDLESS BARLEY

Salzer's Beardless Barley is one of the earliest varieties grown. It is six-rowed and differs from the common sorts by its freedom from the troublesome beards. It is a safe barley feed for live stock.

Salzer's Beardless Barley is a vigorous grower, producing strong, short straw and heavy, well-filled heads, averaging about three inches in length. Being a very early variety, it can be cut and put out of the way before wheat and oats are harvested. It can be grown on most any kind of land. It will produce a good crop on light soils.

Salzer's Beardless Barley originated from a six-rowed Barley, and occasionally plants are found with beards.

It is growing in favor for feeding stock, especially hog feeding, and seems to be destined to fill the place occupied by corn in states farther south, as feeding trials with horses, cattle, sheep and hogs in the different western stations have demonstrated.

It is also very valuable as a nurse crop; does not stool as much as oats, it rarely lodges. (See illustration.) Weighs 48 pounds to the bushel.

4276—Lb., 25c, postpaid. Not prepaid: Peck, 60c. See current price list for larger quantities.

SOW SALZER'S SEEDS

I want to write you what your grand Beardless Barley has done for me. It is unequalled for this place. I have a crop knee high, now, on February 20th. Thank you many times for all your fine seeds have done for me.

Mrs. Ada J. Denn, Camos Valley, Oregon.

SALZER'S SILVER KING

Silver King has proven to be one of the heaviest yielding 6-row bearded barley varieties ever grown. Is very early and of vigorous growth; straw is strong and stiff, and very seldom does a field of this barley lodge; ears are very long and well filled with plump and heavy, fine colored grain which is very rich in protein, making it most desirable for feeding purposes. Silver King is the best Barley to sow on heavy, rich soil, but it also thrives on warm, light soil, often outyielding other varieties. Because of its early maturity it is well adapted for the Northern States. Exceptionally heavy yields have been reported of Salzer's Silver King Barley. 48 pounds equal one bushel.

4277—Lb., 25c, postpaid. Not prepaid: Peck, 50c. See current price list for larger quantities.

The seed barley I purchased from you, produced the best crop I ever raised.—E. F. Walshire, Mechanicsville, Iowa.

2 to 2½ bus. sow one acre

Barley

48 lbs. in one bushel

WISCONSIN PEDIGREE

The heaviest yielding variety of bearded barley grown and is the result of years of breeding and selection by the Wisconsin Experimental Station. Our seed is fine, true-to-type stock and represents an unusual value. Wisconsin Pedigree Barley will outyield the common varieties 10 to 20 bu. per acre. It grows taller than other 6-row sorts; it ripens uniformly and is noted for its stiff straw and plump kernels; the heads are unusually large and long; it is very attractive being brighter and whiter than most other sorts; it is a barley you can depend upon to produce a big crop. Why not plant a field of barley this year and reduce your acreage of corn which will have to be cared for all during the summer?

4282—Lb., 25c, postpaid. Not prepaid: Peck, 55c. See current price list for larger quantities.

ODERBRUCKER (Wis. No. 55)

A heavy yielding, stiff-strawed, bearded, 6-row variety. Oderbrucker is about the same as Manshury in manner of growth, time of maturing, and general appearance, but has plumper kernels. It is very rich in protein, containing more than many other varieties, and is superior for stiffness of straw and rust resistance to any variety on test at the experimental station.

4281—Lb., 25c, postpaid. Not prepaid: Peck, 55c. See current price list for larger quantities.

Sow about 1 bu. per acre

Buckwheat

50 lbs. in one bushel

JAPANESE BUCKWHEAT

Buckwheat should be sown about the middle of June, sowing ¾ to 1 bushel per acre. Can be sown after a crop of winter wheat or rye; does well on light soils. Avoid any danger of buckwheat spoiling, by threshing as soon as dry.

Our Japanese Buckwheat is a very valuable and popular strain. The fertility of the soil can be retained by sowing and plowing it under. Equally valuable as a cleaning crop. The large grains are a rich dark color and have a thin hull. Very hardy and productive. It is a cool season crop, and one which may be sown very late in the season and still yield good returns.

About a week earlier than Silver Hull, and on that account can be grown farther North.

4329—Lb., 25c, postpaid. Not prepaid: Peck, 65c. See current price list for larger quantities.

SILVERHULL BUCKWHEAT

Little later and with smaller grains than the Japanese, but nevertheless equally as productive; millers like it, claiming that there is little waste to it and it makes white and very nutritious flour. Grain is a beautiful light gray color and thin hulled. Exceptionally fine for bees.

4331—Lb., 25c, postpaid. Not prepaid: Peck, 60c. See current price list for larger quantities.

COMMON BUCKWHEAT

4332—Lb., 20c, postpaid. Not prepaid: Peck, 55c. See current price list for larger quantities.

28 lbs. sow one acre

Common Flax

56 lbs. in one bushel

In procuring flax seed, be sure you get good, healthy, clean seed. We offer clean and healthy seed only, of the best quality, grown on clean and new land, at a price which is very reasonable.

4450—Price: Lb., 30c, postpaid. Not prepaid: Peck, \$1.50. See current price list for larger quantities.

SOW SALZER'S SEEDS

Have just finished shocking your Superior Fodder Corn. It grew about 9 feet high on the average. A horse trader said it was the best field within 25 miles. Your Billion Dollar Grass grew as you said it would.—Thomas Burdick, Stiles, Wis.

1 peck plants one acre in drills

Fodder Corn

56 lbs. in one bushel

SALZER'S EARLIEST RIPE FODDER

We consider Salzer's Earliest Ripe Fodder Corn the earliest of all fodder corns; it comes at a time when fodder is always scarce on the farm, during those hot weeks and months when an acre of corn, of rich, nutritious food, is worth lots of money. It ripens in about 70 days.

If you plant this corn early, you will have fine feeding corn by July and August when you can replant same, and have good Fodder Corn in September and October.

This Corn ripens ears earlier than any Fodder Corn we know of and produces usually a sure ear on every stalk. The stalks are generally about six feet high, or more, very leafy and bushy, and contain a large amount of nutritious fodder. Of course, this is not as prolific as our Salzer's Superior Fodder Corn, but has the advantage over any and every other Fodder Corn by its being upwards of thirty days earlier. You can easily figure out the great profit in having a Fodder Corn so extremely early, coming at a time when pasture is short. South Dakota grown seed.

4382—Lb., 30c, postpaid. Not prepaid: Peck, \$1.00. See current price list for larger quantities.

SALZER'S MID-SUMMER FODDER

Fodder Corns should be largely planted by every farmer, as it is hard to beat them for large yields of valuable forage under varied soil and climatic conditions. Used for forage, hay, and ensilage, it provides you with a cheap supply of nutritive and healthy food throughout the year for your cattle and live stock. When preserved as ensilage, it can be stored more cheaply in less space than perhaps any other feed; it is always ready to feed; it keeps indefinitely.

Our Mid-Summer Fodder Corn is unexcelled as a fodder or silo corn. It is of great succulency, it silos well, it increases the flow of milk and improves the quality. Invariably produces a heavy yield, with leafy, bushy foliage, and is eaten without any waste. South Dakota grown seed.

4383—Lb., 25c, postpaid. Not prepaid: Peck, 90c. See current price list for larger quantities.

SALZER'S SUPERIOR FODDER

The growing of corn on a fair proportion permits the keeping of more cattle and so increases your revenue, as well as providing you with plenty of manure, so necessary for the soil. When other crops fail and it is too late to plant anything else, fodder corn can always be grown and will give you a paying crop and fine feed for your stock. Plant our splendid Superior Fodder for late use. It is one of the most popular and satisfactory of all ensilage corn. It grows to a large size; it is very leafy and splendidly adapted for ensilage; it is rich, juicy, sweet, and sugary with a tendency to mature several ears.

4384—Lb., 25c, postpaid. Not prepaid: Peck, 90c. See current price list for larger quantities.

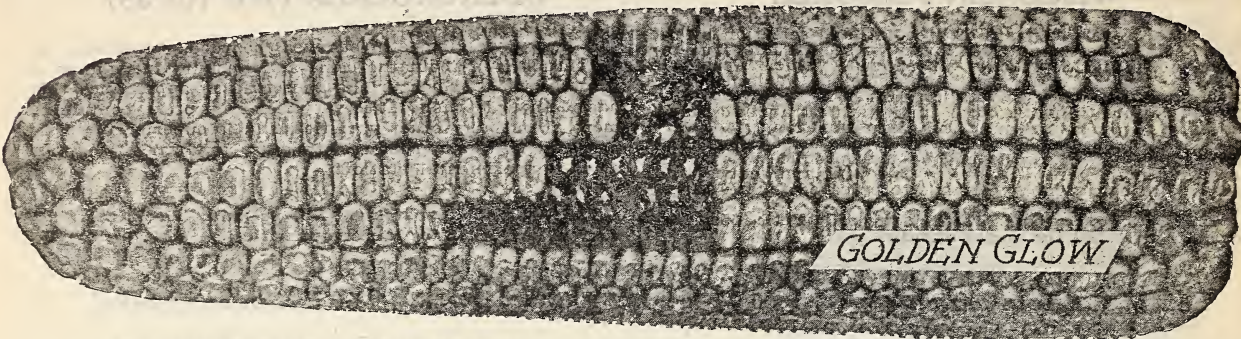

NOTE—We recommend growing Soy Beans for silage as well as Corn. See Page 119 for description of Soy Beans. About two-thirds Corn and one-third Soy Beans will make a perfect ration for your cattle, as the Soy Beans supply the protein the corn lacks. They may be grown in the same row as the Fodder Corn, or separately.

Salzer's Seeds are the best I have ever grown.—Lucille Weisbrodt, R. D. 1, Cleves, Ohio.

8 lbs. plant one acre in hills
Corn weighs 56 lbs. to the bushel

CORN

GOOD SEED CORN IS VERY SCARCE
THIS YEAR. ORDER EARLY.

We Hand Pick all of our corn, with the exception of the Flints, Fodder, White Cap, and Northwestern Dent, but can also furnish all varieties Not Hand Picked, for price of which see current price list.

SALZER'S NEW COLD RESISTANT GOLDEN GLOW

Here is a fine new type of corn that is one of the best for Central and Upper Wisconsin as well as other Northern States. In addition to its remarkable ability to resist cold weather, it has all the grand characteristics of the common Golden Glow—it is just as large, just as early, and just as fine in quality.

This splendid new corn was developed and perfected at the Wisconsin Experimental Station after ten years hard work and testing in different sections. Prof. Moore of the Experimental Station, says, "it is great for the Northern countries as it ripens up so early." He says it holds the same size as the common Golden Glow, can be planted two weeks earlier and will keep right on growing in spite of cold weather and that if frost hits it, it will come right along again.

It produces a large stalk averaging as large as the common Golden Glow, it matures a few days earlier and high yields are reported from growers. It is the best silage corn for Central and upper Wisconsin. Order early.

4367—MINNESOTA GROWN—Hand Picked, lb., 40c. Not prepaid: $\frac{1}{2}$ peck, \$1.20; peck, \$2.00. See current price list for larger quantities.

SALZER'S EXTRA EARLY NORTHWESTERN DENT

It is the earliest and hardest Dent Corn grown and can be reasonably relied upon to mature every season in the Dakotas, Northern Minnesota, Wisconsin, Montana, Michigan and Manitoba, even when other corn fails. The stalks grow about seven feet high and the ears are borne over three feet above the ground, allowing the use of a corn harvester. The ears are of good size, from seven to ten inches long, have a thin cob and ten to fourteen rows of very fine, large kernels of red color with a yellow cap of slight variation. Very productive. Matures in about 75 to 85 days.

Much is planted late when other corn has been destroyed; if planted as late as July it has a good chance to mature in many localities before frost; it is also planted for early feeding, and where the corn is hogged down. Grown for fodder purposes, Northwestern Dent ranks exceptionally high.

4371—MINNESOTA GROWN—Price: Lb., 25c, postpaid. Not prepaid: Peck, \$1.60. See current price list for larger quantities.

4372—SOUTH DAKOTA GROWN—Price: Lb., 25c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

IOWA GOLDMINE

This Corn ripened thoroughly in Southern Wisconsin, Kansas, Nebraska, Iowa and Illinois inside of 100 days. It is one of the most generally planted varieties in the corn belt. The ears are about 10 inches long and very symmetrical. The grain is very deep and of beautiful golden yellow color, and the cob is very thin. Iowa Gold Mine is a heavy cropper, and one of the most productive early varieties. Our stock is carefully grown, ear selected, hand picked.

DAKOTA, IOWA AND NEBRASKA GROWN

4417—Hand Picked, lb., 25c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

SALZER'S GOLDEN GLOW

(See illustration above.) A yellow dent variety of considerable prominence, individually, immense productiveness, fine height, large superb ears, large kernels, small cob and attractive appearance. It is a splendid variety for both light and heavy soils. Has strong constitutional vigor. Matures in about 95 days. Has a record for yielding 164 bushels, 25 pounds, in Oconto County, Wisconsin. Won the sweepstakes at the International Corn Show as the best yellow dent for the Northwest.

A very early variety, maturing as far north as the central part of Wisconsin and the same latitude of Minnesota and South Dakota, although for years we have grown our seed farther north in the central part of Minnesota, northwest of St. Paul. It produces larger ears and is a heavier yielder than Wisconsin No. 8 and only a few days later, ripening in about 95 days.

The ears are of very attractive appearance, quite large, sixteen to eighteen rowed, of symmetrical shape, well filled from butt to tip with good sized kernels of golden-yellow color, slightly rough on the outer end and free of flintiness. The stalks are about seven feet high, produce a large amount of foliage, making a splendid fodder and silage corn. Ear selected, hand picked.

WISCONSIN AND MINNESOTA GROWN

4391—Hand Picked, lb., 30c, postpaid. Not prepaid: Peck, \$1.75. See current price list for larger quantities.

DAKOTA, IOWA AND NEBRASKA GROWN

4376—Hand Picked, lb., 25c, postpaid. Not prepaid: Peck, \$1.20. See current price list for larger quantities.

WISCONSIN No. 8 (Minn. No. 13)

Wisconsin No. 8 has been developed at the Wisconsin Experiment Station from the well-known Minnesota No. 13, which has a great reputation all through Minnesota, being considered one of the earliest and most productive of corns. The ears are of handsome appearance with sixteen to twenty rows of bright, rich yellow, smooth and plump kernels, which set compactly on the cob from butt to tip. The ears average eight inches in length and are frequently borne two on a stalk, which grows about seven feet high. They are very leafy and furnish great quantities of fodder. Wisconsin No. 8 will thoroughly ripen in 90 days and earlier if soil and season are favorable. There is no other yellow dent corn fully as early that is equal to it in productiveness. Our stock is Minnesota, Dakota, Iowa and Nebraska grown. Ear selected, hand picked. The ears resemble the Golden Glow, but are not as large or as long as the Golden Glow.

WISCONSIN AND MINNESOTA GROWN

4406—Hand Picked, lb., 30c, postpaid. Not prepaid: Peck, \$1.60. See current price list for larger quantities.

DAKOTA, IOWA AND NEBRASKA GROWN

4410—Hand Picked, lb., 25c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

SALZER'S NEW LEAMING

One of the best all around heavy yielding Dent Corns of today. Known everywhere as a heavy yielding yellow Corn. Produced 1,238 bushels on 19 acres. Ears about 10 inches long; 18 to 20 rows, well filled with wedge shaped, reddish-yellow kernels of medium size. We have increased the size of the ear, its earliness and also the percentage of grain by careful breeding. Ripens in about 95 to 100 days. Ear selected, hand picked.

DAKOTA OR IOWA GROWN

4395—Hand Picked, lb., 25c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

WAS VERY MUCH PLEASED WITH YOUR SEED CORN.—Thos. Schmidt, Box 124 De Soto, Wis.

8 lbs. plant one
acre in hills

CORN

For description of GOLDEN JEWELL,
IMPROVED MURDOCK, RUSTLER
WHITE DENT, and MINN. WHITE
DENT, see current price list.

REID'S YELLOW DENT

This is one of the most largely grown yellow varieties throughout the corn belt and one of the best varieties for Iowa, Illinois, Nebraska, Kansas and other states in the same latitude. A splendid variety for farmers who sell corn on the ear, as the ears are uniform in size, type and color. They are covered with eighteen to twenty-four rows of deep grain, no space lost between the rows, and are of light golden-yellow color and about nine to eleven inches long, the cob is very thin. It matures in about 115 days. Our stock is exceptionally choice, grown from selected ears only and is sure to please the most particular. Ear selected. Hand picked.

DAKOTA OR IOWA GROWN

4398—Hand Picked, price: Lb., 30c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

MINNESOTA WHITE DENT

The earliest pure white dent corn, maturing in about 90 days, almost as early as Northwestern Dent, adapted for North Dakota, Northern South Dakota, Minnesota and Wisconsin. Yields much larger crops than yellow varieties, equally as early, and can be planted on poor and thin soils and also on cold and wet ground. The ears are of good size, usually eight inches long; the kernels are long and deep, growing very compactly around the cob. The stalks average about six and one-half feet in height, have large and heavy foliage, making an unusually fine fodder. Ear selected. Hand Picked.

MINNESOTA GROWN

4394—Hand Picked, lb., 30c, postpaid. Not prepaid: Peck, \$1.50. See current price list for larger quantities.

FLINT VARIETIES

SANFORD'S WHITE

Matures in one hundred days. Very large ears, 12 to 15 inches long, of symmetrical shape and flinty white color. The stalks are tall, leafy and generally produce 2 or 3 ears. Largely grown by dairy farmers for fodder. South Dakota grown.

4355—Lb., 30c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

LONGFELLOW YELLOW

Ripens in about 90 to 95 days. The ears are from 10 to 15 inches long. The cob is small, kernels large and broad. This corn is adapted to the Northwest, and has often produced 200 bushels of ears to the acre. Stalks $7\frac{1}{2}$ feet high, ears 8-rowed of glossy yellow color, which set about 3 feet from the ground. South Dakota grown.

4353—Lb., 30c, postpaid. Not prepaid: Peck, \$1.25. See current price list for larger quantities.

SILVER KING (Wisconsin No. 7)

In Wisconsin, where it is adapted to only part of the state, about one-fifth of all the corn grown is Silver King. It is a corn for the Extreme Southern Minnesota, South Dakota, Northern Iowa and Illinois, and the lower one-third portion of Wisconsin. We have no other corn, either yellow or white, equally as early that will produce as sure and as large a crop as Silver King, or a better or more leafy silage corn.

Ears averaging eight to nine inches are always filled out clear to the tips and very uniform in size and type. The corn is pure snow white in color with kernels of good length set compactly in straight rows. The corn is a strong grower, ripens in about 100 days. Ears selected. Hand picked.

MINNESOTA GROWN

4400—Hand Picked, lb., 30c, postpaid. Not prepaid: Peck, \$1.60. See current price list for larger quantities.

SOUTH DAKOTA GROWN

4414—Hand Picked, lb., 30c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

SILVERMINE WHITE DENT

More largely grown throughout the corn belt than any other white variety. An enormous cropper, has produced often over 100 bushels per acre; ripens in about 110 days. Creamy white, cylindrical shaped ears, 9 to 10 inches long, with 18 to 20 rows of deep kernels; cob, small and white. Ear selected, hand picked.

DAKOTA OR IOWA GROWN

4401—Hand Picked, lb., 30c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

DAKOTA WHITE

About as early as Gehu, ripens in 60 to 70 days. Very dwarf; small ears. Suitable for early hog feed and for late planting to hog-off in fall. North Dakota grown.

4350—Lb., 30c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

SOUTH DAKOTA YELLOW

Ears large, bright yellow color, kernels fair size, eight thickly set rows to a cob; very productive, yielding often 160 bushel baskets per acre. Ear is 12 to 15 inches long. The average height of the stalks is $7\frac{1}{2}$ feet, while the ears set about 3 feet from the ground, maturing in about 90 days. South Dakota grown.

4357—Lb., 30c, postpaid. Not prepaid: Peck, \$1.15. See current price list for larger quantities.

SOW SALZER'S SEEDS

We certainly like your seeds. We got first prize for two years on both oats and wheat, your seed, and we are just new farmers.
John Lecnor, Lyran Route, Florence, Wis.

Sow about $1\frac{1}{2}$ bu. per acre

Wheat

60 lbs. in one bu.

MARQUIS

It out-yields any other Bald Spring Wheat grown under the same conditions. Farmers who need new strains of Wheat can ill afford not to grow Marquis. This variety holds the World's Championship for the best appearing and best milling wheat. Originally introduced from Canada, where early ripening Wheats are an absolute necessity.

Marquis is a cross between Calcutta, Hard Red and Red Fife, a combination of earliness, yield and high quality. Kernels are beautiful dark red, hard, of large size, attractive shape and color. Heads are exceptionally large, beardless and practically rust proof. Smooth, yellow chaff which hugs the kernel closely, thus resisting frost. Does not thresh out in the wind. Straw medium in height and very stiff. One other point, viz.—no matter what the growing condition, no matter how miserable the size—Marquis kernels usually retain their plumpness—hence the secret of its high milling value.

4751—Lb., 30c, postpaid. Not prepaid: Peck, 85c. See current price list for larger quantities.

EARLY JAVA OR BEARDED JOHNSON

Its points of merit are many, principally its extreme earliness, being earlier than Marquis. It has a very stiff straw with well-filled, long-bearded heads. The berry is round and plump. It is extremely hardy and of a first-class milling quality. It is a splendid yielder. Sow $1\frac{1}{2}$ bu. per acre.

4744—Price: Lb., 30c, postpaid. Not prepaid: Peck, 80c. See current price list for larger quantities.

MACARONI OR DURUM

The exclusive advantages of this variety are its great drought resistance and rust proof characteristics. The manufacture of Macaroni and by-products keep it in great demand. Its productiveness makes it one of the most profitable wheats to grow.

Macaroni Wheat has compactly formed bearded heads; the grain is large, hard and glossy, of yellowish color, often translucent. The grain is very large and does not stool very heavily.

4750—Lb., 30c, postpaid. Not prepaid: Peck, 85c. See current price list for larger quantities.

BLUE STEM AND MARVEL WHEAT

As Marquis has taken the place of these varieties almost entirely, we have decided this year to omit Blue Stem and Marvel Wheats from our Catalog.

Oats

2 to 3 Bu. Sow One Acre
32 lbs. in one bu.

A Field of White Bonanza Oats

SALZER'S WHITE BONANZA

Sow Salzer's Tested Seed Oats this year and have better crops than you ever grew before. Our White Bonanza is a late variety, extremely productive, with strong, stiff straw, bearing long heads filled with good-weight grain. It has demonstrated its ability to produce fine crops on sandy land and on the grain producing prairie soils. A dependable oat that ripens in about ninety days, of branching habit and with stiff straw that will not lodge easily. This variety is hardy, having been grown successfully in Canada, in sections about 1,000 miles northwest of La Crosse. "Bonanza" is our own Registered Trade Mark; no one else has the right to use it. (See illustration.)

If your own Oats are badly stained, run out, or light weight, you cannot afford to sow them when you can get Salzer's White Bonanza,—clean, bright, heavy seed oats. Although a trifle higher priced, their exceptional quality represents a splendid value.

4614—Lb., 25c, postpaid. Not prepaid: Peck, 55c. See current price list for larger quantities.

WISCONSIN PEDIGREE No. 7

An extremely early, hardy oat, developed by the Wisconsin Experimental Station. The straw is unusually stiff, being perhaps the stiffest of any oat. Like all oats of the Kherson type they are valued for their extremely heavy yields. It is a yellow oat, bright, shiny, thin hulled, very meaty, unusually heavy and very early.

4623—Lb., 20c, postpaid. Not prepaid: Peck, 40c. See current price list for larger quantities.

WISCONSIN PEDIGREE No. 1

This fine variety originated at the Wisconsin Experimental Station, and is one of the most sought after of all oats.

It stands up better on rich river bottom land where other varieties usually lodge. Its strong, vigorous root system enables it to withstand drought. Its coarse, stiff straw permits it to stand up well on rich manured land. Especially recommended for following cultivated crops.

At the Wisconsin Station farm it yielded as much as 110 bushels per acre or 32 per cent more than the average of 12 other varieties. It is earlier than the Swedish Select, has shorter and stiffer straw, and does not lodge easily. Fine plump kernel. Very bright color.

4620—Lb., 20c, postpaid. Not prepaid: Peck, 40c. See current price list for larger quantities.

SALZER'S 60 DAY, JULY OR KHERSON

Maturing as it does in July, it admits of very early harvesting.

In North Dakota 60-Day Oat headed the list of varieties on trial. In Canada the Secretary of the Saskatchewan Grain Growers reported he secured 126 bushels per acre.

Salzer's 60-Day is a small, yellowish oat that weighs about 34 pounds to the bushel; it has a very thin hull and is practically all meat. The straw is short, stiff, and does not lodge. These oats are not very attractive looking. Do better in a dry season than any other variety we know of.

4616—Lb., 20c, postpaid. Not prepaid: Peck, 45c. See current price list for larger quantities.

Your Silvermine Oats are a great success in this part of Michigan.—Albert Hinds, Ionia, Mich.

Postage as
per Page 6

IOWAR

This is the best oat ever developed by the Iowa Experimental Station. It is of the Kherson type, but newer than Iowa 103 or Iowa 105. Iowar is of a fine, white color, has wonderfully stiff straw, quite short, and ripens extremely early. Has given heavy yields in the large number of tests made throughout Iowa and Wisconsin and is better suited to Wisconsin conditions than Iowa 103 which has always given splendid results here. The yield is invariably very satisfactory, running 80 bushels and over, per acre. We recommend this variety very highly and having once grown Iowar, you will be delighted with it and will praise it as highly as the next one.

4624—Lb., 20c, postpaid. Not prepaid: Peck, 40c. See current price list for larger quantities.

WISCONSIN No. 5

A splendid variety for upland soils and poor land. The kernel is large, plump and of high nutritive value; of medium length, with a hull a trifle thicker than the Swedish. Straw is very strong, does not lodge easily and the panicles are large and always well filled. It is a medium maturing type. Rust resistant and not easily susceptible to smut. Has a strong root system. Withstands extreme drought.

4621—Lb., 20c, postpaid. Not prepaid: Peck, 40c. See current price list for larger quantities.

SALZER'S SILVERMINE

This variety is reputed for its heavy yields, and is a fine, attractive white oat, growing robust and vigorous and lodges seldom. The heads are borne low on strong, stiff straw which is unusually bright and clean.

The kernels are white, plump, heavy and thin hulled. Endures extremes of dry, wet, hot and cold weather. Immune to a marked degree against the ravages of insects.

4615—Lb., 20c, postpaid. Not prepaid: Peck, 35c. See current price list for larger quantities.

SALZER'S BIG FOUR

Big Four Oats has wonderfully stiff straw, withstanding severe winds to a marked degree. This Oat, more than most other varieties, withstands bugs, insects, etc., and stands up, growing vigorously, when many other varieties succumb to their ravages. It ripens early—a most desirable feature.

The kernels are a beautiful white, plump and long. Thin hull and very meaty. The straw is bright, clean, erect and highly valuable as forage for stock.

4606—Lb., 20c, postpaid. Not prepaid: Peck, 40c. See current price list for larger quantities.

SALZER'S WHITE KHERSON (IOWA 103)

A grand oat which has twice carried off sweepstakes at the International Dry Farming Congress. Extremely early; splendid nurse crop; permits early harvesting and late sowing of other crops. Kernels are slender, plump, white, and thin-hulled. Heavy yielder.

4622—Lb., 20c, postpaid. Not prepaid: Peck, 40c. See current price list for larger quantities.

Sow 60 to 80
lbs. per acre

Spring Speltz, or Emmer Order Early

Speltz, also known as Emmer, is adapted to a wide range of soil and climate, it resists extremes of weather, it is of excellent feeding value and it yields much more heavily than Oats or Barley. Speltz is comparatively new in this country, but each season emphasizes its value and sees the production increasing. It is a Russian cereal closely resembling Barley, altho it is a species of Wheat. It is a hardier plant than wheat and will give better results on poor soil and in a cold, dry climate, than any other cereal. The straw is shorter and stands up better, it is more drought, rust and smut resistant than wheat, and it is not as easily damaged by rain in wet districts during harvest time.

Let Salzer's Speltz help you cut down your feed bills by giving you heavy yields of the most nutritious feed. It will grow any place on earth where grain can be raised and it grows where wheat, oats and barley would be a failure; it is the most profitable hay and grain food on earth; it ripens early and neither rusts, blights, nor lodges; it is relished by all classes of stock; it is splendid for hay and fattens in the green state; it is a sure crop, hardy and prolific; it outyields wheat or barley and is a better feed; it is good for pasture and is a heavy stooler; after harvesting a heavy crop of grain you have the straw, which makes good winter roughage; if you are caught in a pinch without hay, speltz makes good; it is rich in protein, and all live stock, cattle, hogs, poultry, etc., relish and thrive on it.

Salzer's Speltz or Emmer is the best investment you can make, Mr. Farmer, and once planted on your farm, you will never be without it. Sow on ground prepared as you would for barley, wheat, or oats, either broadcast or drill, at the rate of 60 to 80 lbs. Frost will not damage early planting. Cut the grain when it is a little past the milk stage, when it will make a splendid grain and lots of straw.

4697—Lb., 20c, postpaid. Not prepaid: 5 lbs., 50c; 10 lbs., 90c. See current price list for larger quantities.

56 lbs. in
1 bu.

SPRING RYE SALZER'S PROLIFIC

Rye produces a crop that can be relied upon regardless of drouth, wet, cool, or excessive heat conditions and many weed-infested farms have been cleared by growing this grain. As a fertilizer it is a wonder; it can be grown on thinner land than other cereals; as a feed for growing pigs, you cannot beat rye. If you have any thin clay points on your farm, there is the place to plant rye. Don't let any land go to waste. Sow it at the same time as Spring Wheat, using about 1½ bu. per acre. Often sown later on as a catch crop, where winter grain has been killed out.

4672—Lb., 25c, postpaid. Not prepaid: Peck, 85c. See current price list for larger quantities.

SUNFLOWER

For the Silo

Produces an enormous tonnage of from 20 to 30 tons per acre. Fed to dairy cattle, it is found to be satisfactory in every way. The cows relish it and produce practically as much milk as when fed on the other ensilage. Especially valuable in those sections having dry seasons, and in the high altitudes of the Northwest and Western Canada. The seed is valuable as a poultry and hog feed. Sow any time before the middle of July, in rows far enough apart to permit cultivation. Use 5 lbs. per acre. Cultivate and harvest the same as corn.

4704—Lb., 30c, postpaid. Not prepaid: 5 lbs., 95c; 10 lbs., \$1.65. See current price list for larger quantities.

SOW SALZER'S SEEDS

I have had good success with your Dwarf Evergreen Broom Corn, Salzer's Earliest Sweet Amber and your Shrock Kafir-Sorghum. Am enclosing a picture of my hog pasture from your No. 4549 Laugh and Grow Fat Mixture. It grew so fast that I had to mow it and cure it for feed, but it did not take long and it was as nice as before cutting.

John A. Haberman, R. D. 2, Olmitz, Kansas.

Canes

SALZER'S EARLIEST KAFIR

The canes are wonderfully productive and of great value as a forage, ensilage, or grain crop in dry sections.

Grows five to seven feet high, making a straight upward growth; it has a strong stem with wide leaves. The stalks contain considerable sweet sap and remain green until the heads are fully matured; for this reason Kafir Corn is preferred as a forage crop. It does well as far north as South Dakota. Matures in about 130 days. Sow 60 lbs. per acre broadcast, 10 lbs. in drills.

4345—Lb., 25c, postpaid. Not prepaid: 5 lbs., 50c; 10 lbs., 80c. See current price list for larger quantities.

FETERITA

It has proven one of the best forage crops, for dry lands, known today. It produces a stalk of medium height and size, bearing ten to twelve leaves of medium size and a large head, well filled with pure white or bluish white seeds. The grain is fully as soft and much whiter than Kafir Corn. Feterita is an excellent drought resister. In some instances it made excellent crops without receiving any rain from the day it was planted, until harvested. It stands erect, branches out from the root and matures about twenty-five days earlier than Kafir Corn. Sow 60 lbs. per acre broadcast, 10 lbs., per acre in drills.

4340—Lb., 25c, postpaid. Not prepaid: 5 lbs., 55c; 10 lbs., 85c. See current price list for larger quantities.

SHROCK KAFIR-SORGHUM

It is of dwarf growing habit, very stalky and a great stooler. Highly nutritious as a silage. Grows from 3½ to 5 feet high. Very easy to handle in harvesting. One seed often produces 4 or 5 shoots. It never lodges or droops its heads. Sow 10 lbs. per acre.

4338—Lb., 30c, postpaid. Not prepaid: 5 lbs., 85c; 10 lbs., \$1.40. See current price list for larger quantities.

BROOM CORN

Broom Corn for making brooms can be grown where corn grows; requires the same cultivation, but should be planted later. Plant in drills 3 to 3½ feet apart, the plants 2 to 3 inches apart in the rows according to height. Ten lbs. of seed are sown per acre. "Broom Corn and Brooms"—A good book for \$1.40 postpaid. Describes fully how to make brooms.

STANDARD EVERGREEN. Produces fine heads 20 to 25 inches long, of even size and growth and free from crooked ones. Broom makers claim it as one of the finest they ever saw. Grows about 10 to 12 feet high. Will not get red, but is strictly a green variety. Used for medium and large sized brooms.

4324—Lb., 25c, postpaid. Not prepaid: 5 lbs., 75c; 10 lbs., \$1.25. See current price list for larger quantities.

DWARF EVERGREEN. A most valuable variety, very early. Average height, 5 feet; brush 18 to 20 inches long and well fibred, used for whisk brooms, the highest priced brush.

4322—Lb., 25c, postpaid. Not prepaid: 5 lbs., 85c; 10 lbs., \$1.35. See current price list for larger quantities.

We are very much pleased with your seeds.—Mrs. John Becht, R. D. 1, Basking Ridge, N. J.

Sow 75 lbs. per acre broadcast, 10 lbs. in drills.

Sorghum Cane

If any seeds quoted "Not Prepaid" are wanted by mail, please add postage as per page 6.

SALZER'S EARLIEST SWEET AMBER OR SORGHUM

For soiling or green feeding it is one of the best that can be used to feed growing animals and also dairy cattle on account of the large flow of excellent milk which it will produce. Salzer's earliest Sweet Amber or Sorghum makes a good summer pasture for sheep and hogs. The hay is very palatable and nutritious and is relished by all kinds of stock. Cut when heading out, leave for two or three days on the ground and then put up in shocks of about one load each. Unexcelled as a catch crop. The Silage made of Salzer's Earliest Sweet Amber or Sorghum is wholesome and nutritious. Cow Peas and Soy Beans are quite often mixed with cane for the silo. This will greatly increase the feeding value. The seed has about the same nutritive value as corn. Requires 70 to 80 days to mature. 4341—Lb., 20c, postpaid. Not prepaid: 5 lbs., 45c; 10 lbs., 70c. See current price list for larger quantities.

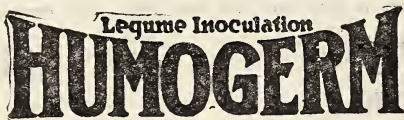

WISCONSIN GROWN EARLY AMBER

In Wisconsin, Northern Iowa, Minnesota, the Dakotas and other Northwestern States, Cane to ripen must be Northern Grown. Aside from this the making of molasses for sale and home use has reached immense proportions and it has been shown that Northern Grown Amber Seed produces the best molasses cane. 4343—Lb., 30c, postpaid. Not prepaid: 5 lbs., \$1.00; 10 lbs., \$1.75. See current price list for larger quantities.

SUMAC SORGHUM CANE

This variety is the most extensively grown type in the southern half of the United States. It is almost as sweet, leafy and a larger yielder than Salzer's Earliest Sweet Amber or Sorghum. 4339—Lb., 20c, postpaid. Not prepaid: 5 lbs., 45c; 10 lbs., 70c. See current price list for larger quantities.

INOCULATING

MORE DOLLARS PER ACRE AND THE ACRES WORTH MORE DOLLARS
ECONOMICAL AND EASY TO USE

Inoculate your legumes, such as Peas, Beans, Clovers, Alfalfa, Vetch, Alsike, Soy Beans, etc., with this inexpensive, highly-bred, nitrogen gathering bacteria. All agriculturists advise inoculation, even where legumes are at present grown without being inoculated. Humogerm inoculated roots will deposit 150 to 200 lbs. of nitrogen to the acre—equivalent to 1/2 ton nitrate of soda. In this way you secure fertility for succeeding crops for almost nothing. Humogerm Bacteria builds root nodules, fills them with nitrogen, and after the crop is harvested, they rot and greatly enrich the soil for future crops. For a few cents, you put the wonderful powers of Nature at work enriching your soil, and she enriches it to a marvelous degree. Inoculation is simple and there are full directions on each package. Order by number according to the crop and number of bushels you wish to inoculate. Note our very low prices.

30 to 40 lbs. sow one acre when used with grain

Sand Vetch (Hairy Vetch)

INOCULATE THIS SEED WITH HUMOGERM

Also known as Winter Vetch. For soil improvement, there is hardly any crop that fits in so well under all conditions as Vetch. It is a heavy carrier of root tubercles and these increase in cold weather more than on any other legume. It will do well on poor lands where clover would fail. It needs a good seed bed with plenty of moisture to begin with, but when once established it will stand almost any degree of heat, cold, or drought. Salzer's Vetch will furnish an early spring forage crop in almost every section of the United States, supplying a very succulent forage from early spring until late fall, and will remain green under snow all winter and give your stock the first green forage in early spring. Is a heavy yielder and our Sand Vetch will do well on sandy soils. Plant at least an acre to Vetch this year, and you will not regret it. Order early, as it is short this year. Sow Sand Vetch in Spring or Fall at the rate of 40 pounds Sand Vetches with about 1/2 bushel of Barley or Oats in Spring and Winter Rye in Fall. To sow Vetch with a nurse crop has always given the best results. If wanted alone, sow Vetch at the rate of 40 to 60 pounds per acre broadcast, or less amount in drills 30 inches apart. 4727—Lb., 30c, postpaid. Not prepaid: 5 lbs., \$1.00; 10 lbs., \$1.75. See current price list for larger quantities.

SPRING VETCHES OR TARES

Like Alfalfa, the Superiority of Vetches for feeding lies in the great amount of protein it contains. As in Alfalfa, its huge soil restoring capacity is one of its greatest values. It is not only highly relished as a fodder and grain crop, but it increases the milk supply of milk cows and produces flesh very rapidly in stock. Rapidity in growth and extreme hardiness render it peculiarly suitable to sections with short seasons. Its immense productiveness makes it one of the most economical crops to grow. Spring Vetch is an annual. It should be sown early in spring, at the rate of 60 to 80 lbs. per acre. If sown in connection with oats, use 50 lbs. Spring Vetches to 32 lbs. oats per acre. 4730—Lb., 20c, postpaid. Not prepaid: 5 lbs., 70c; 10 lbs., \$1.25. See current price list for larger quantities.

Your wheat, oats, potatoes and buckwheat are all growing fine.—Ole H. Erickson, R. D. 1, Hixton, Wis.

Sow 60 to 70 pounds per acre broadcast, 4 to 6 pounds in rows with corn, 2 to 3 pecks in drills alone

Soy Beans

INOCULATE THIS SEED WITH HUMOGERM

Soy Beans are rapidly becoming regarded as one of the most profitable crops that can be grown, especially in the Corn Belt. Generally speaking, they require about the same temperature as corn. Being legumes, they are wonderful soil improvers; they may be used either as a hay crop, pasture crop, soiling crop, or for the grain. Under favorable conditions Soy Beans will produce 12 tons per acre of fresh fodder, rich in protein and fat, which makes an excellent forage to mix in with fodder corn. Will frequently produce 25 to 40 bushels per acre, of the richest possible foodstuff where grown for seed, and it is claimed that butter is more finely flavored when the cows are fed the ground seed. Very drought resistant and produces an abundance of nutritious feed when pastures are brown and dry.

Soy Beans make a good growth on poor soils, especially if inoculated; succeed on acid soil where clover and alfalfa will not do; will grow as far north and south as corn and cotton; they are a splendid rotation crop, either short or whole season; they are equal pound for pound to oil meal in feeding value; they build up the soil and are a splendid green manure crop; they may be cut for hay any time after the pods begin to form. Many of our customers grow Soy Beans with their corn, planting them at the same time, as they do not interfere with the cultivation of the corn. This gives them two crops at harvest time or they let the sheep or hogs in to feed on the beans. Sheep or hogs will leave the corn practically undisturbed until the beans are gone. A crop of Soy Beans grown on your land will prove one of the best investments you ever made.

ITO SAN

This is the standard, best known, and most widely grown. Early maturing (in about 100 days), grows 2½ to 3 feet high. The bean is yellow, it is immensely productive and fine to sow with corn for hogging or forage. Makes fine hay. Especially adapted to a northern latitude.

4304—Lb., 25c, postpaid. Not prepaid: 5 lbs., 65c; 10 lbs., \$1.10. See current price list for larger quantities.

EARLY BROWN (Ohio 9035)

A Brown bean improved by the Ohio Experimental Station. It is probably the most important of the medium sorts. The plant is tall and leafy, fine for hay. Noted as a seed producer and does not easily shatter. Later, but larger than Ito San.

4301—Lb., 25c, postpaid. Not prepaid: 5 lbs., 65c; 10 lbs., \$1.10. See current price list for larger quantities.

MEDIUM YELLOW

Popular throughout the Central States. Is quite early and produces a heavy crop of beans, which makes it desirable.

4302—Lb., 25c, postpaid. Not prepaid: 5 lbs., 60c; 10 lbs., \$1.00. See current price list for larger quantities.

MANCHU

Seeds are yellow with a peculiar black seed scar. It is a medium variety, originally from Northern Manchuria, and larger and later than Ito San. The Wisconsin Experimental Station recommends this variety for hay and silage, and as being one of the best to plant with corn for silage. It is very popular.

4309—Lb., 25c, postpaid. Not prepaid: 5 lbs., 60c; 10 lbs., \$1.00. See current price list for larger quantities.

BLACK EYEBROW

Seeds are black with brown saddle and black seed scar. It is also from Manchuria and about like Manchu in growth and date of maturing. Specially adapted to northern conditions for both grain and hay. One of the best for planting with corn.

4310—Lb., 25c, postpaid. Not prepaid: 5 lbs., 65c; 10 lbs., \$1.10. See current price list for larger quantities.

SALZER'S EARLY BLACK

This variety is very much grown in Wisconsin, particularly in the northern sections, for forage and ensilage. The seed itself is jet black. Dwarf growing habit, hence not so much planted with corn.

4303—Lb., 25c, postpaid. Not prepaid: 5 lbs., 80c; 10 lbs., \$1.25. See current price list for larger quantities.

MAMMOTH YELLOW

Popular in the Central States for forage and ensilage purposes. A later maturing variety than medium yellow. Popular in Illinois and Wisconsin for the heavy tonnage for ensilage purposes that can be grown per acre. One of the heaviest producers of fodder.

4305—Lb., 25c, postpaid. Not prepaid: 5 lbs., 80c; 10 lbs., \$1.25. See current price list for larger quantities.

SOY BEAN MIXTURE

Produces a scientifically mixed blend of Soy Beans that for genuine merit will please the most exacting.

4308—Lb., 25c, postpaid. Not prepaid: 5 lbs., 55c; 10 lbs., 95c. See current price list for larger quantities.

60 lbs. in 1 bu.

Field and Cow Peas

INOCULATE THIS SEED WITH HUMOGERM

YELLOW CANADA FIELD

A variety of field peas grown throughout the north and northwest, also in Canada, a strain so hardy that they do well on any soil suitable for oats or spring wheat. Plowed under as a fertilizer, they rank next to Red Clover. They can be grown alone for fodder purposes and green manure but for a dairy feed it is more profitable to mix them with oats, rye or barley, and to cut for hay when the oats are heading out. Hay is of the finest quality, and cattle, horses, and sheep thrive on it. Can be sown with oats at the rate of 2½ bushels of peas and two bushels of oats for a double crop, threshing at one time and separating with a cleaner.

4655—Lb., 25c, postpaid. Not prepaid: Peck, \$1.35. See current price list for larger quantities.

SALZER'S PROLIFIC COW PEAS

Rank with clovers as one of the best soil builders. Splendid for pasture, soiling and silage—all stock eat it and thrive on it, as Cow Peas have a very high feeding value. Like soy beans, they may be planted with corn, turning in pigs and lambs to eat the peas and then harvest the corn in the usual way. Although grown extensively in the South, they will grow fine in the corn belt and also farther North. Sow from 1½ to 2 bu. per acre. Cow Peas should not be planted until the ground has become warm.

4644—Lb., 20c, postpaid. Not prepaid: Peck, \$1.50. See current price list for larger quantities.

OTHER VARIETIES OF COW PEAS

4643—New Era. 4642—Clay. 4641—Black. 4546—Whip-poor-will. Prices of New Era, Clay, Black, Whip-poor-will, each variety, not prepaid: Peck, \$1.40. See current price list for larger quantities. When stock of any sort are exhausted, we will fill with next best variety.

SALZER'S COW PEA MIXTURE

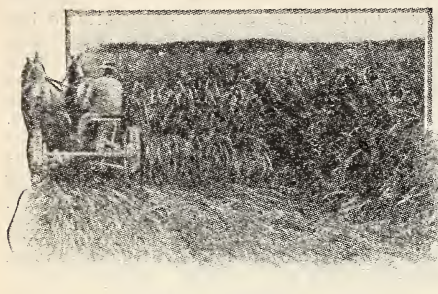

For pasturage, soiling, silage, hay or grain crop many of our most successful dairymen, stockmen and farmers prefer this mixture. Contains the strongest and hardest types that will ripen and give big yields.

4647—Not prepaid: Peck, \$1.35. See current price list for larger quantities.

I have found your seeds very dependable.—Mrs. N. W. Weight, Wales, N. D.

SALZER'S BILLION DOLLAR GRASS

(Panicum Crusgalli)

Salzer's Billion Dollar Grass

For hay, cut when in bloom—rather sooner than later, as it makes better hay without the seed heads than with them. The hay is then healthier and of finer quality; in curing, treat as you would a rich field of clover.

For feeding green—like all rich, luxuriant growing grasses and forage plants, Billion Dollar Grass should be fed in the green state moderately at first. Therefore, you should turn in your cattle and horses at first only after they have fed somewhere else, and thereby gradually accustom them to this.

Prof. Williams, of the United States Department of Agriculture, says: "Already widely grown as a hay crop, it deserves more general use for soiling, as this Grass is of particular value for feeding to dairy cattle, young stock and sheep. Panicum Crusgalli (Billion Dollar Grass) in many sections of the country can be made a supplement for pasture in such a way as to allow a material increase in the number of stock that can be kept on the farm. On account of the large yield and good quality of forage, it is most excellent for silo use, as frequently a good crop can be raised under conditions which would not admit the growing of corn for ensilage. Compared with seed and forage, it will run ahead of timothy. The seed contains much fat, extract matter and protein."

Horses, mules, cows, calves, heifers, sheep, hogs, poultry, geese, turkeys, etc., all relish, thrive and fatten on Billion Dollar Grass. It is undeniably one of the greatest and most economical farm crops in the world for all classes of farm animals. (See illustration above.)

4462—Radium: Lb., 25c, postpaid. Not prepaid: 5 lbs., 75c; 10 lbs., \$1.35. See current price list for larger quantities.

4461—Superior: Lb., 20c, postpaid. Not prepaid: 5 lbs., 65c; 10 lbs., \$1.20. See current price list for larger quantities.

SOW SALZER'S SEEDS

Your Laugh and Grow Fat Hog Pasture Mixture is certainly good as a hay crop. I am thankful for having had your seed and gotten such a crop.
The Billion Dollar Grass Seed that I purchased from you was a life-saver for my stock last winter.
for it.

Mrs. Minnie Joerndt, Breed, Wis.
The cows and horses were crazy
Fred Holford, Hamel, Minn.

Sow about 25 lbs. per acre

Millet

Millet shipped in Cotton Bags only

SALZER'S EARLIEST RUSSIAN

It is two weeks earlier than German Millet, immensely prolific, has great stooling habits, is very leafy and bushy and full of rich green blades; one kernel has been known to produce upwards of fifty fine, strong stalks, just the size that are in great demand and eagerly eaten by cattle. It is not an uncommon thing to cut three to four tons of hay per acre.

This millet stands the hot dry winds of the Dakotas, the burning prairies of Kansas better than other varieties and flourishes on the heated soils of Western Nebraska and Colorado.

4570—Radium: Lb., 20c, postpaid. Not prepaid: 5 lbs., 45c; 10 lbs., 80c. See current price list for larger quantities.

COMMON

Grows usually from 2½ to 3 feet high and makes excellent hay. It is a very early variety with tender stems and leaves. Does especially well on dry and light soils. Its luxuriant growth and quick maturing propensities make it one of the best millets for covering shortages in the hay crop and for smothering weeds.

4566—Radium: Lb., 20c, postpaid. Not prepaid: 5 lbs., 45c; 10 lbs., 80c. See current price list for larger quantities.

4565—Superior: Lb., 15c, postpaid. Not prepaid: 5 lbs., 40c; 10 lbs., 70c. See current price list for larger quantities.

EARLY FORTUNE

An extra early variety. It is claimed to be rust-proof and that chinch bugs will not eat the plant. The seed is of a beautiful red color and is two or three times the size of German Millet. Not a good variety for hay. This variety heads in from 25 to 35 days. It gives a large yield of seed, which can be fed to cattle, poultry and hogs without injury.

4574—Radium: Lb., 20c, postpaid. Not prepaid: 5 lbs., 50c; 10 lbs., 90c. See current price list for larger quantities.

JAPANESE

It grows from 4 to 6 feet high, stands up remarkably and yields large crops. When cured it makes good hay and in quality is superior to corn fodder. It is relished by all kinds of stock.

4583—Choice: Lb., 20c, postpaid. Not prepaid: 5 lbs., 40c; 10 lbs., 70c. See current price list for larger quantities.

GERMAN

Introduced into this country in the early seventies, it is still the most popular of all the millets. Seed heads are usually about an inch thick, 6 to 8 inches long, and packed full of seed, making this variety very productive. Is a little later in season, than common.

The German Millet grows very rank, generally three to four feet high, and is one of the best varieties for hay, being sweet, palatable and milk producing. The hay may seem coarse, yet it is very tender if cut at the right time, which is when in full bloom, and cows, horses and other farm stock are all exceedingly fond of it. Stocks short. Order early.

4578—Radium: Lb., 20c, postpaid. Not prepaid: 5 lbs., 40c; 10 lbs., 70c. See current price list for larger quantities.

4577—Superior: Lb., 15c, postpaid. Not prepaid: 5 lbs., 35c; 10 lbs., 65c. See current price list for larger quantities.

EARLY WHITE WONDER

It is extremely early and produces with a riotous abundance. The heads of this grand millet will measure from 3 to 18 inches, and a single head will have as many as 15,000 seeds. Furthermore, it is just as hardy and vigorous as other millets. It has been raised in western Kansas for several years, with great success, and also in the north.

The foliage is very heavy and the leaves broad, resembling those of corn. It produces an immense amount of excellent fodder which cures very readily. We recommend Early White Wonder for earliness, vigorous growth, and heavy yield of both grain and fodder. Stocks short. Order early.

4593—Radium: Lb., 25c, postpaid. Not prepaid: 5 lbs., 50c; 10 lbs., 85c. See current price list for larger quantities.

4594—Superior: Lb., 20c, postpaid. Not prepaid: 5 lbs., 45c; 10 lbs., 80c. See current price list for larger quantities.

BROOM CORN OR HOG

This Millet does not grow very tall and is, therefore, not much used for hay, but it yields enormous quantities of seed which makes good feed for swine and other stock. It also makes fine feed for poultry and young chicks. It will mature in about two months from sowing. It is yellowish white. The heads resemble Broom Corn when growing, hence the name.

4562—Radium: Lb., 20c, postpaid. Not prepaid: 5 lbs., 35c; 10 lbs., 60c. See current price list for larger quantities.

Have always sown your best grade of Alfalfa Seed and find it has paid me well.—Wm. H. Schlicht, R. D. 3, Manchester, Mich.

SALZER'S

Sudan Grass

Haven't you a few acres on your farm upon which you would like some hay that can be raised quickly and easily and that will give you 4 to 8 tons of cured hay per acre? Plant Salzer's Sudan Grass Seed! The drier and hotter the weather, the more will you be surprised at the wonderful yield. Salzer's Sudan Grass is one of the most prolific hay crops ever grown; in the South it gives three crops and in the North, two crops of hay a season. A surprisingly rapid grower, and as a catch crop fully equal to Millet. Sudan grass is used for pasture, ensilage and soiling as well as for hay. It does best on a rich loam soil, but it has been grown successfully on almost every class of soil from a heavy clay to a light sand. It is a sweet, heavy-yielding grass; absolutely drought proof; stock of all kinds eat it greedily, often in preference to Alfalfa; it analyzes over 9 per cent protein. In purchasing Sudan Grass, insist upon Salzer's—Salzer's is free from Johnson Grass, which is hardly distinguishable from Sudan Seed. The original seed was introduced from Khartum, Central Africa, about twelve years ago, and its wide use today is almost phenomenal, indicating the extreme satisfaction it has been giving everywhere.

AS A HAY CROP it ranks exceptionally high, chemical analysis showing it of the same value as Timothy or Johnson Grass. It equals Millets and yields more. Easy to cut with mower and cures readily. Cut just after full bloom. Cut again when high enough. For soiling and silage it is splendid. Mixed with soy beans or cow peas, it makes exceptionally good silage.

Mr. Frank Strub, R. D. 3, Lansing, Iowa, writes, "I planted three acres with your Sudan Grass on June 29th and on August 22nd we had the first rain. I cut it September 8th, it averaging six feet. Yielded 3 tons per acre. Had clay soil from which 3 crops had been previously raised."

CULTURE: Should not be planted until the soil has become warm in spring. It can be sown at any time in summer 70 to 75 days ahead of frost. Sown in rows from 14 to 18 inches apart, it takes 5 pounds per acre; on good soil where there is plenty of moisture it is also sown broadcast or drilled in, and then 15 (some say 20) pounds of seed are required per acre. (See illustration.)

4530—Lb., 25c, postpaid. Not prepaid: 5 lbs., 85c; 10 lbs., \$1.50. See current price list for larger quantities.

SALZER'S TEOSINTE

A heavy yielding and luxuriant fodder plant containing a considerable amount of sugar. Especially adapted for the South. Georgia reports 38,000 lbs. of green forage per acre. Mississippi 44,000 lbs. The heavy rain falls in the northern tier of states have given it quite an impetus in these states where extremely large crops have been the rule. Quite often a single kernel will produce upwards of 50 stalks. If cut when it reaches 4 to 5 feet in height it makes excellent fodder and will produce a second crop fully as large as the first. If left to grow until September or October, it furnishes excellent material for the silo in much greater amounts than most any other forage crop. Sow in hills 4 to 5 feet apart each way about corn planting time.

4714—Oz., 15c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 85c; 2 lbs. (sufficient for one acre), \$1.65, postpaid. Not prepaid: 5 lbs., \$3.50; 10 lbs., \$6.60. See current price list for larger quantities.

BERMUDA GRASS OR SOUTHERN BLUE GRASS (*Cynodon dactylon*)

This is a perennial grass of creeping habit, very valuable for the southern states, as it withstands drought better than most varieties. It has long, creeping stems which root at the joints and cover the ground with strong matting of fine turf. This has caused it to be sown largely for the purpose of binding drifting sand and for steep embankments subject to wash. It is a splendid pasture grass, furnishing excellent summer pasture when most other grasses are burned out, and the grazing and tramping of stock does not impair it. It is of no value for the northern states north of Virginia. Sow in spring at the rate of 3 to 5 pounds per acre.

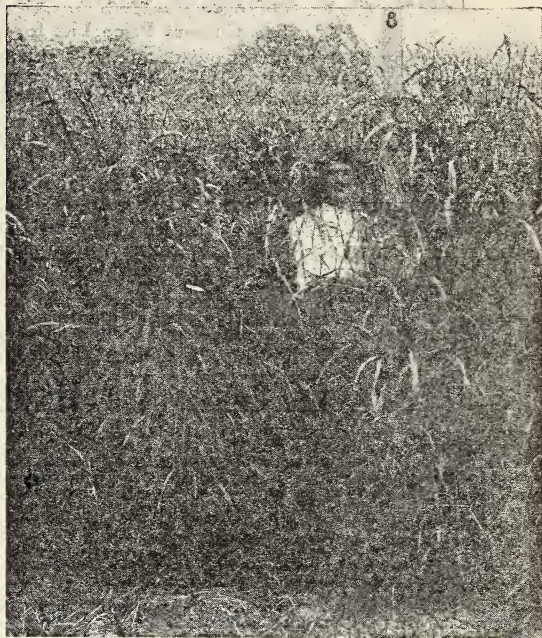

4501—Lb., 70c, postpaid. Not prepaid: 5 lbs., \$3.25; 10 lbs., \$6.00. See current price list for larger quantities.

SALZER'S RENOVATOR GRASS MIXTURE

In Salzer's Renovator or Quick Results Grass Mixture we have something that, we believe, for results and permanency has no superior. It is composed, among others, of such ingredients as Crimson Clover, Italian Rye Grass, Tall Meadow Oat, Kentucky Blue, Orchard Grass, Meadow Fescue, English Rye, Timothy, Brome Grass, Red Top, Dogstail, Alsike, White, Red and other Clovers and Grasses. It is a mixture that has proven itself immensely popular, and we believe that whoever uses it for Meadow or Pasture, either for renovating his pasture or sowing alone, will get big results. For the laying down of a new Pasture or Meadow, sow 20 lbs. per acre. For renovating pastures, sow at the rate of 10 lbs. per acre.

4546—Lb., 40c, postpaid. Not prepaid: 5 lbs., \$1.65; 10 lbs., \$3.00. See current price list for larger quantities.

Was well satisfied with your Sudan Grass Seed which I bought last year.—C. V. Kraetsch, R. D. 1, Box 119, West Bend, Wis.

Salzer's Sudan Grass

SALZER'S PENCILARIA

It should be planted six inches apart in the row and the rows about three and one-half feet apart. Cultivate two or three times if possible, and by that time you will be pleased at its luxuriance. It will average thirty rich, juicy, leafy stalks to the plant, which will be covered with seed heads ten to fifteen inches long. Sow same as early as you would Corn. The usual way of growing it, however, is to mow same when three to six feet high, and it will immediately start again, and can be cut a number of times during the season. Every farmer who keeps cows, horses and hogs should try it if they wish to grow an immense crop of fodder cheaply on a small piece of ground. Sow in drills about five to six lbs., or broadcast, eight lbs. per acre.

4661—Lb., 25c, postpaid. Not prepaid: 5 lbs., 95c; 10 lbs., \$1.75. See current price list for larger quantities.

Salzer's Laugh and Grow Fat Hog Pasture Mixture

See Current Price List for Larger Quantities of Seed Than Quoted

Introduced by us over fifteen years ago, this splendid mixture sprang into instant popularity and it is just as much in demand today as it ever was. Of course there's a reason. Careful and particular buyers, accustomed to quality, insist upon Salzer's Seeds, and nowhere is Salzer Quality better evidenced than in this fine Pasture Mixture.

One of the most vexing questions with every farmer during the summer months is a rapid meat producing hog pasture. In our Laugh and Grow Fat Hog Pasture we have a mixture so balanced to increase flesh that farmers cannot afford to be without it. In other words, if you do not sow this mixture you lose many times more than the purchase price. The hog by nature being a grazing animal must have plenty of pasture, and are stronger and healthier than if fed on grain alone. Notice the testimonials on Pages 117 and 120.

The "Laugh and Grow Fat Mixture" contains generally among others the following: Billion Dollar Grass, Turnips, Amber Cane, Cow Peas, Velvet Bean, Soy Beans, Speltz, Field Peas, Rape, Vetches, Oats, Rye, Millet, Timothy, Giant Incarnat Clover, Rye Grass, etc. It is well in ordering this Mixture to tell us whether you want it for early or late planting and the condition of your soil. (Sow 30 to 50 lbs. per acre.) This mixture consists of annual fodder plants, many of which grow again as fast as fed down; it gives per acre 3 or 5 times as much as any other pasturage. Owing to the great variety of plants it is composed of, it is more greedily eaten than other forage, not only by hogs, but also by all other live stock, such as sheep, cows and horses.

4549—Lb., 20c, postpaid. Not prepaid: 5 lbs., 40c; 10 lbs., 65c. See also current price list.

SALZER'S PERMANENT MEADOW AND PASTURE MIXTURES

To meet the demands for permanent meadows and pastures that will furnish the greatest amount of forage, and at the same time a crop that will make a continuous growth throughout the season, and to meet the various conditions of climate, soil, etc., we are prepared to blend mixtures that will suit your very own land. Some seeds do better on moist land, others on dry land, some at a high, and others at a low altitude. We make up special mixtures to fit your need, and if one for a pasture or a meadow is required, write us and let us quote you prices. When writing us, state the kind of soil, whether heavy, medium, light, rich, moist, peaty, marshy, whether overflowed part of year, whether woodland, sandy, etc. Nothing but pure fresh seeds go into these mixtures. You will need about 25 pounds seed per acre. See current price list for prices.

ITALIAN RYE GRASS

Is extensively used for seeding in pastures where clover and timothy have died out.

The amazing manner in which it thrives under the close cropping of all kinds of stock is remarkable. The Italian Rye Grass is a strong grower, arrives at maturity sooner, has a greater abundance of foliage, which is broader and of a more lively green color, grows considerably taller, is more upright; its spikes are longer and upon the whole, produces more than the English Rye Grass. It should be cut for hay when heading out.

4474—Radium. Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.35; 10 lbs., \$2.35. See also current price list.

ENGLISH OR PERENNIAL RYE GRASS

One of the best grasses for permanent pastures. It produces nutritious grazing and compact sod. Sow about 25 pounds per acre.

It is found to flourish on all kinds of soil, even growing with thrift on upland situations. On rich and moist soil to which it is best suited, it gives remarkably heavy crops. It grows with rapidity, reaching a stage of perfection and producing in its first year a growth of herbage in great abundance.

4470—Radium. Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.35; 10 lbs., \$2.55. See also current price list.

SALZER'S ORCHARD GRASS (*Dactylis Glomerata*)

An exceptionally valuable grass for pasture or hay land, and on account of its earliness very valuable for a permanent pasture. It furnishes green grass very early in spring and until late in the fall. When closely cropped it grows up quickly and is ready for grazing again in a short time. When grown for hay, more than one crop can be obtained in one season, and when only one crop is cut the aftergrowth is very heavy and gives splendid and rich pasture till late in the fall.

4489—Radium. Lb., 40c, postpaid. Not prepaid: 5 lbs., \$1.75; 10 lbs., \$3.00. See also current price list.

4488—Superior. Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.55; 10 lbs., \$2.80. See also current price list.

(*Festuca pratensis*) MEADOW FESCUE (English Blue or Randall Grass)

It is well suited to a wide range of soils, does well on loamy clay and gravelly soils, and thrives on heavy black loam, strong and low lying soils; in wet places in a pasture, where Timothy, Red Clover and Kentucky Blue Grass fail, Meadow Fescue will keep these places productive. It is not adapted to light, sandy soils.

It lives longer than most other kinds of grasses, and although it produces the first year a good crop of hay or pasture, it does not reach the highest stage of growth until second and third year, and for this reason it is exceptionally well adapted for permanent pastures and meadows. On soils which are too shallow and where the presence of hard-pan prohibits the successful culture of Alfalfa, this grass should be sown in place. Matures at the same time as Timothy and Red Top and Alsike Clover and for meadows these varieties are often grown together. Grows 2½ to 3 feet high, roots out well, but never grows in tufts. It blooms in June and July. Sow 20 to 25 pounds per acre.

4484—Radium Brand: Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.20; 10 lbs., \$2.25. See also current price list.

SHEEP'S FESCUE (*Festuca ovina*)—It has a tufted habit of growth; is short, with upright leaves. It is particularly relished by sheep, hence the name. It prefers light, sandy soil and dry uplands; is not affected by drought.

4516—Lb., 65c, postpaid. Not prepaid: 5 lbs., \$2.95; 10 lbs., \$5.70. See also current price list.

TALL MEADOW OAT GRASS (FRENCH RYE GRASS)—Can be cut several times and does well if sown alone. Makes good hay, is natural to sandy loams, but thrives best on strong clays. It is a very hardy grass and endures much heat and cold. Possesses the advantages of early, quick and late growth and is fine for pasture.

4520—Radium: Lb., 45c, postpaid. Not prepaid: 5 lbs., \$1.90; 10 lbs., \$3.65. See also current price list.

JOHNSON GRASS (*Holcus Halepensis*)—Does magnificently in the North. Produces about 5 tons of grass per acre, and this all inside of six months. In the South, it is hard to keep it in bounds, and to eradicate it when once established, but it nevertheless makes good hay and can be relied upon to produce a good crop during the hottest and driest seasons. Frost kills it in the North during winter.

4506—Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.50; 10 lbs., \$2.75. See also current price list.

RED FESCUE (*Festuca rubra*)—Splendid for dry, sandy soil and suitable for lawns. Withstands more shade than most grasses, hence valuable for shady lawns.

4512—Lb., 55c, postpaid. Not prepaid: 5 lbs., \$2.25; 10 lbs., \$4.20. See also current price list.

CRESTED DOGSTALL (*Cynosurus cristatus*)—Very valuable for dry lands and sheep pastures; also splendid for lawn.

4503—Lb., 65c, postpaid. Not prepaid: 5 lbs., \$2.90; 10 lbs., \$5.60. See also current price list.

ROUGH-STALKED MEADOW (*Poa trivialis*)—Valuable for pastures and meadows, particularly on damp soil and sheltered situations, producing a constant supply of nutritious herbage, greatly liked by cattle.

4514—Lb., \$1.00, postpaid. Not prepaid: 5 lbs., \$4.65; 10 lbs., \$8.95. See also current price list.

Your seeds have been very satisfactory.—S. S. Clark, 922 N. D. Street, Fremont, Nebr.

SALZER'S NORTHERN GROWN TIMOTHY

See current price list for larger quantities of seed than quoted.

Timothy is the king of all grasses in our country! As a hay crop it has long been the standard and it is adapted to a wider range of conditions and is grown over a wider area than other grasses. Roughly speaking, it is grown principally in the upper half of the country; it does not thrive in the hot climate of the South nor in the arid regions of the West. No other variety of tame grass will stand the extremes of climate as well as Timothy, or compare with it in average yields or feeding value. It produces one of the best qualities of hay; it stools out and forms compact stools of broad leaves; it does not produce creeping stems or runners. It luxuriates on clay or moist soil and is unsurpassed on peat, but it is not so well suited for light sandy soils. Height 2 to 4 feet. May be sown in the early fall or in spring. If sown alone, sow 6 to 10 pounds per acre. Don't buy any timothy seed just because it's cheap. It doesn't pay, Mr. Farmer! Salzer Quality means good, pure, clean, fresh northern grown seed and in the end, such seed is many more times less expensive than the cheapest seeds you could buy. Salzer's Timothy means 57 years of integrity back of it and means splendid crops.

4717—Radium: Lb., 30c, postpaid. Not prepaid: 5 lbs., 75c; 10 lbs., \$1.35. See also current price list.

4716—Superior: Lb., 30c, postpaid. Not prepaid: 5 lbs., 70c; 10 lbs., \$1.25. See also current price list.

(Certified Quack Free)
(*Bromus Inermis*)

SALZER'S BROME GRASS

This exceptionally valuable grass will bear out every word of praise we give it. Best for permanent pasture. The best of grasses for dry soils. It is a grass for the desert, a grass for the drought-stricken countries, the grass for each and every state of the United States; in fact any and everywhere, and it does well on soil where there is plenty of moisture. Brome Grass is one of our hardiest perennial grasses; no amount of cold will kill it. It withstands the severest drought, and water may stand on it for weeks without injury. Mr. John Hess, Holy Cross Mission, Holy Cross, Alaska, writes, "Your Brome Grass stands up nicely. It is a great pleasure to learn how very hardy it is."

It roots deeply, often 4 to 6 feet and thereby improves greatly the physical condition of the soil; growing on good soils where large yields of cured hay are harvested, and also good returns are obtained on poor, sandy land where timothy is frequently a failure. As a pasture grass it is of special value, staying green and succulent during summer and enduring the close cropping of cattle, horses, sheep and hogs. The chemical analysis shows it extremely rich in flesh producing, milk-increasing, ingredients.

4319—Radium: Lb., 30c, postpaid. Not prepaid: 5 lbs., \$1.10; 10 lbs., \$2.00. See also current price list.

(Solid Seed)

RED TOP

(*Agrostis Vulgaris*)

Has frequently been said of Red Top that as a grass it is more useful than any other. As a permanent pasturage it is especially valuable. As a mixture with clover, timothy, brome, or blue grass it flourishes everywhere.

A very hardy native grass, probably the most perennial grass we have. It would answer well to sow Red Top separately on moist lands where old grass has run out or become mossy; on such places it would fill the soil with numerous roots. Does well on moist, undrained soils, liable to occasionally overflow. Red Top accommodates itself to a variety of soils, even to quite dry situations. Attains a height of 2 to 2½ feet. It is of slender growth and rather fine foliage and throws out slender, spreading heads. It is a very nutritious grass and relished by stock.

Salzer's Radium Clear Red Top is free from chaff. Sow Clear Red Top at the rate of 8 to 12 pounds per acre.

4495—Radium: Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.40; 10 lbs., \$2.50. See also current price list.

4494—Superior: Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.30; 10 lbs., \$2.35. See also current price list.

SALZER'S KENTUCKY BLUE GRASS (*Poa pratensis*)

This grass is one of the first to start up in the spring and is still green when the snow flies in the fall. Uninjured by extremes of cold, heat, wet or drought, its hardness and ability to withstand tramping of hoofs have made it particularly valuable everywhere, consequently, it is now very extensively grown. It is easy to start, easy to grow and to establish pastures of the greenest verdure that will give highly profitable returns. The roots are so thick and stout that the tough sod thus formed makes an almost everlasting sward that permits of very heavy pasturing, year in and year out. Its feeding value is exceptionally high, as it makes one of the best, sweetest and most nutritious pastures, or hay crops that can be grown. For lawns it will produce one of the most beautiful, thick, velvety carpet-like swards imaginable.

4479—Radium: Lb., 50c, postpaid. Not prepaid: 5 lbs., \$2.15; 10 lbs., \$4.20. See also current price list.

4478—Superior: Lb., 45c, postpaid. Not prepaid: 5 lbs., \$2.10; 10 lbs., \$4.10. See also current price list.

5 Lbs. Sow One Acre

RAPE

(*Brassica Napus*)

DWARF ESSEX RAPE

SALZER'S DWARF VICTORIA

One of the most valuable of forage crops and the greatest late season crop that can be grown. May be sown any time from early spring until August and is a success on nearly every soil in the United States and Canada. Pasturing hogs is the cheapest way of producing pork, and for the purpose, Rape is absolutely unexcelled. It thrives splendidly in cool weather. Sixty bushel of oats and 18 ton of rape per acre have been grown, without interfering with the harvesting of the oats, and the rape afterwards producing 18 ton of forage.

Salzer's Dwarf Essex is genuine Holland grown—grown on our own farms in Holland and imported. Quality is the finest. In purchasing rape, you should be governed by the final returns to you, and not by the initial cost. Sow 5 lbs. per acre.

4666—Lb., 25c, postpaid. Not prepaid: 5 lbs., 80c; 10 lbs., \$1.50. See also current price list.

By planting Salzer's Rape Seed, you can secure two crops from the same land; it produces pasture weeks after all other forage plants have been killed by frost; it is better than any other forage for hogs and sheep; it is a succulent, nutritious food for all live stock; sown in corn at the last cultivation it will produce a growth of 15 to 20 inches of the finest forage; it gives you large yields at low costs; it is indispensable to live stock raising.

Salzer's Dwarf Victoria is a fine, bushy Rape, rich and succulent. Genuine Holland grown. The price is a little higher, but its returns in dollars are big.

4667—Lb., 25c, postpaid. Not prepaid: 5 lbs., 85c; 10 lbs., \$1.60. See also current price list.

15 to 20 lbs. sow one acre

Alfalfa

(Lucerne)

INOCULATE THIS
SEED WITH
HUMOGERM

SALZER'S NORTHERN GROWN

SEE CURRENT PRICE LIST FOR LARGER QUANTITIES OF SEED THAN QUOTED

Alfalfa is the principal leguminous forage crop on all continents of the world, it is the greatest money crop in the United States, making it possible to grow a greater number of hogs, horses, cattle and sheep than ever before. Alfalfa is a soil-builder and a soil-enricher; the roots often reach a length of 16 feet and more. The root system loosens the soil for the roots of the next crop and brings the phosphorous and potash to the surface of the soil, and the plant absorbs nitrogen from the air and stores it in the ground.

However, success with alfalfa depends somewhat upon the grower. It gives best results on deep, loose, open, friable soils. Drained bottom lands are good, but lands slightly rolling or level and well drained are best—it requires the richest and best drained soil on your farm. It will not grow on acid soil. If your soil is acid, lime it with 1 to 2 tons lime per acre before planting Alfalfa. If a weedy soil must be used it should be plowed several months before seeding, and several crops of weeds destroyed by harrowing. The seed bed should be worked into a fine state of cultivation and any extra work in this respect will more than repay you by the extra yield, for one of the first considerations is to get rid of the weeds. For best results, inoculate your seed—the cost is nominal and your seed must be pure, clean, and unadulterated. Salzer's Northern Grown Seed is the finest quality and the very best that you can buy. Sow 15 to 20 pounds per acre between May 15th and June 15th, covering $\frac{3}{4}$ inch deep on clay, and 1 $\frac{1}{2}$ inches deep on sandy soil. In some sections it can be planted in April. Sowing with a nurse crop is popular and beardless barley, wheat, and rye are better for the purpose than oats. In using a nurse crop, the Alfalfa and grain should be sown separately and not first mixed. In cutting for hay, the best time is just as the young shoots of the second crop are commencing to start.

Salzer's Northern Grown Alfalfa can be grown in every state in the Union; it will grow three to five crops a year; produces 3 to 7 tons hay per acre; it furnishes more feed per acre than any other forage; in money value it is worth more than clover or timothy; it enriches the soil and the long roots act as a subsoiler. Prepare your seed bed carefully, have sweet, rich, well drained soil, plant the best seed possible, Salzer's, and once grown on your land, you will never again be without Alfalfa. Never sow Alfalfa on low, flat, wet soils.

4213—RADIUM. Price: Lb., 40c, postpaid. Not prepaid: 5 lbs., \$1.80; 10 lbs., \$3.45. See also current price list.

4212—SUPERIOR. Price: Lb., 40c, postpaid. Not prepaid: 5 lbs., \$1.75; 10 lbs., \$3.35. See also current price list.

SALZER'S GRIMM

This variety is considered the hardest of all the alfalfas, due mainly to its branching or lateral root system. It is grown extensively in Montana and Dakota, where the most extreme conditions of heat, drought, and cold exist. One hundred degrees in summer and 50 degrees below in winter without damaging the Alfalfa! No matter where you live you can grow Salzer's Grimm Alfalfa. Never winter-kills, no re-seeding, always makes a crop, the older it is the better it gets. Our seed is pure; grown in cold Montana and the cold Dakotas. Alfalfa grown there will also grow anywhere else where sown.

Mr. N. B. Spande, R. D. 1, Mabel, Minn., writes, "Have 7 acres to Salzer's Grimm Alfalfa and got 35 loads of hay in spite of drought."

4203—Certified Grimm, lb., 65c, postpaid. Not prepaid: 5 lbs., \$3.00; 10 lbs., \$5.75. See also current price list.

4207—Radium Brand Montana or Dakota Grimm, lb., 60c, postpaid. Not prepaid: 5 lbs., \$2.70; 10 lbs., \$5.25. See also current price list.

DRY LAND

Unirrigated lands in the North develop a different type of alfalfa than irrigated soil. The plants produce heavy foliage and more seed and also contain considerable more protein than those raised under irrigation, just as it is with wheat.

Our Dry Land Alfalfa Seed was grown in the dry high land districts of Montana. The annual rainfall in that country is about 15 inches. The plants are grown in rows and are cultivated. A crop of hay (two cuts) in Montana on dry land averages from 3 to 4 tons per acre.

Major D. Vamener, Renala Khurd, N. W. R., India, writes, "During the past two years I have obtained Dry Land Alfalfa Seed from your firm, which has proved very successful."

Dry Land Alfalfa Seed has a decided superiority in its ability to withstand the melting rays of the hot sun for months at a time, when many others would wilt and droop.

4210—Price of Radium Montana Dry Land Alfalfa: Lb., 45c, postpaid. Not prepaid: 5 lbs., \$2.00; 10 lbs., \$3.80. See also current price list.

GIANT ANNUAL HUBAM CLOVER

ACCOMPLISHES IN ONE YEAR WHAT OTHER CLOVERS DO IN TWO

It has practically all the merits of other clovers with the added advantage of producing its maximum value the first year. Grows from five to ten feet in height one season. Accomplishing in approximately three months what other clovers do in one year. Produces two crops or more a season while Alfalfa. Medium or Mammoth Clovers grow but five to fifteen inches the first season. Unexcelled as a hay crop in yield and value. Stands out pre-eminently as a soiling crop. Permits of a shorter rotation than other clovers.

Do not let the price of the seed deter you from sowing one or more acres, but bear in mind its enormous growth.

CULTURE—If sown in cultivating rows 2 to 3 lbs. will sow one acre. Rows 18 to 24 inches permit cultivating with a Constellation Garden Cultivator or any similar tool. In rows 2 $\frac{1}{2}$ to 3 $\frac{1}{2}$ ft. almost any farm cultivator can be used. If sown broadcast 10 to 12 lbs. of seed sow one acre. Avoid sour or acid land, if best results are desired. The better condition the soil the larger the crop. Seed bed should be well worked, then rolled until sub-soil is very compact. For a hay crop sow from earliest spring until late in June. Begins flowering last of June, seed ripens from July 15th to August 1st, according to locality. Produces as a rule two crops of hay or one of hay and one of seed. Handle about the same as White Blossom Sweet Clover. Harvest with a grain binder, preferably in the morning while still wet with dew to prevent the seed from shattering. Shock the sheaves or bundles 8 to 10 in a shock without a cap and allow it to stand a week or so.

4232—Radium. Lb., 75c, postpaid. Not prepaid: 5 lbs., \$2.75; 10 lbs., \$5.00. See also current price list.

SOW SALZER'S SEEDS

My father used to order his seed from you about 20 years ago, and I haven't forgotten how he was always greatly pleased with everything he got from you.

Otto Schlichting, Gooding, Idaho.

YOUR SEED POTATOES ARE THE BEST THAT I EVER PLANTED.—H. O. Klose, Bertram, Texas.

SALZER'S LISCOM

Liscom Alfalfa was named after G. W. Liscom, who had a ranch on the Tongue River, in Custer County, Montana. He planted this alfalfa there some forty years ago. His first field, which is some 30 acres large, is still standing and is more than forty-three years old. This probably is the oldest field of alfalfa in the state of Montana. Withstands the extremes of temperatures of 40 degrees below zero in winter and 100 degrees above zero in summer. It has yielded big crops of hay every season, and is now still in first-class condition. Our seed is grown in Montana and Dakotas.

4208—Radium Liscom: Lb., 50c, postpaid. Not prepaid: 5 lbs., \$2.25; 10 lbs., \$4.35. See also current price list.

SALZER'S COSSACK

Introduced from the Cold, Dry, Arid Steppes of Russia.

Vice-Director N. E. Hansen, of the S. D. Agricultural Experiment Station, says:

"I ask the farmers to believe only what they see with their own eyes. 1. That the Cossack Alfalfa is perfectly hardy. 2. Recovers quickly after cutting. 3. Is remarkable for its abundant leaves, which is the most important part of any Alfalfa plant. 4. Yields abundantly both of hay and seed. 5. Is of wonderfully strong and upright growth. 6. Two to three lbs. sow one acre. The Cossack has made good in severest tests as to hardiness and drought resistance."

Our seed is grown in Dakota and is the seed for arid, upland, high altitudes and drought stricken districts.

4209—Radium Brand: Lb., 80c, postpaid. Not prepaid: 5 lbs., \$3.50; 10 lbs., \$6.50. See also current price list.

SALZER'S WESTERN

Of strong vitality; very hardy and vigorous, withstanding cold and climatic conditions. It has proven itself perfectly hardy in Wisconsin, Minnesota, Michigan and the Dakotas, yielding in these states from 2 $\frac{1}{2}$ to 6 tons per acre. Our seed was grown in Kansas.

4222—Radium—Price: Lb., 40c, postpaid. Not prepaid: 5 lbs., \$1.75; 10 lbs., \$3.20. See also current price list.

Experimental stations are advising against planting clovers which are imported and selling at cheap prices, as they invariably winter-kill.

Clover

INOCULATE THIS
SEED WITH
HUMOGERM

Clovers are perhaps one of the most widely grown of the legumes. Clover is used as a hay, pasture, and soiling crop and often used as green manure to plow under, as the nitrogen gathering bacteria on its roots are wonderful soil enrichers for future crops. It is the hay crop of the pioneer. The frontier life of American farming is in the cut-over land areas of the Northern states, and on these newly cleared lands clover often grows like a weed and yields abundantly. Clover may be grown successfully on many fields where Alfalfa fails. The production of Clover seed, due to weather conditions, was relatively light in 1924, especially in Wisconsin, which has caused a somewhat higher price this season. However, in buying clovers, insist upon the best seeds. Salzer's Clover Seeds are good, pure, fresh, healthy, solid seeds, and it should be the final results to you, Mr. Farmer, that should influence you in purchasing your seeds, and not the initial cost of them.

SALZER'S MEDIUM RED

Medium Red Clover is one of the most important Clovers for general use. It lives two years or more; grows about two feet high; makes two crops a year, yielding about three tons of cured hay per acre. Clover hay is very nutritious, stock fed on it requiring less grain. For soiling crops it is much used and is very valuable for green manuring, adding humus and nitrogen to the soil and thereby providing rich food for the crops which follow, saving the cost of fertilizers or the expense of using farm manure. It does well on a great variety of soils and it thrives most luxuriantly on strong, well-drained loams. In the Northern States Red Clover is mostly sown in the spring, as early as possible.

For hay, it is often sown with Orchard and Tall Meadow Grass, as the three ripen at the same time and give a heavier yield and a better quality hay. When sown alone, sow 10 to 12 pounds per acre. The Wisconsin Seed Law requires 95 per cent purity and 90 per cent germination, and freedom from noxious weeds. Salzer quality not only meets these requirements, but exceeds them.

4243—Radium. Lb., 55c, postpaid. Not prepaid: 5 lbs., \$2.30; 10 lbs., \$4.50. See current price list for larger quantities.

4242—Superior. Lb., 55c, postpaid. Not prepaid: 5 lbs., \$2.25; 10 lbs., \$4.40. See current price list for larger quantities.

SALZER'S CRIMSON OR GIANT INCARNAT

Valuable for Pasture, Green Forage, Hay and Quickly Restoring Worn-Out Soils. Forms upright branching plants, about 2-3 feet high. It roots very deeply and is a bountiful provider of nitrogen. It grows most luxuriantly on fertile loam, yet it will thrive better on thinner and poorer soil than Red Clover. Plowing under a good crop of Crimson Clover is equivalent to about 20 tons of stable manure per acre. It is a cheap source of nitrogen and has restored to profitable cultivation thousands of acres of poor land.

In the northern and central states many sow in spring, as it is liable to freeze out in winter; in the southern and eastern states it is sown in fall; 12 lbs. of seed are used per acre. Should be cut for hay or silage before flowers commence to mature.

4228—Radium. Lb., 30c, postpaid. Not prepaid: 5 lbs., \$1.15; 10 lbs., \$2.00. See current price list for larger quantities.

B ALSIKE AND TIMOTHY MIXTURE

B Alsike and Timothy Mixture contains about 50 per cent Alsike and 50 per cent Timothy; our seed is grown in this neighborhood where most of the farmers grow this mixed seed in preference to other grasses and clovers, as the two varieties are adapted for the same kind of soil, mature at the same time and produce a larger crop of hay or seed than either planted alone. If you plan to grow for hay, then the Alsike-Timothy Mixture will give you splendid satisfaction, and is much cheaper than Alsike sown alone.

It makes hay of superior quality, as Alsike and Timothy "grow hand in hand." If you desire to grow for Seed, by all means sow Salzer's Radium Alsike alone, but if you wish it for pasture or hay, use our Alsike-Timothy Mixture. Sow 8 to 12 lbs. per acre.

4225—Lb., 30c, postpaid. Not prepaid: 5 lbs., \$1.20; 10 lbs., \$2.10. See current price list for larger quantities.

BIENNIAL YELLOW SWEET

Is in great demand on account of its earliness, being about two weeks earlier than the white. Does not grow as tall, but makes just as good pasturage as the white. Produces high quality hay.

4258—(Scarified): Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.35; 10 lbs., \$2.40. See current price list for larger quantities.

SAINFOIN OR ESPARSETTE

Especially valuable for poor land and barren hillsides, but on good land produces large, fine quantities of nutritious fodder. If wanted for hay, cut just before the flowering period. Splendid pasture for sheep, and soiling food for cattle and horses. Sow 20 to 40 lbs. per acre in spring, covering well, with or without a nurse crop.

4265—Lb., 30c, postpaid. Not prepaid: 5 lbs., \$1.25; 10 lbs., \$2.30. See current price list for larger quantities.

SALZER'S MAMMOTH RED

Mammoth Red Clover is quite distinct from Medium, being larger, of coarser and more robust growth, and two to three weeks later. It is also more hardy, stands frost better and is more permanent. On rich, loamy soils it attains an immense growth, yielding much more bulk than medium clover, but makes only one crop, and pasture after that. It grows well on land too poor and on soil too low for Medium Red, and is, therefore, largely used to restore fertility to worn-out soil. It is particularly good for light soils where Medium will not do so well—Salzer's Radium strain frequently growing 4 and 5 feet tall. Mammoth Red Clover should be in every permanent pasture, as it retains its greenness throughout the summer and furnishes a larger amount of forage.

4237—Radium. Lb., 55c, postpaid. Not prepaid: 5 lbs., \$2.40; 10 lbs., \$4.65. See current price list for larger quantities.

4236—Superior. Lb., 55c, postpaid. Not prepaid: 5 lbs., \$2.35; 10 lbs., \$4.60. See current price list for larger quantities.

SALZER'S ALSIKE

Alsike Clover is exceptionally leafy, frequently producing as much hay as Mammoth. It is admirably suited to the cool, cold climate of the Northwest. On many soils it produces good crops, on which Red Clover will not grow. Alsike is the most hardy of all Clovers. Withstands the severest cold and does not readily winter-kill or heave out of the ground with frost, and readily reseeds itself. Grows about two to three feet high. The stems are thinner than those of Red Clover and the leaves are more numerous.

This Clover prefers damp, moist, loamy soil, but it will also grow fairly well on stiff clays. Here in the Northwest it is extensively grown mixed with Timothy. Both varieties are well adapted for this soil and they ripen at the same time. Fine for pasture on low grounds, in fact, the only clover that will not kill out on water-soaked soil.

Alsike does well if sown with grains in either spring or fall. Should be cut for hay as soon as it is in full bloom and for seed when two-thirds of the heads are ripe. One of the best honey-producing plants that can be grown.

4261—Radium. Lb., 40c, postpaid. Not prepaid: 5 lbs., \$1.60; 10 lbs., \$3.00. See current price list for larger quantities.

4260—Superior. Lb., 40c, postpaid. Not prepaid: 5 lbs., \$1.55; 10 lbs., \$2.90. See current price list for larger quantities.

SALZER'S WHITE SWEET

Sweet Clover is a biennial and grows in all parts of the United States; it possesses a wide adaptability in regard to soil and climate than any other clover. It thrives on the poorest sandy soil and on dry hill sides, where no other clover will grow. On alkali soils sweet clover is the only plant that will grow and make a yield. It will endure drouth, thrives on wet soil, stands more heaving and frost than red or alsike clover. Wherever it has grown it has left a rich spot, which is readily taken up by other crops. Always sow a little with all spring sown grain. It ranks as one of the highest fertilizers of the leguminous crops. Like all legumes it gathers nitrogen from the air, and enriches the soil with it. Sweet Clover develops clusters of fleshy roots which reach many feet into the ground, and which the New York Experimental Station estimated to weigh 20 tons per acre, and these long, fleshy roots decay when two years old, as soon as the seed matures.

Sweet Clover should be cut the first season when it shows the maximum growth in fall. The second year it is cut before it comes into full bloom. In the Northern States Sweet Clover is generally pastured until about July, and when stock is taken off it will grow rapidly and can soon be cut for hay or for seed. The sowing of seed is done from early spring until late fall, and the sub-soil must be very compact. Sow 15 lbs. per acre, ½ inch deep.

4253—Radium (scarified): Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.30; 10 lbs., \$2.40. See current price list for larger quantities.

4254—Superior (scarified): Lb., 35c, postpaid. Not prepaid: 5 lbs., \$1.25; 10 lbs., \$2.30. See current price list for larger quantities.

SALZER'S DWARF WHITE DUTCH

A low, close-growing Clover; round, white heads; very fragrant; best adapted to moist soils, but succeeds also on dry land; excellent as an addition to mixtures for permanent pastures. As a bee plant it is famous everywhere. One-quarter of a pound of our Dwarf White Dutch Clover will be sufficient to sprinkle upon a lawn 20x50 feet.

4249—Radium. Per oz., 10c; ¼ lb., 30c; lb., 85c, postpaid. Not prepaid: 5 lbs., \$3.45; 10 lbs., \$6.75. See current price list for larger quantities.

Your Radium Red Top stands drought better than anything else we have ever tried.—Thos. D. Griffin, Hardy, Nebr.

Salzer's Northern Grown Seed Potatoes

NOTE.—To points over 400 miles from La Crosse, to prevent damage in transit, potatoes in 3 bushel lots or more should be shipped in barrels, for which add 50c per barrel extra. Three bushel can be packed in one barrel.

Salzer's Seed Potatoes are Northern Grown from selected seed stock, grown on soils that are especially well suited to each variety, producing potatoes that cannot be excelled in vigorousness, purity and productiveness. On our farms in Northern Minnesota we grow larger and better potatoes for seed than can be grown in other districts where the soil and climate is not so desirable for the purpose. When Salzer's Northern Grown Potatoes are planted only a short distance farther south, they frequently yield double the crop of home-grown stock, even of the same variety. We urge you to place your order early. Each year we soon run out of some varieties, and by ordering early you will not be disappointed. The demand for our potatoes is increasing each year, thousands of orders being received from all parts of the country. Salzer Quality is nationally known. When buying potatoes, do not judge prices by the current prices of eating potatoes. Salzer's Seed Stocks have a value and quality distinctly their own and should not be compared with prices of lower grade potatoes. Potatoes weigh 60 lbs. to the bushel.

CUSTOMERS IN THE SOUTH

We begin shipping potatoes to Texas, Alabama and the South about the fore part of January, 1925. There is no potato that does better in these states than Salzer's Early Six Weeks, Salzer's Earliest, Bliss Triumph, Irish Cobbler, Early Ohio and, for late sorts, Green Mountain, Russet Rural, and Burbank.

SALZER'S EARLY SIX WEEKS POTATO

Salzer's
Early
Six
Weeks

Salzer's Extra Early Six Weeks is our leading variety. It is perhaps the most widely known. It has a national record. Is a dependable type. Is the earliest of the large yielders. Has a reputation for reliability. Is a strain of exceptional vigor. Has a pronounced constitutional hardiness. Has behind it a record for large yields. Continuous selection, roguing and improving the stock seed has produced a highly developed potato of a most vigorous type, a potato full of life and energy. A strain we consider unexcelled, and one we have always endeavored to make so early, so superior, so true to type, so strong and vigorous that its superiority will manifest itself, in the field, at harvest, on the table and as a keeper.

As the name indicates, under favorable weather, potatoes for table use can be had in six weeks from planting. It is a rapid, strong, robust grower. Grows very upright. Tubers are numerous and compact in the hill. Skin is pink and smooth. The flesh is white and cooks mealy, dry and floury. Round to oblong in shape.

One of the best market varieties; fine for long distance shipping and winter storing. (See illustration.)

Yields ranging from 200 to 300 bushels per acre have been frequently reported of this splendid potato.

Lb., 25c, postpaid. Price, not prepaid: Peck, 50c. See current price list for larger quantities.

EARLY EUREKA

This is an extra early potato, remarkable for its drought resistance and its ability to mature heavy yields before the hot, dry summer sets in. For an early potato it is noted for its keeping qualities. The white flesh has a delightful flavor and cooks mealy. It is almost round in appearance, similar to the Irish Cobbler, and produces uniform tubers. The skin is smooth and snowy white. Many market gardeners give this potato a stated preference over other early varieties.

The vines are wonderfully vigorous and the tubers lie close together in the hills. On account of the heavy foliage it can withstand heat and drought.

Lb., 25c, postpaid. Price, not prepaid: Peck, 45c. See current price list for larger quantities.

SALZER'S EARLY ROSE

Early Rose, the popular extra early potato of our father's day, is today still one of the foremost extra early potatoes and in prominence keeps pace with the times.

Carefully bred, closely roged, rigidly cultivated, painstakingly developed, it is a vastly improved type from what our forebears knew.

It is hardly possible to grow a more dependable type than Early Rose, as its eating, keeping and yielding qualities are all one fondly wishes for.

Although somewhat reddish in appearance, the flesh is a beautiful snowy white. In shape it is oblong. Fine for baking. (See illustration.)

Lb., 25c, postpaid. Price, not prepaid: Peck, 45c. See current price list for larger quantities.

Salzer's Early Rose Much Reduced in Size

SOW SALZER'S SEEDS

We have been planting your Early Six Weeks Potatoes for nine years. Always had good crops, and they are fine keepers.
Benedictine Sisters, St. Mary of the Pines, Chewelah, Wash.

Your Six Weeks Potatoes are the best potatoes I can get for this part of the country. G. H. Gregg, Box 264, Branson, Mo.

Have been using your Early Six Weeks Potatoes for three years and they are certainly remarkable. Storekeepers and customers prefer them to other varieties.
A. P. Johnson, Box 44, Triumph, Minn.

A WORD ABOUT CERTIFIED POTATOES

Potato "Certification" is an undertaking by the state to assure that the "Seed so Certified" has been grown under conditions and reached such a state of perfection as to be as near perfect in Varietal Purity (98%), Constitutional Vigor (95%), Uniformity of size (95%), and Freedom from Disease as is possible to profitably grow and sell at a slight margin above other seed stocks. (The above per cents are the minimums, our stocks range higher.) We only issue a "Certificate" with each barrel (3 bus.) or more; on quantities less than one barrel we give you our guarantee that the stock is certified. The stock is Minnesota grown.

This year we only list the following varieties of Certified Seed Potatoes: Early Ohio, Triumphs and Cobblers.

Seed potatoes received, they are No. 1 in every respect and should produce even in the worn out fields of Pa.—Geo. Hamilton, New Florence, Pa.

SALZER'S PEDIGREE STRAIN RED RIVER EXTRA EARLY OHIO

This splendid strain is grown at very heavy expense, but it's worth it. It is the result of many years' close, careful selection to improve the shape, develop the size, increase the yield, the strain and eliminate the deep eyes.

Into these potatoes we have bred vitality, quality, and yield, with a resultant profit to you.

The sprouts are very strong; the vines grow erect and the potatoes are very compact in the hill. Has a very smooth skin. Flesh is pure white. Unusually mealy and cooks dry and floury. Well rounded symmetrical shape and uniform size.

We recommend them for seed to such farmers who want high-class, finely selected, thoroughly bred seed potatoes; potatoes standing ready to return to the grower a large crop of fine, early, merchantable tubers—tubers of class and quality.

Lb., 25c, postpaid. Price, not prepaid: Peck, 55c. See current price list for larger quantities.

CERTIFIED RED RIVER EARLY OHIOS

It was the parent seed of this stock that won first prize at the Minnesota Potato Show at Duluth, Minn., and Council Bluffs, Iowa, Horticultural Show.

Lb., 30c, postpaid. Price, not prepaid: Peck, 60c. See current price list for larger quantities.

SALZER'S EAGLE VALLEY EARLY OHIOS

Grown in the Great Eagle Valley potato district in Minnesota. Wonderfully fine stock and produces bountifully.

Lb., 25c, postpaid. Price, not prepaid: Peck, 50c. See current price list for larger quantities.

If potatoes are to be shipped in barrels, add 50c extra for each barrel. One barrel holds 3 bushels.

SALZER'S EARLIEST

This potato is to be prized more for its extreme earliness than for its fine looks. It is of roundish shape, medium size and has proved immensely popular as a yielder, keeper and for its table qualities. Very smooth. Medium and uniform in size. Shallow eyes. Skin pinkish. Flesh snow white.

Lb., 30c, postpaid. Price, not prepaid: Peck, 60c. See current price list for larger quantities.

EAGLE VALLEY GREEN MOUNTAIN

This is a very reliable late variety. It is increasing in popularity wherever known and, in fact, in many sections it has now superseded most other main crop varieties. It thrives in all potato soils and in most all localities, yielding big crops of large, smooth, white skinned tubers of oblong to roundish form, somewhat flattened. On good soils the potatoes are all of good size, almost entirely free of small tubers. The surface is often netted, of bright appearance. Eyes are few and well distributed. The flesh is white, solid, fine grained, cooks white, dry and mealy. It has a very fine flavor. It seems to be almost entirely free of diseases; scabs, etc. Rain or shine, drouth or wet, it seems always to deliver the potatoes in the fall. The vines are large spreading, bright green, and grow very vigorously.

Lb., 25c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

BURBANK

The Burbank is a creation of that California wizard who has produced such wonderful results in the crossing of vegetables. But of all the things Mr. Burbank has ever done, nothing has been of greater benefit to the world than the Burbank potato. This potato—by years of selecting and care in growing—selecting as to heaviness in yield, uniformity in ripening and richness in flavor, the Burbank is today, we believe, one of the finest high quality late potatoes. Nothing excels it; when it comes to yields, it is superb. A splendid late variety. Very similar in shape to the Early Rose.

Lb., 25c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

SALZER'S EAGLE VALLEY BLISS TRIUMPHS

We consider Eagle Valley Triumphs the best strain of Triumphs money can buy. Clean, fresh, plump, vigorous, fully matured stock that has strong, robust seed life.

It measures up to every requirement and has every favorable point requisite to a first class and high bred strain. It has a handsome reddish jacket. Tubers are round and of medium size. Remarkable for its uniformity. Eyes very shallow. Cooks to a dry, pearly whiteness. Has a splendid flavor. It is a potato that we can, with pride, recommend for the most fastidious taste. It is as productive as any first early potato we know of.

Lb., 30c, postpaid. Price, not prepaid: Peck, 55c. See current price list for larger quantities.

CERTIFIED RED RIVER BLISS TRIUMPHS

Lb., 35c, postpaid. Price, not prepaid: Peck, 60c. See current price list for larger quantities.

If potatoes quoted "Not Prepaid" are wanted by mail, add postage per Page 6.

SALZER'S EAGLE VALLEY IRISH COBBLERS

Eagle Valley, Minnesota, is famous for the beautiful, clean skinned potatoes it produces; its favorable soil condition is not easily found elsewhere. These fine Irish Cobblers have a clear and smooth skin; flesh is pure white, of excellent quality and always cooks mealy. A splendid early variety, maturing in about seven weeks, with tubers uniformly smooth, round, plump, and eyes strong and well developed. Cobblers do well anywhere. The vines make short, upright growth, so that the hills may be only a short distance apart. Is noted for producing few, if any, small potatoes, so that you can market the whole crop.

Lb., 25c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

SCHROEDER'S CERTIFIED RED RIVER IRISH COBBLERS

Lb., 30c, postpaid. Price, not prepaid: Peck, 60c. See current price list for larger quantities.

SALZER'S PRIZETAKER

We think it is the finest of the reddish skinned Potatoes—it has a tremendously large demand all over the United States; if same is planted once it will seldom be omitted from the farm—owing to its superb quality and big yield. It is a magnificent, nice, large, sound tuber with a reddish skin and white flesh, very rich and delightful flavor, splendid either for cooking, baking or slicing; indeed, it is one of the very best late all-around Potatoes known.

Lb., 25c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

SALZER'S RUSSET RURAL

One of the best known, most popular late varieties of white potatoes. It is a big cropper and of fine, attractive appearance. Stands up well under adverse climate and soil conditions. Skin is of a fairly pronounced russet color.

Lb., 25c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

FAMOUS EAGLE VALLEY RURAL

Thrives under varied soil and weather conditions. Its shallow eyes are few and far between. Flesh white and mealy and figuratively is scab proof and disease resistant. The skin is unusually attractive, noticeably so, almost white, and very finely netted; in fact, almost russet in appearance. We wish our customers would get acquainted with this meritorious heavy yielding late potato. Especially adapted to northern sections where it is very popular on account of its keeping qualities.

Lb., 25c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

YOUR SEED POTATOES LAST SPRING WERE JUST FINE.—George Eichmiller, R. D. 3, Jasper, Ind.

SALZER'S NORTHERN GROWN POTATOES

SCAB PROOF GOLDEN RUSSET

CARMAN No. 3

The crowning merits of this potato are its immense yield, beautiful, attractive appearance and scab-proof habit. Each of these virtues is sufficient in itself to commend this variety for general and widespread culture.

It has a vigorous constitution and has repeatedly proved itself of satisfying the most exacting requirements as to climate and soil. It has behind it a history of big crops and a wide reputation for dependability. It is unusually uniform in shape and in period of ripening. Unexcelled for table quality, mealy and delightful in flavor. As a shipper and long keeper, it is a superior type. A medium late variety. Potatoes weigh 60 lbs. per bushel.

Lb., 20c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

SIR WALTER RALEIGH

This potato is in a class by itself and Mr. Carman, the introducer, believed when he produced this creation that it would outstrip and outgrow and outyield every other late variety, and he came pretty close to it.

Sir Walter Raleigh resembles the Rural in shape, but is little more buff in color, the flesh is whiter, and it is from four to six days earlier than the Rural. The tubers are more uniform, with practically no small ones, nearly every one being of marketable size. It is unquestionably the best of the Rural type.

Lb., 20c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

A white late potato known everywhere. It is a tremendous cropper and in great demand. No better cooker or keeper can be had. Very popular in large city markets. Lb., 20c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

SALZER'S MCKINLEY POTATOES

This fine late potato, an improved type of the Green Mountain, was introduced by us in 1899. It thrives almost everywhere and on good soils the absence of small tubers is remarkable. Eyes are few, in shape it is oblong, with two good ends, slightly flattened, creamy white skin, white flesh, and free from any diseases. Of vigorous growth, withstands climatic conditions. A heavy yielder. Old customers will welcome the chance to obtain this variety again.

Lb., 20c, postpaid. Price, not prepaid: Peck, 40c. See current price list for larger quantities.

Wis.-Minn. Standard Collection

Standard Varieties Recommended by Wis. and Minn. Agricultural Departments

Contains 2 pecks each, Eagle Valley Rurals, Red River Early Onix, Eagle Valley Cobblers, and Kings, and 1 peck each, Eagle Valley Green Mountains, Scab Proof Golden Russets, Eagle Valley Bliss, Triumphs, and Early Rose. Twelve pecks in all—1 barrel. A real bargain. Price, not prepaid: See current price list.

NORTHERN GROWN SEED POTATO EYES

Especially fine for customers living at a great distance, as it saves them the heavy transportation cost. We pay the postage. The fertile eyes are cut only from the same high grade stocks as listed in our catalog. Packed in damp moss and shipped at time of planting. Enables everyone to obtain Salzer's Quality Potatoes, regardless of where they live.

Price of Certified Ohio: 20 Eyes, 35c; 60 Eyes, 80c; 100 Eyes, \$1.25; 250 Eyes, \$3.00; 1,000 Eyes, \$11.00, postpaid. Other varieties, Your Selection: 20 Eyes, 30c; 60 Eyes, 70c; 100 Eyes, \$1.00; 250 Eyes, \$2.40; 1,000 Eyes, \$9.00, postpaid. No orders accepted for Less Than 20 Eyes of One Variety.

SALZER'S FERTILIZERS

PRICES ARE F. O. B. LA CROSSE UNLESS OTHERWISE NOTED

If wanted by mail,
add postage,
per Page 6.

5560—FORD AMMONIUM SULPHATE. Nitrogen, the main constituent of ammonia, exerts more influence on the quick growth, early yield, and quality of crops, than other fertilizers. Everyone knows the value of manure as a fertilizer. Fifty pounds of Ford Ammonium Sulphate contains more nitrogen than one ton of manure. It is a highly concentrated product and should be sparingly used. It is always best to apply it as a top dressing when vegetation or foliage is dry, or if applied when vegetation or foliage is wet, the ammonium sulphate should be washed into the ground immediately by a thorough sprinkling in order to avoid any possibility of burning. For field crops, apply on ground away from vegetation. Never apply during a hot, dry spell. It is better, though, to work it into the soil when seeding. For general garden use, sprinkle and rake into the soil about 1 lb. per 1,000 square feet just before seeds are planted. For any crop that needs it, apply about 100 pounds per acre, working into the sod before seeding, or broadcasting and harrowing in when fitting the land, or part may be handled this way and the balance used as a top dressing after growth has started. Ammonium sulphate supplies nitrogen alone and enough potash and phosphate should either be already present in the soil or it should be supplied additionally. Price: Lb., 25c; 5 lbs., 95c, postpaid. Not prepaid: Lb., 20c; 5 lbs., 80c; 10 lbs., \$1.25; 25 lbs., \$2.25; 50 lbs., \$3.50; 100 lbs., \$6.00; 500 lbs., \$28.50.

5502—ALL SOLUBLE. For market gardeners. This brand has been prepared for such crops as require an extra quick, strong fertilizer; should be mixed well into the soil. Adapted for tobacco, hops, potatoes, flax, sugar beets, early cabbage, cauliflower, celery, fruits, especially strawberries; suitable for all soils (except sour). Use 250 to 500 lbs. per acre. Analysis, 2-12-2. Not prepaid: 5 lbs., 35c; 10 lbs., 60c; 25 lbs., \$1.10; 50 lbs., \$1.80; 125 lbs., \$3.90; 250 lbs., \$7.65; 500 lbs., \$15.10; 1,000 lbs., \$29.50.

5509—NITRATE OF SODA. Nitrate of Soda is not a substitute for other Manures, but we recommend it as a cheap form in which to apply Nitrogen to plants. Gardeners who are using farm manure should continue to use it, but use Nitrate of Soda in addition to other fertilizers. Remove the lumps before using and break them up, which can be done by pounding. Use as a top dressing at the rate of 100 lbs. per acre. For the Home Garden apply as a solution one ounce to two gallons of water. Not prepaid: 5 lbs., 50c; 10 lbs., 90c; 25 lbs., \$1.50; 50 lbs., \$2.75; 100 lbs., \$5.00; 500 lbs., \$24.00; 1,000 lbs., \$47.00.

5538—POTATO GROWER. This fertilizer is of special use for the potato crop, and is also adapted for sweet potatoes, vines, fruit trees and all leguminous plants. Use at the rate of 250 to 500 lbs. per acre. Analysis 2-12-6. Not prepaid: 125 lbs., \$8.50; 500 lbs., \$16.25; 1,000 lbs., \$31.00.

5552—FRUIT AND ROOT CROP GROWER. For fruit trees and small fruits, garden truck, tobacco, potatoes, sugar beets, etc. Use 250 to 500 lbs. per acre. Analysis, 4-8-6. Not prepaid: 125 lbs., \$4.35; 250 lbs., \$8.50; 500 lbs., \$16.25; 1,000 lbs., \$31.00.

5511—BONE MEAL FERTILIZER. A by-product of the large packing houses; it is made from fresh green bone with an analysis of about 3 per cent ammonia, 27 per cent phosphoric acid and 50 per cent bone phosphate. This fertilizer has been steamed in order to give quicker action. Is considered one of the most lasting and result producing fertilizers obtainable. Not prepaid: 5 lbs., 35c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.75; 125 lbs., \$3.75; 250 lbs., \$7.25; 500 lbs., \$14.00; 1,000 lbs., \$27.25.

5510—ACID PHOSPHATE. Sixteen per cent available Animal or bone phosphate in the most available form. Used on grain crops and others requiring an excessive amount of phosphoric acid. Not prepaid: 5 lbs., 25c; 10 lbs., 40c; 25 lbs., 85c; 50 lbs., \$1.50; 125 lbs., \$3.25; 250 lbs., \$6.25; 500 lbs., \$12.00; 1,000 lbs., \$22.75.

5500—WALKER'S EXCELSIOR PLANT FOOD. It is the most concentrated, quickest acting, most complete and evenly balanced odorless, soluble fertilizer known. Produces vigorous, healthy growth in all plants and bulbs and profusion of flowers. Price: 5-oz. package, 25c; 12-oz. package, 50c, postpaid.

5526—WHEAT, CORN AND OATS GROWER. For general farm use, but especially adapted for the growing of all cereals. Use at the rate of 250 to 500 lbs. per acre. Analysis, 2-16-2. Not prepaid: 125 lbs., \$4.25; 250 lbs., \$8.25; 500 lbs., \$16.00; 1,000 lbs., \$30.50.

5586—SHEEP MANURE. This fertilizer is dry, pulverized and screened and all undigested weed seeds have been destroyed so they cannot under any circumstances germinate. The analysis is: Ammonia, 2.73 per cent; Phosphoric Acid, 1.75 per cent; Potash, 1.50 per cent; Humus, 90 per cent. Not prepaid: 5 lbs., 25c; 10 lbs., 40c; 25 lbs., 80c; 50 lbs., \$1.40; 100 lbs., \$2.60; 500 lbs., \$12.50; 1,000 lbs., \$23.00.

5514—CORN GROWER. Contains a large percentage of phosphoric acid and potash, the most essential elements in the production of a maximum corn crop. Nitrogen is also supplied in sufficient quantity to form a well-balanced, complete fertilizer. An excellent brand for black soils. Use 250 to 500 lbs. per acre; half broadcast, balance in hills or drills, mixing thoroughly with the soil before planting. Analysis, 2-12-2. Not prepaid: 125 lbs., \$3.90; 250 lbs., \$7.65; 500 lbs., \$15.10; 1,000 lbs., \$29.50.

5512—PHOSPHATE AND POTASH. For general farm crop. An especially good fertilizer for clover and alfalfa, also for strengthening and balancing farm manures. Should not be used on sour loams or heavy clay lands. 250 to 500 pounds per acre. Analysis, 0-14-4. Not prepaid: 5 lbs., 35c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.75; 125 lbs., \$3.75; 250 lbs., \$7.25; 500 lbs., \$14.00; 1,000 lbs., \$27.00.

WE LIKE YOUR SIX WEEKS POTATOES FINE.—E. F. Wilkinson, R. D. 5, Washington, Kansas.

Salzer's Improved Constellation Garden Tools

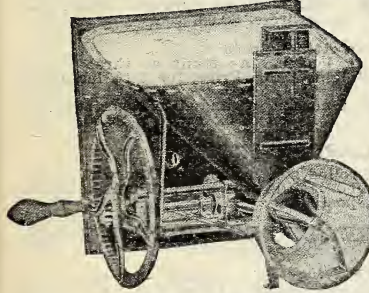

PRICES ON THIS PAGE ARE F. O. B. LA CROSSE UNLESS OTHERWISE NOTED

Salzer's Improved Constellation Complete is a combination outfit which may be used as a hill or drill seeder, double or single wheel cultivator, plow, or hoe, as conditions require. It has all the equipment to serve you from the initial seeding to the final cultivation. Readily converted from one use to another; the change from seeder to cultivator being made by removing two red-headed bolts. One standard frame is used throughout. As a seeder, this machine opens the furrow, drops the seed, closes the furrow, packs the earth, and marks the next row—all in one operation. Seed regulator is carefully made of brass, and perfectly controls the seed flow. Sows all seeds from beans down to the finest garden seeds, in continuous drills, or hills 4, 6, 8, 10, 12 or 24 inches apart. Is adjustable to permit planting at any depth up to two inches. All of the parts are made of the best materials, carefully fitted, and attractively finished. We stand solidly behind every tool we furnish, and we guarantee them to give you satisfaction and to be just as represented. Full directions are packed with every tool. The exceptionally low price of this high grade machine complete, makes it an unusually splendid value, one which we believe cannot be duplicated elsewhere.

- 1—SALZER'S IMPROVED CONSTELLATION COMPLETE**, as illustrated above. Shipping weight, 60 lbs. Price, not prepaid, \$16.35.
2—SALZER'S IMPROVED CONSTELLATION HILL AND DRILL SEEDER. Will sow all seeds from beans down to finest garden seeds, either in continuous drills, or in hills spaced from 4 to 24 inches apart. Can be made into a complete machine by adding the cultivating equipment. Shipping weight, 50 lbs. Price, not prepaid, \$13.10.
3—SALZER'S IMPROVED CONSTELLATION DOUBLE WHEEL CULTIVATOR. May be used as a double wheel hoe, plow or cultivator astride the row during early cultivation, and as a single wheel cultivator between the rows later. Adding seeder parts will make the complete machine. Shipping weight, 35 pounds. Price, not prepaid, \$11.15.
4—SALZER'S IMPROVED CONSTELLATION DOUBLE WHEEL HOE. For those who want a machine with the hoes only. By adding necessary parts later on, you can have the complete machine. Shipping weight, 30 pounds. Price, not prepaid, \$9.45.
5—SALZER'S IMPROVED CONSTELLATION SINGLE WHEEL CULTIVATOR. For the small gardener. Can be used as a hoe, plow, or cultivator, working between the rows. Shipping weight, 35 pounds. Price, not prepaid, \$10.25.
6—SALZER'S IMPROVED CONSTELLATION SINGLE WHEEL HOE. Hoes are the most necessary tools in garden cultivation. This single wheel tool is very popular with the small gardener. Shipping weight, 27 pounds. Price, not prepaid, \$8.70.

PLANET JR. GARDEN TOOLS

- These fine garden tools are so well known that they require no description. Circular will be sent upon request.
No. 25—PLANET JR. COMBINED HILL AND DRILL SEEDER, DOUBLE AND SINGLE WHEEL HOE, CULTIVATOR AND PLOW. Shipping weight, 61 pounds. Price, not prepaid, \$26.00.
No. 4D—PLANET JR. SEEDER ONLY. Shipping weight, 40 pounds. Price, not prepaid, \$17.00.
No. 12—PLANET JR. DOUBLE WHEEL HOE. Shipping weight, 33 pounds. Price, not prepaid, \$13.00.
No. 17—PLANET JR. SINGLE WHEEL HOE. Shipping weight, 24 pounds. Price, not prepaid, \$9.00.

CAHON HAND SEEDER

5250—Is in a class decidedly its own. Sows all kinds of Grain and Grass Seeds, and at a common walking gait, sows from 4 to 8 acres per hour, throwing Wheat, Rye and Barley 30 feet; Hemp, 28 feet; Oats, 23 feet, and Timothy, 18 feet. The bag and hopper will hold about 22 quarts. Weight, packed, 14 lbs. Price, \$3.95.

LA CROSSE HAND SEEDER

5252—This Seeder will pay for itself in sowing five acres, twice over. It was brought forward to meet the demand for a cheap, perfect Hand Seeder. Its great advantage is that it sows the ground three times in going over once, leaving no possible chance of skipping. From 40 to 60 acres can be sown in a day, according to the kind of seed used. It sows Grasses, Clovers, Grain and Fertilizers, throwing clover 18, timothy, 15, millet and flax 18, and wheat 25 feet. Full directions accompany each machine. Weight, packed, 9 lbs. Price, \$1.95.

THE ACME POTATO PLANTER

5228—Anybody having from 1 to 30 acres of potatoes to plant will find the Acme will do the work better, cheaper and quicker than any other machine made.

The erect position, the carrying of the seed on the shoulder, its ease of operation, relieves the farm work of much of its disagreeableness. "Almost as easy as walking, is the remark of many who have used it. The weight of the planter is only 2½ lbs. Weight, 4 lbs., packed. Price, \$1.45.

Acme

THE PEERLESS POTATO PLANTER

5227—It is a tubular planter, and works on the same principle as the Acme Planter. Some people prefer same on account of not having to drop the potato so far as in the other Planters. It is a good tool, simple, strong, durable and easy to operate. Weight, 5 lbs. Price, \$1.75.

Peerless

MODEL HAND GRIST MILLS

We handle three sizes of these Mills. They are made of strong and durable metal and will grind all kinds of grain. Will make fine graham flour and meal for table use, crack kernels of corn for small chicks, grind hominy, make split peas, cracked wheat, grind rock salt, dry bones or shells for poultry. They are easily adjusted to grind fine or coarse.

| No. | Weight. | Capacity per Hr. | Price |
|------|---------|------------------|--------|
| 5092 | 20 lbs. | ½ to 1 bu. | \$2.95 |
| 5093 | 35 lbs. | 1 to 2 bu. | 4.95 |
| 5094 | 60 lbs. | 1½ to 3 bu. | 6.75 |

IMPROVED CYCLONE SEEDER

5251—The Cyclone Seeder is exactly like the La Crosse Seeder, except it turns with a crank. Sows all kinds of grain, grass and clover seed perfectly; also fertilizers, ashes, etc. The machine is supplied with a distributing wheel which scatters the seed evenly. The flow of the seed is uniform and the distribution even. Has a heavy duck hopper, holding ½ bushel; sows 5 acres per hour. Directions with each machine. Weight, 7 pounds. Price, \$1.95.

ACME CORN PLANTER

One of the best, handiest and quickest hand corn planters today.

Plant to any depth, and as rapid as you desire. Weight, 4 pounds.

4928—Price, each, \$1.25.

4929—With Pumpkin Seed Attachment, \$1.45.

4930—With Fertilizer Attachment, \$2.50.

Acme

LA CROSSE CORN SHELLER

With a little practice anybody can shell a bushel of corn in about 3½ minutes. It is a machine we have never known to get out of order if common sense is used. We know of no sheller at twice the price that we would rather offer than the La Crosse. Considering the capacity, the price and durability of this sheller, no farmer who has occasion to use shelled corn can be without one. It is an indispensable farm tool, if time and money are a consideration. Weight, 10 lbs.

4941—Each, \$1.60.

4942—Butting and Tipping Attachment. Weight, 1 pound. 25c extra.

4943—Pop Corn Attachment. Weight, 1 pound. 15c extra.

PRICES ON THIS PAGE ARE F. O. B. LA CROSSE UNLESS OTHERWISE NOTED

THE VEGETABLE SLICER AND CABBAGE CUTTER

5187—Every housewife needs a vegetable slicer. This is the best obtainable. It is strongly constructed and with ordinary care should last a lifetime. Is A No. 1 for slicing cabbage, apples, carrots, cucumbers, radishes, etc. Five slices are cut with every stroke of the hand. Price, 95c, 3 for \$2.75, postpaid.

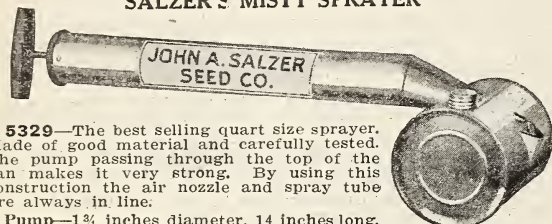

SALZER'S CONTINUOUS SPRAYER

5321—The most practical Continuous Sprayer made. All working parts are of brass—two nozzle tips, one straight and one upshoot. The siphon tube and ball check valve are removable for cleaning, repairing, etc.

Pump—1½ inches diameter, 14 inches long.
Tank—4 inches diameter, 4½ inches long. Holds 1 quart. Length over all 18 inches. Weight, 1½ lbs. Price by express, 85c.

SALZER'S MISTY SPRAYER

5329—The best selling quart size sprayer. Made of good material and carefully tested. The pump passing through the top of the can makes it very strong. By using this construction the air nozzle and spray tube are always in line.

Pump—1½ inches diameter, 14 inches long.

Tank—4 inches diameter, 4½ inches long. Lock sealed, no solder. Capacity one full quart. Length over all 21 inches. Weight, 1½ lbs. Price, 55c each by express.

LENOX IMPROVED SPRAYER

For Indoor Plants

5307—Spraying under the leaves kills the insects, removes the dust and keeps them healthy. Buy one and keep your plants clean. Weight, ½ lb. Price, 70c. Extra bulbs, 35c each, postpaid.

SULPHUR TOBACCO SOAP

Make Tobacco soap suds and spray. Your plants will surprise you. Makes house plants bloom. Let your wife see this. Price of 3 oz., 15c; 8 oz. cake, 30c, postpaid.

SALZER'S POWDER GUN

5236—This Dust Sprayer is used throughout the entire United States for dusting Paris Green and all insecticides in their dry state. It has hardwood head block and handles, basswood sides, fine grade of leather for the bellows. By unscrewing the funnel the powder is put directly inside of Powder Gun and is kept constantly agitated by the action of the bellows, insuring a uniform discharge with each operation. Weight, 1½ lbs. Price, by express, \$1.75.

RUBBER BULB SPRINKLER

5309—For house use this is a very convenient, most sensible, easiest and handiest sprayer you can get. So simple it cannot possibly get out of order. It does its work wonderfully effective. When once used you will wonder how you got along without it. Indispensable for sprinkling plants, washing, etc. Each, \$1.50, postpaid.

LAWN MOWER SHARPENER COMPOUND

5699—Order a 50-cent can of Clover Mower Sharpening Compound, and sharpen your mower every time you use it. When applied to the cutting edges of a mower it will grind them and make a perfect job of it. Any boy, girl, man or woman can sharpen a mower with this Compound. Instructions with each can. Price, each, 55c, postpaid.

POULTRY SUPPLIES

5067—Egg Setting Shipping Box. Holds 15 eggs. Each, 35c; 6 for \$1.80, postpaid.
5098—Grit and Shell Box. Easily cleaned and filled. Shipping weight, 2½ lbs. Each, \$1.25, not prepaid.
5041—Farmer's Egg Carrier. Holds 12 dozen eggs. Shipping weight, 8 lbs. Each, \$1.50, not prepaid.
5076—Sanitary Fountain or Feeder. Feeds water or grain. Fine for chicks. Does not include jar. Each, 20c, postpaid.
5077—Galvanized Drinking Fountain. Each, 1 qt., 65c; 2 qt., 80c; 4 qt., 1.00, postpaid.
5171—Champion Leg Bands. State poultry breed when ordering. 25 for 30c; 50 for 45c; 100 for 75c, postpaid.
4811—Poultry Marking Punch. Each, 50c, postpaid.
4810—Powder Gun. For applying lice powder. Each, 15c, postpaid.

IMPROVED CLIPPER CLEANER

A perfect Clover, Timothy, Grain, Wheat, Oats, Rye, Barley and Seed Cleaner. A complete set of 12 screens with each mill for cleaning grain, seed, beans, peas, etc. A perfect corn grader. Can be run as power machine; f. o. b. Michigan. Every farm should have one.

4902—No. 1B Capacity, wheat and other grain, 20 bu. per hour; clover, and other seed, 10 bu. per hour. Shipping weight, 185 lbs. Length, 4 ft. 8 in.; width, 2 ft. 2 in.; height, 3 ft. 8 in. Price, \$35.00. F. O. B., Michigan.

4903—No. 2B Capacity, wheat and other grains, 25 bu. per hour; clover and other seeds, 15 bu. per hour. Price, \$41.50. F. O. B. Michigan. Circular sent upon request.

SALZER'S PERFECTION SPRAYER

The Perfection Sprayer has a tank made like a steam boiler. The all-riveted seams give the necessary strength for developing a high pressure, which is absolutely essential for good results. The all-brass pump is placed inside the tank and is easily removed.

Pump—1½ inches diameter, 15 inches long, seamless brass tubing. The plunger is equipped with special plunger leathers. The valve is brass.

The Discharge Hose is attached to the discharge tube which extends to the bottom of the tank and curves to fit the natural bend of the hose.

Tank—7½ inches diameter, 20 inches long; capacity 4 gallons. Made of first quality galvanized sheets or all-brass as ordered.

Package—One in a heavy carton; shipping weight ten pounds.

5330—Galvanized Sprayer. Price, each, by express, \$6.50.

5331—Brass Sprayer. Price, each by express, \$9.00.

Extra Attachments

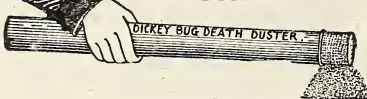

Extension pipe, brass, 2 ft. length. As many as three can be used for reaching trees. Weight, 1 lb. Price, for 2 ft. length, by express, 65c each.

Two-row attachment with 2 nozzles, arranged to cover two rows at one operation. Weight, 1 lb. Price, by express, \$2.00.

STEEL GARDEN TROWEL

5338—Made of fine cold rolled steel. Bright blade with malleable iron shank firmly riveted. Blade will not pull off the shank. Six-inch blade. Each, 20c, postpaid.

DICKEY BUG DEATH DUSTER

4880—To apply Bug Death in dry form. Weight, 1½ lbs. Each, 60c, postpaid.

SALZER'S WHITEWASH SPRAYER

5318—Constructed of heavy galvanized iron, nicely painted. Has brass tops and bottoms, three ft. hose, one ft. brass extension rod and brass nozzle, giving two different sizes of spray; also has a steel foot rest. Used for spraying trees, vegetables, washing wagons, windows, whitewashing, etc. Will throw a stream 35 ft. high. Weight, 5 lbs. Price, by express, \$2.30.

THE LEVIN PRUNER

5271—One of the best tools out; cuts ¾ in. dry oak; weight, 7½ oz. Each, \$1.15, postpaid.

EXCELSIOR HAND WEEDER

5358—Beyond doubt one of the handiest tools for the garden. Particularly useful for scuffling weeds. Price, 25c, postpaid.

RAIN KING SPRINKLER

5900—A new type of sprinkler, throwing a spray any distance up to 80 feet. The arms are adjustable, so you can sprinkle your lawn and flower-bed at the same time with heavy stream or coarse spray. Sprinkles in opposite directions or at right angles. Each, \$3.85, postpaid.

CARNICAL SPRINKLER

5902—A low priced but good and efficient sprinkler. Will last a life time. Sprinkles an area 20 feet in diameter. Finished in black enamel. Each, 65c, postpaid.

DAISY NOZZLE

5906—Most efficient nozzle made. Throws very fine spray or a heavy stream. Each, 95c, postpaid.

LOCKED PLANT BANDS

The simplest way to handle plants for transplanting is to grow them in our Ready-To-Use Plant Bands. They come already folded, and all you have to do is to open them, fill with soil and then plant. These bands are economical, they make an ideal worm guard; in transplanting into the field simply put the band and all into the ground, thus preventing exposing the roots to the air, which always sets the plant back. By using these it is even possible to transplant sweet corn, cucumbers, squash, melons, beans, etc. Plants started in these bands and set in the field, never know they have been moved.

5201—Price, postpaid: 2x2x2½ in. deep, 55c per 100; \$1.30 per 250; \$2.35 per 500.

KEENO SHARPENER

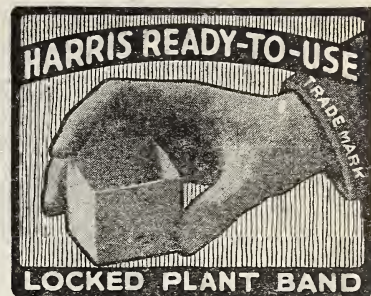

5911—Any one can sharpen knives easily, quickly, and perfectly. Just the thing for your kitchen. Simply place knife between the two sets of wheels and draw towards you. Each, \$1.10, postpaid.

HOSE ATTACHMENT

5908—With this attachment inserted into the ground, the nozzle need not be held and it can be set at any angle. Working parts made of brass and will not rust. See illustration at left. Each, 75c, postpaid.

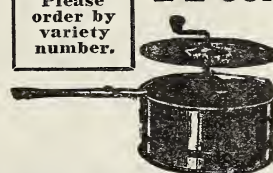

5359—It fits the hand so comfortably that the fingers are entirely free for use wherever necessary. Price 20c, postpaid.

NEPONSET PAPER POTS

5916—Paper pots last almost indefinitely, hold moisture better and are much less expensive than clay pots. These paper pots are made from a tough, lasting, and thoroughly water-proof paper, and may be used over and over again. They can be used in every way that earthenware pots can be used. We can furnish them in 2½, 3 and 4 inch sizes. Prices: 2½ inch and 3 inch size, 12 for 25c; 25 for 45c; 50 for 75c, postpaid. 4 inch size, 12 for 35c; 25 for 65c; 50 for \$1.15, postpaid.

E Z CORN POPPER

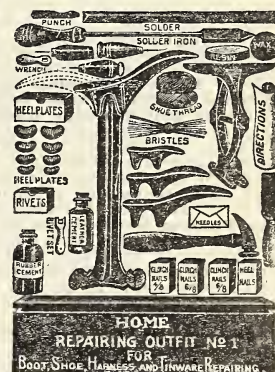

Well made and will last a life time. Each, \$1.90, postpaid.

5912—A new style popper that is so simple a child can operate it. Will pop corn with or without butter and is easy to keep clean, uses less heat and does not burn corn.

Write for prices on other repair parts.

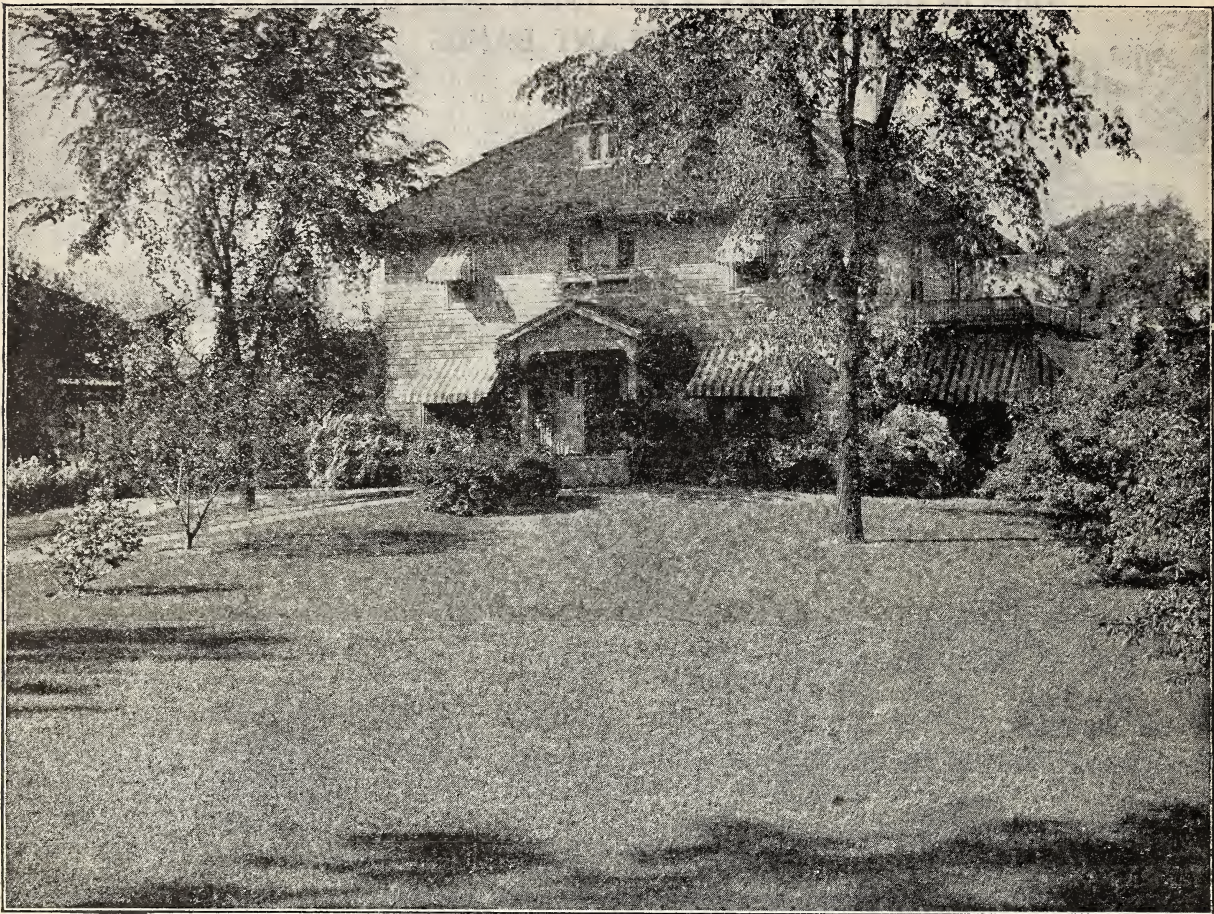

RAT CORN—Kill Your Rats, Mice and Gophers

5433—Kills rats, mice, gophers and ground squirrels. It mummifies them. No matter where they die they simply dry up and will positively not smell. Rat Corn is not dangerous to handle, and is harmless to human beings and all domestic animals. Can leave it around anywhere without fear. One pair of rats will produce 900,000 rats in five years if all survive. Kill them. Rat Corn will do it. It also kills mice, ground squirrels and gophers. Complete booklet in each can "How to Destroy Rats."

Price: Small size, 30c; medium size, 55c; large size, \$1.10, postpaid.

A La Crosse Lawn Five Weeks After Sowing Salzer's Radium Lawn Grass Seed

SALZER'S RADIUM LAWN GRASS SEED

It is the easiest thing in the world to grow a beautiful lawn. How often in our own city, as well as in other towns, do we find people spending from \$10.00 to \$25.00 sodding a lot, when 50c to \$1.00 worth of Lawn Grass Seed would do the work, would do it better and give a thicker swath and a greater growth than any sod you can find and put on anywhere. **There is nothing that gives quicker growth and a thicker sod than Salzer's Radium Lawn Grass Mixture. It produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, elastic turf, and is often ready for mowing four weeks from sowing.** This Lawn Grass is composed of a combination of various native and foreign, fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained from spring to winter, year after year, and without burning brown in summer.

Mrs. Wayne E. Stevens, 808 Main St., Alamosa, Colo., writes, "The Radium Lawn Grass Seed I received last spring is all you recommend it to be and even more."

Mrs. Charles N. Wright, 132 Prospect St., Jacksonville, Ill., writes, "I succeeded in getting a splendid stand with your Radium Lawn Grass Seed this spring."

For a successful lawn, your soil should be rich, and carefully pulverized, smoothed and leveled. If your soil requires it, fertilize it with well rotted manure, or other fertilizer. Then plant vigorous, dependable lawn grass seed early enough to allow the grass to become well established before being subjected to hot weather, or to the direct rays of the hot summer sun. In spring, sow as early as possible and before a rain, and in fall, sow before the autumn rains. Sow about 1 pound to 300 square feet; about 8 lbs. to a 50-foot lot. For renewing old lawns, about one-half as much. One pound is about 1½ quarts.

4526—RADIUM: ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.35, postpaid. Not prepaid: 10 lbs. or more, at 40c per lb.

4525—SUPERIOR: ½ lb., 25c; 1 lb., 45c; 5 lbs., \$2.10, postpaid. Not prepaid: 10 lbs. or more, at 38c per lb.

SALZER'S SPECIAL LAWN GRASS MIXTURE

If for any reason you have been unable to get a good lawn, you should be able to obtain one by letting us give it our individual attention and making a special mixture to suit your needs. While for almost all general purposes, our grasses are unusually successful, yet extreme conditions require special care. Write use whether you have a new or old lawn, whether it is shady or sunny, level or sloping, heavy or light rainfalls, mild or severe winters, whether fertilized, etc., and kind of soil. Send us a sample of your soil, if you wish. We can then send you a mixture which should give you fine results and enable you to get a good lawn.

4529—½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.65, postpaid. Not prepaid: 10 lbs. or more, at 47c per lb.

SALZER'S SHADY PLACE GRASS SEED

We have carefully prepared this combination of grasses for sowing in shady parts of your lawn, or under large trees, etc., where the ordinary grasses will not give the best results. It will practically overcome any difficulties you may have had with shaded spots.

4527—½ lb., 30c; 1 lb., 55c; 5 lbs., \$2.45, postpaid. Not prepaid: 10 lbs. or more, at 44c per lb.

Have bought seeds of you for 15 years and have always been satisfied.—Mrs. Catherine Scriber, Mellinville, N. Y.

Salzer's Grass Seeds for Golf Courses are used by the leading clubs.

SALZER'S RE-CLEANED GOLF GRASS MIXTURES

Write for special prices in larger quantities than quoted.

We have furnished grass seeds for the majority of the golf courses throughout the entire central section of the country, as well as for many of the leading clubs in the East and West. Exhaustive tests of the many different varieties of grasses on our great Cliffwood Farms, have given us a thorough knowledge for this class of work, which we gladly place at the disposal of Greens Committees, etc., without charge. We cordially invite Clubs to communicate with us as to their needs. It is most important that re-cleaned seeds be sown—the increased cost is more than offset by the saving in the club's bill for weeding. We know that Salzer's Re-Cleaned Seeds will give you satisfaction.

SALZER'S PUTTING-GREEN MIXTURE

In almost every case, mixtures should be sown instead of one variety. You will invariably obtain a good turf more quickly, it will present a more attractive appearance from early spring until late fall, and you will have a more resistant and durable turf, as the roots draw their nourishment from different depths in the soil. Our Putting-Green Mixture is the best that knowledge and skill can produce, regardless of price. Sow 75 to 100 lbs. for a 90x90 ft. green; 25 lbs. for renovating a worn turf.

4528—Lb., 70c; 5 lbs., \$3.40, postpaid. Not prepaid: 10 lbs., \$6.25; 25 lbs., \$15.00; 100 lbs., \$57.50.

SALZER'S FAIR-WAY MIXTURE

It is essential that the proper grasses be sown on a fairway; usually they receive far less attention than the putting-greens. Too frequently, mixtures are used that will not make a proper golf sod. Salzer's Fair-Way Mixture is composed of grass seeds that will produce well-knit turf, springy, elastic, that will be a pleasure to walk upon and that will require little attention. When ordering, please state if your soil is dry or moist, clayey or sandy, etc. Sow about 250 lbs. to the acre; for renovating, 125 lbs.

4532—Lb., 55c; 5 lbs., \$2.65, postpaid. Not prepaid: 10 lbs., \$4.75; 25 lbs., \$11.25; 100 lbs., \$42.75.

DWARF WHITE DUTCH CLOVER FOR LAWNS

While we do not put White Clover in our Lawn Grass Seed, we have many requests for it and recommend one ounce to each pound of lawn seed. Our Special Lawn Mixture always contains the right percentage of Dutch Clover.

4249—Radium, per oz., 10c; ¼ lb., 30c; lb., 85c; 2 lbs., \$1.60; 5 lbs., \$3.75, postpaid. Not prepaid: 10 lbs., \$6.75. See current price list for larger quantities.

SALZER'S LAWN FERTILIZER

If wanted by parcel post, please add postage as per rates on Page 6.

Lawn Grass is a voracious feeder, and must have plant food in order to hold its beautiful, dark green color and velvety appearance. The ordinary stable manure contains the desirable chemical plant foods. However, it has serious drawbacks, in being hard to handle, ill-looking, decidedly odorous, and, not the least of all, it contains weed seeds. All of these objections are obviated by the use of our lawn fertilizer. If the lawn is in fair condition, it is only necessary to rake off the dead leaves and grass in the early spring and scatter broadcast over its surface some of our Lawn Fertilizer, with a little of our Radium Lawn Seed over the thin spots, and the work is done.

5600—Odorless Lawn Fertilizer. Promotes a vigorous, healthy growth, gives the grass a rich, dark appearance. More effective than stable manure. Apply before a rain, preferably in spring, using 25 lbs. per 1,000 square feet or about 100 lbs. for the ordinary city lot. Or can be used at the time the seed is planted. 5 lbs., 35c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.75; 125 lbs., \$3.75, not prepaid.

5508—Bone Meal Fertilizer. Valuable enricher of the soil. Rich in phosphate. Apply about 25 lbs. per 1,000 square feet, either as a top dressing or working in when seed is planted. 5 lbs., 35c; 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.75; 125 lbs., \$3.75, not prepaid.

5560—Ford Ammonium Sulphate. Highly concentrated. Use 2 to 3 pounds (not more) per 1,000 square feet, applying on dry grass, and then sprinkling, to wash it off and into the soil. The increased growth will astonish you. For new lawns, work into soil when seeding. Do not apply on wet grass or wet foliage, or burning will result. Do not apply during a hot, dry spell of weather. Lb., 25c; 3 lbs., 65c, postpaid. Not prepaid: 5 lbs., 80c; 10 lbs., \$1.25; 25 lbs., \$2.25; 50 lbs., \$3.50.

We have been delighted with everything we ordered from your firm.—Mrs. Chas. E. Green, 702 S. Olive St., Mexico, Mo.

Prices are F. O. B. La Crosse
Except Where Noted.

INSECTICIDES AND FUNGICIDES

Notice: Items Marked
(*) Are Not Mailable

5428-BUG DEATH. Kills all bugs and worms that chew leaves and foliage; it is non-poisonous, containing no Arsenic or Paris Green. May be used dry or in solution. Used extensively for cabbage and tomato worms, potato and cucumber bugs, etc. It is applied with a duster or powder gun, at the rate of about 12 pounds per acre. **Lb., 30c; 3 lbs., 80c; 5 lbs., \$1.10, postpaid.**

4881-BUG DEATH ACRE-AN-HOUR SIFTER. For farm use to apply above. Weight, 2 lbs., Price, 85c, postpaid.

***5400-ARSENATE OF LEAD POWDER.** Its principal advantage lies in the fact that it does not injure tender foliage. Use 4 to 6 pounds of Arsenate to 100 gallons of water. **Not prepaid: Lb., 50c; 5 lbs., \$2.00; 10 lbs., \$3.50; 25 lbs., \$8.25.**

***5418-BORDEAUX MIXTURE.** Dry Powder. Many people prefer this Dry Bordeaux because it can be readily applied in dust form and it is as effective as the liquid in preventing fungous growth. It can also be used mixed with water at the rate of 1 pound to 5 gallons. **Price: Lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.**

5484-TOBACCO DUST. For green and black aphid, fleas, beetles, etc. **Lb., 25c; 5 lbs., 85c; 10 lbs., \$1.25, postpaid.**

***5456-DRY LIME-SULFUR.** The best remedy for San Jose and other scale insects on trees and shrubs. Use 1 pound to 15 gallons of water. Full directions with each package. **Price: 5 lbs., \$1.35; 10 lbs., \$2.25; 25 lbs., \$4.75; 50 lbs., \$8.95.**

***5463-PARIS GREEN.** It is quick acting, powerful and sure in its deadly work. Will destroy all bugs and worms in a few hours. The Paris Green contains not less than 50% Arsenious Oxide, combined with copper, and not more than 3 1/2% water soluble arsenic. **Price: 1/2 lb. pkg., 30c; 1 lb., 55c; 5 lb. pkg., \$2.50; 14 lb. pkg., \$6.65; Kite (56 lbs.), \$25.00; 100 lb. keg, \$43.50.**

5480-SULPHUR TOBACCO SOAP. Unsurpassed for quickly exterminating all insect life on plants or flowers in and out of doors. Excellent for rose bushes, shrubs, etc. **Price: 3 oz. cake, 15c; 8 oz. cake, 30c, postpaid.**

***5450-HELLEBORE POWDERED WHITE.** One of the best insecticides for general garden use. Destroys slugs, caterpillars, rose bugs, cut worms, etc. Safe to use when fruit, or vegetables, are nearly ripe. Can be used as a powder or dissolved, 1 ounce in 3 gallons of water. **Price: Lb., 50c; 5 lbs., \$2.35; 10 lbs., \$4.50.**

***5453-ARSENATE OF CALCIUM.** Rapidly replacing Paris Green for potato bugs and other uses to which Paris Green is put. Contains the maximum quantity of 43 per cent arsenic oxide. Stays well in suspension in the sprayer, insuring an even and uniform distribution on the foliage.

Price: Lb., 45c; 5 lbs., \$1.85; 10 lbs., \$3.35; 25 lbs., \$7.25; 50 lbs., \$12.95; 100 lbs., \$24.90.

5472-SLUG SHOT. A non-poisonous powder and a very popular insecticide; it requires no further mixing or preparation, easily distributed either by duster or in water by spraying. Very effective in destroying potato bugs and beetles, green and black flies, slugs, worms, caterpillars, etc. **1 lb. carton, with perforated top, 30c; 5 lb. bag, 95c, postpaid. Not prepaid: 10 lb. bag, \$1.35; 25 lbs., \$2.75.**

5476-IN TIN CANISTER WITH PERFORATED SCREW TOP. Readily refilled and indestructible. Each, 75c, postpaid.

5434-RED WING INSECT POWDER. This insect powder is of national repute and is put up in boxes that can be used as a powder gun; with a slight pressure from the hand sprays evenly and proper. It is harmless to humans and animals. Will destroy roaches, flies, bed bugs, moths, mosquitoes, lice, chicken lice, ants, red ants, fleas and practically all small bugs. **Price: Small size, 15c each; medium size, 25c each, postpaid.**
